Quality assessment is the overall system of activities whose purpose is to provide assurance that the overall quality control job is being done effectively. It involves a continuing evaluation of the products produced and the performance of the production system. Quality assessment describes those techniques used to assess the quality of the measurement process and the resulting data. The establishment of a system of control charts is considered the best way to monitor the performance of a measurement system. Control charts are plots of multiple data points from the same or similar samples (or processes) versus time. The relative variability of repetitive data can thus be visualized. These charts can also be used with reference materials, spiked samples, and surrogates as a means of assessing the accuracy of measurements.

Quality assurance begins with the establishment of data quality objectives and extends throughout the entire measurement process. Each laboratory should have a quality assurance program and, for each study, a quality assurance project plan (QAPjP). This plan should be complete and detailed and its language clear and unambiguous to preclude confusion and misunderstanding (U.S. EPA, 1983). The contents of the plan should include the following:

1. Statement of the data quality objectives for the monitoring effort.
2. Full description of the chemical to be analyzed.
3. Review of the analytical method selected, following the procedures discussed in section 2.8.
4. Description of the steps taken to verify and validate the method.
5. Verification and validation results.
6. Description and source of reference standards.
7. Field study design with rationale.
8. Quality assurance and quality control used throughout the study.
9. List of equipment and materials to be used in the field.
10. Description of the system used to ensure sample preservation and handling, traceability of instrumentation, samples, and data.

Examples of the last quality assurance and quality control procedure listed above include the following:

Sample Preservation and Handling—When immediate analysis of the collected sample is not possible, precautions should be taken so that the sample integrity is not altered. The assessor should store the sample in a manner that guarantees that the parameters to be measured are not altered. The container material should not interfere with the analysis of the specific parameters, and the holding times specified for the analytical procedure should not be violated unless it can be demonstrated that significant changes have not occurred.

Traceability of Instrumentation—All collection and measurement instrumentation should have a unique identification number. Maintenance, calibration, and use logs should be maintained.

Traceability of Samples—All samples should have a unique identification number that is traceable to information on the field site, monitoring location, and collection devices. An efficient way to trace samples is to employ a bar code labeling system. Under this system, samples are labeled with adhesive bar code labels to identify the samples and trace them through the sampling and analytical procedures.

Traceability of Data—Data should be documented and filed to allow complete reconstruction from initial field records to data archiving.

Audits should also be a feature of all quality assurance programs. A systems audit should be made at appropriate intervals to ensure that all aspects of the quality assurance program are operative. Performance audits in which a laboratory is evaluated based on the results of analyses of blind standard samples also provide valuable quality assessment information.

2.8. Selection and Validation of Analytical Methods

Selecting the most suitable method of analysis involves developing a chemical profile of the chemical of interest. This profile should identify the physical and chemical properties of the chemical, such as vapor pressure, water solubility, octanol-water partition coefficient, boiling and melting points, molecular weight, and other properties that help characterize the chemical.

There are several major steps in the method selection and validation process:

Step 1. Determination of Method Requirements

The method requirements are normally established by the assessor who needs environmental measurement data. The

requirements identify the substances of interest (analytes), define the matrices to be examined, and specify (quantitatively) the performance of the method and the reliability, confidence, and quality of the measurements needed.

Step 2. Method Selection and Testing

Existing methods should be reviewed to identify candidate methods that may be adequate to meet the needs of the assessor. The method detection limit (MDL), which is the lowest amount detectable with a stated level of confidence, is of particular importance for selection of an analytical method and must be considered in light of the needs of the risk assessment.

Step 3. Single Laboratory Testing

The candidate method, if new, is subjected to laboratory and field testing, as necessary, to characterize its performance adequately with respect to the requirements established in Step 1.

Step 4. Comparability Testing

An evaluation similar to that described for Step 3 is conducted by other laboratories participating in the study to verify the method write-up and to confirm the results and conclusions of the method characterization conducted in the Single Laboratory Testing.

Step 5. Final Method Description

The method description is revised to incorporate changes or clarifications determined to be necessary based on the testing in Steps 3 and 4.

2.9 Background Level

At some sites, background chemical contamination is significant and should be accounted for. Background is defined as chemical contamination due to a source other than the site under investigation. Background can be either natural or from man-made sources. The exposure assessor should try to define local background conditions of concern by observing nearby locations clearly unaffected by the site under investigation.

When differences between a background (control site) and a target site are to be determined experimentally, the sampling of the control site must be done with the same detail and care as for that of the target. Otherwise, the uncertainty of any difference can be limited by the data for the control.

3. Guidelines for Using Measurements in Exposure Assessments

3.1. Use of Measurement Data in Making Inferences for Exposure Assessments

As discussed in the previous two chapters, the primary purpose for making measurements and using data related to exposure assessments is to make inferences from the measurements (samples) to the whole. In predictive exposure assessments, the whole is usually a medium of interest such as outdoor air, drinking water, a consumer product, etc. Once characterization of the medium has been made (and this may include changes over time), a matched link to individuals or populations being assessed must be made, usually via use of exposure scenarios. In direct measurement of exposure, sampling of one individual's exposure must be related to the exporsures of a collection of individuals (the whole). This relationship may also include inferences about different times and locations from those in the sample (e.g., different cities, winter vs. summer, present vs. past). In reconstructive exposure assessment, the whole is usually the total absorbed dose over some period of the past, which is reconstructed from samples of various tissues, fluids, or other biomarkers; individual absorbed doses might then be used to make inferences about collections of individuals.

In all these cases, the exposure assessor must have a clear picture of the relationship between the sample and the whole. It is obvious that the sampling being done for exposure assessments does not always try to characterize the same thing as "the whole." For example, samples of an environmental medium such as surface water, which are useful in characterizing the medium itself, are not necessarily immediately useful for characterizing exposures from surface water. But the characterization of the medium (over space and time) can be used, along with the location and activities of individuals or populations, to estimate exposures. Because the samples taken for exposure assessment differ in what they are trying to characterize, a sample taken as a direct measure of exposure, for example, is qualitatively different from a sample of an environmental medium, and these are qualitatively different from a tissue or body fluid sample.

The concept that different measurements, all taken under the general category of "exposure-related measurements," cannot all be used in the same way is critical to using these data in an exposure assessment. It is the exposure assessor's primary responsibility to understand, explain, and justify the relationship between the sample data and the inferences or conclusions being drawn from the data in the assessment. In doing so, the assessor must evaluate data relevance, adequacy, and uncertainty. These topics are covered in sections 3.2, 3.3, and 3.4, respectively.

Inferences are generalizations that actually go beyond the information contained in the set of data. Inferences involve at least some subjectivity, since it is impossible to eliminate all elements of subjectivity no matter how objectively data are collected. The credibility of an inference is often related to the method used to make it and the amount of supporting data it is based on. A guess, for instance, is one type of inference, although an assessor or decision-maker is likely to place less confidence in this method as a predictor of real-world events or conditions than many other methods. Anecdotal information, that is, stories of the form "once I knew a situation where * * *", are somewhat better than guesses as predictors, but the assessor has only a limited knowledge of where in the distribution of real-world situations this anecdote is being drawn from. Professional judgment is usually a better predictor that either guesses or anecdotes, since it presupposes that a (sometimes substantial) data base of experience (i.e., a collection of anecdotes) is being used, even if this is not a formal data base.

Statistical inferences also are generalizations that actually go beyond the data set. Statistical inferences may take any of several forms (see any statistics textbook for examples), but unlike the types of inferences mentioned above, a statistical inference will usually state not only the inference, but a measure of how good the inference is. For that reason, statistical inferences (including inferences involving judgment; see section 3.3.3) are often preferable to guesses, anecdotes, or professional judgment alone in understanding, explaining, and justifying the inferences made in linking the samples with the characterization of the whole, provided the data are shown to be relevant and adequate.

3.2. Relevance of Measurement Data for the Intended Exposure Assessment

Since all of the approaches to exposure assessment involve exposure measurements to some degree [1], it is important that the proper "match" be made between the measurement data and the type of exposure assessment. As discussed in the previous chapter, the exposure assessment approach will often dictate the type of measurements needed if new data are being generated. More often, however, the exposure assessor has at least some data that

[1] Of course, it is always possible to do a predictive assessment based solely on models and assumptions, without a subsequent reality check, but even these assessments use models and model inputs which may ultimately be based on measurement in some form.

BEST COPY AVAILABLE

were collected from previous studies, either for exposure assessment purposes or (more often) for other purposes. In determining relevance of data for the intended exposure assessment (adequacy of the data is covered in section 3.3), the assessor must consider not only the type of data and what it might logically characterize, but also how this characterization relates to risk.

There are many types of measurement data that an assessor can collect or evaluate for an exposure study. The measurements themselves are samples, and the assessor must have a clear idea of what kinds of inferences may be made for each type of measurements and what assumptions need to be made to make those inferences. Table 3–1 gives some examples of different types of measurements, what these samples are usually used to characterize, and what additional information must be known before the data, inferences, and characterizations can be used in an assessment.

As Table 3–1 illustrates, different types of measurements may be relevant to characterizing a variety of exposure-related media and parameters. (Nevertheless, just because certain measurements may be used to characterize these media or parameters is not a guarantee that in a particular assessment the medium or parameter can be adequately characterized with the data at hand (see section 3.3).) In addition to determining relevance to characterizing media or parameters, the assessor must also determine the relevance of these media or parameters to the exposure assessment.

TABLE 3–1.—EXAMPLES OF TYPES OF MEASUREMENTS TO CHARACTERIZE EXPOSURE-RELATED MEDIA AND PARAMETERS

Type of measurement (sample)	Usually attempts to characterize (whole)	Examples	Typical information needed to characterize exposure
A. *Predictive Assessments:*			
1. Fixed Location Monitoring	Environmental medium; samples used to establish long-term indications of media quality and trends over time.	NASQAN,[1] water quality networks, air quality networks.	Population location and activities relative to monitoring locations; fate of pollutants over distance between monitoring and point of exposure; time variation of pollutant concentration at point of exposure.
2. Short-term Media Monitoring (including indoor air).	Environmental or ambient medium; samples used to establish a "snapshot" of quality of medium over relatively short time.	Special studies of environmental media, indoor air.	Population location and activities (this is critical since it must be closely matched to variations in concentrations due to short period of study); fate of pollutants between measurement point and point of exposure; time variation of pollutant concentration at point of exposure.
3. Source Monitoring of Facilities.	Release rates to the environment from sources (facilities) (often given in terms of relationship between release amounts and various operating parameters of facility).	Stack sampling, effluent sampling, leachate sampling from landfills, incinerator ash sampling, fugitive emissions sampling, pollution control device sampling.	Fate of pollutants from point of entry into the environment to point of exposure; population location and activities; time variation of release.
4. Food Samples	Concentrations of contaminants in food supply.	FDA Total Diet Study Program,[2] market basket studies, shelf studies.	Dietary habits of various age/sex/cultural groups. Relationship between food items sampled and particular (geographic, ethic, demographic) groups studied; relationships between concentrations in uncooked vs. prepared food.
5. Drinking Water Samples	Drinking water supply	Ground Water Supply Survey,[3] Community Water Supply Survey,[4] tap water.	Fate and distribution of pollutant from point of sample to point of consumption. Population served by specific facilities and consumption rates. For exposure due to other uses, e.g., cooking and showering, need to know activity patterns and volatilization rates.
6. Consumer Products	Concentration levels of various products.	Shelf surveys, e.g., solvent concentration in household cleaners [5].	Establish use patterns and/or market share of particular product, individual exposure at various usage levels, extent of passive exposure.
7. Breathing Zone Measurements (Industrial Studies).	Exposure to chemicals in an industrial setting.	Industrial hygiene studies, occupational surveys.	Fate of pollutants between monitoring and point of exposures, location, activities, time spent relative to monitoring locations. Protective measures/avoidance.
8. Microenvironmental Studies.	Ambient medium in a defined area, e.g., kitchen, automobile interior, office setting, parking lot.	Special studies of indoor air, radon measurements, office building studies.	Activities of study populations relative to monitoring locations and time exposed.
9. Surface soil sample	Soil available for contact	Soil samples at contaminated sites.	Fate of pollution on/in soil; activities of potentially exposed populations.
10. Soil Core	Soil including pollution available for ground water contamination; can be an indication of quality and trends over time.	Soil sampling at hazardous waste sites.	Fate of substance in soil, speciation and bioavailability, and contact and ingestion rates as a function of activity patterns and age.
11. Fish Tissue	Extent of insult to ecological population, and/or extent of contamination of edible fish tissue.	National Shellfish Survey,[6] special studies on local fish populations.	For ecological assessments: Relationship of samples to fish population (then see reconstructive assessment below). For humans: relationship of samples to food supply for individuals or population of interest, consumption habits, preparation habits.
B. *Direct Assessments:*			
1. Air Pump/Particulates and Vapors ("split sample" air).	Exposure of an individual or population via the air medium.	TEAM study,[7] carbon monoxide study [8].	Direct measure of individual exposure during time sampled; to characterize exposure to population, relationship between individuals and population must be established as well as relationships between times sampled and other times for the same individuals, and relations between sampled individuals and other populations. In order to make these links, activities of the sampled individuals compared to populations characterized are needed in some.

TABLE 3-1.—EXAMPLES OF TYPES OF MEASUREMENTS TO CHARACTERIZE EXPOSURE-RELATED MEDIA AND PARAMETERS—Continued

Type of measurement (sample)	Usually attempts to characterize (whole)	Examples	Typical information needed to characterize exposure
2. Split Sample Food/Split Sample Drinking Water.	Exposures of an individual or population via ingestion.	TEAM study [7]	Same as above.
3. Skin Patch Samples	Dermal exposure of an individual or population.	Pesticide Applicator Survey [8]	Same as above, skin penetration.
C. *Reconstructive Assessments:*			
1. Breath	Total absorbed dose for individuals or population (usually indicative of relatively recent exposures).	Measurement of VOCs, alcohol (usually limited to volatile compounds).	(1) Relationship between individuals and population; exposure history (i.e., steady-state or not) pharmacokinetics (chemical half-life), possible storage reservoirs within the body. (2) Relationship between breath content and body burden.
2. Blood	Total absorbed dose for individuals or population (usually indicative of relatively recent exposures).	Lead studies, pesticides, heavy metals (usually best for soluble compounds, although blood lipid analysis may reveal lipophilic compounds).	(1) Same as above. (2) Relationship between blood content and body burden.
3. Adipose	Total absorbed dose for individuals or population (usually indicative of long-term averages).	NHATS,[10] dioxin studies, PCBs (usually limited to lipophilic compounds).	(1) Same as above. (2) Relationship between adipose content and body burden.
4. Nails, Hair	Total absorbed dose for individuals or population (usually indicative of past exposure in weeks to months range; can sometimes be used to evaluate exposure patterns).	Heavy metals studies (usually limited to metals).	(1) Same as above. (2) Relationship between nails, hair content, and body burden.
5. Urine	Total absorbed dose for individuals or population (usually indicative of elimination rates), may vary in time since exposure depending on chemical.	PERC study,[11] TCE study [12]	(1) Same as above. (2) Relationship between urine content and body burden.

For example, if a chemical shows adverse effects through inhalation, but ingestion and dermal studies show no adverse effects, measurement data to characterize ingestion and dermal routes of exposure may be irrelevant.[2] Likewise, for a substance that shows adverse effects for some forms (vapor, solid, particular valence state, etc.) but not others, the assessor must evaluate and explain why the data used match with the chemical species of concern.

In addition to the general discussion of relevance above, the following sections deal with more specific issues of relevance.

3.2.1. Direct Measurement of Exposure

Direct exposure assessments always rely on measurements. Assessments using the direct measurement approach can be assessing individual exposures, exposures to groups of individuals or segements of a population (i.e., a subpopulation) of which the sampled individuals are a part. Each of these objectives of the overall exposure assessment presents different issues of relevance to using the data.

Data collected for the direct measurement approach are typically personal samples of an individual or small population sample. The data are usually chemical-specific, although samples of radiation, particulates, fibers, or other non-chemical-specific agents have been measured. The data are usually time-specific, and can be expressed in terms of a time-weighted average (TWA) (i.e., 1-hour TWA, 8-hour TWA, etc.) or a continuous curve (e.g., by using the recording carbon monoxide monitor). The data are usually location-specific, the location being wherever the individual with the personal monitor was during the period of measurement. It should be noted here that unless detailed records are kept of where the individual goes and for how long, this information may not be available to the assessor. The data are also usually a function of the specific activities of the individual during the period of measurement; this information is rarely available to the assessor in more than very broad categories, if at all.

To make the case that the direct measurement data are relevant to the exposure assessment being done, the exposure assessor must show that these factors for the data match the objective of the assessment. If there is an unknown or partial match between the data factors and the assessment objectives, the assessor must make, state, and justify assumptions that will establish a logical link. For example, if 8-hour TWA data are available, and the objectives of the assessment are to evaluate average exposure over 10 years, the 8-hour TWA data might be used if it is known (from other data, observation, etc.) that the concentrations/exposures do not vary significantly from day to day, and that

[2] A caution here; unless pharmacokinetics are reasonably well known and mechanisms of action identified, it is often very difficult to dismiss exposure routes as totally irrelevant, even if some studies show no apparent adverse effect.

the day selected for measurement is representative or typical (based on statistical considerations, etc.).

For those individuals for whom direct measurements of exposure have been made, these data may be used directly in individual exposure assessments provided the data are of adequate quality (see section 3.3), are measures of the appropriate chemical or agent, and are actually measuring exposure while it takes place. This is an unusual case in that it is one of the few times where measurement data may be used directly as exposure data. Individual direct measurement exposure assessments are usually done for the purposes of protecting the individuals, often in an occupational environment. When exposures are being compared to an action level, concern level, standard, or other benchmark, and the data are being taken to answer a yes/no question about whether exposure is above the benchmark, direct measurements properly collected are the most relevant data.

Direct measurement data are also used to characterize the exposures of a population, or a segment of a population, by making inferences from the individuals sampled to the population or population subgroup. The logical link between the individuals sampled and the entire population is considerably strengthened by statistics. If the individuals sampled were selected randomly, probabilistically, or in a manner that can be described with statistics, this link can perhaps be described quantitatively, and the exposure assessor is advised to consult a statistician to help in establishing the relevance of the data taken for individuals to the exposures of a population. It must be kept in mind that the population being characterized by the data is not necessarily the population desired for the objectives of the assessment, since the assessment may involve different times (summer, winter, etc.), different locations (all service station attendants vs. data taken for attendants in Cleveland, etc.), or different activity patterns (persons who eat fish vs. persons who do not eat fish, etc.). All of these differences between the data measured and the population for which the assessment requires characterization must be identified and logical links must be drawn between individual measurement data and population exposures before the data can be fully relevant.

3.2.2. Reconstructive Exposure Assessment

Measurement data for reconstructive exposure assessments are usually from individuals (although composite tissue samples from several individuals are sometimes used), are usually chemical-specific, and may also be location-specific, time-specific, and activity-specific. Some reconstructive exposure assessment samples will reflect exposures over the relatively recent past (e.g., exposures can be reflected in breath, blood, urine, and fecal samples after minutes-to-days), while others will be indications of exposures over a longer period of time (e.g., adipose tissue, bone, and hair samples are usually reflective of exposures that took place weeks-to-years previously). The key to linking measurements of body burden or other biomarkers to exposure assessment is pharmacokinetics (i.e., the time-dependent distribution, metabolism, transport, storage, and elimination of the agent within the organism). In addition, before these measurements can be used to reconstruct absorbed dose or exposure, information must be known on the properties of the chemical, individual characteristics (size, body fat content, etc.), and whether the exposure has been long-term, acute, intermittent, a past episode, etc.

Pharmacokinetics can also be used to establish the relevance of particular samples to the exposure assessment being considered. Because pharmacokinetics maps out where a substance is likely to go within an organism, it will indicate the relevance of various tissues or fluids as an indication of exposure. For example, for a lipid-soluble substance with a long half-life within the body (such as 2,3,7,8-TCDD), pharmacokinetic considerations would show that adipose tissue or blood fat samples may be very relevant while breath samples are irrelevant, since inside the body the chemical avoids the blood/breath elimination route and instead is stored in fat tissue.

As with the direct measurement data discussed in the preceding section, reconstructive exposure assessment usually use data from an individual, and so the inferences made from the samples will be to characterize the absorbed dose (or exposure if absorption data are available) for an individual. All of the considerations discussed previously about making inferences from individuals to populations also apply here.

3.2.3. Predictive Exposure Assessment

Use of measurement data in predictive exposure assessments can vary widely, from a speculative assessment where no measurements are used directly, to an assessment where extensive measurement data are used both to characterize the chemical and to characterize the activities of the individuals or populations assessed. Exposure assessments that use no measurement data directly have legitimate purposes in a regulatory agency, for example, where the chemical has not been manufactured yet so no measurements can be made, or in preliminary evaluations of exposure where great precision is not required.[3] However, most predictive exposure assessments use at least some measurement data.

Like the other approaches to exposure assessment, the predictive approach requires the assessor to make a logical link between the measurement data and the exposure. Because of the many different types of measurements used in predictive exposure assessment, making these links (say, from source measurements to exposures) can be complex. Using measurement data to quantify exposure is usually done using any of several forms or derivatives of a general exposure equation.

Exposure, or the contract of an agent with the exchange boundaries of an organism (i.e., skin, lungs, digestive tract, etc.), can be mathematically defined as the amount of the agent available for absorption at the exchange boundaries. Over a period of interest, T, this can be described as:

$$E = \int_{t=0}^{T} I\,dt \qquad (3\text{-}1)$$

where E is the exposure, I is the intensity of contract, and t is time. The units of E are "amount," usually a mass of a chemical, but amount can also be in terms of fibers of asbestos, radiological amounts, etc. if the dose-response relationship for which the exposure and dose information being calculated are also in these terms. For the sake of simplicity, the discussion that follows will use units of mass for E. Note that I varies over time and may even be zero for part of the period of interest from t=0 to t=T. The units of I are mass/time.

The intensity of contact, I, is a function of C, the concentration of the pollutant in the medium contacting the organism, and CR is the contact rate or extent of contact:

$$I = (C)\,(CR) \qquad (3\text{-}2)$$

[3] For example, many times a decision is needed as to which chemical to study first, or even whether to continue to study a chemical. Often these decisions involve few resource consequences and great precision is not necessary. This is not to say, however, that important decisions with large resource implications should be made based on assessments using no measurements if measurement data may make a difference in the decision.

The units of C and CR may vary, but must be compatible with each other and must lead to units of mass/time exposed for I. For example, if C is in units of M/M (e.g., mg/kg food ingested), CR is in units of M/T (e.g., kg food ingested/day). If C is in units of M/V (e.g., mg/L water ingested), CR is in units of V/T (e.g., L water ingested/day). Conversion factors may be necessary in assessing I. For example, if C is in units of V/V (e.g., ppm in air), a conversion factor to M/V (say, mg/m³ of air) would be necessary if CR is in the typical units of V/T (m³/day). For dermal exposures, if C is in units of, say, M/V of bulk material (e.g., mg/L), a conversion factor of the form (M/A)/(M/V) (say, mg available per cm² skin exposed/mg per L bulk material) yielding C in units of M/A (e.g., mg/cm²) with CR typically in A/T units (e.g., cm² skin exposed/hour).

The discrete form of equation 3–1 is:

$$E=\sum_{i=1}^{N} I_i t_i = I_1 t_1 + I_2 t_2 + \ldots + I_n t_n \qquad (3\text{–}3)$$

where t_i now becomes the duration of exposure of event i, and I_i is the intensity of contact for exposure event i. For multiple exposure events over period of interest T (using equations 3–2 and 3–3):

$$E=\sum_{i=1}^{N} I_i t_i = \sum_{i=1}^{N} (C_i)(CR_i)t_i \qquad (3\text{–}4)$$

where

$$T=\sum_{1=1}^{N} t_i \qquad (3\text{–}5)$$

for all events, and

$$ED=\sum_{i=1}^{N} t_i \qquad (3\text{–}6)$$

for events where I is not zero. ED is the duration of exposure over all events where exposure occurs, that is, where the intensity of contact, I, is not zero.

The *exposure rate* can be defined as the exposure per unit of time. Certain average exposure rates can be useful in exposure assessment. Using equations 3–4 and 3–5, if $\bar{I}_e$ is a weighted average intensity of contact over the period of interest (including those segments of time when intensity is zero):

$ER_e = \bar{I}_e = E/T \qquad (3\text{–}7)$

where ER_e is the calendar-time exposure rate. If equation 3–6 is used instead of 3–5, a similar exposure rate is derived for those times when exposure is actually occurring:

$ER_e = \bar{I}_e = E/ED \qquad (3\text{–}8)$

Note that in equations 3–4, E is the same whether or not there are zero intensity terms on the right side of the equation, but 3–7 represents a calendar-time (or clock time) exposure rate and 3–8 represents and exposure-time exposure rate. The difference is whether the exposure rate, which is an average, is averaged over a period of time where sometimes exposure is zero, or is averaged over only those periods of time when exposure is occurring. By substitution,

$ER_e = I\ ED/T \qquad (3\text{–}9)$

For cases where the contact rate, CR, is reasonably constant, and using the weighted average concentration for C, substituting equations 3–2 into 3–9 yields:

$ER_e = (C)\ (CR)\ (ED)/T \qquad (3\text{–}10)$

where ER_e is the calendar-time exposure rate for period of interest T, and ED is the time during which exposure actually occurs at average concentration C and contact rate CR. This exposure rate can be normalized to unit body weight (BW) to yield a normalized calendar-time exposure rate. A commonly-encountered special case of this is the lifetime average daily exposure (LADE), where the period of interest is the lifetime (LT):

$LADE = (C)\ (CR)\ (ED)/(LT)\ (BW \qquad (3\text{–}11)$

where, using representative units for water ingestion as an example:

LADE = lifetime average daily exposure [mg/kg/day]
C = average concentration [mg/L water ingested]
CR = contact rate [L water ingested/day]
ED = duration of time when exposure actually occurs days]
LT = lifetime [70 years converted to days]
BW = body weight (kg) (Note that this is average body weight over a lifetime and not merely the adult body weight.)

The resulting LADE is a normalized lifetime exposure rate. Another useful relationship encountered frequently is the dose equation, given in simplified form:

$D = (E)\ (AF) \qquad (3\text{–}12)$

where D is dose (units are mass), E is exposure, and AF is an absorption fraction:

AF = amount absorbed/amount available for absorption (3–13)

These equations, when used with equation 3–11, give rise to another commonly encountered term, the lifetime average daily dose (LADD):

$LADD = (C)\ (CR)\ (ED)\ (AF)/(BW)\ (LT) \qquad (3\text{–}14)$

Note that the concentration (C), the contact rate (CR), the exposure duration (ED), absorption fraction (AF), lifetime (LT), and body weight (BW) are all parameters that are specific to the individual, although the absorption fraction, body weight, and lifetime might usually be described with generic measurements, that is, averages for a population, since they are reasonably constant for an individual. Note also that both CR and ED are dependent on the activities of the individual, and the relevant data for these parameters are activity pattern data. A major task for the exposure assessor is to determine which measurement data are relevant to

determine C, the concentration of the agent that contacts the individual. In actual exposure situations, C is likely to vary over time, sometimes by a great deal.

There are several ways that exposure assessors use measurements such as those listed in Table 3–1 to determine C and to calculate exposures using the predictive approach. Three of these ways, each having a somewhat different approach to dealing with the variation in C (and other parameters), are the *scenario method*, the *microenvironment method*, and the *Monte Carlo method*. For all of these methods, the measurement data are first used to make inferences about environmental or ambient media, and how concentrations of the chemical or agent vary over time in those media. The logical links are formed and justified between the measurement (sample) data and the characterization of the media as given in the examples in Table 3–1. Once these characterizations are made, they are used to make inferences about exposure. These three methods are not mutually exclusive, and often are used in combination in exposure assessments.

The scenario method can be used either with a single scenario, usually starting with an average concentration to calculate an LADE or LADD as in equations 3–11 and 3–14, or with multiple scenarios. In the *single scenario method*, a set of assumptions is made about how exposure takes place for an individual, and values for the various parameters in the generic exposure equation are derived from the assumptions. For example, let us assume we are doing an exposure assessment concerned with chloroform in drinking water. Since it is known that chloroform may be formed as part of the chlorination process in a drinking water treatment plant, the drinking water treatment plant can be viewed as the source, and measurements can be made of the chloroform concentrations in the finished drinking water leaving the plant. Knowledge or data concerning the fate of chloroform in the distribution system will help build the logical link between the measurements at the treatment plant and later exposure; fate information may allow linking the concentrations at the plant with those at the tap.[4] An average concentration in tap water can be estimated from the data and fate considerations, say in this case, 20 mg chloroform/L tap water. Activity pattern data are used, or assumptions made, concerning the activities of the exposed individual, to determine what the parameters for contact rate and exposure duration will be for the scenario. For this scenario, assume the contact rate is two liters of tap water ingested daily, and that the individual lives at this location for 40 years (the exposure duration). Using a lifetime of 70 years (converted to days), and a body weight of 70 kg, the LADE calculation (using equation 3–11) is straightforward.

For the concentration parameter in the exposure equation, the single scenario method usually assumes it to be a single value. (The mean value and highest value reported are two common single-value treatments depending on whether the scenario is supposed to represent a "typical" or "worst case," respectively.[5] Recall that in the derivation of LADE in equation 3–11, it is an average intensity of contact for the exposure period. Substituting the highest value reported for the concentration term for a worst-case estimate in the LADE equation is essentially saying that the person will be exposed to that value on average for the duration of exposure (ED in equation 3–11). Variation in the concentration parameter C, as well as the other parameters, are often treated with ranges or a sensitivity analysis. Use of the single scenario method, where variation in the parameters is not used, can only be justified if individual exposures are being evaluated; applying a single scenario estimate to a population without considering variation is tantamount to saying all members of the population behave exactly the same way and are exposed to exactly the same concentrations of the chemical or agent. In cases where the variation is not known, single values may be used if explained in the uncertainty section of the assessment. where an analysis of the impacts of possible variation should be done.

A few words need to be said here about the use of "worst-case" scenarios. As discussed in Chapter 1, the exposure assessor is trying to estimate a real-world dose to use in the dose-response relationship for a risk assessment. By maximizing the parameters in a scenario for exposure, the assessor is looking at the top end of the distribution of exposures in a population (if indeed the worst case actually exists in the population). A legitimate use of worst-case scenarios is to determine if the exposure or risk is low enough even at this extreme so as to dismiss concern for this scenario. It is not legitimate to use a worst-case scenario to prove that there in fact exists a concern in a real population. In constructing a worst-case scenario, the assessor has usually added assumptions or used particular data points that bring into question whether the scenario actually represents the real world. If the exposure or risk value estimated by a worst-case scenario is high enough to cause concern, the assessor must reevaluate the parameters used and perform reality checks before deciding a problem really exists. It is critical that the results of a worst-case individual scenario are not immediately applied to an entire population, since in almost all cases this will result in a substantial overestimate of a potential problem.

In the *multiple scenario method*, several individual scenarios are constructed, with particular attention given to highlighting the variability of the parameters used for the scenarios. The most common use of multiple scenarios will be where a typical case and a worst case (or reasonable worst case) are constructed, using the same procedures described above. In its theoretical extreme, one could construct a different scenario for each individual, using the particular values of the parameters which apply to that individual, and derive an estimate of population exposures by aggregating the individual scenarios.[6] With populations

[4] Alternately, of course, one could take measurements at the tap and consider that as the source for the purpose of the assessment. Where this approach may cut down uncertainty for the individual exposure, it makes generalization to a population from the individual estimates somewhat more difficult since the relationship among the individuals as far as differences in concentration at the tap is unknown.

[5] A worst-case scenario is one that estimates the highest exposure. One form of worst-case scenario is the so-called "maximally exposed individual" (MEI), which represents the single individual with the highest exposure. Naturally, the worst case can be arrived at in a number of ways besides maximizing concentration; the exposure can often be much more sensitive to the activities of the individual (ingestion rates, for example). In most exposure assessments, adjusting all the parameters to their limiting values would maximize exposure results in a scenario that may not have realistic chance of happening in the real world. For example, in the drinking water scenario, maximizing all parameters in an LADD calculation would mean the individual with the smallest body weight and shortest lifetime consumed the most water per day at the highest concentration for the longest duration; this combination is unlikely to actually occur since at least some of the parameters (e.g., body weight and consumption rate) may be covariant. For this reason, the concept of "reasonable worst-case" scenarios is often used, where the exposures are high but the combination of parameters thought to be one which probably occurs in the actual population.

[6] This has in fact been done by the Office of Toxic Substances for the 4920 respondents in the OTS chlorinated solvents study, as reported in the Task #43 report to contract 68–02–4254, dated 8/31/87, titled, "Consumer Exposure Estimates for Solvents."

of more than a small number of individuals, this may become unwieldy, but often groups of individuals will be treated as behaving similarly enough to be covered by a single scenario, thereby dividing the population into subpopulations. This procedure is often done when estimating occupational exposures for a single chemical across a number of job types. Each job type is covered by a different scenario which uses the particular parameters pertinent to that job.

The *microenvironment method* treats the variability in the concentration contacted, C, as a series of constants. If the contact rate is assumed to be fairly constant during periods of exposure, equation 3–4 can be reduced to:

$$E=(CR)\sum_{i=1}^{N} C_i, \qquad (3\text{–}15)$$

where each microenvironment i has associated with it a characteristic concentration C_i, and the subject spends a duration t_i in that microenvironment. In this method, the individual's surroundings are divided into compartments where the chemical or agent concentration remains constant, or at least has a known and describable variability. Measurement data for concentrations of chemicals or agents are usually described as constants (usually means of the measured data) for each microenvironment. Exposure estimates are derived by using an exposure equation such as the one described above, evaluating each microenvironment, and summing over all the microenvironments for an individual. Unlike the scenario methods described in equation 3–11, however, which essentially evaluate average individual exposure and which can then be aggregated to populations, the microenvironment method can more easily directly incorporate data on population activity patterns into the estimate by assigning statistical weights to the various microenvironments.

The *Monte Carlo method* immediately uses the fact that the parameters in the generic exposure equation are not single values, but distributions of values, to derive a distribution of exposures in the population. Using computer-assisted iterative techniques, the Monte Carlo simulation will solve exposure equations multiple times (hundreds, thousands) using all the actual values observed from measurements or characterization of the media, and all the data about activity patterns. The technique involves using random combinations of the actual data enough times to generate a distribution of estimated exposures while recreating the distribution of the data on the equation parameters. Although this may superficially resemble the theoretical extreme of the multiple scenario method discussed previously, it is fundamentally different, since the multiple scenario method purposefully combines the values from the distribution and the Monte Carlo method does this randomly. Whereas the multiple scenario technique may be impracticable if the population is large, the Monte Carlo method is not limited by a large population. Because of the way the estimate is derived, however, the Monte Carlo method has several issues that the exposure assessor must keep in mind before using it. First, the Monte Carlo technique works on the assumption that the parameters are independent; if they are not independent, but assumed so, excessive error may result. There are methods, however, to account for covariance if known. Second, and a more resource-related concern for most exposure assessors, is that the variation or distribution of the input parameters must be known. For the assessor using measurement data to derive distributions of concentrations or activities, this may have important ramifications to the sampling plan, and it is best to consult a statistician about the possibility of using the data for Monte Carlo simulations before the date are collected.

3.2.4. Measurements and Modeling

In exposure assessments, exposure models based on mathematical equations are used extensively to calculate things such as environmental fate/transport in surface water, indoor air levels of chemicals volatilizing from consumer products, etc. These exposure models and exposure-related measurements should be mutually supportive. When an analytical method for a particular chemical and medium is well established, and models are just being developed, all collected measurement data can be used to validate the models. Conversely, when such an analytical method is being developed and the appropriate mathematical models are well accepted, the models can be part of the process of verifying the data from the analytical method. Whenever the relative certainty of models and the relevant measurements of adequate quality are in question, the assessor should favor the measurements.

EPA's Office of Research and Development is in the process of establishing criteria for the selection of exposure assessment-related models that are most useful for a particular scenario. Part of this process involves the use of measurement data to answer selection criteria questions (e.g., fate and transport, degradation rates). Model selection criteria documents already exist for ground water (U.S. EPA, 1988d) and surface water (U.S. EPA, 1987c) and are being developed for other media.

Monitoring data and environmental fate modeling are complementary tools used to help estimate exposure. A combination of monitoring data and estimates obtained from environmental modeling reduces uncertainty in estimating chemical concentrations at exposure points. While monitoring data have the advantage of being actual measurements at the pollution site, they may have potential limitations, particularly in assessing long-term trends. However, measurement data, which are autocorrelated, can be used to predict trends in future exposures (Roach, 1977). Over-reliance on monitoring data can cause underemphasis of chemicals that have not yet been released from a source or are slow moving.

Another question related to monitoring data, which modeling helps resolve, is whether they are representative only of their sampling locations, or are relevant also to an overall exposure assessment. Because chemical concentrations are spatially variable, the assessor may need to use modeling for proper spatial representativeness in the exposure assessment. Monitoring usually represents a spatial distribution that is by necessity limited. The use of models in conjunction with monitoring can project chemical concentrations over space and time, thereby strengthening the logical link between measurement data and exposures.

3.2.5. Use of Surrogate Data in Pesticide Exposure Assessment

The use of surrogate data plays a major role in EPA assessments of human non-dietary exposure to chemicals, especially in the Office of Pesticide Programs. According to the Agency's "Pesticide Assessment Guidelines, Subdivision U, Applicator Exposure Monitoring" (U.S. EPA, 1987d): "Surrogate exposure data are defined as exposure monitoring data collected for other pesticide chemicals using comparable methods and under similar conditions as for the pesticide under assessment." The mechanics of the use of surrogate data have been discussed in public fora and in the published

scientific literature in recent years. The assumption in the use of surrogate data is that in many pesticide application scenarios, the physical parameters of application (such as human activity which leads to exposure), not the properties of the pesticide, are most important in determining the level of exposure. Note that when using a passive dosimetry monitoring method, what is measured is the amount of chemical impinging on the skin surface, or available for inhalation, that is, exposure, not the actual dose received. Factors such as dermal penetration, are, of course, expected to be highly chemical-dependent.

The development of a surrogate data base, and valid predictive correlations where possible, is a procedure that the Agency will continue to pursue. The Agency believes that it is more reliable to estimate exposure based on an extensive, scientifically sound and appropriate "surrogate" data base rather than on the results of an individual pesticide application study with a limited number of replicates, even if that single study is judged valid by the Agency. As the Agency receives additional valid exposure data from any source, the data will be added to the existing data base, thus expanding the data base and improving its reliability for estimating exposure for other pesticides.

3.2.6. Combining Measurement Data Sets from Various Studies

Combining data from more than one source into a single data set must be done cautiously. The circumstances under which each set of data was collected (target population, sampling design, location, time, etc.) and the quality of the data (precision, accuracy, representativeness, completeness, etc.) must be evaluated. Combining summary statistics of the data sets (e.g., means) into a single data set may be more appropriate than combining the original data values. Statistical methods are available for combining results from individual statistical tests. For example, in applicable cases, several studies with marginally statistically significant results may justify an overall conclusion of a statistically significant effect.

The best way to report data is to provide sufficient background information for the measurement data set, including clear documentation of the source of the data (including references). This allows for determining the underlying probability distribution of the measurement variable. A probability distribution can be ascertained from the following types of information about the data set: the arithmetic or geometric mean, the number of measurements in the data set, the extreme values, the mode or modes, the median value, the variance or standard deviation, and a histogram showing the general shape of the distribution.

Arithmetic means are good descriptors of the central tendency of a data set provided the data set is normally distributed. Geometric means are better descriptors of central tendency for lognormal distributions. The median is a good measure of the location of the center of a data set because it is unaffected by extreme values. Unfortunately, it does not make use of all the information contained in the data set, but rather uses only the relative sizes of the measurements. The median is also less amenable than a mean to mathematical treatment, and is more difficult to use in more elaborate statistical techniques.

3.3. *Adequacy of Measurement Data for the Intended Exposure Assessment*

Measurement data, whether generated for the particular exposure assessment or taken from another measurement study, must be evaluated for their adequacy in use as samples representative of media, individual exposures, body burden, or whatever is being characterized. The same considerations discussed in section 2.4 concerning data quality (precision, accuracy, representativeness, completeness, and comparability) are appropriate when evaluating any data being considered for use in an assessment.

Even in the case of serious flaws, data should not be discarded entirely unless better data are available. If flawed data are retained, the nature and seriousness of the flaws should be clearly stated. If flawed data are rejected for use in exposure assessments in favor of better data, the flaws should be clearly stated and the basis for judgment of the retained data should be documented.

3.3.1. Quality Assurance and Quality Control for Previously-Generated Data

In many instances, previous studies may have developed data that could be useful for the current sampling plan requirements of the exposure assessor. Any data developed through previous studies should be validated with respect to quality and extrapolation to current use. The criteria for method selection and validation should also be followed in the analysis of existing data. Some other considerations when evaluating data include the following:

Analytical Methods—Were the analytical methods used in collecting or analyzing the data from the previous study consistent with present practices? The methods need not be identical, and a lower detection limit with a newer method does not necessarily mean that the older data are inadequate. However, research might have identified problems with older methods that would invalidate them for current use.

Detection Limits—It should be determined whether the detection limits of the analytical method were sensitive to current Agency standards and criteria for evaluating data.

Laboratory—Was the laboratory performing the analysis considered competent? Are matrix spike recoveries acceptable for the intended use? Were any laboratory blanks contaminated?

Sample Collection Considerations—Was the sampling plan followed? Where and how were the samples collected? Were a sufficient number of samples collected? Methods for sample collection are as important as methods for sample analysis.

Sample Handling Considerations—Were traceability procedures followed if the samples were analyzed off-site? Were the samples preserved properly? How were the samples shipped? How long were the samples held before being analyzed?

3.3.2. The Role of Limit of Detection (LOD) Values in Measurements Used to Estimate Exposure

The ability to detect and accurately measure a quantity tends to decrease at low concentrations due to various factors such as sampling constraints, limitations of the measuring instrument, contamination from sources other than the source being considered, etc. The limitations of the measuring system must be understood when interpreting data for exposure assessment.

The limit of detection (LOD) is the smallest concentration or amount of a substance that can be reliably detected by a given measurement process. The limit of quantitation (LOQ) is the smallest concentration or amount of a substance for which quantitative results may be obtained with a specified degree of confidence. The precise interpretation of these definitions depends on the analytical method (e.g., particle counting methods differ from methods such as GC–MS with essentially continuous results) and the substance being analyzed. The definitions tend to vary also between applications and laboratories ("reliably detected" may be defined as detected with a probability of 95%, 99%, 99.9%, etc.).

The exposure assessor should ensure that the LOD and LOQ have been clearly defined and estimated for the

measurement process under consideration and are appropriate for the needs of the exposure assessment. The laboratory should not only state numerical values, but definitions of the LOD and LOQ.

Exposure assessors may often be faced with data consisting largely of "below LOD" or "at LOD" values. Since the exposure assessment is only as good as the data supporting it, it is essential to interpret these types of data properly so as to avoid misrepresenting the data set or the exposure assessment itself. Rules of thumb that the exposure assessor may encounter in the way data sets are reported include:

Data less than the LOD reported as "non-detected"—When measurements less than the LOD are reported as non-detected, the data are referred to as censored. The level of censoring is based on the confidence with which the analytical signal can be discerned from the noise. Statistical methods are available for treating these data sets and many are summarized and include working examples (Cox and Oakes, 1984; Miller, 1981; Kalbfleisch and Prentice, 1980; Porter et al., 1988).

All Non-detects reported as LODs—In this worst-case approach, all non-detects are assigned the value of the LOD, which may be considered the largest concentration of analyte that could be present but not yet detected. This approach biases the mean in a positive direction. The seriousness of such a bias will depend on the relative number of detects and non-detects in the data set and the relative size of the detection limit compared to the mean of the data with values above the LOD.

All non-detects reported as zero—This approach results in biasing the mean in a negative direction. Again, the seriousness of the bias depends on the relative number of detects and non-detects and the mean of the data with values above zero.

All non-detects as LOD/2—This approach assumes that on the average all values between the LOD and zero could be present; therefore, an average value would result if many samples in this range were measured. Similar to the above approaches, the seriousness of the bias depends on the relative number of detects and non-detects and the mean of the data above LOD/2.

Another option includes all measured values reported, without regard to the considerations for LODs and LOQs. Negative values (e.g., a blank larger than the value measured for a sample) must be reported when they occur. Indeed, if a population value is truly zero, an equal number of negative and positive measured values is expected because of the measurement variability. Using this approach, the mean and standard deviation of the data set are the important parameters, and the results for individual samples should not be considered apart from the data set.

3.4. *Evaluation and Description of Uncertainty in the Use of Measurements*

The estimation of a quantitative value of a parameter using measurement data is an inexact process. Every measurement results in a somewhat different value for the parameter. Thus, the resulting data and any decisions based on them have a degree of *measurement uncertainty*. When using field or laboratory measurement in the decision-making process, the exposure assessor must always evaluate the data for their uncertainty and assess them for the error associated with the risk estimate. The assessment will also contain *descriptive uncertainty*, which refers to the uncertainty in the logic of how the measured data and the exposures are linked. Descriptive uncertainty as well as measurement uncertainty must be clearly indicated in the assessment. An error in descriptive logic about how the measurements and the exposures are linked may mean the difference between estimating exposures that do or do not actually occur in the real world, with resulting health, ecological, or economic consequences. For that reason, it is essential that the non-numeric assumptions about how the measurements and exposures are linked are clearly laid out in the uncertainty analysis.

Most predictive or reconstructive exposure assessments, and often direct measurement assessments, also rely somewhat on expert judgment. Section 3.4.3 discusses formal means for representing uncertainty due to expert opinion.

3.4.1. Assignment of Limits of Uncertainty to Data

Any assignment of uncertainty to data must consider both random and systematic sources of error and, for the measurement process, the sampling operation and the relation of the samples to the population of concern. The assignment of measurement uncertainty must be made on the basis of a statistical analysis of the data. However, even the best statistical treatment may often involve some subjective decisions. Accordingly, all details of the analysis of the data must be documented, and clear statements must be made as to what the assigned uncertainties represent.

3.4.2. Statistical Analysis of Data

The services of a professional statistician are essential in the exposure assessment process when data are being analyzed statistically.

The evaluation of both the mean and the dispersion of a data set depends on the knowledge or assumption of the type of distribution of the population. Types range from a uniform distribution in which all individuals have the same frequency of occurrence (e.g., flipping a coin) to those in which the frequencies of occurrence vary and may be symmetrically or asymmetrically distributed. The normal distribution is the type most frequently encountered and is familiar to most scientists. The results of measurement processes are often normally distributed. Individual samples from environmental media often exhibit a log-normal distribution. Log-normal data can be transformed to normal data by first converting to logarithms and then treating the logarithms as if they were the actual data. It would be useful to graph the available data to ensure that the results are normally distributed. There are computerized statistics packages on the commercial market that facilitate the determination of data distribution. Also, a limited number of samples may preclude statistical analysis of the data.

Depending on the distribution of data, statistics such as dispersion, range, standard deviation, and confidence intervals can be developed, as well as measures of bias and uncertainty. Again, the exposure assessor is advised to consult a statistician or good statistics text for further information and guidance in this area.

3.4.3. Decision Analytic Approach for Expert Opinion

The decision analytic approach explicitly characterizes and represents major uncertainties using probability as the language to convey the degree of uncertainty. When the available data are too indirect, conflicting, or incomplete to draw relationships of concern, the National Academy of Sciences, in its 1977 review of EPA's decision-making procedures, endorsed the use of (judgmental) probabilities as a means for scientific experts to communicate more precisely their knowledge concerning scientific uncertainties to decision-makers (National Academy of Sciences, 1977). An important issue in implementing a decision analytic assessment is the selection of the exposure experts to provide probabilistic exposure relationships. There is extensive

literature covering techniques used for eliciting probability judgments from experts and the various types of bias that can occur when experts make such judgments (Von Holstein and Matheson, 1979; Spetzler and Von Holstein, 1975; Kahneman et al., 1982; Wallsten and Budescu, 1983).

Bayesian inference is worthy of note for combining expert opinion and experimental or survey data. This approach to representing uncertainty is to begin with a prior probabilistic distribution to represent the uncertainty, based on expert opinion, anecdotal information interpreted by an expert, or other sources. The prior distribution is then updated using experimental data and standard Bayesian statistics to obtain an updated or "posterior" distribution, which is taken to be the final form of the distribution (see Hayes et al., 1987, or any statistics text covering Bayesian inference).

Glossary of Terms

Absorbed Dose—The amount of a substance penetrating across the exchange boundaries of an organism, via either physical or biological processes, after contact (exposure).

Accuracy—The measure of the correctness of data, as given by the difference between the measured value and the true or standard value.

Administered Dose—The amount of a substance given to a human or test animal in determining dose-response relationships, especially through ingestion or inhalation. (See applied dose.) Even though this term is frequently encountered in the literature, administered dose is actually a measure of exposure, because even though the substance is "inside" the organism once ingested or inhaled, administered dose does not account for absorption. (See absorbed dose.)

Agent—A chemical, radiological, mineralogical, or biological entity that may cause deleterious effects in an organism after the organism is exposed to it.

Ambient—Surrounding conditions. "Indoor ambient" and "outdoor ambient" are sometimes used to differentiate between indoor and outdoor surroundings.

Ambient Measurement—A measurement (usually the concentration of a chemical or pollutant) taken in an ambient medium, normally with the intent of relating the measured value to the exposure of an organism which contacts that medium.

Ambient Medium—One of the basic categories of material surrounding or contacting an organism, e.g., outdoor air, indoor air, water, or soil, through which chemicals or pollutants can move and reach the organism. (See biological medium, environmental medium.)

Applied Dose—The amount of a substance given to a human or test animal in determining dose-response relationships, especially through dermal contact. (See administered dose.) Even though this term is encountered in the literature, applied dose is actually a measure of exposure, since it does not take absorption into account.

Arithmetic Mean—The sum of all the measurements in a data set divided by the number of measurements in the data set.

Breathing Zone—A zone of air in the vicinity of an organism from which respired air is drawn. Breathing zone measurements are frequently made in occupational health studies by placing monitors at fixed locations of approximately head height near where a worker spends a substantial amount of the workday.

Bias—A systematic error inherent in a method or caused by some feature of the measurement system.

Biological Measurement—For the purposes of reconstructive exposure assessment, a measurement taken in biological medium, usually of the concentration of a chemical/metabolite or the status of a biomarker, normally with the intent of relating the measured value to the absorbed dose of a chemical at some time in the past. (Biological measurements are also taken for purposes of monitoring health status and predicting effects of exposure.) (See ambient measurement.)

Biological Medium—One of the major categories of material within an organism, e.g., blood, adipose tissue, or breath, through which chemicals can move, be stored, or be biologically, physically, or chemically transformed. (See ambient medium, environmental medium.)

Comparability—The ability to describe likenesses and differences in the quality and relevance of two or more data sets.

Data Quality Objectives (DQO)—Statements of the level of uncertainty an assessor is willing to accept in results derived from environmental data.

Direct Measurement of Exposure—An approach to quantifying exposure by taking measurements of exposure at or near the exchange boundaries of an organism while the exposure is taking place.

Dose—The amount of a substance available for interaction with metabolic processes of an organism following exposure and absorption into the organism. The amount of a substance crossing the exchange boundaries of skin, lungs, or digestive tract is termed *absorbed dose*, while the amount available for interaction by any particular organ or cell is termed the *delivered dose* for that organ or cell. Theoretically, the sum of the delivered doses plus the metabolic transformations should equal absorbed dose. (The terms *adminstered dose* and *applied dose* refer to amounts of a substance made available for absorption, and therefore are measures of exposure rather than dose. As such, these terms, sometimes found in the literature, are somewhat confusing and should be avoided if possible by exposure assessors. The term *exposure dose*, a common radiological term, refers to exposure but carries the assumption that the absorption fraction is one, making exposure equal to absorbed dose. Again, this term is somewhat confusing and should be avoided if possible.)

Dose Rate—Dose per unit time, for example in mg/day. Dose rates are often normalized to body weight, yielding units such as mg/kg/day.

Dose-Response Assessment—The determination of the relationship between the magnitude of exposure and the probability of occurrence of the health effects in question.

Dose-Response Curve—A representation, normally in a graphical presentation, of the relationship between dose and probability of occurrence of a health effect or effects. Often these curves are actually based on "administered dose" (i.e., exposure) rather than absorbed dose or delivered dose. (See discussion under "dose.")

Dosimeter—Instrument to measure dose; many so-called dosimeters actually measure exposure rather than dose.

Dosimetry—Process of measuring dose.

Ecological Exposure—Exposure of a nonhuman receptor or organism to a chemical, radiological, or biological agent.

Effluent—(Waste) material being discharged into the environment, either treated or untreated. Effluent generally is used to describe water discharges to the environment, although it can refer to stack emissions or other material flowing into the environment.

Environmental Fate—The destiny of a chemical or biological pollutant after release into the environment. Environmental fate involves temporal and spatial considerations of transport, transfer, storage, and transformation.

Environmental Fate Model—In the context of exposure assessment, any mathematical abstraction of a physical

system used to predict the concentration of specific chemicals as a function of space and time subject to transport, intermedia transfer, storage, and degradation in the environment.

Environmental Medium—One of the major categories of material found in the outdoor natural physical environment that surrounds or contacts organisms, e.g., surface water, ground water, soil, or air, and through which chemicals or pollutants can move and reach the organisms. (See ambient medium, biological medium.)

Exposure—Contact of an organism with a chemical, physical, or biological agent. Exposure is quantified as the amount of the agent available at the exchange boundaries of the organism (e.g., skin, lungs, digestive tract) and available for absorption.

Exposure Assessment—The determination or estimation (qualitative or quantitative) of the magnitude, frequency, duration, and route of exposure.

Exposure Pathway—The course a chemical or pollutant takes from the source to the organism exposed.

Exposure Rate—Exposure per unit time (compare exposure, dose, dose rate), yielding units of amount (mass, fibers, etc.)/time, for example, mg/day. Exposure rates are often normalized to body weight, yielding units such as mg/kg/day.

Exposure Route—The way a chemical or pollutant enters an organism after contact, e.g., by ingestion, inhalation, or dermal absorption.

Exposure Scenario—A set of assumptions about how exposure takes place (including assumptions/conditions concerning sources, exposure pathways, concentrations of pollutants, individual or population habits and characteristics), which aid the exposure assessor in evaluating, estimating, or quantifying exposures.

Fixed-Location Monitoring—Sampling of an environmental or ambient medium for pollutant concentration at one location continuously or repeatedly over some length of time.

Geometric Mean—The nth root of the product of n values.

Guidelines—Principles and procedures to set basic requirements for general limits of acceptability for assessments.

Hazard Identification—The determination of whether a particular substance or chemical is or is not causally linked to particular health effects.

Limit of Detection (LOD)—The smallest concentration or amount of a substance that can be differentiated from background by a given measurement process (e.g., analytical instrument/sample matrix combination). (See limit of quantitation.)

Limit of Quantitation (LOQ) (also, "limit of quantification")—The lower limit of concentration or amount of substance for which quantitative results may be obtained with a specified degree of confidence (i.e., the amount that must be present before a particular method is considered to provide reliable and reproducible quantitative results). (See limit of detection.)

Maximally Exposed Individual (MEI)—The single individual with the highest exposure in a given population.

Median Value—The value in a measurement data set such that half the measured values are greater and half are less.

Microenvironment Method—A method used in predictive exposure assessments to estimate exposures by sequentially assessing exposure for a series of areas (microenvironments) that can be approximated by constant or well-characterized concentrations of a chemical or other agent.

Microenvironments—Well-defined areas such as the home, office, automobile, kitchen, store, etc. that can be treated as homogeneous (or well characterized) in the concentrations of a chemical or other agent.

Mode—The value in the data set that occurs most frequently. Monte Carlo Method—A method used in predictive exposure assessments that uses the Monte Carlo technique, a repeated random sampling from the distribution of values for each of the parameters in a generic exposure equation, to derive an estimate of the distribution of exposures in the population.

Non-Parametric—Statistical methods that do not assume a particular statistical distribution for the statistical population(s) of interest ("distribution-free methods").

Personal Measurement—A measurement collected from an individual's immediate environment using direct methods such as personal air pumps.

Pharmacokinetics—The study of the time course of absorption, distribution, metabolism, and excretion of a foreign substance (e.g., a drug or pollutant) in an organism's body.

Precision—A measure of the reproducibility of a measured value under a given set of conditions.

Predictive Exposure Assessment—An approach to quantifying exposure by measurement or estimation of both the amount of a substance contacted, and the frequency/duration of contact, and subsequently linking these together to estimate exposure. Predictive exposure assessments commonly use the scenario method, the microenvironment method, or the Monte Carlo method (or combinations of these) to make the link between amount (intensity of contact) and duration of contact.

Probability Samples—Samples selected from a statistical population such that each sample has a known probability of being selected.

Quality Assessment—The overall system of activities that provide an objective measure of the quality of data produced.

Quality Assurance—The system of activities whose purpose is to provide to the user of the exposure assessment the assurance that the data used as a basis for the assessment meet defined standards of quality.

Quality Control—The overall system of activities whose purpose is to control the quality of the measurement data so that they meet the needs of the user.

Random Samples—Samples selected from a statistical population such that each sample has an equal probability of being selected.

Range—The difference between the largest and smallest values in a measurement data set.

Reconstructive Exposure Assessment—An approach to quantifying exposure by reconstructing absorbed dose (and exposure) after exposure has occurred, from evidence within an organism such as chemical levels in tissues or fluids, or from evidence of other biomarkers of exposure.

Representativeness—The degree to which a sample is, or samples are, characteristic of the whole medium, exposure, or dose for which the samples are being used to make inferences.

Risk—The probability of deleterious health or environmental effects.

Risk Characterization—The description of the nature and often the magnitude of human or non-human risk, including attendant uncertainty.

Sample—A small part of something designed to show the nature or quality of the whole. Exposure-related measurements are usually samples of environmental or ambient media, exposures of a small subset of a population for a short time, or biological samples, all for the purpose of inferring the nature and quality of parameters important to evaluating exposure.

Sampling Frequency—The time interval between the collection of successive samples.

Sampling Plan—A set of rules or procedures specifying how a sample is to be selected and handled.

Scenario Method—A method used in predictive exposure assessment to account for variability in exposure parameters by setting up one or more alternative sets of assumptions (scenarios), evaluating each for the resulting exposures, and then using the resulting exposure estimate(s) as being illustrative of the exposures in the actual populations being evaluated. In the case of a single scenario, a sensitivity analysis is usually performed on the parameters to evaluate the variability.

Source Characterization Measurements—Measurements made to characterize the rate of release of agents into the environment from a source of emission such as an incinerator, landfill, industrial or municipal facility, consumer product, etc.

Standard Operating Procedure (SOP)—A procedure adopted for repetitive use when performing a specific measurement or sampling operation.

Statistical Control—The process by which the variability of measurements or of data outputs of a system is controlled to the extent necessary to produce stable and reproducible results.

Statistical Significance—An inference that the probability is low that the observed difference in quantities being measured could be due to variability in the data rather than an actual difference in the quantities themselves. The inference that an observed difference is statistically significant is typically based on a test to reject one hypothesis and accept another.

Surrogate Data—Substitute data or measurements on one substance used to estimate corresponding values of another substance.

Department of Education

34 CFR Part 203

Chapter 1 Program for Neglected or Delinquent Children; Notice of Proposed Rulemaking

VOL 53 ISS 232 DE 2 1988 UMI

DEPARTMENT OF EDUCATION

34 CFR Part 203

Chapter 1 Program for Neglected or Delinquent Children

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The U.S. Secretary of Education (Secretary) proposes regulations to implement the portion of Chapter 1 that provides financial assistance to State agencies responsible for the education of neglected or delinquent children in institutions. Under Part D of Chapter 1 of Title I of the Elementary and Secondary Education Act of 1965, as amended, the U.S. Department of Education (Department) provides financial assistance to meet the special educational needs of children in institutions for neglected or delinquent children, children attending community day programs for neglected or delinquent children, and children in adult correctional institutions.

DATES: Comments must be received on or before January 31, 1989.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Mrs. Mary Jean LeTendre, Director, Compensatory Education Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 2043), Washington, DC 20202–6132.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Mr. James R. Ogura, Chief, Program Policy Branch, Compensatory Education Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 2043), Washington, DC 20202–6132. Telephone: (202) 732–4701.

SUPPLEMENTARY INFORMATION:

Background

Title I of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (Pub. L. 100–297) amended the Elementary and Secondary Education Act of 1965 (ESEA) to include a number of new and reauthorized programs. One of these programs is Chapter 1 of Title I of the ESEA, which reauthorizes programs previously contained in Chapter 1 of the Education Consolidation and Improvement Act of 1981 (ECIA). Part D of Chapter 1 of the ESEA, as amended, which would be implemented by these proposed regulations, provides financial assistance to State agencies for projects designed to meet the special educational needs of children in institutions for neglected or delinquent children, children attending community day programs for neglected or delinquent children, and children in adult correctional institutions.

In reauthorizing the Chapter 1 Program for Neglected or Delinquent Children, Congress enacted several changes designed to improve services for the children participating in the program. First, section 1241 clarifies that if a State agency is responsible for providing free public education for neglected or delinquent children in institutions or adult correctional institutions, the agency is eligible for a grant under this part. This includes a State educational agency (SEA) that has the responsibility and does not provide the services directly, but provides the services under contract with a local educational agency (LEA) or by arrangement with another State agency. The Conference Report (H.R. Rept. 567, 100th Cong., 2d Sess. 339 (1988)) further indicates that if a State appropriates funds specifically for the SEA to provide education for neglected or delinquent children in institutions, the SEA shall be considered to meet the definition of an eligible State agency under this part even if the SEA does not directly provide the educational services.

Second, the reauthorization, in section 1242(a) of the Act, clarifies that neglected or delinquent children attending community day programs for neglected or delinquent children are included in the categories of children eligible for services. In addition, section 1292 of the Act provides that handicapped children eligible to be counted and served under this part are also eligible to be counted and served under the Chapter 1 program for handicapped children, if they qualify for services under section 1225 of the Act.

Third, section 1243 of the Act seeks to improve the transition of neglected or delinquent children from educational programs operated by institutions to regular classrooms operated by LEAs. The Act permits a State to reserve 10 percent or less of the amount it receives under this part to support projects that facilitate the transition of children from State-operated or State-supported institutions to LEAs.

Fourth, section 1242(b) of the Act contains a special interpretation of how the supplement-not-supplant requirement applies to the Chapter 1 Program for Neglected or Delinquent Children. Although the services provided under this part must be supplementary to services provided with State funds, compliance with the requirement is to be determined on the basis of the total hours of instruction children receive from State sources without regard to the specific subject areas. For example, even if an institution's regular program of instruction does not include a reading class, funds received under this part may be used to provide a remedial reading class if the total instructional time for the selected children is increased by the amount of time of the remedial reading class.

Finally, section 1242(a) requires that records for students transferring between institutions and LEAs include any available individualized education plans for the students.

Regulatory Issues

The Secretary particularly invites comments on the following issues:

1. Reservation of Funds for Transition Services

The statute provides that a State may reserve up to and including 10 percent of the amount it receives under section 1241 of Chapter 1 for transition services. Under § 203.40(b), the Secretary has interpreted this provision to mean that the State agency educating the children in the institutions, which will not always be the SEA, has the discretion to reserve the funds. Since the State agency provides education for institutionalized children returning to LEAs, the Secretary believes that the State agency is in a better position to determine the transition needs of students and to identify the resources available to facilitate students' transitions to LEA programs. The Secretary specifically seeks comments on whether an SEA or State agency should have the authority to reserve the funds.

2. Definitions of Institutions

Section 1244 of Chapter 1 defines the terms "institution for delinquent children" and "institution for neglected children." The definitions in the Act exclude the requirement in the current regulations that children in the institution have an average stay in the institution of at least 30 days. The Secretary believes that institutions that serve children for less than 30 days, such as reception and diagnostic centers, do not have sufficient time to provide services of sufficient size, scope, and quality to meet the needs of the

children sought to be addressed by this program. Therefore, § 203.6(c) adds to the statutory definition the requirement that children in an eligible institution have an average stay in the institution of at least 30 days.

3. Maintenance of Effort

Section 1242(a) of the Act requires that a State agency maintain fiscal effort on the same basis as is required of an LEA under section 1018(a) of the Act. In determining an LEA's compliance with the requirement, an SEA considers current expenditures, as defined in section 1471 of the Act, in the calculation of combined fiscal effort per student and aggregate expenditures. The statutory definition of current expenditures includes expenditures for administration, instruction, attendance, health services, pupil transportation services, plant operation and maintenance, fixed charges, and net expenditures to cover deficits for food services and student body activities. These expenditures represent an LEA's fiscal effort in providing a free public education for its students.

A State agency operating institutions for neglected or delinquent children is primarily responsible for caring for the children in the institutions. Therefore, many of the expenditures incurred by institutions for neglected or delinquent children include expenses that are primarily associated with the cost of caring for the children rather than the cost of providing them a free public education. Section 203.41(a)(3) limits the expenditures to be included in determining whether a State agency has properly maintained effort to expenditures for instructional staff salaries and instructional materials and supplies. The Secretary particularly seeks comments on limiting the expenditure categories and whether additional costs should be included in the determination to reflect educational expenditures more accurately without causing additional and unwarranted burden on a State agency.

4. State Regulations

Section 1451(b) of the Act requires that State rules and regulations, relating to the administration and operation of Chapter 1 programs, be reviewed by a committee of practitioners prior to publication. The statute provides that a majority of the members of the committee be representatives of LEAs. Section 1242 of the Act requires that programs under this part be administered and carried out in a manner consistent with section 1451(b). In order to be consistent with section 1451(b), the Secretary proposes to require that a committee of practitioners be established. However, because funds under this program go to State agencies rather than LEAs, the Secretary proposes that the majority of the committee represent those State agencies rather than LEAs as provided in section 1451(b). Section 203.50(e)(3)(ii) of the proposed regulations reflects this position.

Applicability of Education Department General Administrative Regulations (EDGAR)

As indicated in § 203.5(a), the Secretary proposes to make the relevant parts of EDGAR applicable to programs under this part. In making this proposal, the Secretary is responding to a need for additional guidance. During the six years that EDGAR has not been applicable under Chapter 1 of the ECIA, SEAs and State agencies have asked the Department numerous questions that are answered by the provisions in EDGAR. Moreover, without the benefit of the guidance in EDGAR, a number of States have incurred audit exceptions concerning fiscal control and fund accountability. The Secretary believes that making the relevant parts of EDGAR applicable to programs under this part will address the need for better guidance and accountability. Moreover, the Secretary does not believe this action will create additional burden for SEAs and State agencies because EDGAR is applicable to other State-administered Federal education programs and has recently been reviewed with respect to federalism issues and burden reduction, and unduly burdensome requirements have been revised or removed.

Specifically, the Secretary proposes to apply Part 76 (*State-Administered Programs*), with certain exceptions; Part 77 (*Definitions that Apply to Department Regulations*); and Part 78 (Education Appeal Board). In addition, regulations implementing the new enforcement provisions in Part E of the General Education Provisions Act would apply when those regulations are promulgated. Further, the Secretary proposes in § 203.5(a)(4) to apply Part 80 (*Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments*), unless a State formally adopts its own written fiscal and administrative requirements for expending and accounting for funds received by the SEA and its LEAs under this part. If a State does not have its own written requirements implemented by July 1, 1989, but wishes to develop them, the requirements in Part 80 would apply until such time as written requirements are formally adopted. If a State chooses to apply its own written requirements, those requirements must be available for Federal inspection. In a case where departmental officials determine that a State's requirements are not sufficient, the enforcement provisions in Part E of GEPA would apply, including the due process provisions in that part. During the transition period provided for in section 1491(c) of the Act (July 1, 1988 through June 30, 1989), a State may continue to comply with the requirements under Chapter 1 of the ECIA. The Secretary specifically invites comments on § 203.5(a)(4).

Program Improvement

Under proposed § 203.46(a)(2), each State agency would be required to use the results from evaluating its project to make necessary improvements. Any necessary changes in the project would of course be subject to approval by the SEA.

State Complaint Procedures

Section 203.52 of the proposed regulations has been added to require States to develop and implement procedures for resolving complaints at the State and local levels. The Secretary has added this section in response to language in the conference report accompanying the Hawkins-Stafford Act recommending that the Secretary "issue amended regulations making 34 CFR 76.780 through 76.783 applicable to Chapter 1." H.R. Rept. 567, 100th Cong., 2d Sess. 341 (1988). The Secretary has proposed, in a previously published notice of proposed rulemaking, to remove the complaint procedures from Part 76 and to retain those procedures only in regulations for the specific programs to which they apply. Rather than repeating the complaint provisions currently in Part 76, however, the Secretary has attempted in § 203.52 to implement the conferees' intent that States develop and implement procedures to resolve complaints while affording States maximum flexibility in tailoring those procedures to fit State and local needs.

Annual Performance Report

Under § 203.46(c), the SEA will be required annually to submit to the Secretary the data required under section 1019(b)(3) of the Act, along with additional items the Department believes are necessary in describing the impact of the program. The additional items that would be included are: (1) The number of children, by grade, receiving services in neglected, delinquent, adult correctional,

community day programs for neglected or delinquent children, and transitional projects; (2) characteristics of participants, including age, gender, and ethnicity; (3) the number of participants—in neglected, delinquent, or adult correctional institutions, or community day programs—each by type of instructional or support service received; (4) the number of participants with handicapping conditions; and (5) other information as may be requested by the Secretary.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Executive Order 12606—The Family

The Secretary certifies that these proposed regulations have been reviewed in accordance with Executive Order 12606 and that they do not have a significant negative impact on family formation, maintenance, and general well-being. To the contrary, the program provides educational and support services for children removed from families because of delinquency or neglect and supports activities that facilitate children's return to family and local school programs.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities. Because these proposed regulations would affect only States and State agencies, the regulations would not have an impact on small entities. States and State agencies are not defined as "small entities" in the Regulatory Flexibility Act.

Paperwork Reduction Act of 1980

Sections 203.21, 203.30, 203.44, 203.46, and 203.52 contain information collection requirements. As required by the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these sections to the Office of Management and Budget for its review. (44 U.S.C. 3504(h).)

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: James D. Houser.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 2043, 400 Maryland Avenue SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

List of Subjects in 34 CFR Part 203

Education, Education of disadvantaged, Elementary and secondary education, Grant programs—education, Juvenile delinquency, Neglected, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Number 84.013—Chapter 1 Program for Neglected or Delinquent Children.)

Dated: November 29, 1988.

Lauro F. Cavazos,

Secretary of Education.

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by revising Part 203 to read as follows:

PART 203—CHAPTER 1 PROGRAM FOR NEGLECTED OR DELINQUENT CHILDREN

Subpart A—General

Sec.

203.1 What is the Chapter 1 Program for Neglected or Delinquent Children?
203.2 Who is eligible for a grant?
203.3 Who is eligible for a subgrant?
203.4 What kind of activities may be assisted?
203.5 What regulations apply?
203.6 What definitions apply?
203.7–203.9 [Reserved]

Subpart B—How Does a State Apply for a Grant?

203.10 What assurances must a State submit to receive a grant?
203.11–203.19 [Reserved]

Subpart C—How Does the Secretary Determine the Amount of a Grant?

203.20 How does the Secretary determine the amount of a grant to an SEA?
203.21 How does the Secretary determine the amount of a State agency grant?
203.22 What funds are available for an SEA to carry out its responsibilities?
203.23–203.29 [Reserved]

Subpart D—How Does a State Agency Apply For and Receive a Subgrant?

203.30 How does a State agency apply for a subgrant?
203.31 What are the State agency needs assessment requirements?
203.32 Under what conditions does an SEA approve a State agency's application?
203.33–203.39 [Reserved]

Subpart E—What Post-Award Conditions Must Be Met by a State Agency?

203.40 What costs are allowable?
203.41 What is the maintenance of effort requirement?
203.42 Under what circumstances may an SEA waive the maintenance of effort requirement?
203.43 What is the supplement-not-supplant requirement that applies to the program?
203.44 What is included in the records of transferred students?
203.45 How may personnel be assigned supervisory duties?
203.46 What are the requirements for evaluating and reporting project results?
203.47–203.49 [Reserved]

Subpart F—What Are Other State Responsibilities for the Program?

203.50 Does a State have authority to issue State regulations for the program?
203.51 How can State personnel paid with Chapter 1 funds be assigned to State programs?
203.52 What complaint procedures must an SEA adopt?
203.53–203.59 [Reserved]

Authority: 20 U.S.C. 1232(b)(2), (5), 2721(a), 2724(b), 2728 (a), (b), (d), 2729(b), 2801–2804, 2811–2812, 2824 (a), (b), 2831(a), 2835 (a), (d), 2838 (a), (b), (c), 2851, 2853, 2891, unless otherwise noted.

Subpart A—General

§ 203.1 What is the Chapter 1 Program for Neglected or Delinquent Children?

Under the Chapter 1 Program for Neglected or Delinquent Children, the Secretary provides Federal financial assistance for projects designed to meet the special educational needs of neglected or delinquent children—

(a) In institutions for neglected children;

(b) In institutions for delinquent children;

(c) Attending community day programs for neglected or delinquent children; and

(d) In adult correctional institutions.

(Authority: 20 U.S.C. 2802(a))

§ 203.2 Who is eligible for a grant?

The Secretary provides funds under this part to State educational agencies (SEAs) for State agencies directly responsible for providing free public

education for children referred to in § 203.1.

(Authority: 20 U.S.C. 2801(a))

§ 203.3 Who is eligible for a subgrant?

(a) A State agency that is responsible for providing free public education for children in institutions for neglected or delinquent children, children attending community day programs for neglected or delinquent children, or children in adult correctional institutions is eligible to receive a subgrant under this part.

(b) The SEA shall annually notify each eligible State agency of the amount of funds the State agency is eligible to receive under the Chapter 1 Neglected or Delinquent Program.

(Authority: 20 U.S.C. 2801 (a), (b))

§ 203.4 What kind of activities may be assisted?

Under the Chapter 1 Neglected or Delinquent Program, the Secretary makes payment to SEAs to assist State agencies in conducting—

(a) Programs and projects that are designed to meet the special educational needs of children in institutions for neglected or delinquent children, children attending community day programs for neglected or delinquent children, and children in adult correctional institutions; and

(b) Projects that facilitate the transition of children from State institutions for neglected or delinquent children into programs operated by local educational agencies (LEAs).

(Authority: 20 U.S.C. 2802(a), 2803(a))

§ 203.5 What regulations apply?

The following regulations apply to the Chapter 1 Neglected or Delinquent Program:

(a) The Education Department General Administrative Regulations (EDGAR) as follows:

(1) 34 CFR Part 76 (*State-Administered Programs*) as follows:

(i) Subpart A (*General*).

(ii) Sections 76.125 through 76.137 (Consolidated Grant Applications for Insular Areas).

(iii) Subpart E (*How a Subgrant is Made to an Applicant*).

(ivi) Subpart F (*What Conditions Must Be Met by the State and Its Subgrantees?*), except for §§ 76.650 through 76.662 (Participation of Students Enrolled in Private Schools).

(v) Subpart G (*What Are the Administrative Responsibilities of the State and Its Subgrantees?*), except for § 76.722 (Other responsibilities of the State).

(vi) Subpart H (*What Procedures Does the Secretary Use to Get Compliance?*).

(2) 34 CFR Part 77 (*Definitions that Apply to Department Regulations*).

(3) 34 CFR Part 78 (*Education Appeal Board*).

(4) 34 CFR Part 80 (*Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments*), unless a State formally adopts its own written fiscal and administrative requirements for expending and accounting for all funds received by SEAs and LEAs under this part. These requirements must be available for Federal inspection and must—

(i) Be sufficiently specific to ensure that funds received under this part are used in compliance with all applicable statutory and regulatory provisions;

(ii) Result in the efficient and effective administration of programs under this part;

(iii) Ensure that funds received under this part are only spent for reasonable and necessary costs of operating programs under this part; and

(iv) Ensure that funds received under this part are not used for general expenses required to carry out other responsibilities of State or local governments.

(b) The regulations in this Part 203.

(Authority: 20 U.S.C. 2831(a))

§ 203.6 What definitions apply?

(a) *Definitions in the Act.* The following terms used in this part are defined in section 1471 of the Act:

Average daily attendance.
Average per pupil expenditure.
Construction.
Current expenditures.
Equipment.
Free public education.
Local educational agency.
Parent.
Secretary.
State.
State educational agency.

(b) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR 77.1:

GEPA.
Grant.
Nonprofit.
Private.
Project.
Supplies.

(c) *Other definitions.* The following definitions also apply to this part:

"Act" means Chapter 1 of Title I of the Elementary and Secondary Education Act of 1965, as amended.

"Adult correctional institution" means a facility in which persons are confined as a result of a conviction of a criminal offense, including persons under 21 years of age.

"Children" means—

(a) Persons up to age 21 who are entitled to a free public education not above grade 12; and

(b) Preschool children.

"Community day program" means, as determined by the SEA, a regular program of instruction provided by a State agency at a community day school operated specifically for neglected or delinquent children.

"ECIA" means the Education Consolidation and Improvement Act of 1981.

"Fiscal year" means the Federal fiscal year—a period beginning on October 1 and ending the following September 30—or another 12-month period normally used by the SEA for recordkeeping.

"Institution" means either an institution for neglected children or an institution for delinquent children, or an adult correctional institution.

"Institution for delinquent children"means, as determined by the SEA, a public or private residential facility that is operated for the care of children who—

(a) Have been determined to be delinquent or in need of supervision; and

(b) Have had an average length of stay in the institution of at least 30 days.

"Institution for neglected children" means, as determined by the SEA, a public or private residential facility, other than a foster home, that is operated for the care of children who—

(a) Have been committed to the institution or voluntarily placed in the institution under applicable State law because of abandonment, neglect, or death of the parents or guardians; and

(b) Have had an average length of stay in the institution of at least 30 days.

"Regular program of instruction" means an educational program (not beyond grade 12) in an institution or a community day program for neglected or delinquent children that consists of classroom instruction in basic school subjects such as reading, mathematics, and vocationally oriented subjects, and that is supported by non-Federal funds. Neither the manufacture of goods within the institution nor activities related to institutional maintenance are considered classroom instruction.

"State agency" means an agency of State government directly responsible for the free public education of children in institutions for neglected or delinquent children or in adult correctional institutions, or in community day programs for neglected or delinquent children. Although the term generally refers to an agency other than an SEA, the term includes an SEA

that receives a specific State appropriation for the education of neglected or delinquent children but transfers the funds to another agency that has responsibility for providing the educational services. The educational services may be provided in schools operated by the SEA or the State agency or schools under contract or other arrangement with the SEA or the State agency.

(Authority: 20 U.S.C. 2831(a), 2891; H.R. Rept. 567, 100th Cong., 2d Sess. 339 (1988) (Conf. Rept.))

§§ 203.7-203.9 [Reserved]

Subpart B—How Does a State Apply for a Grant?

§ 203.10 What assurances must a State submit to receive a grant?

(a) A State that wishes to receive fund under this part for State agency projects designed to meet the special educational needs of neglected or delinquent children shall submit to the Secretary, through its SEA, assurances that the SEA will—

(1) Meet the requirements in section 435(b) (2) and (5) of the General Education Provisions Act (GEPA) relating to fiscal control and fund accounting procedures;

(2) Carry out the evaluation requirements in § 203.46; and

(3) Ensure that its State agencies comply with all applicable statutory and regulatory requirements.

(b) The assurances submitted under paragraph (a) of this section remain in effect for the duration of the SEA's participation in programs under this part.

(Authority: 20 U.S.C. 1232d(b) (2), (5), 2729 (b), (a), (d), 2838(c))

§§ 203.11-203.19 [Reserved]

Subpart C—How Does the Secretary Determine the Amount of a Grant?

§ 203.20 How does the Secretary determine the amount of a grant to an SEA?

(a) This Secetary annually determines the amount of funds under this part that State agencies in a State are eligible to receive in accordance with sections 1241(b) and 1291 of the Act.

(b) The Secretary annually notifies the SEA of the amount each State agency is eligible to receive under this part.

(Authority: 20 U.S.C. 2801(b), 2811)

§ 203.21 How does the Secretary determine the amount of a State agency grant?

(a) *Amounts of grants.* The Secretary determines the amount of a State agency grant according to section 1241 of the Act and the following data:

(1) Average daily attendance data, determined according to the provisions of paragraph (c) of this section, in the schools operated or supported by the State agencies in the State, including community day schools for neglected or delinquent children.

(2) The applicable average per pupil expenditure data.

(3) The amount appropriated for programs for neglected and delinquent children for the relevant fiscal year.

(b) *Determination of average daily attendance.* (1) Average daily attendance is computed for each institution or community day program serving neglected or delinquent children by—

(i) Calculating from daily attendance records the total number of days of attendance of children in the regular educational program, as defined in § 203.6(c), during the most recently completed school year; and

(ii) Dividing that total by 180.

(2) For the purpose of computing average daily attendance—

(i) A child is counted as being in a full day of attendance for each day the child attends the regular educational program for three or more hours; and

(ii) A child is counted as being in one-half day of attendance for each day the child attends the regular educational program for at least one hour, but less than three hours.

(3) To be counted in average daily attendance, a child must be—

(i) One for whom a State agency is providing a free public education; and

(ii) Enrolled for at least 10 hours a week in a regular educational program for which daily attendance records are kept.

(4) Neglected or delinquent children under this part, who are eligible for programs for handicapped children under 34 CFR Part 302, may be counted for grant determinations under both programs and may be served under both programs.

(Authority: 20 U.S.C. 2801(b))

§ 203.22 What funds are available for an SEA to carry out its responsibilities?

(a) Except for programs under Part C of Chapter 1, an SEA shall use funds received under section 1404(a) of the Act for the proper and efficient performance of its duties under Chapter 1.

(b) The SEA may use not more than 15 percent of the funds referred to in paragraph (a) of this section for indirect costs.

(Authority: 20 U.S.C. 2824 (a), (b))

§§ 203.23-203.29 [Reserved]

Subpart D—How Does a State Agency Apply for and Receive a Subgrant?

§ 203.30 How does a State agency apply for a subgrant?

(a) A State agency shall submit an application to the SEA for a period of not more than three fiscal years.

(b) The application submitted by the State agency must include the following:

(1) A description of the procedures to be used conduct an annual assessment of educational needs that meets the requirements of § 203.31.

(2) A description of the project to be conducted, including a budget for the initial project year.

(3) Data showing that the State agency has maintained fiscal effort as required by § 203.41.

(4) Other information the SEA may request.

(c) A State agency shall annually update an application that has been approved for more than one year by submitting the following information to the SEA:

(1) Data showing that the State agency has maintained fiscal effort as required by § 203.41.

(2) A budget for the expenditure of funds received under this part.

(d) If there are substantial changes in the numbers or the needs of children to be served or the services to be provided, the State agency shall submit a description of the changes to the SEA.

(Authority: 20 U.S.C. 2721(a), 2724(b), 2728 (a), (b), (d), 2802 (a), (c))

§ 203.31 What are the State agency needs assessment requirements?

A State agency may receive funds under this part only if it conducts an annual assessment of all children in eligible institutions to—

(a) Identify the special educational needs of children in the institutions and children attending community day programs for neglected or delinquent children;

(b) Identify the general instructional areas on which the program will focus;

(c) Select for participation those children with the greatest need for special assistance; and

(d) Determine the special needs of participating children with sufficient specificity to ensure concentration on those needs.

(Authority: 20 U.S.C. 2724(b))

§ 203.32 Under what conditions does an SEA approve a State agency's application?

(a) An SEA shall approve a State agency's application for funds under this

part if that application meets the requirements under §§ 203.30 and 203.31.

(b) An SEA may approve an application for a grant to a State agency for one year or for a period of up to three years if a State agency operates programs for children who participate for more than one year.

(c) SEA approval of an application under paragraph (a) of this section does not relieve the State aency of its responsibility to comply with all applicable requirements.

(Authority: 20 U.S.C. 2802 (a), (c))

§§ 203.33-203.39 [Reserved]

Subpart E—What Post-Award Conditions Must Be Met by a State Agency?

§ 203.40 What costs are allowable?

(a) A State agency shall use funds under this part only for programs and projects (including the acquisition of equipment and, if necessary, the construction of school facilities) that are designed to—

(1) Meet the special educational needs of children in institutions for neglected or delinquent children, children attending community day programs for neglected or delinquent children, or children in adult correctional institutions; and

(2) Support educational services supplemental to the basic education of neglected or delinquent children that must be provided by the State.

(b)(1) A State agency may reserve 10 percent or less of the funds it receives for any fiscal year under section 1241 of the Act for projects designed to facilitate the transition of children from State institutions or community day programs for neglected or delinquent children into locally operated elementary and secondary education programs.

(2) The services provided from the funds reserved under paragraph (b)(1) of this section may include, but are not limited to, the following:

(i) Supplemental instruction to improve achievement in basic and more advanced skills.

(ii) Counseling—educational, family, and personal.

(iii) The services of persons with special responsibilities to act on behalf of individual children (ombudspersons).

(iv) Tutoring.

(v) Re-entry orientation programs.

(3) Projects funded under paragraph (b)(1) of this section may be conducted directly by the State agency, or by contracts or other arrangements with one or more of the following:

(i) One or more LEAs.

(ii) Other public agencies.

(iii) Private, nonprofit organizations.

(4) The special educational services funded under paragraph (b) of this section shall be provided to neglected or delinquent children in schools other than those operated for children in State institutions or community day programs for neglected or delinquent children.

(Authority: 20 U.S.C. 2802(a), 2803)

§ 203.41 What is the maintenance of effort requirement?

(a)(1) *Basic standard.* Except as provided in paragraph (b) of this section, an SEA shall pay a State agency its allocation of funds under this part if the SEA finds that either the combined fiscal effort per student or the aggregate expenditures of State funds with respect to the provision of free public education by the State agency for the preceding fiscal year was not less than 90 percent of the combined fiscal effort per student or the aggregate expenditures for the second preceding fiscal year.

(2) *Meaning of "preceding fiscal year."* For purposes of determining maintenance of effort, the "preceding fiscal year" is the Federal fiscal year or the twelve-month fiscal period most commonly used in a State for official reporting purposes prior to the beginning of the Federal fiscal year in which funds are available.

Example: For funds first made available on July 1, 1989, if a State is using the Federal fiscal year, the "preceding fiscal year" is Federal fiscal year 1988 (which began on October 1, 1987) and the "second preceding fiscal year" is fiscal year 1987 (which began on October 1, 1986). If a State is using a fiscal year that begins on July 1, 1989, the "preceding fiscal year" is the twelve-month period ending on June 20, 1988 and the "second preceding fiscal year" is the period ending on June 20, 1987.

(3) *Expenditures.*—(i) *To be considered.* In determining a State agency's compliance with the maintenance of effort requirement, the SEA shall consider the State agency's expenditures from State funds for free public education. These include expenditures for instructional staff salaries, supplies, and materials.

(ii) *Not to be considered.* The SEA may not consider the following expenditures in determining a State agency's compliance with the maintenance of effort requirement:

(A) Any expenditures related primarily to the care of children in institutions rather than for free public education.

(B) Any expenditures for community services, capital outlay, or debt service.

(C) Any expenditures from funds provided under Chapter 1 and Chapter 2 of Title I of the Act or Chapters 1 and 2 of the ECIA.

(b) *Failure to maintain effort.* (1) If a State agency fails to maintain effort and a waiver under § 203.42 is not granted, the SEA shall reduce the State agency's allocation of funds under this part in the exact proportion by which the State agency fails to meet 90 percent of both the combined fiscal effort per student and aggregate expenditures (using the measure most favorable to the State agency) for the second preceding fiscal year.

(2) In determining maintenance of effort for the fiscal year immediately following the fiscal year in which the State agency failed to maintain effort, the SEA shall consider the State agency's fiscal effort for the second preceding fiscal year to be no less than 90 percent of the combined fiscal effort per student or aggregate expenditures (using the measure most favorable to the State agency) for the third preceding fiscal year.

Example: In Federal fiscal year 1990, a State agency fails to maintain effort because its fiscal effort in the preceding fiscal year (1988) is less than 90 percent of its fiscal effort in the second preceding fiscal year (1987). In assessing whether the State agency maintained effort during the next fiscal year (1991), the SEA may consider the State agency's expenditures for the second preceding fiscal year (1988) (the year that caused the State agency's failure to maintain effort) to be no less than 90 percent of the State agency's expenditures in the prior fiscal year (1987).

(Authority: 20 U.S.C. 2728(a), 2802(a))

§ 203.42 Under what circumstances may an SEA waive the maintenance of effort requirement?

(a)(1) An SEA may waive, for one fiscal year only, the maintenance of effort requirement in § 203.41 if the SEA determines that a waiver would be equitable due to exceptional or uncontrollable circumstances. These circumstances include but are not limited to the following:

(i) A natural diaster.

(ii) A precipitous and unforeseen decline in the financial resources of the State agency.

(2) An SEA may not consider tax initiatives or referenda to be exceptional or uncontrollable circumstances.

(b)(1) If the SEA grants a waiver under paragraph (a) of this section, the SEA shall not reduce the amount of funds under this part the State agency is otherwise entitled to receive.

(2) In determining maintenance of effort for the fiscal year immediately following the fiscal year for which the waiver was granted, the SEA shall

BEST COPY AVAILABLE

consider the State agency's fiscal effort for the second preceding fiscal year to be no less than 90 percent of the combined fiscal effort per student or aggregate expenditures (using the measure most favorable to the State agency) for the third preceding fiscal year.

Example: In fiscal year 1990, a State agency secures a waiver because its fiscal effort in the preceding year (1988) is less than 90 percent of its fiscal effort in the second preceding fiscal year (1987) due to exceptional or uncontrollable circumstances. In assessing whether the State agency maintained effort during the next fiscal year (1991), the SEA may consider the State agency's expenditures for the second preceding fiscal year (1988) (the year for which the State agency needed a waiver) to be no less than 90 percent of the State agency's expenditures in the prior fiscal year (1987).

(Authority: 20 U.S.C. 2728(a), 2802(a))

§ 203.43 What is the supplement-not-supplant requirement that applies to the program?

(a) Except as provided in paragraph (b) of this section, a State agency may use funds available under this part only to supplement and, to the extent practical, increase the level of non-Federal funds that would, in the absence of funds under this part, be made available for the education of pupils participating in projects funded under this part, and in no case may funds available under this part be used to supplant those non-Federal funds.

(b) To meet the requirement in paragraph (a) of this section, a State agency is not required to provide services under this part through use of a particular instructional method or in a particular instructional setting.

(c) A State agency may exclude, for the purpose of determining compliance with the supplement-not-supplant requirement in paragraph (a) of this section, State and local funds spent to carry out special programs that the Secretary has determined, in advance and in writing, meet the requirements of section 1018(d)(1)(B) of the Act.

(d) For the purposes of determining compliance with paragraph (a) of this section, a program under this part will be considered supplementary to the regular education program on the basis of the number of hours students receive instruction from State sources regardless of the subject areas of instruction.

Example: The regular program of instruction in an institution provides classes with State funds in English, mathematics, and vocational education. Each student receives three hours of instruction each day. The Chapter 1 program provides a remedial reading class for children selected to receive Chapter 1 services. Although reading is not part of the regular program of instruction, the Chapter 1, remedial reading class is supplemental to the regular program because the Chapter 1 services provides additional instructional time for participating children.

(Authority: 20 U.S.C. 2728 (b), (d), 2802 (a), (c))

§ 203.44 What is included in the records of transferred students?

A State agency shall include any individualized education plans in the records of students who transfer to another State or local educational agency.

(Authority: 20 U.S.C. 2802(c))

§ 203.45 How may personnel be assigned supervisory duties?

(a) A State agency may assign personnel paid entirely with funds available under this part to limited supervisory duties that may provide some benefit to children not participating in the Chapter 1 project if—

(1) Similarly situated personnel at the same site, who are not paid with funds available under this part, are assigned these duties; and

(2) The time spent by Chapter 1 personnel on these duties does not exceed the least of the following:

(i) The proportion of total work time that similarly situated non-Chapter 1 personnel at the same site spend performing these duties.

(ii) One period per day.

(iii) Sixty minutes per day.

(b) The amount of time referred to in paragraph (a)(2) of this section may be calculated on a daily, weekly, monthly, or annual basis.

(c) The limited supervisory duties in paragraph (a) of this section need not be limited to classroom instruction and may include but are not limited to the following:

(1) Supervision of halls, playgrounds, lunchrooms, study halls, bus loading and unloading, and homerooms.

(2) Participation as a member of a school curriculum committee.

(3) Participation in the selection of regular curriculum materials and supplies.

(Authority: 20 U.S.C. 2853; H.R. Rept. 95, 100th Cong., 1st Sess. 34–35 (1987))

§ 203.46 What are the requirements for evaluating and reporting project results?

(a) *State agency evaluations.* (1) A State agency that receives funds under this part shall annually conduct an evaluation to determine the impact of the project on the ability of the participants to—

(i) Maintain and improve their educational achievement;

(ii) Maintain school credit in compliance with State requirements; and

(iii) Make the transition to regular or special education programs operated by LEAs.

(2) If an evaluation shows that a project is not making substantial progress in meeting the goals in paragraph (a)(1) of this section, the State agency shall make changes in the project, with the approval of the SEA, that will enable the project to meet those goals.

(b) *SEA evaluation.* (1) An SEA shall conduct an evaluation of programs under this part that is based on State agency data collected under paragraph (a) of this section at least once every two years.

(2) The SEA shall inform its State agencies, in advance, of the specific data that will be needed and how the data may be collected.

(3) The SEA shall—

(i) By a date established by the Secretary, submit the results of that evaluation to the Secretary; and

(ii) Make public the results of that evaluation.

(c) *Performance report.* (1) An SEA shall—

(i) Collect data specified in the Act and by the Secretary in the SEA's performance report; and

(ii) Submit those data to the Secretary.

(2) A State agency receiving funds under this part shall provide to the SEA any data needed by the SEA to complete its performance report.

(d) *Average daily attendance.* On a date specified by the Secretary each year, the SEA shall submit to the Secretary the average daily attendance data required under § 203.21(a).

(Authority: 20 U.S.C. 2729(b), 2802(d), 2835 (a), (d))

§§ 203.47–203.49 [Reserved]

Subpart F—What Are Other State Responsibilities for the Program?

§ 203.50 Does a State have authority to issue State regulations for the program?

(a)(1) Except as provided in paragraph (b) of this section, Chapter 1 does not preempt, prohibit, or encourage State rules, regulations, or policies issued pursuant to State law.

(2) If a State issues rules, regulations, or policies, they may not be inconsistent with the provisions of the following:

(1) The Chapter 1 statute.

(2) The regulations in this part.

(3) Other applicable Federal statutes and regulations.

(b) A State may not issue rules, regulations, or policies that limit a State agency's decisions regarding—

(1) Grade levels to be served;

(2) Basic skill areas to be addressed;

(3) Instructional settings, materials, or teaching techniques to be used;

(4) Instructional staff to be employed, as long as this staff meets State certification and licensing requirements for education personnel; or

(5) Other essential support services.

(c) Nothing in paragraph (b) of this section limits an SEA's authority to review and approve State agencies' applications or to ensure that State agencies use Chapter 1 funds in accordance with all applicable requirements.

(d) The State shall identify any State rule, regulation, or policy relating to the administration and operation of Chapter 1 programs, including those based on State interpretation of any Federal law, regulation, or guideline, as a State-imposed requirement.

(e)(1)(i) Except as provided in paragraph (e)(2) of this section, if a State issues rules or regulations relating to the administration and operation of Chapter 1 programs funded under this part, a State committee of practitioners shall review before publication—

(A) Any proposed rule or regulation if one is required under State law; or

(B) Any final rule or regulation if a proposed rule or regulation is not required by State law.

(ii) The State is encouraged to convene the committee of practitioners for the purpose of the review required under paragraph (e)(1)(i) of this section.

(2) In an emergency situation in which a rule or regulation must be issued within a limited time, the State—

(i) May issue a regulation without the prior consultation required in paragraph (e)(1) of this section; and

(ii) Shall immediately convene a committee of practitioners to review the emergency regulation prior to issuance in final form.

(3)(i) The committee of practitioners must include—

(A) Administrators;

(B) Teachers; and

(C) Parents.

(ii) The majority of the committee must be representatives of State agencies.

(4) SEAs are encouraged to request from appropriate organizations recommendations for membership on the committee.

(Authority: 20 U.S.C. 2851; H.R. Rept. 95, 100th Cong., 1st Sess. 34 (1987))

§ 203.51 How can State personnel paid with Chapter 1 funds be assigned to State programs?

(a) As provided in paragraph (b) of this section, an SEA may use funds received under § 203.22(a) to pay the salary costs for any employee assigned to programs funded under this part and special State programs that meet the requirements of section 1018(d)(1) of the Act.

(b) Salary costs are allowable charges to funds received under § 203.22(a) if the following conditions are met:

(1) An employee's assignments are related to the SEA's administrative, training, and technical assistance responsibilities under the programs.

(2) The SEA maintains contemporaneous time distribution records reflecting the actual amount of time the employee spends on the programs.

(3) The time distribution records are signed by the employee's supervisor.

(4) Actual costs are charged to the programs on the basis of the employee's time distribution records.

(Authority: 20 U.S.C. 2728(d), 2853; H.R. Rept. 95, 100th Cong., 1st Sess. 34 (1987))

§ 203.52 What complaint procedures must an SEA adopt?

(a) *Definition of a complaint.* For the purpose of this section, a complaint is a signed, written statement that includes—

(1) An allegation that a requirement applicable to a program under this part has been violated; and

(2) Information that supports the allegation.

(b) *Who may complain.* Any parent, teacher, or other concerned individual or organization may file a complaint.

(c) *Where to file.* (1) Unless a complaint meets the standards for a direct complaint to the SEA under paragraph (d)(2)(iii) of this section, a complaint must be filed initially with the appropriate State agency.

(2) A complainant who is dissatisfied with the initial decision of the State agency may file an appeal with the SEA.

(d) *Procedures for complaint resolution.* (1) An SEA shall develop and implement written procedures to govern—

(i) Investigation and resolution of complaints by a State agency;

(ii) Review by the SEA of appeals of complaints resolved by a State agency; and

(iii) Investigation and resolution of direct complaints filed with the SEA.

(2) The procedures required under paragraph (d)(1) of this section must include—

(i) Specific time limits for investigation and resolution of complaints by a State agency;

(ii) Specific time limits for resolution of direct complaints and appeals by the SEA; and

(iii) Standards for—

(A) Accepting direct complaints under paragraph (d)(1)(iii) of this section; or

(B) Referring a direct complaint to the appropriate State agency for resolution.

(Authority: 20 U.S.C. 2831(a); H.R. Rept. 567, 100th Cong., 2d Sess. 341 (1988) (Conf. Rept.))

DEPARTMENT OF EDUCATION

34 CFR Part 81

General Education Provisions Act; Enforcement

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary of Education (Secretary) proposes to add a new Part 81 to Title 34 of the Code of Federal Regulations. Part 81 would implement amendments to Part E of the General Education Provisions Act (GEPA) made by Pub. L. 100–297, enacted April 28, 1988. The proposed regulations in this document contain general procedural rules for proceedings before the Office of Administrative Law Judges (OALJ) authorized by the GEPA amendments and specific rules for OALJ hearings for the recovery of funds.

DATES: Comments must be received on or before January 31, 1989.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Barry W. Stevens, U.S. Department of Education, Office of the General Counsel, 400 Maryland Avenue SW., Room 4087 FOB–6, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Barry W. Stevens, (202) 732–2730.

SUPPLEMENTARY INFORMATION: On April 28, 1988, the President signed into law the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988, Pub. L. 100–297. Section 3501 of that statute amends and restates Part E of the General Education Provisions Act (GEPA), which relates to the enforcement of legal requirements under most grant programs administered by the Secretary of Education. The proposed regulations in this document contain standards and procedures relating to the newly-authorized Office of Administrative Law Judges (OALJ) and hearings for the recovery of funds conducted by the OALJ. These proposed regulations thus implement the core provisions of the amended statute. The Secretary intends to develop additional regulations to implement the remaining provisions of Part E, and those regulations will be published in proposed form at a later date. A discussion of specific provisions of the proposed regulations in this document follows.

Subpart A—General Provisions

Subpart A contains provisions relating to the establishment of the OALJ. Section 81.1 sets out the purpose of Part 81. Section 81.2 lists the definitions of terms used in that part, including "applicable program" (*i.e.*, a program to which Part E of GEPA applies) and "disallowance decision" (*i.e.*, an appealable decision of a Departmental official to require a recipient to return funds). Section 81.3 sets out the statutory jurisdiction of the OALJ and provides that the Secretary publishes a notice in the **Federal Register** if he designates an additional proceeding or class of proceedings to be heard by that Office. Section 81.4 states who the members of the OALJ are, provides for the appointment of one of the members as the chief judge, and describes how members are assigned to cases.

Subpart B—General Rules of Procedure

Subpart B contains general procedural rules for any proceeding conducted by the OALJ. For a particular kind of Part E proceeding, the general rules in Subpart B are supplemented by speicific rules for that kind of proceeding. One set of specific rules is Subpart D—Hearings for Recovery of Funds, which is a part of this document. Specific rules for other Part E proceedings will be published in a separate document.

Section 81.10 sets out the authority and responsibility of an Administrative Law Judge (ALJ) in conducting a hearing on the record. This section includes provisions on the disqualification of an ALJ from a case. The Secretary intends that the disqualification provisions be interpreted in the light of 28 U.S.C. 455, relating to the disqualification of a Federal judge.

Section 81.11 describes a hearing on the record under Part 81. This section contemplates that the hearing will generally be conducted on the basis of briefs and other written submissions, and it establishes standards for the receipt of oral testimony and the hearing of oral argument. This section also authorizes an ALJ to hold conferences of the parties in person or by conference telephone call.

Section 81.12 contains provisions for the participation in cases before an ALJ of persons or organizations other than the parties. Under these provisions, a third party files an application to participate with the ALJ. The ALJ reviews the application and determines whether and to what extent participation is warranted. This section contemplates that third-party participation will generally be limited to the submission of briefs but permits certain other forms of participation in the ALJ's discretion.

Section 81.13 permits a party or other participant to be represented by counsel. Section 81.14 requires generally that proceedings at which the parties must appear in person be held in the Washington, DC, area. Section 81.15 prohibits a party or other participant from communicating with an ALJ *ex parte* on any fact at issue in a case or any matter relevant to the merits.

Section 81.16 provides that a party's request for an order or a ruling from an ALJ be made by motion and sets out the standards and procedures for motion practice. Section 81.17 governs the filing of briefs and other written submissions. It requires service of the filed materials on the other party and sets standards for the identification of filing dates.

Section 81.18 provides that the Federal Rules of Evidence do not apply to proceedings under Part 81 but that an ALJ accepts only evidence that is relevant, material, not unduly repetitious, and not inadmissible because it relates to settlement and mediation discussions. This seciton also authorizes an ALJ to take official notice of certain facts. Section 81.19 acknowledges the applicability of legal privileges under common law as interpreted by the Federal courts. Section 81.20 requires that any evidentiary hearing or oral argument be recorded and transcribed and that the transcript be made available to the parties upon request at no charge. This section also describes what the record consists of for purposes of further proceedings.

Section 81.21 pertains to settlement negotiations. It requires an ALJ to stay the proceedingts for settlement negotiations or the approval of a settlement agreement if the parties so request. This section also requires the ALJ to dismiss the case if the parties enter into a settlement agreement and request dismissal. Finally, this section bars disclosing the contents of settlement negotiations to the ALJ and admitting evidence of conduct or statements made during settlement negotiations in any proceeding under Part 81.

Subpart C—Other Rules

Subpart C contains special new rules that apply to OALJ proceedings under the amendments to Part E of GEPA.

Section 81.30 governs the discovery process. It provides, as a general policy, that the parties to a proceeding are encouraged to exchange relevant documents and information voluntarily. This policy is intended to reduce the high cost in time and money that formal discovery may entail and to promote the resolution of disputes through mediation and settlement. In addition, this discovery, provisions pertaining to the

issuance and enforcement of subpoenas, and a limit on the period for discovery. This section also includes an express prohibition against an ALJ's compelling discovery of legally privileged information. See H.R. Rep. No. 95, 100th Cong., 1st Sess., 93 (1987).

Section 81.31 describes the voluntary mediation that is available in cases pending before the OALJ. This section includes provisions concerning the qualifications of a mediator, a limit on the period for mediation, and criteria for extending that period. To promote a free and open discussion during mediation and to preserve the mediator's impartiality, this section bars the introduction of evidence from the mediation discussions in proceedings under Part 81 and prohibits the mediator from disclosing in these proceedings certain information acquired as a part of his or her mediation duties. The Secretary specifically requests comments on how a successful mediation process for OALJ cases may be ensured.

Section 81.32 recites the statutory requirement that the Equal Access to Justice Act, 5 U.S.C. 504, applies to OALJ proceedings. This section also includes a reference to the Department's regulations implementing that statute.

Subpart D—Hearings for Recovery of Funds

Subpart D contains specific rules that apply to hearings for the recovery of funds under applicable programs. The regulations in Subparts A through C apply to these hearings as well.

Section 81.40 sets out the basis for requiring a recipient to return funds to the Department and recites the statutory provision that a decision to do so may be based on evidence in any form. Section 81.41 summarizes the considerations that determine the amount of funds required to be returned: proportionality of the remedy to the violation and the exclusion of any amount attributable to mitigating circumstances or barred by the applicable statute of limitations.

Section 81.42 addresses the first of these considerations—proportionality. This section recites the statutory provision that the amount required to be returned be proportional to the extent of harm caused by a violation of law to an identifiable Federal interest associated with the program in question. The regulations then set out an illustrative list of identifiable Federal interests and a second list of hypothetical examples of how the standards for proportionality apply. The purpose of the examples is to promote predictable, consistent, and equitable results in the enforcement of grant conditions and thereby reduce the litigation associated with the enforcement process.

Section 81.43 addresses the second consideration in setting the measure of recovery—mitigating circumstances. Under the amended statute, a State or local educational agency is not required to return misspent funds if the misexpenditures was caused by certain mitigating circumstances. This section sets out each of the three types of qualifying mitigating circumstances and states what the recipient must prove to be relieved of the obligation to return funds.

Section 81.44 describes the Department's notice of a disallowance decision. The notice must include a prima facie case for the recovery of funds and inform the recipient of its statutory rights to obtain review of the decision by the OALJ and to request mediation. In addition, this section requires that the notice describe the time available to apply for review and the procedure for filing an application for review.

Sections 81.45 and 81.46 describe the means by which the Department may reduce the amount of a claim: redetermining the claim on the basis of a proper application of the law to the facts, compromising the claim under government-wide standards, or compromising the claim under standards in the amended Part E of GEPA. Section 81.46 recites the statutory standards and procedures for compromising a claim under the GEPA provisions, which permit the Secretary to compromise up to $200,000 in the amount of a claim.

Section 81.47 states the statutory requirement that a recipient file an application for review with the OALJ within 30 days of receipt of the notice of a disallowance decision. This section also sets out the required contents of such an application. If an application is timely filed, the ALJ who considers it may permit the recipient to supplement or amend the application with respect to issues that were timely raised.

Section 81.48 describes the process by which an application for review is considered. First, the ALJ assign to the case reviews the Department's notice of a disallowance decision for compliance with the requirements in 81.44. If the notice meets these requirements, the ALJ proceeds to consider the application for review; if not, the notice is returned to the Departmental official who issued it for possible modification and reissuance. If the application for review, with any supplements or amendments, meets the requirements of 81.47, the ALJ accepts jurisdiction of the case and schedules a hearing on the record; if not, the disallowance decision becomes the final decision of the Department.

Section 81.49 implements the statutory requirements for timely adjudication by requiring that all evidence in a case be submitted within 90 days of the OALJ's receipt of the application for review, subject to extension for good cause. Section 81.50 implements the statutory provisions relating to the burden of proof. This section provides that the recipient presents its case first and has the burden of proving that it is not required to return funds for one or more of the reasons recognized by law.

Section 81.51 requires that the ALJ make an initial decision based on the record (described in 81.20), sets out the elements of such a decision, and describes the procedures for notifying the Secretary and the parties to the case.

Sections 81.52 and 81.53 described the procedure for review of an ALJ's initial decision by the Secretary. Section 81.52 describes how review of an initial decision may be obtained. Because of the limited time available under the statute for the Secretary's review, this section is framed to permit both parties to seek review simultaneously even if one party seeks no modification of the initial decision. As provided by the statute, a party has 30 days from receipt of the initial decision to file its petition for review. This section requires that the petition be filed by hand-delivered or overnight mail delivery and that a copy be simultaneously served on the other party by these means. This section also sets out the required contents of a petition and establishes a 15-day period for a party to file a responsive statement of its views on the issues raised in the other side's petition.

Section 81.53 states which decisions are and are not subject to review and what materials the Secretary considers during the review process. This section recites the statutory substantial evidence rule respecting an ALJ's findings of fact and prohibits the introduction of new evidence after the initial decision except in extraordinary circumstances. If these circumstances are found, the Secretary remands the case to the ALJ. This section also provides that the Secretary, for good cause, may remand a case to the ALJ for further briefing or for clarification and revision of the initial decision. Finally, this section describes the contents of any decision to modify or set aside an ALJ's initial decision and the procedure for notifying the parties.

Section 81.54 describes when an ALJ's initial decision or the Secretary's decision on review becomes the final decision of the Department. Section

81.55 describes how the Department collects a claim and sets out the standards for when collecting action may be undertaken. This section also recites the statutory prohibition against the Department's collecting interest for the period between the date of the disallowance decision and the date of the final decision of the Department.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive order 12291. They are not classified as major regulations because they do not meet the criteria for major regulations established in that Order.

Regulatory Flexibility Act Clarification

The Secretary certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities. While some small local educational agencies and small nonprofit organizations would be affected by these regulations, the Secretary does not expect the total number of these entities to be significant in comparison to the total number of entities that would be subject to these regulations.

Paperwork Reduction Act of 1980

These proposed regulations have been examined under the Paperwork Reduction Act of 1980 and have been found to contain no information collection requirements.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3034 FOB–6, 400 Maryland Avenue, SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

Assessment of Education Impact

The Secretary particularly requests comments on whether the proposed regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 Part 81

Enforcement, General Education Provisions Act.

(Catalog of Federal Domestic Assistance Number does not apply)

Dated: October 20, 1988.

Lauro F. Cavazos,

Secretary of Education.

The Secretary proposes to add a new Part 81 to Title 34 of the Code of Federal Regulations to read as follows:

PART 81—GENERAL EDUCATION PROVISIONS ACT—ENFORCEMENT

Subpart A—General Provisions

Sec.
81.1 Purpose.
81.2 Definitions.
81.3 Jurisdiction.
81.4 OALJ membership and assignment to cases.

Subpart B—General Rules of Procedure

81.10 Authority and responsibility of an ALJ.
81.11 Hearing on the record.
81.12 Third-party participation.
81.13 Representation.
81.14 Location of proceedings.
81.15 Ex parte communications.
81.16 Motions.
81.17 Filing requirements.
81.18 Evidence.
81.19 Privileges.
81.20 The record.
81.21 Settlement negotiations.

Subpart C—Other Rules

81.30 Discovery.
81.31 Mediation.
81.32 Costs and fees of parties.

Subpart D—Hearings for Recovery of Funds

81.40 Basis for recovery of funds.
81.41 Measure of recovery.
81.42 Proportionality.
81.43 Mitigating circumstances.
81.44 Notice of a disallowance decision.
81.45 Reduction of claims.
81.46 Compromise of claims under GEPA.
81.47 Application for review of a disallowance decision.
81.48 Consideration of an application for review.
81.49 Submission of evidence.
81.50 Burden of proof.
81.51 Initial decision.
81.52 Petition for review of an initial decision.
81.53 Review by the Secretary.
81.54 Final decision of the Department.
81.55 Collection of claims.

Authority: 20 U.S.C. 1221e–3(a)(1), 1234–1234i, 3474(a), unless otherwise noted.

Subpart A—General Provisions

§ 81.1 Purpose.

The regulations in this part govern the enforcement of legal requirements under applicable programs administered by the Department of Education and implement Part E of the General Education Provisions Act (GEPA).

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 3474(a))

§ 81.2 Definitions.

The following definitions apply to the terms used in this part:

"Administrative Law Judge" (ALJ) means a judge appointed by the Secretary in accordance with section 451 (b) and (c) of GEPA.

"Applicable program" means any program for which the Secretary of Education has administrative responsibility, except a program authorized by—

(a) The Higher Education Act of 1965, as amended;

(b) The Act of September 30, 1950 (Pub. L. 874, 81st Congress), as amended; or

(c) The Act of September 23, 1950 (Pub. L. 815, 81st Congress), as amended.

"Department" means the United States Department of Education.

"Disallowance decision" means the decision of an authorized Departmental official that a recipient must return funds because it made an expenditure of funds that was not allowable or otherwise failed to discharge its obligation to account properly for funds.

"Party" means either of the following:

(a) A recipient that appeals a decision.

(b) An authorized Departmental official who issues a decision that is appealed.

"Recipient" means the recipient of a grant or cooperative agreement under an applicable program.

"Secretary" means the United States Secretary of Education.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234 (b), (c), and (f)(1); 1234a(a)(1); 1234i; 3474(a))

§ 81.3 Jurisdiction.

(a) The Office of Administrative Law Judges (OALJ) established under section 451(a) of GEPA has jurisdiction to conduct the following proceedings concerning an applicable program:

(1) Hearings for recovery of funds.

(2) Withholding hearings.

(3) Cease and desist hearings.

(b) The OALJ also has jurisdiction to conduct other proceedings designated by the Secretary. If a proceeding or class of proceedings is so designated, the Department publishes a notice of the designation in the **Federal Register**.

(Authority: 5 U.S.C. 554, 20 U.S.C. 1234(a))

§ 81.4 OALJ membership and assignment to cases.

(a) The Secretary appoints Administrative Law Judges as members of the OALJ.

(b) The Secretary appoints one of the members of the OALJ to be the chief judge. The chief judge is responsible for

the efficient and effective administration of the OALJ.

(c) The chief judge assigns an ALJ to each case or class of cases within the jurisdiction of the OALJ.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234 (b) and (c), 3474(a))

Subpart B—General Rules of Procedure

§ 81.10 Authority and responsibility of an ALJ.

(a) An ALJ assigned to a case conducts a hearing on the record. The ALJ regulates the course of the proceedings and the conduct of the parties to ensure a fair, expeditious, and economical resolution of the case in accordance with applicable law.

(b) An ALJ is bound by all applicable statutes and regulations and may neither waive them nor rule them invalid.

(c) An ALJ is disqualified in any case in which the ALJ has a substantial interest, has been of counsel, is or has been a material witness, or is so related to or connected with any party or the party's attorney as to make it improper for the ALJ to be assigned to the case.

(d)(1) An ALJ may disqualify himself or herself at any time on the basis of the standards in paragraph (c) of this section.

(2) A party may file a motion to disqualify an ALJ under the standards in paragraph (c) of this section. A motion to disqualify must be accompanied by an affidavit that meets the requirements of 5 U.S.C. 556(b). Upon the filing of such a motion and affidavit, the ALJ decides the disqualification matter before proceeding further with the case.

(Authority: 5 U.S.C. 556(b); 20 U.S.C. 1221e–3(a)(1); 1234 (d), (f)(1), and (g)(1); 3474(a))

§ 81.11 Hearing on the record.

(a) A hearing on the record is a process for the orderly presentation of evidence and arguments by the parties.

(b) An ALJ conducts the hearing entirely on the basis of briefs and other written submissions unless—

(1) The ALJ determines, after reviewing all appropriate submissions, that oral testimony is needed to resolve a material factual issue in dispute; or

(2) The ALJ determines, after reviewing all appropriate submissions, that oral argument is needed for a proper disposition of the case.

(c) An ALJ may hold conferences of the parties in person or by conference telephone call.

(Authority: 5 U.S.C. 556(d); 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 3474(a))

§ 81.12 Third-party participation.

(a) A person or organization, other than a party, that wishes to participate in a case shall file an application to participate with the ALJ assigned to the case. The application must—

(1) Identify the case in which participation is sought;

(2) State how the applicant's interest relates to the case;

(3) State how the applicant's participation would aid in the disposition of the case; and

(4) State how the applicant seeks to participate.

(b) The ALJ may permit and applicant to participate if the ALJ determines that the applicant's participation—

(1) Will aid in the disposition of the case;

(2) Will not unduly delay the proceedings; and

(3) Will not prejudice the adjudication of the parties' rights.

(c) If the ALJ permits an applicant to participate, the ALJ permits the applicant to file briefs.

(d)(1) In addition to the participation described in paragraph (c) of this section, the ALJ may permit the applicant to participate in any or all of the following ways:

(i) Submit documentary evidence.

(ii) Provide oral testimony.

(iii) Make oral argument.

(2) The ALJ may place appropriate limits on an applicant's participation to ensure the efficient conduct of the proceedings.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 3474(a))

§ 81.13 Representation.

A party to, or other participant in, a case may be represented by counsel.

(Authority: 20 U.S.C. 1221e–3(a)(1), 3474(a))

§ 81.14 Location of proceedings.

Any conference, hearing, argument, or other proceeding at which the parties are requir d to appear in person is held in the Washington, DC, metropolitan area unless the ALJ determines that that location is not feasible.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 3474(a))

§ 81.15 Ex parte communications.

A party to, or other participant in, a case may not communicate with an ALJ on any fact in issue in the case or on any matter relevant to the merits of the case unless the parties are given notice and an opportunity to participate.

(Authority: 20 U.S.C. 554(d)(1), 557(d)(1)(A); 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 3474(a))

§ 81.16 Motions.

(a) To obtain an order or a ruling from an ALJ, a party shall make a motion to the ALJ.

(b) Except for a request for an extension of time, a motion must be made in writing unless the parties appear in person or participate in a conference telephone call. The ALJ may require a party to reduce an oral motion to writing.

(c) If a party files a motion, the party shall simultaneously serve a copy of the motion on the other party by hand-delivery or by mail.

(d) Except for a request for an extension of time, the ALJ may not grant a party's written motion without the consent of the other party unless the other party has had at least 21 days from the date of service of the motion to respond. However, the ALJ may deny a motion without awaiting a response.

(e) The date of service of a motion is determined by the standards for determining a filing date in § 81.17(c).

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 3474(a))

§ 81.17 Filing requirements.

(a) Any written submission to an ALJ or the OALJ under this part must be filed by hand-delivery or by mail.

(b) If a party files a brief or other document with an ALJ or the OALJ, the party shall simultaneously serve a copy of the filed material on the other party by hand-delivery or by mail.

(c)(1) The filing date for a written submission to an ALJ or the OALJ is either—

(i) The date of hand-delivery; or

(ii) The date of mailing.

(2) If a scheduled filing date falls on a Saturday, Sunday, or Federal holiday, the filing deadline is the next business day.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 3474(a))

§ 81.18 Evidence.

(a) The Federal Rules of Evidence do not apply to proceedings under this part. However, the ALJ accepts only evidence that is—

(1) Relevant;

(2) Material;

(3) Not unduly repetitious; and

(4) Not inadmissible under § 81.21 or § 81.31.

(b) The ALJ may take official notice of facts that are generally known or capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned.

(Authority: 5 U.S.C. 556 (d) and (e); 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 3474(a))

§ 81.19 Privileges.

The privilege of a person or governmental organization not to produce documents or provide information in a proceeding under this part is governed by the principles of common law as interpreted by the courts of the United States.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1232(f)(1), 3474(a))

§ 81.20 The record.

(a) The ALJ arranges for any evidentiary hearing or oral argument to be recorded and transcribed and the transcript made available to the parties upon request at no charge.

(b) The record of a hearing on the record consists of—

(1) All papers filed in the proceeding;

(2) Documentary evidence admitted by the ALJ;

(3) The transcript of any evidentiary hearing or oral argument; and

(4) Rulings, orders, and subpoenas issued by the ALJ.

(Authority: 5 U.S.C. 556(e), 557(c); 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 3474(a))

§ 81.21 Settlement negotiations.

(a) If the parties to a case file a joint motion requesting a stay of the proceedings for settlement negotiations or the approval of a settlement agreement, the ALJ grants the stay.

(b) Evidence of conduct or statements made during settlement negotiations is not admissible in any proceeding under this part. However, evidence that is otherwise discoverable may not be excluded merely because it was presented during settlement negotiations.

(c) The parties may not disclose the contents of settlement negotiations to the ALJ. If the parties enter into a settlement agreement and file a joint motion to dismiss the case, the ALJ grants the motion.

(Authority: 5 U.S.C. 554(c)(1); 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 3474(a))

Subpart C—Other Rules

§ 81.30 Discovery.

(a) The parties to a case are encouraged to exchange relevant documents and information voluntarily.

(b) In a proceeding before the OALJ, the ALJ, at a party's request, may order compulsory discovery described in paragraph (c) of this section if the ALJ determines that—

(1) The order is necessary to secure a fair, expeditious, and economical resolution of the case;

(2) The discovery requested is likely to elicit relevant information with respect to an issue in the case;

(3) The discovery request was not made primarily for the purposes of delay or harassment; and

(4) The order would serve the ends of justice.

(c) If compulsory discovery is prmissible under paragraph (b) of this section, the ALJ may order a party to do one or more of the following:

(1) Produce relevant documents.

(2) Answer written interrogatories that inquire into relevant matters.

(3) Have depositions taken.

(d) The ALJ may issue a subpoena to enforce an order described in this section and may apply to the appropriate court of the United States to enforce the subpoena.

(e) The ALJ may not compel the discovery of information that is legally privileged.

(f)(1) The ALJ limits the period for discovery to not more than 90 days but may grant an extension for good cause.

(2) At a party's request, the ALJ may set a specific schedule for discovery.

(Authority: 20 U.S.C. 1234 (f)(1) and (g))

§ 81.31 Mediation.

(a) Voluntary mediation is available for proceedings that are pending before the OALJ.

(b) A mediator must be independent of, and agreed to by, the parties to the case.

(c) A party may request mediation by filing a motion with the ALJ assigned to the case. The ALJ arranges for a mediator if the parties to the case agree to mediation.

(d) A party may terminate mediation at any time. Mediation is limited to 120 days unless the mediator informs the ALJ that—

(1) The parties are likely to resolve some or all of the dispute; and

(2) An extension of time will facilitate an agreement.

(e) The ALJ stays the proceedings during mediation.

(f)(1) Evidence of conduct or statements made during mediation is not admissible in any proceeding under this part. However, evidence that is otherwise discoverable may not be excluded merely because it was presented during mediation.

(2) A mediator may not disclose, in any proceeding under this part, information acquired as a part of his or her official mediation duties that relates to any fact in issue in the case or any matter relevant to the merits of the case.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234(f)(1) and (h), 3474(a))

§ 81.32 Costs and fees of parties.

The Equal Access to Justice Act, 5 U.S.C. 504, applies by its terms to proceedings before the OALJ. Regulations under that statute are in 34 CFR Part 21.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234(f), 3474(a))

Subpart D—Hearings for Recovery of Funds

§ 81.40 Basis for recovery of funds.

(a) Subject to the provisions of § 81.41, an authorized Departmental official requires a recipient to return funds to the Department if—

(1) The recipient made an unallowable expenditure of funds under a grant or cooperative agreement; or

(2) The recipient otherwise failed to discharge its obligation to account properly for funds under a grant or cooperative agreement.

(b) An authorized Departmental official may base a decision to require a recipient to return funds upon an audit report, an investigative report, a monitoring report, or any other evidence.

(Authority: 20 U.S.C. 1234a(a) (1) and (2))

§ 81.41 Measure of recovery.

A recipient that made an unallowable expenditure or otherwise failed to discharge its obligation to account properly for funds shall return an amount that—

(a) Meets the standards for proportionality in § 81.42;

(b) Excludes any amount attributable to mitigating circumstances under the standards in § 81.43; and

(c) Excludes any amount expended in a manner not authorized by law more than five years before the recipient received the notice of a disallowance decision under § 81.44.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 1234a(k), 1234b (a) and (b), 3474(a))

§ 81.42 Proportionality.

(a)(1) A recipient that made an unallowable expenditure or otherwise failed to account properly for funds shall return an amount that is proportional to the extent of the harm its violation caused to an identifiable Federal interest associated with the program under which it received the grant or cooperative agreement.

(2) An identifiable Federal interest under paragraph (a)(1) of this section includes, but is not limited to, the following:

(i) Serving only eligible beneficiaries.

(ii) Providing only authorized services or benefits.

(iii) Complying with expenditure requirements and conditions, such as set-aside, excess cost, maintenance of effort, comparability, supplement-not-supplant, and matching requirements.

(iv) Preserving the integrity of planning, application, recordkeeping, and reporting requirements.

(v) Maintaining accountability for the use of funds.

(b) The following examples illustrate how the standards for proportionality apply. The examples present hypothetical cases and do not represent interpretations of any actual program statute or regulation.

(1) *Ineligible beneficiaries.* A State uses 15 percent of its grant to meet the special educational needs of children who were migratory, but who have not migrated for more than five years as a Federal program statute requires for eligibility to participate in the program. Result: Recovery of 15 percent of the grant—all program funds spent for the benefit of those chidren. Although the services were authorized, the children were not eligible to receive them.

(2) *Ineligible beneficiaries.* A Federal program designed to meet the special educational needs of gifted and talented children requires that at least 80 percent of the children served in any project must be identified as gifted or talented. A local educational agency (LEA) conducts a project in which 76 students are identified as gifted or talented and 24 are not. The project was designed and implemented to meet the special educational needs of gifted and talented students. Result: The LEA must return five percent of the project costs. The LEA provided authorized services, for a project in which the 76 target students had to constitute at least 80 percent of the total. Thus, the maximum number of non-target students permitted was 19. Project costs relating to the remaining five students must be returned.

(3) *Ineligible beneficiaries.* Same as the example in paragraph (b)(2) of this section, except that only 15 percent of the children were identified as gifted or talented. On the basis of the low percentage of these children and other evidence, the authorized Departmental official finds that the project as a whole did not address their special educational needs and was outside the purpose of the statute. Result: The LEA must return its entire award. The difference between the required percentage of gifted and talented children and the percentage actually enrolled is so substantial that, if consistent with other evidence, the official may reasonably conclude the entire grant was misused.

(4) *Ineligible beneficiaries.* Same as the example in paragraph (b)(2) of this section, except that 60 percent of the children were identified as gifted or talented, and it is not clear whether the project was designed or implemented to meet the special educational needs of these children. Result: If it is determined that the project was designed and implemented to serve their special educational needs, the LEA must return 25 percent of the project costs. A project that included 60 target children would meet the requirement that 80 percent of the children served be gifted and talented if it included no more than 15 other children. Thus, while the LEA provided authorized services, only 75 percent of the beneficiaries were authorized to participate in the project (60 target children and 15 others). If the authorized Departmental official, after examining all the relevant facts, determines that the project was not designed and implemented to serve the special educational needs of gifted or talented students, the LEA must return its entire award because it did not provide services authorized by the statute.

(5) *Unauthorized activities.* An LEA uses ten percent of its grant under a Federal program intended to meet the special educational needs of educationally deprived children to pay for recreational trips to an amusement park and a circus. All the children are eligible to receive program services. Result: Recovery of ten percent of the grant—all program funds spent for the trips. Although the children were eligible to receive program services, the trips were unrelated to a special educational need and, therefore, not authorized by law.

(6) *Set-aside requirement.* A State uses 22 percent of its grant for one fiscal year under a Federal adult education program to provide programs of equivalency to a certificate of graduation from a secondary school. The adult education program statute restricts those programs to no more than 20 percent of the State's grant. Result: Two percent of the State's grant must be returned. Although all 22 percent of the funds supported adult education, the State had no authority to spend more than 20 percent on secondary school equivalency programs.

(7) *Set-aside requirement.* A State uses eight percent of its basic State grant under a Federal vocational education program to pay for the excess cost of vocational educational services and activities for handicapped individuals. The program statute requires a State to use ten percent of its basic State grant for this purpose. Result: The State must return two percent of its basic State grant, regardless of how it was used. Because the State was required to spend that two percent on services and activities for handicapped individuals and did not do so, it diverted those funds from their intended purposes, and the Federal interest was harmed to that extent.

(8) *Excess cost requirement.* An LEA uses funds reserved for the disadvantaged under a Federal vocational education program to pay for the cost of the same vocational education services it provides to non-disadvantaged individuals. The program statute requires that funds reserved for the disadvantaged must be used to pay only for the supplemental or additional costs of vocational education services that are not provided to other individuals and that are required for disadvantaged individuals to participate in vocational education. Result: All the funds spent on the disadvantaged must be returned. Although the funds were spent to serve the disadvantaged, the funds were available to pay for only the supplemental or additional costs of providing services to the disadvantaged.

(9) *Maintenance-of-effort requirement.* An LEA participates in a Federal program in fiscal year 1988 that requires it to maintain its expenditures from non-Federal sources of program purposes to receive its full allotment. The program statute requires that non-Federal funds expended in the first preceding fiscal year must be at least 90 percent of non-Federal funds expended in the second preceding fiscal year and provides for a reduction in grant amount proportional to the shortfall in expenditures. No waiver of the requirement is authorized. In fiscal year 1986 the LEA spent $100,000 from non-Federal sources for program purposes; in fiscal year 1987, only $87,000. Result: The LEA must return 1/30 of its fiscal year 1988 grant—the amount of its grant that equals the proportion of its shortfall ($3,000) to the required level of expenditures ($90,000). If, instead, maintenance of expenditures were a clear condition of the LEA's eligibility to receive funds and there were no provisions for a proportional reduction in the grant award, the LEA would be required to return its entire grant.

(10) *Supplanting prohibition.* An LEA uses funds under a Federal drug education program to provide drug abuse prevention information to students in the eight grade. The LEA is required to provide that information under State law. Funds under the Federal program statute are subject to a supplement-not-supplant requirement. Result: All the funds used to provide the required information to the eighth-grade

students must be returned. The Federal funds did not increase the total amount of spending for program purposes because the information would have been provided with non-Federal funds if the Federal funds were not available.

(11) *Matching requirement.* A State receives an allotment of $90,000 for fiscal year 1988 under a Federal adult education program. It expends its full allotment and $8,000 from its own resources for adult education. Under the Federal statute, the Federal share of expenditures for the State's program is 90 percent. Result: The State must return the unmatched Federal funds, or $18,000. Expenditure of a $90,000 Federal allotment required $10,000 in matching State expenditures, $2,000 more than the State's actual expenditures. At a ratio of one State dollar for every nine Federal dollars, $18,000 in Federal funds was unmatched.

(12) *Application requirements.* An LEA submits an application to its State educational agency (SEA) for a subgrant of Federal program funds to carry out school-level basic skills development programs. After it receives the Federal funds, it decides instead to use 20 percent of the funds to carry out a program for gifted and talented elementary school students, but does not amend its application to the SEA. Result: 20 percent of the LEA's subgrant must be returned. The LEA had no authority under the Federal statute to use the funds except as provided by its approved local application. The statutorily required planning process was circumvented and accountability for the proper use of Federal funds was not maintained.

(13) *Application requirements.* Under a State-administered program, an LEA is required to submit an application to its SEA, which must approve that application before it may make a subgrant to the LEA. The LEA never submits an application, but the SEA awards a subgrant anyway. The LEA uses the subgrant to carry out activities that would have been authorized if included in an approved local application. Result: The SEA must return the amount of the subgrant. The statutorily required planning process was circumvented, specific application requirements were avoided, and accountability was not maintained.

(14) *Harmless violation.* Under a Federal program, a grantee is required to establish a 15-member advisory council of affected teachers, school administrators, parents, and students to assist in program design, monitoring, and evaluation. Although the law requires at least three student members of the council, a grantee's council contains only two. The project is carried out, and no damage to the project attributable to the lack of a third student member can be identified. Result: No financial recovery is required, although the grantee must take other appropriate steps to come into compliance with the law. The grantee's violation has not measurably harmed a Federal interest associated with the program.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 1234b(a), 3474(a))

§ 81.43 Mitigating circumstances.

(a) A recipient that is a State or local educational agency and made an unallowable expenditure or otherwise failed to account properly for funds is not required to return any amount that is attributable to the mitigating circumstances described in paragraph (b), (c), or (d) of this section.

(b) Mitigating circumstances exist if it would be unjust to compel the recovery of funds because the recipient's violation was caused by erroneous written guidance from the Department. To prove mitigating circumstances under this paragraph, the recipient shall prove that—

(1) The guidance was provided in response to a specific written request from the recipient that is clearly identified as a request for authoritative guidance;

(2) The guidance was provided by a Departmental official authorized to provide the guidance, identified by notice in the **Federal Register**;

(3) The recipient actually relied on the guidance as the basis for the conduct that constituted the violation; and

(4) The recipient's reliance on the guidance was reasonable.

(c) Mitigating circumstances exist if it would be unjust to compel the recovery of funds because the recipient's violation was caused by the Department's failure to provide timely guidance. To prove mitigating circumstances under this paragraph, the recipient shall prove that—

(1) The recipient in good faith submitted a written request for guidance, clearly identified as a request for authoritative guidance, with respect to the legality of a proposed expenditure or practice;

(2) The request was submitted by certified mail, return receipt requested, to a Departmental official authorized to provide the requested guidance, as provided by notice in the **Federal Register**;

(3) The request—

(i) Accurately described the proposed expenditure or practice; and

(ii) Included the facts necessary for the Department's determination of its legality;

(4) The request contained the certification of the chief legal officer of the appropriate State educational agency that the officer—

(i) Examined the proposed expenditure or practice; and

(ii) Believed it was permissible under State and Federal law applicable at the time of the certification;

(5) The recipient reasonably believed the proposed expenditure or practice was permissible under State and Federal law applicable at the time it submitted the request to the Department;

(6) No Departmental official authorized to provide the requested guidance responded to the request within 90 days of its receipt by the Department; and

(7) The recipient made the proposed expenditure or engaged in the proposed practice after the expiration of the 90-day period.

(d) Mitigating circumstances exist if it would be unjust to compel the recovery of funds because the recipient's violation was caused by the recipient's compliance with a judicial decree from a court of competent jurisdiction. To prove mitigating circumstances under this paragraph, the recipient shall prove that—

(1) The recipient was legally bound by the decree;

(2) The recipient actually relied on the decree when it engaged in the conduct that constituted the violation; and

(3) The recipient's reliance on the decree was reasonable.

(e) If a Department official authorized to provide the requested guidance responds to a request described in paragraph (c) of this section more than 90 days after its receipt, the recipient that made the request shall comply with the guidance at the earliest practicable time.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 1234b(b), 3474(a))

§ 81.44 Notice of a disallowance decision.

(a) If an authorized Departmental official decides that a recipient must return funds under § 81.40, the official gives the recipient written notice of a disallowance decision. The official sends the notice by certified mail, return receipt requested, or other means that ensure proof of receipt.

(b)(1) The notice must include a prima facie case for the recovery of funds.

(2) For the purpose of this section, a prima facie case is a statement of the law and the facts that, unless rebutted,

is sufficient to sustain the conclusion drawn in the notice. The facts may be set out in the notice or in a document that is referenced by the notice and available to the recipient.

(3) A statement that the recipient failed to maintain records required by law or failed to allow an authorized representative of the Secretary access to those records constitutes a prima facie case for the recovery of the funds affected.

(c) The notice must inform the recipient that it may—

(1) Obtain a review of the disallowance decision by the OALJ; and

(2) Request mediation under § 81.31.

(d) The notice must describe—

(1) The time available to apply for a review of the disallowance decision; and

(2) The procedure for filing an application for review.

(Authority: 20 U.S.C. 1221e-3(a)(1), 1234(f)(1), 1234a(a), 3474(a))

§ 81.45 Reduction of claims.

The Secretary or an authorized Departmental official as appropriate may, after the issuance of a disallowance decision, reduce the amount of a claim established under this subpart by—

(a) Redetermining the claim on the basis of the proper application of the law, including the standards for the measure of recovery under § 81.41, to the facts;

(b) Compromising the claim under the Federal Claims Collection Standards in 4 CFR Part 103; or

(c) Compromising the claim under § 81.46, if applicable.

(Authority: 20 U.S.C. 1221e-3(a)(1), 1234(f)(1), 1234a(j), 3474(a); 31 U.S.C. 3711)

§ 81.46 Compromise of claims under GEPA.

(a) The Secretary or an authorized Departmental official as appropriate may compromise a claim established under this subpart without following the procedures in 4 CFR Part 103 if—

(1)(i) The amount of the claim does not exceed $200,000; or

(ii) The difference between the amount of the claim and the amount agreed to be returned does not exceed $200,000; and

(2) The Secretary or the official determines that—

(i) The collection of the amount by which the claim is reduced under the compromise would not be practical or in the public interest; and

(ii) The practice that resulted in the disallowance decision has been corrected and will not recur

(b) Not less than 45 days before compromising a claim under this section, the Department publishes a notice in the **Federal Register** stating—

(1) The intention to compromise the claim; and

(2) That interested persons may comment on the proposed compromise.

(Authority: 20 U.S.C. 1221e-3(a)(1), 1234(f)(1), 1234a(j), 3474(a))

§ 81.47 Application for review of a disallowance decision.

(a) If a recipient wishes to obtain review of a disallowance decision, the recipient shall file a written application for review with the OALJ.

(b) A recipient shall file an application for review not later than 30 days after the date it receives the notice of a disallowance decision.

(c) An application for review must contain—

(1) A copy of the disallowance decision of which review is sought;

(2) A short and plain statement of the disputed issues of law and fact, the recipient's position with respect to these issues, and the disallowed funds the recipient contends need not be returned; and

(3) A statement of the facts and the reasons that support the recipient's position.

(d) The ALJ who considers a timely application for review may permit the recipient to supplement or amend the application with respect to issues that were timely raised. Any requirement to return funds that is not timely appealed becomes the final decision of the Department.

(Authority: 20 U.S.C. 1221e-3(a)(1), 1234(f)(1), 1234b(b)(1), 3474(a))

§ 81.48 Consideration of an application for review.

(a) The ALJ assigned to the case under § 81.4 considers an application for review of a disallowance decision.

(b) The ALJ decides whether the notice of a disallowance decision meets the requirements of § 81.44, as provided by section 451(e) of GEPA.

(1) If the notice does not meet those requirements, the ALJ—

(i) Returns the notice, as expeditiously as possible, to the authorized Departmental official who made the disallowance decision,

(ii) Gives the official the reasons why the notice does not meet the requirements of § 81.44; and

(iii) Informs the recipient of the ALJ's decision by certified mail, return receipt requested

(2) An authorized Departmental official may modify and reissue a notice that an ALJ returns

(c) If the notice of a disallowance decision meets the requirements of § 81.44, the ALJ decides whether the application for review meets the requirements of § 81.47.

(1) If the application, including any supplements or amendments under § 81.47(d), does not meet those requirements, the disallowance decision becomes the final decision of the Department.

(2) If the application meets those requirements, the ALJ—

(i) Informs the recipient and the authorized Departmental official that the OALJ has accepted jurisdiction of the case; and

(ii) Schedules a hearing on the record.

(3) The ALJ informs the recipient of the disposition of its application for review by certified mail, return receipt requested. If the ALJ decides that the application does not meet the requirements of § 81.47, the ALJ informs the recipient of the reasons for the decision.

(Authority: 20 U.S.C. 1221e-3(a)(1), 1234(e) and (f)(1), 1234b(b), 3474(a))

§ 81.49 Submission of evidence.

(a) The ALJ schedules the submission of the evidence, whether oral or documentary, to occur within 90 days of the OALJ's receipt of an application for review under § 81.47.

(b) The ALJ may waive the 90-day requirement for good cause.

(Authority: 5 U.S.C. 556(d); 20 U.S.C. 1221e-3(a)(1), 1234(f)(1), 1234a(c), 3474(a))

§ 81.50 Burden of proof.

If the OALJ accepts jurisdiction of a case under § 81.48, the recipient shall present its case first and shall have the burden of proving that the recipient is not required to return the amount of funds that the disallowance decision requires to be returned because—

(a) An expenditure identified in the disallowance decision as unallowable was allowable, and the recipient fully discharged its obligation to account properly for the funds;

(b) The amount required to be returned does not meet the standards for proportionality in § 81.42;

(c) The amount required to be returned includes an amount attributable to mitigating circumstances under the standards in § 81.43; or

(d) The amount required to be returned includes an amount expended in a manner not authorized by law more than five years before the recipient received the notice of the disallowance decision.

(Authority: 20 U.S.C. 1221e-3(a)(1), 1234a(b)(3) and (f)(1), 1234b(b)(1), 3474(a))

§ 81.51 Initial decision.

(a) The ALJ makes an initial decision based on the record.

(b) The initial decision includes the ALJ's findings of fact, conclusions of law, and reasoning on all material issues.

(c) On the day the ALJ makes the initial decision, the ALJ—

(1) Sends the initial decision to the Secretary; and

(2) Sends the initial decision to each of the parties by hand-delivery or by certified mail, return receipt requested.

(d) For the purpose of this section, "initial decision" includes an ALJ's modified decision after the Secretary's remand of a case.

(Authority: 5 U.S.C. 557(c); 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 3474(a))

§ 81.52 Petition for review of an initial decision.

(a) If a party wishes to obtain the Secretary's review of the initial decision of an ALJ, the party files a petition for review with the OALJ, which sends the petition to the Secretary.

(b) A party shall file a petition for review not later than 30 days after the date it receives the initial decision. The party shall file its petition by hand-delivery or by overnight mail delivery.

(c) If a party files a petition for review, the party shall simultaneously serve a copy of the petition on the other party by hand-delivery or by overnight mail delivery.

(d) A petition for review must contain—

(1) The identity of the initial decision of which review is sought; and

(2) A statement of the reasons asserted by the party for affirming the initial decision, modifying it, or setting it aside in whole or in part.

(e)(1) A party may respond to a petition for review by filing a statement of its views on the issues raised in the petition with the OALJ not later than 15 days after the date it receives the petition. The OALJ sends the statement to the Secretary.

(2) A party shall simultaneously serve a copy of its statement of views on the other party by hand-delivery or by overnight mail delivery.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 1234a(e), 3474(a))

§ 81.53 Review by the Secretary.

(a) The Secretary reviews the initial decision of an ALJ on the petition of a party under § 81.52. An interlocutory decision of an ALJ is not subject to review.

(b) The Secretary's review of an initial decision is based on the record of the case, the initial decision, and any submissions of the parties or other participants in the case filed during the review process.

(c)(1) The ALJ's findings of fact, if supported by substantial evidence, are conclusive.

(2) The Secretary, for good cause, may remand the case to the ALJ to take further evidence. The ALJ may make new or modified findings of fact and may modify the initial decision. The new or modified findings, if supported by substantial evidence, are conclusive.

(3) A party may not introduce new evidence after an initial decision unless the Secretary determines that extraordinary circumstances made the introduction of the evidence during the proceeding before the ALJ impossible. If the Secretary permits the introduction of new evidence, the Secretary remands the case to the ALJ.

(d) The Secretary, for good cause, may remand the case to the ALJ for further briefing or for clarification or revision of the initial decision.

(e)(1) If the Secretary modifies or sets aside an initial decision, in whole or in part, the Secretary's decision includes a statement of the reasons that support it.

(2) The Secretary gives a decision to modify, remand, or set aside to the OALJ, which sends the decision to each of the parties by hand-delivery or by mail. If the decision is mailed, the OALJ sends it certified mail, return receipt requested.

(Authority: 5 U.S.C. 557(b); 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 1234a(d), 3474(a))

§ 81.54 Final decision of the Department.

(a) The ALJ's initial decision becomes the final decision of the Department 60 days after the recipient receives the ALJ's decision unless the Secretary modifies, sets aside, or remands the decision during the 60-day period.

(b) If the Secretary modifies or sets aside the ALJ's initial decision, the Secretary's decision becomes the final decision of the Department on the date the recipient receives the Secretary's decision.

(Authority: 20 U.S.C. 1221e–3(a)(1), 1234(f)(1), 1234a(g), 3474(a))

§ 81.55 Collection of claims.

(a) An authorized Departmental official collects a claim established under this subpart by using the standards and procedures in 34 CFR Part 30.

(b) A claim established under this subpart may be collected—

(1) 30 days after a recipient receives notice of a disallowance decision if the recipient fails to file an acceptable application for review under § 81.47; or

(2) On the date of the final decision of the Department under § 81.54 if the recipient obtains review of a disallowance decision.

(c) The Department takes no collection action pending judicial review of a final decision of the Department under section 458 of GEPA.

(d) If a recipient obtains review of a disallowance decision under § 81.48, the Department does not collect interest on the claim for the period between the date of the disallowance decision and the date of the final decision of the Department under § 81.54.

(Authority: 20 U.S.C. 1234(f)(1); 1234a(f) (1) and (2), (i), and (l))

Location of Mining Claims; Assessment Work; Mineral Patent Applications; Amendment Establishing Service Charges and Making Clarifications; Final Rulemaking

VOL 53 ISS 232 DE 2 1988 UMI

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Parts 3830, 3850, and 3860

[AA-680-09-4310; Circular No. 2614]

Location of Mining Claims; Assessment Work; Mineral Patent Applications; Amendment Establishing Service Charges and Making Clarifications

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking amends 43 CFR Parts 3830, 3850, and 3860 to establish or increase service charges connected with the filing and recording of documents required by the General Mining Law of 1872 and the Federal Land Policy and Management Act of 1976. The final rulemaking enables the Bureau of Land Management to recover some of the costs of administering its mining law administration program. It also makes other regulatory changes intended to improve the administration of the mining claim program, to increase equity to program users, and to clarify terminology.

EFFECTIVE DATE: January 3, 1989.

ADDRESS: Any suggestions or inquiries should be sent to: Director (680), Mail Stop 3538, Bureau of Land Management, 1800 C St., NW., Washington, DC. 20240.

FOR FURTHER INFORMATION CONTACT: Roger Haskins, (202) 343–8537 or William Condit, (202) 343–8537.

SUPPLEMENTARY INFORMATION: A proposed rulemaking amending certain sections of the regulations at 43 CFR Subparts 3830, 3850, and 3860 was published in the **Federal Register** on June 23, 1988 (53 FR 23720). After the proposal was published, post cards notifying mining claimants that it was available for comment were sent to approximately 60,000 entities in the United States. This outreach effort generated 557 comments, from 420 individuals, 100 businesses in the mining industry, 33 environmental and mining associations, and 4 units of local government. The individuals, businesses, associations, and local governments represent all regions of the United States, but the majority originated from States west of the Mississippi River.

The comments addressed all aspects of the proposed rulemaking. All comments received were given careful consideration and are addressed in the preamble, either as general comments on the rulemaking as a whole or as specific comments connected with particular proposed changes. In general, the correspondents agreed that regulatory and procedural changes to the program for processing and administering mining claims and patents were needed to clarify terminology or increase program efficiency. They generally disagreed, however, with the methods by which the Bureau proposed to increase efficiency, particularly the Bureau of Land Management's (Bureau) proposals to establish or increase service charges (user fees) for the filing of various mining-claim-related documents. Descriptions of the comments and discussions of their disposition are grouped into either the general comments or specific comments sections below.

General Comments

Three comments challenged the Bureau's authority to record mining claims on public lands. Two of them believed that the Bureau should return its recordation function to the counties where the claims are located. This comment cannot be adopted because its adoption is not legally possible. The Bureau is required by section 314 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1744) to record mining claims. That statute requires the owners of unpatented lode or placer mining claims located before October 21, 1976, to file within 3 years after October 21, 1976, the following: (1) A copy of the official record of the notice of location, including a description of the location of the mining claim sufficient to locate the claim on the ground, and (2) a notice of intention to hold the mining claim or an affidavit of assessment work performed on the claim. The statute also requires that the claimholder file a notice of intention to hold the mining claim or an affidavit of assessment work each year after the initial filing and before December 31. Owners of mill sites and tunnel sites must comply with (1), above, under the statute. Under regulations promulgated January 27, 1977, such owners are required to comply with (2). The statute further requires all claims and sites located after the date of enactment to be recorded within 90 days of location and, in order to hold the mining claim or site, that a notice of intention to hold the mining claim or an affidavit of assessment work be filed every calendar year after the year of location.

The statute further states that failure to file either the notice of intent or the assessment work affidavit would constitute an abandonment of the mining claim by the owner, but that the claim would not be considered abandoned if the notice of intent or assessment was defective or late under other Federal laws requiring filing or recording of mining claims, or if the instrument is filed for record by or on behalf of some but not all of the owners of the mining claim or mill site.

The constitutionality of section 314 was challenged in court. On October 24, 1983, the District Court for the District of Nevada declared section 314 of the Federal Land Policy and Management Act (FLPMA) unconstitutional. The United States appealed directly to the United States Supreme Court. Because of this action, on January 31, 1984, all decisions on mining case recordation cases that were considered abandoned and void were suspended at the request of the Director of the Department of the Interior's Office of Hearings and Appeals, pending a Supreme Court decision on the constitutional question.

On April 1, 1985, the Supreme Court upheld the constitutionality of Section 314 of FLPMA in its entirety. (See *United States v. Locke*, 471 U.S. 84, 1985.) In its *de novo* review of BLM's procedures, it also found the Bureau's administrative system for mining claim recordation processing to be reasonable and adequate. Since that date, the Bureau has been implementing the mining claim recordation system with the objective of maintaining accurate mining claim records.

Several comments on the proposed rulemaking disputed 2 statements made in the preamble: (1) That the regulatory proposals were not a major Federal action significantly affecting the quality of the human environment and (2) that the proposed regulatory changes would not have an adverse effect on a substantial number of small entities. These comments argued that the economic effects of the proposed service charge increases would cause significant adverse effects both on the socio-economic environment and on small businesses in the mining industry. Because the proposal to establish a service charge for the annual filing of either an affidavit of assessment work or a notice of intent to hold was the focus of most comments, the discussion below centers on that service charge.

According to Bureau of Land Management records, approximately 85 percent of Federal mining claimants hold 20 or fewer mining claims. According to one comment, California has the lowest claimholder rate, an average of 2.7 claims per claimholder By contrast, only 1.3 percent of all mining claimants hold more than 200 claims and 0.1 percent hold more than 1,500 claims each. Although there are

exceptions, claimholders holding 1,500 or more claims tend to be medium to large-sized companies, including miners of uranium, precious metals, and base metals.

The proposed rulemaking provided for a $5 per claim per year filing fee on affidavits of annual assessment work and notices of intent to hold. Mining claimants are required by law to do not less than $100 worth of assessment work on or for the benefit of each lode or placer claim each year. Expenditures for mill sites and tunnel sites are necessary as well to maintain their validity. The filing fee would increase the Federally imposed component of the cost of maintaining each claim by not more than 5 percent per year. This increase would amount to $15 for the average California claimant and not more than $100 for the 85 percent of all claimants who hold 20 or fewer claims. Because many claimants seeking to make discoveries on their claims are doing more than the minimum $100 annual labor, their cost increase would be less than 5 percent.

The fee schedule could be considered by some individuals to favor small entities because the new service charges on a small claimholder, one holding 20 claims or less, would be at most $100 per year.

The service charge increases could also benefit small claimholders by reducing the number of what many comments referred to as "paper hangers," individuals who locate large numbers of mining claims for speculative purposes only. According to some comments, these "paper hangers" hold up to 2,000 claims each. The Bureau expects that an elastic response will occur. That is, some claimants holding large numbers of claims are expected to relinquish or drop their more marginal claims rather than pay the new annual filing fee. These lands would then be available for exploration by other individuals.

The response to service charge increases will be inelastic where market demands support the location of claims for a particular mineral commodity, and those claims will not likely be relinquished to avoid the filing fee. In support of this expectation, we note that Nevada counties have recently raised their recording fees for affidavits of assessment work, also charged on a per-claim basis. Numbers of claims filed there have increased significantly, not decreased, despite the increase in recording fees, because of factors such as the increased price of gold and the State's geological favorability for precious metal deposits.

The foregoing discussion is not a substitute for the description and analysis of comments addressing the service charge schedule proposals. That discussion is located at 43 CFR 3833.1–3, below. The data presented above are support for the conclusion that the fee increases would not adversely affect a substantial number of small businesses or create unacceptable socio-economic effects because the burden of the increases would fall equally on all claimholders and is only a small increase in costs of exploration and mining.

Specific Comments

43 CFR 3833.0–5

The proposed rulemaking created the definitions of "relocation" at § 3833.0–5(q) and "amended location" at § 3833.0–5(p) to reduce confusion among mining claimants on which of the terms should be used when recording their mining claims with the Bureau. Approximately 85 percent of those commenting on this section concluded that the proposed definitions further confused mining claimants rather than reducing their confusion. Only 15 percent of those commenting on this section supported the definitions as proposed.

Those opposing the definitions pointed out that they conflicted with established case law, at both the Federal and State levels, and that they posed problems for prospectors in the field. They stated that the definition of "amended notice of location" eliminated the possibility of adding lands to an existing claim. Historically, the comments noted, mining claimants have been allowed to amend their claims to take in additional unappropriated ground. In addition, one comment noted a logical inconsistency within the definition of "amended notice of location". The definition stated that an amended notice could be used to make changes in the position of claim boundary monuments, but could not be used to add lands to a claim. However, changes in boundary position add or remove lands from the claim. As a result of these comments, the final rulemaking revises the definition of "amended notice of location" to allow for the inclusion of additional unappropriated lands.

Opponents of the definition of "relocation" interpreted it to mean that a claimant must waive all rights to a prior claim if he files a new claim. They stated that frequently no definitive distinction could be made between an amendment and a relocation on the ground and that, if the claimant chose incorrectly, he or she could lose all rights to the claim. This would be in conflict with case law in certain States.

The final rulemaking removes the phrase "which is adverse to any former location on the same lands" from the definition of relocation. The purpose of the definition is administrative, that is, the definition is intended to assist Bureau employees in determining whether to assign a new serial number to a relocated claim or to retain the serial number on an amended claim while noting the amendment. It is not the intention of the Bureau to decide whether or not claimants have correctly identified their claims as amended or relocated for the purpose of maintaining title under the mining law. The Bureau's intention is to decide in which set of case files the document belongs.

A few correspondents encouraged the Bureau to accept hybrid claims as legitimate filings. Hybrid claims are combination documents which both amend and relocate a claim at the same time. The comments stated that the filing of such a document gives better protection to claimants if the validity of their claims is challenged in court. The suggestion is not adopted. Acceptance of hybrid claims would involve the setting up of two separate, parallel case files for each claim. Maintaining parallel case files is contrary to Department policy, which was established by several Interior Board of Land Appeal cases (*R. Gail tibbets et al.*, 43 IBLA 210 (1979), as modified by *Hugh B. Fate, Jr. et al.*, 86 IBLA 215 (1985) and *Russell Hoffman (On Reconsideration)*, 87 IBLA 146 (1985)). The principal difficulty in administering parallel files for a claim is that of determining which of the case files constitutes the official record of the claim, if the claim is litigated. Therefore, a hybrid claim, if submitted, will be treated as if it is an amended notice of location and will be adjudicated in connection with the existing mining claim case file of record.

At the suggestion of one comment, the section now contains a definition of "authorized officer." The comment noted that the term was used in many sections of the regulations but was not defined in this subpart.

43 CFR 3833.1–3

The Bureau proposed to establish or increase the established service charges for the following actions: (1) The filing of initial recordations of mining claims and sites and (2) the annual filings of affidavits of assessment work and notices of intent to hold mining claims, amendments to location, and transfers of interest. The service charge for the

filing of an initial claim or site would be increased from $5 to $10 per claim. New service charges of $5 would be imposed on each of the annual filings.

This section generated the largest number of comments on the proposed rulemaking. Approximately 90 percent of those commenting stated positions or made suggestions on this proposal. Some comments both stated positions and made suggestions so that the percentages and categories described below may overlap. The comments can be sorted into six categories: (1) Approximately 70 percent of the comments either categorically opposed the fees without stating a reason or stated that they would be a burden and a hardship on the small miner; (2) approximately 15 percent thought that the fees to be imposed should be based on a per-document, rather than a per-claim charge; (3) 4 percent suggested that fees for the annual filing of assessment work should be based on a sliding scale, usually $5 each for the first 10 claims or sites and then 50 cents or $1 each for the rest on the same document; (4) 1 percent suggested discounts for various groups, including small miners and senior citizens; (5) 7 percent were satisfied with the proposal as written; and (6) 2 percent suggested that the proposed fees were too low and recommended fees of up to $100 to record annual filings, plans, and notices, these increased fees to be used to offset the costs of reclamation of public lands which had been mined.

The category one correspondents based their arguments on the filing fees actually being a tax that would force the small miner out of business, and compared the fees to those charged by County Recorders. County Recorder fees were noted to be significantly lower.

Statute and case law make a distinction between taxes and service charges. A tax is a charge imposed by legislatures or other authorities on citizens to pay for public services or to meet the demands of managing a government. The citizens upon whom the taxes are imposed may or may not directly benefit from the services. Service charges are charges imposed on the users of specific programs, and these users will directly benefit from the services provided. Service charges serve a cost-recovery function in that the government or other organization uses the money to defray the cost of providing the service. Taxes are authorized by Federal and State constitutions or related revenue statutes. User fees, at the Federal level, are allowed by Title V of the Independent Offices Appropriation Act (31 U.S.C. 9701). Policies implementing that law require that a charge to recover the costs of program administration be imposed for services that provide special benefits or privileges to identifiable non-Federal recipients above and beyond those accruing to the public at large. The fee may be assessed either as a cost pursuant to an established schedule or as a share of the cost to the performing bureau or office as determined by a formal accounting system.

A detailed analysis of the processing costs of the Bureau for mining claim recordation documents indicated that in Fiscal Year 1987 each claim for which an affidavit of assessment work (or notice of intent to hold) was filed required an expenditure of $7.42. The initial recordation of a claim cost the Bureau $10.13. Because there is a benefit to the public, as well as to the mining claimants themselves, from the maintenance of these records, a portion of the recordation program costs should not be recovered from filing fees. Based on an analysis of public versus mining claimant benefits, $5.00 per claim for annual filings and $10.00 per claim for initial recordation was determined to be the appropriate cost recovery fees that approach but do not exceed actual costs.

The law and its implementing policies allow for exemptions from user fees, but the Bureau has been unable to justify exempting the mining claim recordation program from service charges. In fact, the General Accounting Office and the Department of the Interior's Office of the Inspector General have criticized the Bureau in at least 9 reports and letters in the last 5 years for having no, or very low, service charges for most of its programs. At least 2 reports and 1 letter have focused on the mining recordation program.

The Bureau's processing costs are higher than those of the County Recorder. The County Recorder receives a location certificate or affidavit of assessment work and places the entire page, undifferentiated, into a book. In contrast, the Bureau, as the official recordkeeper of the United States for public lands, receives a location certificate, adjudicates it for land status and legal requirements, and then enters it into the Bureau's data processing system. A separate file must be maintained for each claim. Annual filings of assessments of work and notices of intent to hold mining claims are adjudicated for ownership changes and numbers of claims or sites filed. Separate copies are made for each mining claim or site listed, and each automated record must also be updated. The County Recorder is simply filing a record; the Bureau is processing and recording many changes to a public land record. The additional requirements on the Bureau as a Federal land records agency mean that its processing costs are clearly not comparable to those of the County Recorder.

The category 2 group of comments argued that the County Recorder operates on a per page basis and that the Bureau ought to operate on the same basis. The Bureau of Land Management queried County Recorder Offices in the western States before presenting this proposal for public comment. In at least six States—Colorado, Idaho, Montana, Nevada, South Dakota, and Utah—the fee for recording affidavits of assessment work is charged on a per-claim basis, as opposed to a per-document basis. For example, Utah counties charge $5 for an affidavit of assessment work plus 50 cents for each claim after the first. Although the Bureau could operate on a per-page basis, this procedure would not always recover the costs of processing the document. Some annual filings, for example, contain up to 100 claims or sites per document, and the Bureau is required to adjudicate each claim or site as a separate action and separately enter each into the appropriate case file. The same situation applies to transfers of interest. Charging on a per-page basis would be equivalent, in effect, to giving volume discounts to filers who have multiple claims even though each claim required separate processing. These entities would be charged the same amount as an individual filing one claim. Because the Bureau must recover its processing costs equitably, each filer must be charged on a per-claim, rather than a per-document, basis.

The category 3 comments suggested that service charges on annual filings be imposed on a sliding scale. Sliding scale fees increase the time of administration of individual claims and encourage the filing of fewer documents. The combination of increased administration time and reduced filings would result in revenues that do not recover administrative costs or that would shift the majority of the burden of paying for administering the program to the small miner with only a few claims. To ensure that small businesses do not shoulder an inappropriate share of the burden, fees must be on a per-claim basis. Alternatively, the fees could increase with the number of claims held per claimant so that large entities holding many claims would pay a higher per-

claim share. This idea was rejected as being inequitable.

The category 4 comments suggested discounts for various select groups who use the program, such as small miners or senior citizens. These discounts would significantly increase administrative costs because the special groups would have to be identified initially and then reviewed annually as the filings are made. The reduced revenues could result in failure to recover administrative costs. The proposal would also present numerous practical problems because of the difficulties of defining the special groups. For instance, the term "small miner" could include those individuals or businesses with a "few" claims or those with small, active operations. The term "active" could also present difficulties because the term could include only currently active operations, those active during a certain period within the last 3 to 5 years or some other arbitrary standard.

The category 5 comments supported the proposals as written. Some in the group expressed support for the idea that the increased revenues should remain in the States where they are generated to improve administration of the mining program. This proposal can be implemented to some extent because language in the Fiscal Year 1989 Interior Appropriations Act authorizes the Bureau to place the fees collected by this rulemaking into a special no-year reimbursable account and not into the General Fund. The funds in a no-year account are not returned to the Treasury at the end of the fiscal year. The money is carried over in the account into subsequent fiscal years to be spent as needed. The legislation further requires that all fees collected by this fee schedule and returned to the Bureau in Fiscal Year 1989 and later years be spent only in the Mining Law Administration Program to improve the Bureau's record system and to expand and improve its overall activities in the mining law administration program. Because of the close linkage to the cost generating activities in each State, the funds generated in any State will likely to be returned to that State. It is not feasible to mandate annual accounting or budget requirements in the regulations, however.

One of the correspondents supporting the service charges based her support upon the canceled check serving as evidence that the service charges had been paid and that the Bureau had received the documents sent. The Bureau would take this suggestion one step further and strongly encourage claimholders to send in their annual filings by certified mail with a return receipt requested, further protecting them against loss of their claims because of alleged losses of the annual filing documents by the Bureau after their receipt from the U.S. Mail. A return receipt card may serve as evidence that the documents were received on time, overturning the presumption of regularity in the processing of Bureau records. One comment estimated that 10 percent of the notices sent were lost in the mail.

The Bureau also strongly encourages claimholders to use the serial numbers of the claims for which filings are made each year on the filings themselves. This practice will reduce the number of incorrect credits given for payments made for the mining claims and will prevent a claim from being lost due to confusion over similar claim names or owner surnames.

The category 6 comments supported greatly increased filing fees to permit the Bureau to reclaim lands disturbed by previous mining actions and to operate a thorough enforcement/bonding program. The fees suggested were up to 1,000 percent above those proposed.

The law does not permit an agency to recover more than its actual costs. Fees collected in excess of expenditures are legally considered a tax. The Bureau has no power to tax individuals or groups without express Congressional legislative authority. Because the Bureau does not have taxing authority, this proposal cannot be adopted.

One additional proposal in this section drew comments. This proposal was the provision that, after June 1, 1989, any filings not accompanied by the appropriate filing fee would be considered fatally defective and would be returned to the sender without further action. The result would be that the claim was considered abandoned. Some comments suggested that a grace period be given to "cure" the defect of the lack of a filing fee or of the right amount of a fee. The comments stated that no fee or an incorrect fee should be correctable without the disastrous consequence of losing a claim with no right of appeal. Based on these comments, the final rulemaking continues a 30-day grace period for curing the defect of no fee or an insufficient fee until January 1, 1991. After that date, by which time claimants should be accustomed to the requirement, filings accompanied by insufficient or no fees will be refused by the Bureau. This proposal has been renumbered as 43 CFR 3833.1–4 to avoid confusion between the fees mentioned in 43 CFR 3833.1–3 and the date when non-payment of fees becomes a non-curable defect.

43 CFR 3833.2

The proposed rulemaking amended 43 CFR 3833.2–1 to reflect the fact that new mining claims, mill sites, and tunnel sites could not be located in units of the National Park System. One comment supported the proposal. Several others stated that the proposal was not necessary because it duplicated provisions of the regulations relating to the National Park Service at 36 CFR Part 9. In addition, a few argued that units of the National Park System should be open to mineral location and development.

The final rulemaking retains the language of the proposed rulemaking. The Mining in the Parks Act of September 28, 1976 (90 Stat. 1342), prohibits mineral location and development in units of the National Park System. Therefore, the suggestion that units of the National Park System be open to mineral location and development cannot be adopted. The intent of the regulations is to reinforce the statutory prohibition against mineral location in National Parks. The regulatory provisions of the National Park Service relevant to the mining laws are referenced in these regulations to assist prospectors and miners who might not have access to or knowledge of regulations relating to the National Park Service.

Two comments noted an ambiguity in language at 43 CFR 3833.2–2(b) with respect to the phrase "between January 1, 1978, and October 22, 1979." The correspondents could not determine whether or not the beginning and ending dates were included. The final rulemaking changes the language to clarify that the beginning and ending dates are included in the provision.

Two comments responded to the proposed language in 43 CFR 3833.2–2(b) requiring that notices of intention to hold or evidence of annual assessment work be filed on or before December 30 of each calendar year after 1979. The comments suggested December 31 as an alternative date. The final rulemaking retains the December 30 date for filing because that date is set by the Federal Land Policy and Management Act of 1976.

One of the comments pointed out that notices of intention to hold mill sites and tunnel sites are not filed with County Recorders. Notices of intention to hold mining claims are the only notices filed with County Recorders. The final rulemaking changes the language of § 3833.2–2(c) to reflect this fact.

43 CFR 3833.4

A few comments addressed the proposal in this section to make the failure to file information required by a decision of the authorized officer a cause for voiding, and considering abandoned, a mining claim, mill site, or tunnel site. The correspondents suggested that the information failure should be considered a curable defect and that the decision should be appealable. The language of the final rulemaking makes the suggested change and allows individuals to appeal the voiding of claims and sites for failure to file information requested in a decision. If the Bureau is upheld on appeal, the claim would be conclusively deemed abandoned and void.

43 CFR 3833.5

The proposed rulemaking eliminated the so-called "diligent search" requirement, whereby the Bureau made a thorough search to find the whereabouts of a mining claimant before administratively taking adverse action on the claimholder's claim. The final rulemaking eliminates the diligent search requirement for administrative decisions of the authorized officer but adds language to clarify that the diligent search requirement continues for mineral contest actions. This language is added in response to 3 comments, which addressed the possible elimination of the requirement for a "diligent search" for mineral contests.

43 CFR 3852.2

Numerous comments addressed this section, which would impose a service charge of $50 on petitions for the deferment of annual assessment work. Eight comments opposed the service charge as being a hardship on small miners and suggested that Congress appropriate the money to administer the mining program through appropriations. Six comments supported the proposal.

The actions involved in processing a petition for deferment of annual assessment work are as follows: A land law examiner receives the petition, evaluates it by examining the facts and law in the matter, and then issues a decision granting or denying the petition. The Bureau's estimate of the actual time spent by a land law examiner in processing a petition for deferment costs approximately $25 per petition. The proposed $50 fee is reduced to $25 by this final rulemaking to reflect the approximate costs of processing this type of document. As was discussed under 43 CFR 3833.1–3 above, the Bureau is obligated by statute and policy to recover the costs of administering its programs. This final rulemaking therefore adopts a service charge of $25 for each petition for deferment of assessment work.

43 CFR 3862.1–2

The proposed rulemaking increased the filing fee for a patent application from $25 to $250 per application and from no fee to $50 for each additional claim or site in the application. There were 24 comments on the section, with six supporting the increase and 18 opposed. Those opposing the increase stated that it was a hardship on small miners, that it was too high, or that it should only be collected if the patent was granted.

The proposed fee increase is another cost recovery measure. The fee increase is not unreasonable, considering the costs of providing the benefits obtained in the patent process, required by law to be recovered. Under the General Mining Law of 1872, as amended (30 U.S.C. 22 *et seq.*), the mineral industry could obtain a mineral patent to the lands under the mining claim or site, a deferment of assessment work, and a forum to challenge rival locators over rights of discovery or the mineral character of the lands.

The Bureau, in order to fulfill the responsibility of the Secretary of the Interior to grant or deny these claimed or asserted rights, maintains a staff of Land Law Examiners, sometimes called adjudicators, in each State Office, and mineral examiners in each district or area office.

The land law examiners process patent applications by assuring that all required title work complies with Departmental standards, that the proper affidavits of compliance are submitted, that the mineral survey is in order, and that the application has been advertised in the legal section of local newspapers. If all the preceding requirements are met, the Bureau issues the first half of the mineral entry final certificate.

After the mineral entry final certificate is issued, the mineral examiner visits the mining claim or site covered by the application. The examiner maps the geology, samples the mineral deposits, and verifies the mineral survey and improvements upon the mining claim or site. The information collected by the mineral examiner is then evaluated to determine if the mining claim contains an economically extractable mineral commodity. If so, the examiner recommends that the patent issue. If not, the examiner recommends that a mineral contest action be initiated against the mining claims in the administrative law court of the Department of the Interior. A hearing is held before an Administrative Law Judge to determine whether the claims are valid or null and void.

The Bureau incurs processing costs whether or not the patent is granted. Therefore, the final rulemaking does not adopt the suggestion that the fee be imposed only if the patent is granted. The service charge on patent applications is, by this rulemaking, set at $250 per application and the first claim contained in the application and $50 for each additional claim or site thereafter in the application.

The principal authors of this rulemaking are Roger Haskins and William Condit of the Division of Mining and Salable Minerals, assisted by the staff of the Division of Solid Mineral Leasing and the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). See the discussion under General Comments for the rationale for this determination.

The information collection requirements contained in 43 CFR Part 3833 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1004–0114.

List of Subjects in 43 CFR Parts 3830, 3850, and 3860

Mineral royalties, Mines, Public lands—Mineral resources, Reporting and Recordkeeping requirements.

Under the authority of the General Mining Law of May 10, 1872 (30 U.S.C. 22), section 2478 of the Revised Statutes, as amended (43 U.S.C. 1201), the Independent Offices Appropriations Act (31 U.S.C. 9701), and sections 304, 310, and 314 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1734, 1740, and 1744), the regulations at Subpart 3830, Group 3800, Subchapter C, Chapter II of Title 43 of the Code of Federal Regulations are amended as set forth below:

James E. Cason,

Acting Assistant Secretary of the Interior.

October 14, 1988.

PART 3830—[AMENDED]

1. The authority citation for Part 3830 is added to read:

Authority: 30 U.S.C. 22, sections 2319 and 2478 of the Revised Statutes, as amended (43

U.S.C. 1201), 31 U.S.C. 9701, 16 U.S.C. 1901, 1907, and 43 U.S.C. 1734, 1740, 1744, and 1782.

§ 3833.0–3 [Amended]

2. Section 3833.0–3(d) is amended by removing the citation "(31 U.S.C. 483a)" and replacing it with the citation "(31 U.S.C. 9701)".

§ 3833.0–5 [Amended]

3. Section 3833.0–5 is amended by:

A. Revising paragraph (j) to read:

(j) "Affidavit of assessment work" means the instrument required under state law that certifies that assessment work required by 30 U.S.C. 28 has been performed on, or for the benefit of, a mining claim or, if state law does not require the filing of such an instrument, an affidavit evidencing the performance of such assessment work; and

B. Adding new paragraphs (p), (q), (r), and (s) to read:

(p) "Amended location" means a location that is in furtherance of an earlier valid location and that may or may not take in different or additional unappropriated ground. An amendment may:

(1) Correct or clarify defects or omissions in the original notice or certificate of location; or

(2) Change the legal description, mining claim name, position of discovery or boundary monuments, or similar items.

An amended location notice relates back to the original location notice date. No amendment is possible if the original location is void.

(q) "Relocation" means the establishment of a new mining claim, mill site, or tunnel site. A relocation may not be established by the use of an "amended location notice", but requires a new original location notice or certificate as prescribed by state law.

(r) "Annual filing" means either an affidavit of assessment work or a notice of intention to hold the mining claim, mill site, or tunnel site.

(s) "Authorized officer" means any employee of the Bureau of Land Management to whom authority has been delegated to perform the duties described in this subpart.

4. Section 3833.1–1 is amended by:

A. Revising the title to read:

§ 3833.1–1 Recordation of mining claims, mill sites and tunnel sites located on or before October 20, 1976.

B. By adding the figure "(a)" at the beginning of the existing paragraph in that section; and

C. Adding a new paragraph (b) to read:

(b) No unit of the National Park System remained open to mining claim location after September 28, 1976. All mining claims, mill sites, and tunnel sites located in a unit of the National Park System on that date were required to be recorded with the National Park Service on or before September 28, 1977, or they were, by operation of law, deemed conclusively to be abandoned and void.

5. Section 3833.1–3 is revised to read:

§ 3833.1–3 Service charges.

(a) All service charges shall be payable by United States currency, postal money order, or negotiable instrument payable in United States currency and shall be made payable to the Department of the Interior—Bureau of Land Management.

(b) Each mining claim, mill site, or tunnel site filed for recordation shall be accompanied by a nonrefundable service charge of $10.00.

(c) Annual filings submitted pursuant to § 3833.2 of this title shall be accompanied by a nonrefundable service charge of $5.00 for each mining claim, mill site, or tunnel site.

(d) Amendments to a previously recorded notice or certificate of location shall be accompanied by a nonrefundable service charge of $5.00 for each mining claim, mill site, or tunnel site.

(e) Transfers of interest filed pursuant to § 3833.3 of this title shall be accompanied by a nonrefundable service charge of $5.00 for each mining claim, mill site, or tunnel site affected.

§ 3833.1–4 Effective date of service charges.

(a) *Prior to January 1, 1991.* Filings that are not accompanied by the service charges set forth in § 3833.1–3 of this title shall be noted as being recorded on the date received provided that the claimant submits the proper service charge within 30 days of receipt of such deficiency notice by the authorized officer. Failure to submit the proper service charge shall cause the filing to be rejected and returned to the claimant/owner.

(b) *Beginning January 1, 1991.* Filings that are not accompanied by the proper service charges set forth in § 3833.1–3 of this title shall not be accepted and will be returned to the claimant/owner without further action.

6. Revise § 3833.2 to read:

§ 3833.2 Annual filings.

7. Section 3833.2–1 is revised to read:

§ 3833.2–1 National Park System lands.

(a) For all mining claims, mill sites, and tunnel sites located within a unit of the National Park System that was recorded on or before September 28, 1977, an annual filing shall be submitted to the proper BLM office on or before December 30 of each succeeding calendar year thereafter.

(b) Even though the National Park Service, except under certain limited circumstances described in 36 CFR Part 9, Subpart A, does not permit surface disturbing actions to occur in units of the National Park System, a notice of intent to hold should be filed for mining claims and sites located within these units. If the owner has received National Park Service approval for surface disturbing actions under 36 CFR Part 9, Subpart A, either a notice of intent or an affidavit of assessment work, as appropriate, should be filed.

(c) The provisions of this section shall apply to all mining claims, mill sites, and tunnel sites included in a unit of the National Park System because of an enlargement of the said unit after September 28, 1976.

(d) Evidence of annual assessment work for mining claims, mill sites, and tunnel sites located in a unit of the National Park System shall be in the form prescribed by § 3833.2–4 of this Title. A notice of intention to hold such a claim or site shall be in the form prescribed in § 3833.2–5 of this title.

(e) The authorized officer shall forward copies of annual filings on mining claims, mill sites, and tunnel sites located within a unit of the National Park System to the proper National Park Service office.

§§ 3833.2–2, 3833.2–3, 3833.2–4 [Redesignated as §§ 3833.2–4, 3833.2–5, 3833.2–6]

8. Redesignate §§ 3833.2–2, 3833.2–3, 3833.2–4 as §§ 3833.2–4, 3833.2–5, and 3833.2–6, respectively.

9. New §§ 3833.2–2 and 3833.2–3 are added to read:

§ 3833.2–2 Other Federal lands.

Unpatented mining claims, mill sites, and tunnel sites located on Federal lands which are not within a unit of the National Park System are subject to the following annual filing requirements:

(a) If a mining claim, mill site, or tunnel site located on or before October 20, 1976, was recorded in the proper BLM office prior to January 1, 1978, a notice of intention to hold or evidence of annual assessment work shall be filed in the proper BLM office on or before December 30, of the calendar year following the calendar year of its recordation, and of each calendar year thereafter.

(b) All owners of mining claims, mill sites, or tunnel sites located on or before October 20, 1976, and recorded in the

BEST COPY AVAILABLE

proper BLM office on or after January 1, 1978, and on or before October 22, 1979, shall have filed a notice of intention to hold or evidence of annual assessment work in the proper BLM office on or before October 22, 1979, and on or before December 30 of each calendar year after 1979.

(c) Owners of mining claims, mill sites, and tunnel sites located on or after October 21, 1976, shall file a notice of intention to hold or evidence of annual assessment work in the proper BLM office on or before December 30 of the calendar year following the calendar year of the location of the mining claims, mill site, or tunnel site.

(d) Evidence of annual assessment work shall be in the form prescribed in § 3833.2–4 of this title. A notice of intention to hold shall be in the form prescribed in § 3833.2–5 of this title.

§ 3833.2–3 Consistency between the Federal Land Policy and Management Act and the General Mining Law of May 10, 1872.

(a) The Federal Land Policy and Management Act requires that a notice of intention to hold or evidence of annual assessment work be filed on or before December 30 of each calendar year following the calendar year in which the mining claim, mill site, or tunnel site was located. To comply with the requirements of the Act for mining claims, mill sites, or tunnel sites located between September 1 and December 31 of a given calendar year, the claimant shall submit an annual filing on or before December 30, of the following calendar year for each location to prevent the mining claim, mill site, or tunnel site from being declared abandoned and void by operation of law.

(b) Evidence of assessment work filed under this subpart between January 1 and the following December 30 of the same calendar year shall be deemed to have been filed during that calendar year, regardless of what assessment year that work fulfilled under State law.

(c) Notice of intention to hold a mining claim, mill site, or tunnel site may be filed at the election of the owner, regardless of whether the assessment work has been suspended, deferred, or not yet accrued. However, the owner shall have filed with the Bureau of Land Management the same documents which have been or will be recorded with the local recordation office. There is no requirement to file a notice of intent to hold for a mill site or a tunnel site with the local recordation office. A notice of intention to hold a mining claim, mill site, or tunnel site shall be effective only to satisfy the filing requirement for the calendar year in which the notice is filed. The filing of a notice of intention to hold with the Bureau of Land Management shall not relieve the owner of complying with Federal and State laws pertaining to the performance of assessment work.

§ 3833.4 [Amended]

11. Section 3833.4(b) is amended by removing the phrase "§§ 3833.1–2(b), 3833.2–1(c), 3833.2–2(a) and (b), or 3833.2–3(b) and (c)" and replacing it with the phrase "§§ 3833.2–4 (a) and (b), and 3833.2–5 (a) and (b)", and by removing the second and third sentence of the paragraph and adding a new sentence to read "Failure to file the information requested by the decision of the authorized officer shall result in the mining claim, mill site, or tunnel site being deemed conclusively to be abandoned and it shall be void."

§ 3833.5 [Amended]

12. Section 3833.5 is amended by:

A. Amending paragraph (d) by removing everything after the first sentence of the paragraph and replacing it with "As provided in Subpart 1810 of this title, all owners of record with the Bureau of Land Management shall be personally notified and served by certified mail, return receipt requested, sent to their last address of record. Such owners shall be deemed to have been served if the certified mail was delivered to that address of record, regardless of whether the certified mail was in fact received by them. The provisions of this subpart shall not be applicable to procedures for public notice required under Part 3860 of this title with respect to mineral patent applications and to the procedures given in 43 CFR 4.450–5 concerning service in mineral contest actions."; and

B. By adding a new paragraph (h) to read:

* * * * *

(h) Any party adversely affected by a decision of the authorized officer made pursuant to the provisions of this Subpart shall have a right of appeal pursuant to Part 4 of this title.

PART 3850—ASSESSMENT WORK

1. An authority citation is added to read:

Authority: 30 U.S.C. 22 et seq.

Subpart 3852—Deferment of Assessment Work

§ 3852.2 [Amended]

2. The last sentence of § 3852.2(a) is revised to read:

(a) * * * Each petition shall be accompanied by a $25 nonrefundable service charge.

* * * * *

PART 3860—MINERAL PATENT APPLICATIONS

1. An authority citation is added to read:

Authority: 30 U.S.C. 22 et seq.

Subpart 3862—Lode Mining Claim Patent Applications

2. Section 3862.1–2 is revised to read:

§ 3862.1–2 Service charge.

Each Mineral Patent Application shall be accompanied by a nonrefundable service charge of $250 per application and the initial mining claim or site plus $50 for each additional mining claim or site contained within the application.

Part VIII

Department of Labor

Employment and Training Administration

20 CFR Part 639
Worker Adjustment and Retraining Notification; Interim Interpretative Rule

DEPARTMENT OF LABOR

20 CFR Part 639

Worker Adjustment and Retraining Notification

AGENCY: Employment and Training Administration, Labor.

ACTION: Interim interpretative rule; request for comments.

SUMMARY: The Employment and Training Administration of the Department of Labor is publishing an interim interpretative rule interpreting the provisions of the Worker Adjustment and Retraining Notification Act (WARN). WARN provides that, with certain exceptions, employers of 100 or more workers must give at least 60 days' advance notice of a plant closing or mass layoff to affected workers or their representatives, to the State dislocated worker unit, and to the appropriate local government.

DATES: *Effective date*: The interim interpretative rule is effective on December 2, 1988. However, as discussed below in the **SUPPLEMENTARY INFORMATION**. affected employers may be required to provide advance notice as early as December 6, 1988.

Expiration date: As noted in § 639.11 of the interim interpretative rule, the interim interpretative rule will, by its own terms, expire on April 1, 1989.

Comments: This interim interpretative rule also is being used to solicit comments on a subsequent final rule which the Department intends to issue before the expiration of this interim interpretative rule. Comments must be received by January 31, 1989. See also the Notice of Proposed Rulemaking on this subject, which will be published separately in the December 5, 1988, issue of this **Federal Register**.

ADDRESS: Comments shall be mailed to the Assistant Secretary of Labor, Employment and Training Administration, Department of Labor, Room N–4459, 200 Constitution Avenue, NW., Washington, DC 20210; Attention: Administrator, Office of Job Training Programs.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Colombo; Telephone: (202) 535–0577.

SUPPLEMENTARY INFORMATION:

Introduction

The Worker Adjustment and Retraining Notification Act (WARN, the statute, or the Act), Pub. L. 100–379, 102 Stat. 890, was enacted on August 4, 1988. 29 U.S.C. 2101 *et seq*. Section 11 of the Act provides that WARN goes into effect on February 4, 1989. WARN provides that, with certain exceptions, employers of 100 or more workers must give at least 60 days' advance notice of a plant closing or mass layoff to affected workers or their representatives, to the State dislocated worker unit (see 29 U.S.C. 1661(b)(2)), and to the appropriate local government. 29 U.S.C. 2902 and 2903. Section 8(a) of the Act requires that the Secretary of Labor "prescribe such regulations as may be necessary to carry out this Act. Such regulations shall, at a minimum, include interpretative regulations describing the method by which employers may provide for appropriate service of notice as required by this Act." 29 U.S.C. 2107(a). Under section 11 of the Act, the authority to issue regulations for WARN became effective on August 4, 1988.

The Employment and Training Administration (ETA) of the Department of Labor (DOL or Department), since the enactment of WARN, has published in the **Federal Register** for comment various notices and discussion papers on WARN. 53 FR 43731 (October 28, 1988); 53 FR 39403 (October 6, 1988) 53 FR 38026 (September 29, 1988); 53 FR 36056 (September 16, 1988); and 53 FR 34844 (September 8, 1988). In developing this interim interpretative rule, ETA has considered the comments received in response to those notices and discussion papers.

Prior Actions

The Department of Labor (DOL) is conducting the WARN implementation process in an open and public manner. On September 16, 1988, the Department published a notice in the **Federal Register** inviting comments from interested parties regarding: "(1) [T]he extent to which the Department should issue interpretative regulations; and (2) [T]o the extent that regulations are needed, the specific views of commenters on how particular sections of the law should be implemented through regulations."

A total of 63 letters was received, of which 43 were sufficiently timely for full consideration. The comments break out by source as follows: Employer associations 18, companies 17, law firms 8, unions 7, employee associations 1, Members of Congress 4, State officials 7, and private citizens 1.

The Department's analysis of these comments revealed the following points:

(1) Both companies and unions strongly encouraged DOL to publish interpretative regulations that explain how WARN will be implemented and clarify WARN provisions they find ambiguous.

(2) The commenters also requested that DOL address or define a number of specific items including:

(a) The earliest date notice would be required to be given;

(b) Who is affected by an employment loss (e.g., part-time workers and incumbents with seniority who displace other workers);

(c) The exemption of temporary workers and temporary facilities;

(d) The terms "single site of employment," "facility" and "operating unit," which are important terms used in determining coverage of plant closings and mass layoffs;

(e) The allowable bases for reduced advance notice under the Act for companies encountering unforeseeable business circumstances.

A question has arisen regarding the meaning of the February 4, 1989, effective date of WARN. Section 3(a) of WARN states "an employer shall not order a plant closing or mass layoff until the end of a 60-day period after the employer serves written notice * * *."

Some commenters have interpreted this language to require that employers must provide full 60-day notice in advance of planned plant closings or mass layoffs occurring on or after the effective date, i.e., any actions planned to occur on or after February 4, 1989 would be subject to the full 60-day notice requirement, requiring notice as early as December 6, 1988.

Another interpretation that has been offered is that the effective date provision requires notice to be given only for actions which will occur 60 days after February 4, 1989, i.e., notice would be required only for actions occurring on or after April 5, 1989.

Still a third possible interpretation is that an employer must give such advance notice as is possible for all covered employment actions that occur on or after February 4, 1989, e.g., for a layoff occurring on March 6, 1989, the employer would be required to provide 30 days' notice.

DOL has received comments supporting each of these interpretations. DOL agrees with commenters that a strong case can be made to support the second and third interpretations, but DOL also has determined that there are substantial arguments to support the first interpretation. DOL has been informed in a comment submitted by four of the Congressional sponsors of WARN that they intended WARN to require 60 days' notice for all plant closings that occur on or after the effective date.

DOL views the effective date provision to mean that covered

employment actions which occur on or after February 4, 1989 are subject to the notice requirements of WARN. That may mean that notice is required to be given as early as December 6, 1988. DOL believes that it would not be responsible to advise employers not to give notice during a period (December 6, 1988–April 4, 1989) when notice may later be determined to have been required. Employers are, therefore, best advised to proceed conservatively and to provide notice in view of this possible liability.

DOL is therefore issuing these regulations as an interim interpretative rule so that potentially affected employers will know in advance of December 6, 1988, how to comply with the law.

DOL agrees with commenters who have pointed out that the publication of this regulation only a few days before the notice requirement may become effective may not provide sufficient advance notice to enable some employers to fully comply with all the regulatory provisions. DOL has alerted employers to the possibility that notice may be required to be given as of December 6, 1988 in both the September 16 and October 28 **Federal Register** Notices. Nonetheless, DOL recognizes that the details of these regulations have not been generally known. DOL therefore believes that in the early days of WARN implementation substantial compliance with regulatory requirements should be sufficient to comply with WARN.

It should be noted that the requirements of WARN do not apply to employment actions that are completed prior to February 4, 1989.

Issues Under the Act

On October 28, 1988, the Department published the WARN Discussion Paper in the **Federal Register** and solicited comments. This paper reviewed sections 2, 3, 4 and 11 of the statute, discussing questions raised in comments on the September 16, 1988 Notice and issues addressed in the legislative history.

DOL has received comments in response to the October 28 Notice from employer associations, employers, labor unions, law firms and a State governmental agency. A letter of comment was submitted by four members of Congress who were legislative sponsors. DOL has reviewed and considered the comments in drafting its regulations. Because of the short timeframes for developing these regulations, DOL will continue to consider these comments and others that may be received in response to the October 28 Notice, as well as those received in response to this document, in the preparation of the final WARN regulations.

Following is a section-by-section analysis of the regulations and the comments.

(1) Organization of Regulations

The Department has written and presented the WARN regulations so they will be understandable, and offer guidance to readers in the business and labor communities. Issues are discussed in their logical sequence, in an effort to easily convey the intent of the Act and employers' responsibilities.

(2) Scope and Purpose

The scope of these regulations is basic: Section 2 of the Act provides necessary definitions and exclusions; section 3 describes the content and service of notice, sets forth the legal bases for providing reduced notice or extending a 6-month layoff period, and reviews employment losses over a 90-day period to determine whether some employers are covered by WARN requirements; and section 4 outlines two possible exemptions to coverage of plant closings and mass layoffs.

The Department decided not to regulate in any way regarding enforcement and civil penalties (i.e., section 5 of the statute) since the courts alone have the authority to enforce WARN, and are therefore best situated to interpret these important provisions of WARN.

The regulations note that WARN does not supersede or supplant collective bargaining agreements which provide additional rights. DOL is interested in receiving comments on: (1) Whether and to what extent the final regulations might provide that collective bargaining agreements which provide for the terms different from terms incorporated into the WARN regulations may be used to legitimate alternative methods of compliance with WARN; and (2) whether such a provision should apply only to collective bargaining agreements that are entered into after the effective date of WARN or whether agreements that predate WARN also should be included. Obviously, the length of the notice period cannot be reduced by agreement, but DOL is interested in receiving comments on other definitions or requirements which might properly be varied in collective bargaining agreements: for example, the definitions of single site of employment, facility or operating unit or the content of notice.

(3) Definitions

The definition of employer presented in the Act makes it clear that all business enterprises of the stated size are covered. Because of the use of the term "business enterprise", DOL concludes that regular Federal, State, and local government public services are outside the purview of WARN. Commenters have sought clarification regarding the treatment of private nonprofit entities; quasi-public corporations, authorities, institutions of higher learning, hospitals, and public utilities. The Congressional commenters stated that the intent of WARN was to include private nonprofit organizations and "public and quasi-public entities operating in a 'commercial' context." To the extent such entities engage in "business" (i.e., take part in a commercial or industrial enterprise; supply a service or good on a mercantile basis; or provide independent management of public assets, raising revenue and making desired investments), such entities appear to meet the definition of "business enterprise" in the absence of specific legislative history on this point.

Generally, DOL has developed its definition of the term "employer" in accordance with the comments; it has included nonprofit organizations. In the final rule, DOL is considering including some public agencies within the definition. DOL does not, however, intend to define covered public enterprises in terms of the traditional/non-traditional governmental functions distinction that was rejected by the Supreme court as unworkable in *Garcia v. San Antonio Metropolitan Transit Authority*, 469 U.S. 528 (1984). Instead, DOL is considering defining which public entities are covered in terms of an organizational test, i.e., whether the entity is managed by a separately organized governing board with independent authority to manage its personnel and assets. DOL believes this test will cover the entities intended to be covered and will have the virtue of relative ease of application. DOL specifically invites comments on whether such entities should be covered and whether this test is an appropriate basis for defining coverage.

DOL agrees with commenters that, as a general rule, separately incorporated or organized entities should be treated as separate employers. It must be recognized, however, that there are cases where related entities are not effectively separate and must be treated as one entity for WARN purposes. DOL has adopted standard tests recognized by the courts in the context of a variety of laws for determining whether a subsidiary or an independent contractor

is sufficiently independent from its parent to be treated separately.

In the application of the tests, the courts look to the totality of the circumstances and each determination is highly fact-specific. Given the complex nature of the determination, § 639.3(a), which defines "employer", sets out a brief description of a few of the more important factors used in determining subsidiary or independent contractor status.

The regulations set down definitions for "plant closing", "mass layoff" and "representative" as presented in WARN.

Commenters asked the Department to clarify the meaning of "affected employees" in the Act. Since the statute includes in the term those employees who can reasonably be expected to experience an employment loss, it is clear the impact on the employee roster of bumping, seniority, and persons with multiple job skills requires consideration.

A number of commenters discussed the difficulty of determining 60 days in advance which employees will be bumped in some of the complex bumping procedures that exist in various industries. Most of these commenters referred to collectively bargained bumping procedures in which case notice goes to unions(s), not to individual workers (Section 3(a)(1) of WARN). One commenter took the opposite view and suggested that employers are well aware of who will be affected by bumping systems and should be required to notify all potentially affected employees. DOL believes that, in those cases of non-bargained, employer-developed seniority or bumping systems to which notice to individual workers applies, there are real complexities which militate against imposing an absolute requirement that notice be given to all potentially affected employees regardless of the complexity of the bumping system. DOL is persuaded that there are factors, including the possible non-exercise of bumping rights by an intermediate bumpee and the difficulty of predicting a bumping path where employees have several options among positions or lines of progression into which they can bump, which make it difficult to predict who will finally be affected as a result of a plant closing or mass layoff. Additionally, DOL believes that in some cases adoption of an absolute notice rule would contravene the intent of WARN to provide notice to those workers who will be affected by dislocation events and might lead to unnecessarily broad mass termination or blanket notices which Congress clearly intended should not be utilized. DOL has, therefore, adopted a reasonable foreseeability test in defining affected employees.

The purpose of WARN to provide notice to workers so alternative employment or necessary training can be obtained on a timely basis applies equally to white-collar and managerial employees as well as to employees in the skilled trades and other blue-collar occupations. Therefore, the Department includes managerial and supervisory workers as "affected employees". The definition also addresses questions raised regarding consultants and contract employees, excluding them since they are not legally employees of the businesses to which they are assigned.

The definition of "employment loss" and exclusions from employment loss in the regulations closely follow the language of the statute. Commenters questioned whether an employment loss occurs when there is job loss but no loss of income. Some commenters gave examples of programs under which an employee retains full pay, benefits and other rights although separated from a particular job and suggested that the definition of employment loss should take account of such programs. DOL agrees and has developed the definition of employment loss to take account of these employer initiatives. On the other hand, DOL does not agree that total or partial income replacement programs where an employee does not retain full employment status, such as supplemental unemployment benefits and severance pay, should affect the definition of employment loss, and has developed the definition accordingly.

On a related matter, commenters have asked that DOL discuss in its regulations arrangements where employers have reassigned workers after providing the notice required by WARN, prior to the date of employment loss. Reassignment could be to training, paid leave status, on job-seeking activities. DOL agrees that such reassignments may be possible where not prohibited by contract, but does not which to endorse practices which could undermine the objectives of WARN that both workers and their communities be provided notice in advance of a plant closing. Accordingly, DOL is specifically requesting comments on this issue for consideration prior to issuing a final rule.

"Unit of local government" is defined in the regulations as in the Act. Commenters asked what taxes should be considered in determining which unit of local government should receive notice. The logical solution is for a firm to aggregate all taxes paid to a single unit of local government.

The definition of "part-time employee" in the regulations follows the statutory language. Some commenters were unsure whether regular full-time employees with employment during less than 6 of the last 12 months would be considered part-time or full-time employees. The statute specifically states that such employees are part-time and makes no specific exemption for employees newly hired for full-time, permanent employment.

Other commenters were unsure as to the status of employees who are traditionally understood to be "seasonal" and short-term, yet are hired on a recurring basis. According to the Act, if these employees work for less than 6 of the past 12 months, they are part-time employees. Such employees would, in most cases, also fall under the "temporary facility/limited employment" exemption in section 4(a). Further, "seasonal" employees who work longer than 6 months may also fall under the "limited employment" exemption.

In response to commenters' requests for guidelines in determining the period used in calculating whether a worker has worked "an average of fewer than 20 hours per week," DOL has established that the shorter of the time the worker has been employed or the most recent 90 days should be used.

Several commenters requested clarification of the term "single site of employment." The regulations provide a definition which is drawn from the April 1988 Conference Report on H.R. 3.

As a general rule, a geographic connection or proximity is required to define "single site of employment." Even where several distinct operations are performed at a geographically connected site, that plant will be counted as a single site of employment. The facilities or units that house the separate functions may also be "facilities or operating units" within the plant which are also used to measure the occurrence of a covered employment loss.

DOL also recognizes that in some limited cases geographically separate sites may still be considered a single site of employment because of an inextricable operational connection. DOL intends this exception to be a narrow one to cover those cases where separate buildings are used for the same purpose and share the same staff and equipment, or other unusual organizational situations exist.

DOL has adopted common sense definitions of the terms "facility" and "operating unit" within a single site of

employment. These terms are important for determining whether a plant closing has occurred. DOL has defined these terms in a manner which attempts to define physically and operationally distinct entities for purposes of determining whether a plant closing, the shutdown of a distinct entity, has occurred. Generally, commenters do not appear to disagree with the definitions adopted. After receiving and reviewing specific comments regarding the "plant closing" definition, DOL notes, that the closing of a facility or operating unit at which fewer than 50 workers are employed does not, under the statute, become a plant closing if additional employees in an unrelated unit are also laid off. An example would be a plant of 300 workers, where an operating unit of 35 workers is closed. As a result of that closing, 15 other workers in other parts of the plant lose their jobs. Advance notice is not required under these circumstances. DOL solicits comment on this example, and related issues.

The definition of operating unit can be applied through the following example. A 24-hour store eliminating its night shift would not carry out a closing of an operating unit, but the elimination of all warehouse and stock workers on all three shifts would constitute the closing of an operating unit if 50 or more workers were affected.

DOL also has provided definitions of the terms "State dislocated worker unit" and "State."

(4) Who Must Give Notice

In response to DOL's discussion paper, several commenters pointed out that WARN creates an absolute division of responsibility for giving notice between a buyer and seller of a business; the seller is liable to give notice up to and including the date (time) of sale and the buyer is responsible thereafter. DOL agrees and has developed its regulations to reflect that view. Thus, at all times one of the parties to the transaction is responsible for giving notice. The Department's regulations offer guidance to employers anticipating a sale or purchase transaction to avoid confusion regarding service of notice and liability under WARN, by suggesting that each party's responsibility with respect to these items be covered in the contract of sale.

A number of commenters objected to DOL's use of the word "tenure" in the discussion paper when reviewing the meaning of the last sentence of section 2(b)(1) which provides that employees of the seller as of the effective date of the sale become employees of the buyer immediately thereafter. The commenters stated that this provision should be interpreted solely to relate to the responsibility to provide notice. DOL generally agrees and has not used the term "tenure" in the regulations. DOL agrees that Congress did not intend to affect other questions relating to employment status that are unrelated to the notice requirements of WARN. DOL notes, however, that for WARN purposes this provision does prevent a full-time employee of the seller from being classified as a part-time employee of the buyer because the employee has not worked for the buyer for 6 months.

(5) When Must Notice Be Given

To aid employers in complying with the Act and issuing notice when it is due, DOL suggests that the employers look ahead and behind, not only 30 days, but 90 days (section 3(d)) in determining whether planned employment actions will trigger notice requirements. By doing this, an employer can look at its planned employment actions, in the broader framework of the Act, and reduce potential liability for failure to give notice when thresholds have been met. DOL reminds employers that, in the case of the section 3(d) 90-day aggregate, notice is not required if the employer can demonstrate that the reductions were the result of "separate and distinct actions and causes and are not an attempt to evade" the Act.

In response to inquiries from commenters, DOL has pointed out a practical and reasonable method for measuring the number of employees in a business enterprise for the purpose of determining whether an employer is covered by WARN, i.e., has sufficient numbers of workers or hours so that WARN applies, and, if so, whether a particular employment action is a plant closing or mass layoff. The obvious point in time at which an enterprise's employment level should be measured is the date the first notice is required to be given. Because this point of measurement is closest to the time of the employment action, a "snapshot" on this date is usually most reflective of the firm's employment status, and thus of its coverage under WARN. There are, however, instances in which this method of employment measurement is not most indicative of a firm's true employment level and thus not appropriate for determining WARN coverage. The use of the number of employees on a more representative alternative date, or the use of an average employment level calculated over a recent period of time, may be appropriate where employment levels have surged up or down for temporary, and thus unrepresentative, reasons. An example would be the detailing of a large group of employees to a particular employment site for a short period of time.

For the purpose of exclusion from the definition of employment loss under section 2(b)(2), DOL has defined the term "transfer." Consistent with direction on transfers found in the June 2, 1987, Senate Committee Report, the new job being offered must be substantially equivalent in terms of pay and working conditions. By applying this definition, the term transfer, as used in the statute, will indeed refer to a transfer, and not a demotion. Some commenters suggested that the definition of reasonable commuting distance or comparable employment be made sufficiently flexible to accommodate the different provisions of collective bargaining agreements. DOL agrees and points out that under section 6 of the Act and under § 639.1(f) of the regulations provision is made for assuring that WARN does not supersede collective bargaining agreements which provide different but not inferior rights in areas such as these.

Section 639.5(c) of the regulations clarifies that work may fall under the temporary employment exemption in section 4(1) of the Act, if the workers understood the temporary nature of the employment at the time of hire. Since such an understanding could arise in a variety of ways, the regulations specify reference to employment contracts or local or industry employment practices, but leave the burden of proof to employers. A distinction is made between temporary work and long-term or continuous employment in construction and agriculture.

A number of commenters argued that the regulations should provide a blanket exemption to certain industries where the majority of workers may be hired for particular projects or seasonal, recurring work. DOL does not agree that a blanket exemption for any industry is appropriate since DOL cannot find that *all* the employees of any industry are necessarily hired only for particular projects. DOL believes, however, that the regulations define temporary facility and particular project in a manner which will not subject industries in which employees are generally hired for a particular project to any unforeseen liability as long as there are clear understandings about the nature of their employment.

Section 639.5(d) of the regulations addresses the strikes and lockouts exemption in section 4(2) of the Act. In the discussion paper DOL suggested that the exemption effectively does not apply to strikes since it is difficult to understand how a strike by employees

constitutes a plant closing or mass layoff, an action solely within the power of the employer. A number of commenters disagreed with this suggestion, although none clarified how a strike can constitute a plant closing or mass layoff. DOL agrees that a strike can cause a plant closing or mass layoff and has, therefore, included strikes within the regulatory provision.

The legislative history reveals the clear intent of Congress to restrict the exemption to actions which occur in the normal course of collective bargaining. The regulations reflect this intent and emphasize that the exemption does not apply where there is an attempt to evade the Act. Commenters also questioned whether employment loss suffered by non-striking employees as a direct or indirect result of a strike entitles them to notice, especially when their loss of employment cannot be predicted 60 days in advance. This situation is specifically addressed in the legislative history. The intent to provide advance notice whenever workers are involuntarily unemployed due to a plant closing or mass layoff may extend to these workers. DOL is considering, in the final regulations, therefore, requiring notice to non-striking employees at the employment site that is directly affected by the strike or lockout, but clarifying that reduced notice under the unforeseeable business circumstances provision may apply to plant closings or mass layoffs that indirectly result from strikes or lockouts.

DOL recognizes that the entire area of strikes and lockouts as they relate to the provisions of WARN is a complex one involving a variety of issues that arise under the National Labor Relations Act. While DOL does not intend to promulgate regulations which intrude into these matters, DOL does recognize that additional clarity may be possible in the final regulations and, therefore, invites additional comments on these issues.

(6) Who Must Receive Notice

Notice must be given to affected employees' representatives, directly to unrepresented affected employees, to the State dislocated worker unit, and to the chief elected official of the unit of local government. Section 639.6 of the regulations clarifies who is to receive notice in each case. It may be advisable to provide notice to the level of the union organization which is closest to the workers and which has the ability to act to notify individual workers. Thus, while the regulations specify that the notice is to be served upon the chief elected officer of the exclusive representative or bargaining agent, it is recommended that a copy also be given to the local union official.

Affected employees entitled to notice include part-time as well as full-time employees, since the law does not specify otherwise. In addition, where bumping rights apply, employees who may reasonably be expected to experience an employment loss due to application of bumping rights are entitled to notice as well as incumbents of positions to be directly affected. This is borne out by the legislative history. It is clear, however, that such factors as voluntary separations, early retirement and transfers which occur after notice is given will change which employees actually experience employment loss. In recognition of such non-predictable factors, the regulations state that notice is to be given to the extent that the affected workers can be identified.

States are required, under the Economic Dislocation and Worker Adjustment Assistance Act (EDWAA), to have operating dislocated worker units as of July 1, 1989. To meet the requirement for notice to these units prior to their creation or designation by State governors and to permit States to set in motion existing worker adjustment assistance programs, the regulations specify that notice served upon the State governor constitutes service upon the State dislocated worker unit.

Questions were raised about the identity of the chief elected official of a unit of local government, given the variety of local government structures. In particular, clarification was sought in the situation where local government is run by an elected board. The regulations clarify this situation by providing that the chairperson of the elected board is to receive notice. The regulations also provide that all local taxes should be aggregated for purposes of determining which unit of local government to notify when a plant is located within two or more such units.

(7) Content of Notice

A number of commenters argued that the discussion paper imposed too many requirements on employers and went beyond the requirements of the Act. While the Act does not enumerate specific elements which should be included in the advance written notice of an order for a plant closing or a mass layoff, the purpose of providing notice to the parties mentioned above is to allow each of them to take appropriate action to facilitate training, employment or other adjustments for affected employees. The content of notice to each party, specified in § 639.7 of the regulations, is designed to provide information necessary for each of them to take responsible action.

Commenters pointed out that specific requirements for identifying the date on which a layoff or termination is to occur could interfere with their collectively bargained procedures for notice to employees or their unions. DOL agrees that it is not the intent of WARN to interfere with such processes and has attempted to draft the notice content requirements to provide for some flexibility where notice is provided well in advance of WARN's 60-day notice period. DOL also agrees with one commenter that in plant closing situations where such long-term notice is given that otherwise complies with these regulations but where notice of a definite termination date is not possible, the giving of a second notice specifying a termination date 60 days in advance of that date constitutes full compliance with WARN.

It is clear from comments that there are circumstances in which a closing or layoff will be triggered if a specific event occurs, but it is not known at the time 60-day notice would be required whether that specific event will take place. It would be consistent with the intent of the Act to provide notice in such a situation. However, since the eventual outcome is not definite, the regulations stipulate that the notice must clearly identify its conditional nature and the circumstances on which it is based.

(8) *How is Notice to be Served*

Commenters asked whether the parties listed in the Act must have the written notice in hand 60 days before the separation occurs or whether the employer could mail the notice, insert the notice in affected workers' pay envelopes, etc., 60 days prior to the employment action. According to the legislative history, the first option is the correct interpretation. Any method of transmittal that is designed to ensure this end, i.e., to have the notice in hand 60 days in advance, would satisfy the intent of the Act. Additionally, the floor debates indicated that a ticketed notice fails to meet the requirements of WARN.

(9) *When May Notice Be Given Less Than 60 Days in Advance*

The three conditions allowing for a reduction of the 60-day period mentioned in the regulations are set forth in the statute. While commenters pointed to several floor comments which indicated a less restrictive approach to applying reduced notice provisions, the totality of the legislative history indicates the narrow nature of these

bases as well as the requirement that the employer must satisfactorily prove the necessity of a reduced notice period, if challenged. To ensure that the employees or their representative(s), the State dislocated worker unit, and the chief elected official of the unit of local government receive the information needed to help the workers find a new job or receive appropirate training, a brief statement of the basis for reducing the notification period should accompany the other elements required in the notice under the regulations. As expressed in the statute, the employer must give as much notice as is practicable.

The language of the "faltering company", "unforeseeable business circumstances", and "natural disaster" bases outlined in the regulations to a great extent reiterates relevant portions of the April 1988 Conference Report's text.

Commenters asked for clarification of when business circumstances are not reasonably foreseeable. In an effort to provide guidance and address their concerns, the regulations state that the employer must exercise such commercially reasonable business judgment as would a similarly situated employer in predicting the demands of a particular market. The employer is not, however, required to predict general economic conditions that may impact the demand for his goods or services.

Commenters also suggested that DOL list examples of reasonably unforeseeable business circumstances in the regulations. While DOL agrees with the commenters that such factors as strikes or lockouts elsewhere, loss of contracts, unexpected major market downturns, fires and closures ordered by government agencies all may constitute unforeseeable business circumstances, at this time DOL does not see the utility of including such a list in the regulations. DOL is willing to consider including in the final regulations examples which illustrate principles applicable to employers generally. DOL therefore invites additional comments on examples that should be included in regulations and the circumstances in which they might apply.

In the case of the "natural disaster" exception, the floor debates demonstrate Congressional intent that an employment action that was a direct result would fall under this exception, while one that was caused as an indirect result of a natural disaster would not be covered. The Department, however, understands that "indirect" plant closings or mass layoffs may not be known 60 days in advance and, thus, the "unforeseeable business circumstance" provision may prove applicable.

(10) *When May Notice Be Extended*

Section 639.10 covers the length of time after the date specified in the notice for which the notice is valid. To ensure that the parties who are due notice have the most current and helpful data available and, thus, can make appropriate plans, additional notice is due if the original date is not met. If the postponement is for less than 60 days, the notice need only contain a reference to the earlier notice, the date to which the planned action is postponed, and the reasons for the postponement. This type of notice will provide the parties with needed information and be less burdensome to the employer. If the postponement extends for 60 days or more, the additional notice should be treated as new notice and meet the specified requirements.

Several commenters disagreed with this interpretation, arguing that there is no specific statutory requirement to support it, that a 180-day period is more in keeping with the rolling 90-day aggregation period for determining employment loss under section 3(d) and that if any "secondary" notice is required posting general notice on a bulletin board should be sufficient. DOL believes that the approach it has adopted is most consistent with Congressional intent in two important respects. First, it furthers the Congressional purpose that notice to workers provide the workers and governmental authorities with specific information in order to react to a dislocation event and to obtain new employment or training to minimize the effects of that event. If workers are not informed of changes in planned termination dates their planning will be disrupted and either they will run the risk of losing other opportunities or the employer will lose employees who it may need to carry on its operations. Second, DOL's approach is in accord with Congress' express intent to prohibit rolling notice.

In the legislative history, the floor debats stipulate that rolling notice is *not* acceptable, and, accordingly, routine periodic notice of a possible plant closing or mass layoff is not permitted under the regulations.

Publication of Interim Interpretative Rule; Request for Comments; Expiration Date of Interim Interpretative Rule

This document is published as an interim interpretative rule with a 60-day comment period. WARN was enacted on August 4, 1988. 102 Stat. 890. With an effective date of February 4, 1989, and the potential requirement that employers provide advance notice as early as December 6, 1988, it is essential that the interpretations contained in this interim interpretative rule be issued as soon as possible.

Due to the short statutory timeframe and the need to provide employers, workers, and governments with sufficient advance notice of the interim interpretative rule, the Department of Labor has found, pursuant to 5 U.S.C. 553(a)(B), that immediate publication of an interim interpretative rule is in the public interest in that the employer community and workers need timely guidance on the requirements of WARN. Further, this is an interpretative rule, for which the Administrative Procedure Act does not require a notice of proposed rulemaking or a delay in the effective date. 5 U.S.C. 553(b)(A) and (d)(2).

The Department also is requesting comments on the interim interpretative rule for 60 days after its publication, and plans to respond to those comments and publish a final rule at a later date. The extended comment period is provided so that the many parties interested in the final rule will have a full opportunity to comment before final regulations are published. The formal Notice of Proposed Rulemaking is being published separately in the December 5, 1988, issue of the **Federal Register**.

As noted in § 639.11 of the interim interpretative rule, it expires on April 1, 1989. By that time, DOL expects to have published an effective a final rule.

Regulatory Impact

The interim interpretative rule interprets the provisions of the Worker Adjustment and Retraining Notification Act. It imposes no burdens on employers or others; implementation flows from the Act itself. As it would not have the financial or other impact to make it a major rule, preparation of a regulatory impact analysis is unnecessary. See Executive Order 12291, 5 U.S.C. 601 *note*.

Insofar as is possible, however, DOL intends to perform an analysis of the impact of the Act, this interim interpretative rule, and the final rule, to aid the General Accounting Office in its function of reporting to Congress on the Act.

The interim interpretative rule was not preceded by a general notice of proposed rulemaking. Therefore, it is not a "rule" as that term is defined in the Regulatory Flexibility Act. 5 U.S.C. 601(2).

VOL 53 ISS 232 DE 2 1988 UMI

Paperwork Reduction Act

The interim interpretative rule is not a rule to which the Paperwork Reduction Act applies. Further, this rule imposes no requirement that a company maintain any record in any format, or that any record be on file for subsequent government review.

Information collection requirements in the final rule will be submitted to the Office of Management and Budget for review pursuant to the Paperwork Reduction Act.

Employment, Labor, Labor management relations, Labor unions, Penalties.

Interim Interpretative Rule

Accordingly, Chapter V of Title 20, Code of Federal Regulations, is amended by adding a new Part 639, to read as follows:

PART 639—WORKER ADJUSTMENT AND RETRAINING NOTIFICATION

Sec.

639.1 Purpose and scope.
639.2 What does WARN require?
639.3 Definitions.
639.4 Who must give notice?
639.5 When must notice be given?
639.6 Who must receive notice?
639.7 What must the notice contain?
639.8 How is the notice served?
639.9 When may notice be given less than 60 days in advance?
639.10 When may notice be extended?
639.11 Expiration date.

Authority: 29 U.S.C. 2107(a).

§ 639.1 Purpose and scope.

(a) *Purpose of WARN.* The Worker Adjustment and Retraining Notification Act (WARN or the Act) provides protection to workers, their families and communities by requiring employers to provide notification 60 calendar days in advance of plant closings and mass layoffs. Advance notice provides workers and their families some transition time to adjust to the prospective loss of employment, to seek and obtain alternative jobs and, if necessary, to enter skill training or retraining that will allow these workers to successfully compete in the job market. WARN also provides for notice to State dislocated worker units so that dislocated worker assistance can be promptly provided.

(b) *Scope of these regulations.* These regulations establish basic definitions and rules for giving notice, implementing the provisions of WARN. The Department's objective is to establish clear principles and broad guidelines which can be applied in specific circumstances. However, the Department recognizes that Federal rulemaking cannot address the multitude of industry and company-specific situations in which advance notice will be given.

(c) *Notice encouraged where not required.* Section 7 of the Act states:

> It is the sense of Congress that an employer who is not required to comply with the notice requirements of section 3 should, to the extent possible, provide notice to its employees about a proposal to close a plant or permanently reduce its workforce.

(d) *WARN enforcement.* Enforcement of WARN will be through the courts, as provided in section 5 of the statute. Employees, their representatives and units of local government may initiate civil actions against employers believed to be in violation of section 3 of the Act. The Department of Labor has no legal standing in any enforcement action and, resultantly, will not be in a position to issue advisory opinions affecting specific cases. These regulations are interpretive, and are not binding upon the courts. The Department will provide assistance in understanding these regulations and may revise them from time to time as may be necessary.

(e) *Notice in ambiguous situations.* It is civically desirable, it would appear to be good business practice for an employer to provide advance notice to its workers or unions, local government and the State when terminating a significant number of employees. In practical terms, there are some questions and ambiguities of interpretation inherent in the application of WARN to business practices in the market economy that cannot be addressed in these regulations. It is therefore prudent for employers to weigh the desirability of advance notice against the possibility of expensive and time-consuming litigation to resolve disputes where notice has not been given.

(f) *Coordination with job placement and retraining programs.* The Department, through these regulations and through the Trade Adjustment Assistance Program (TAA) and Economic Dislocation and Worker Adjustment Assistance Act (EDWAA) regulations, encourages maximum coordination of the actions and activities of these programs to assure that the negative impact of dislocation on workers is lessened to the extent possible. By providing for notice to the State dislocated worker unit, WARN notice begins the process of assisting workers who will be dislocated.

(g) *WARN not to supersede other laws and contracts.* The provisions of WARN do not supersede any State laws or collective bargaining agreements that provide for additional notice or rights and remedies. If such law or agreement provides for a longer notice period, WARN notice shall run concurrently with that additional notice period.

§ 639.2 What does WARN require?

WARN requires employers who are planning a plant closing or a mass layoff to give affected employees at least 60 days' notice of such an employment action. While the 60-day period is the minimum for advance notice, this provision is not intended to discourage employers from voluntarily providing longer periods of advance notice. Not all plant closings and layoffs are subject to the Act, and certain employment thresholds must be reached before the Act applies. The Act sets out specific exemptions, and provides for a reduced period of notification in particular circumstances. Damages and civil penalties can be assessed against employers who violate the Act.

§ 639.3 Definitions.

(a) *Employer.* (1) The term "employer" means any business enterprise that employs (i) 100 or more employees, excluding part-time employees; or (ii) 100 or more employees, including part-time employees, who in the aggregate work at least 4,000 hours per week, exclusive of hours of overtime. Workers on temporary layoff who have a reasonable expectation of recall should be counted as employees. The term "employer" includes non-profit organizations of the requisite size. Regular Federal, State, and local government public services are not covered.

(2) Independent contractors and subsidiaries which are wholly or partially owned by a parent company will be treated as separate employers or as a part of the parent or contracting company depending upon the degree of their independence from the parent. Some of the factors to be considered in making this determination are (i) common ownership, (ii) common directors and/or officers, (iii) de facto exercise of control, (iv) unity of personnel policies emanating from a common source, and (v) the dependency of operations.

(3) An employer may have one or more sites of employment under common ownership or control. An example would be a major auto maker which has dozens of automobile plants throughout the country. Each plant would be considered a site of employment, but there is only one "employer", the auto maker.

(b) *Plant closing.* The term "plant closing" means the permanent or temporary shutdown of a "single site of employment", or one or more "facilities or operating units" within a single site of employment, if the shutdown results in an "employment loss" during *any 30-day period* at the single site of employment for *50 or more* employees, excluding any part-time employees. An employment action that results in the effective cessation of production or the work performed by a unit, even if a few employees remain, is a shutdown. A "temporary shutdown" triggers the notice requirement only if there are a sufficient number of terminations, layoffs exceeding 6 months, or reductions in hours of work as specified under the definition of "employment loss."

(c) *Mass layoff.* The term "mass layoff" means a reduction in force which first, is not the result of a plant closing, and second, results in an employment loss at the single site of employment during *any 30-day period* for:

(1) *At least 33 percent* of the employees, excluding part-time employees, and

(2) *At least 50 employees,* excluding part-time employees.

Where 500 or more employees are affected, the 33% requirement does not apply, and notice is required if the other criteria are met. Plant closings, which can be triggered by the termination of a smaller number of workers than a mass layoff, involve the shutdown of one or more district units within a single site. A mass layoff involves employment loss, regardless or whether one of more units are shut down at the site.

(d) *Representative.* The term "representative" means an exclusive representative of employees within the meaning of Section 9(a) or 8(f) of the National Labor Relations Act or Section 2 of the Railway Labor Act.

(e) *Affected employees.* The term "affected employees" means employees who may reasonably be expected to experience an employment loss as a consequence of a proposed plant closing or mass layoff by their employer. This includes employees who will likely lose their jobs because of bumping rights or other factors, to the extent that such workers can be identified at the time notice is required to be given. The term "affected employees" includes managerial and supervisory employees, but does not include business partners. Consultant or contract employees who have a separate employment relationship with another employer and are paid by that other employer, or who are self-employed, are not "affected employees" of the business to which they are assigned. In addition, for purposes of determining whether coverage thresholds are met, only incumbent workers in jobs being eliminated are counted.

(f) *Employment loss.* (1) The term "employment loss" means (i) an employment termination, other than a discharge for cause, voluntary departure, or retirement, (ii) a layoff exceeding 6 months, or (iii) a reduction in hours of work of individual employees of more than 50% during each month of any 6-month period.

(2) Where a termination or a layoff (see paragraphs (f)(1) (i) and (ii) of this section) is involved, an employment loss occurs upon the loss of full employment status. "Full employment status" means full pay, benefits, and other employment entitlements. Payment of normal termination or separation benefits otherwise due, such as severance pay and supplemental unemployment benefits, does not serve to continue full employment status.

(3) Employees who are transferred to employer-sponsored programs in which they retain full pay, benefits and other employment entitlements do not suffer an employment loss.

(4) An employee is not considered to have experienced an employment loss if the closing or layoff is the result of the relocation or consolidation of part or all of the employer's business and, prior to the closing or layoff—

(i) The employer offers to transfer the employee to a different site of employment within a reasonable commuting distance with no more than a 6-month break in employment, or

(ii) The employer offers to transfer the employee to any other site of employment regardless of distance with no more than a 6-month break in employment, and the employee accepts within 30 days of the offer or of the closing or layoff, whichever is later.

(g) *Unit of local government.* The term "unit of local government" means any general purpose political subdivision of a State, which has the power to levy taxes and spend funds as well as general corporate and police powers. When a covered employment site is located in more than one unit of local government, the employer must give notice to the unit to which it determines it paid the highest taxes for the year preceding the year for which the determination is made. All local taxes paid should be aggregated for this purpose.

(h) *Part-time employee.* The term "part-time" employee means an employee who is employed for an average of fewer than 20 hours per week or who has been employed for fewer than 6 of the 12 months preceding the date on which notice is required, including workers who work full-time. This term includes workers who would traditionally be understood as short-term, "seasonal" employees. The period to be used for calculating whether a worker has worked "an average of fewer than 20 hours per week" is the shorter of the actual time the worker has been employed or the most recent 90 days.

(i) *Single site of employment.* (1) A single site of employment can refer to either a single location or a group of contiguous locations. Groups of structures which form a campus or industrial park, or separate facilities across the street from one another, may be considered a single site of employment.

(2) Separate buildings or areas which are not directly connected or in immediate proximity may be considered a single site of employment if they are in reasonable geographic proximity, used for the same purpose, and share the same staff and equipment. An example is an employer who manages a number of warehouses in an area but who regularly shifts or rotates the same employees from one building to another.

(3) Non-contiguous sites in the same geographic area which do not share the same staff or operational purpose should not be considered a single site. For example, assembly plants which are located on opposite sides of a town and which are managed by a single employer may be considered separate sites if they employ different workers.

(4) The term "single site of employment" may also apply to unusual organizational situations where the above criteria do not reasonably apply.

(j) *Facility or operating unit.* The term "facility" refers to a building or buildings, and the term "operating unit" refers to a product, task or specific work function within or across facilities at the single site. For workers whose primary duties require travel from point to point (e.g., railroad workers, bus drivers, salespersons), the facility or operating unit to which they are assigned as their home base will define the unit in which they are covered for WARN purposes.

(k) *State dislocated worker unit.* The term "State dislocated worker unit" means a unit to be designated or created in each State by the Governor under Title III of the Job Training Partnership Act, as amended by the Economic Dislocation and Worker Adjustment Assistance Act.

(l) *State.* For the purpose of WARN, the term "State" includes the 50 States,

the District of Columbia, the Commonwealth of Puerto Rico, and the U.S. Virgin Islands.

§ 639.4 Who must give notice?

Section 3(a) of WARN states that "an employer shall not order a plant closing or mass layoff until the end of a 60-day period after the employer serves written notice of such an order * * *." Therefore, an employer who is anticipating carrying out a plant closing or mass layoff is required to give notice to affected employees or their representative(s), the State dislocated worker unit and the chief elected official of a unit of local government. (See definitions in § 639.3 of this part.)

(a) It is the responsibility of the employer to decide the most appropriate person within the employer's organization to prepare and deliver the notice to affected employees or their representative(s), the State dislocated worker unit and the chief elected official of a unit of local government. In most instances, this may be the local site plant manager, the local personnel director or a labor relations officer.

(b) Consistent with Section 3(c) of WARN, an employer who has previously carried out a short-term layoff (less than 6 months) which is being extended beyond 6 months is required to give notice when it becomes reasonably foreseeable that the extension is required. Section 3(c) requires that the layoff, at its outset, was announced to be for less than 6 months.

(c) In the case of the sale of part or all of a business, Section 2(b)(1) of WARN defines who the "employer" is. The full responsibility to notify any workers whose employment will be terminated as a result of a sale remains with the seller up to and including the effective date (time) of the sale and is then assumed by the buyer. According to the language of the Act, employees are always entitled to notice, i.e., at all times the employer is responsible for providing notice. For purposes of coverage under WARN, an employee of the seller becomes an employee of the buyer at the time of the sale.

(1) If the seller is made aware of any definite plans on the part of the buyer to carry out a plant closing or mass layoff within 60 days of purchase, the seller may give notice to affected employees as an agent of the buyer, if so empowered. If the seller does not give notice, the buyer is responsible to give notice.

(2) If the buyer has been silent about any plans to reduce the workforce, the buyer is responsible for giving notice to affected employees after the time of sale.

(3) It may be prudent for the buyer and seller to determine the impacts of the sale on workers, and to arrange between them for advance notice to be given to affected employees or their representative(s), if a mass layoff or plant closing is planned. In addition, it may be advisable, considering potential liabilities, for the contract of sale to contain an explicit discussion of these arrangements.

§ 639.5 When must notice be given?

(a) *General rule.* With certain exceptions discussed in paragraphs (b), (c) and (d) of this section and in § 639.9 of this part, notice must be given at least 60 days prior to any planned plant closing or mass layoff, as defined in these regulations. When all employees are not terminated on the same date, the date of the first individual termination within the statutory 30-day period triggers the 60-day notice requirement. The first and each subsequent group of terminees are entitled to a full 60 days' notice. In order for an employer to decide whether issuing notice is required, the employer should:

(1) Look ahead 30 days and behind 30 days to determine whether employment actions both taken and planned will, in the aggregate for any 30-day period, reach the minimum numbers for a plant closing or a mass layoff and thus trigger the notice requirement; and

(2) Consistent with section 3(d) of WARN, look ahead 90 days and behind 90 days to determine whether employment actions both taken and planned which separately may not be of sufficient size to trigger WARN coverage will, in the aggregate for any 90-day period, reach the minimum numbers for a plant closing or a mass layoff and thus trigger the notice requirement. An employer is not, however, required under section 3(d) to give notice if the employer demonstrates that the separate employment losses are the result of separate and distinct actions and causes, and are not an attempt to evade the requirements of WARN.

(3) The point in time at which the number of employees is to be measured for the purpose of determining coverage is the date the first notice is required to be given. If this "snapshot" of the number of employees employed on that date is clearly unrepresentative of the ordinary or average employment level, then a more representative number can be used to determine coverage. Examples of unrepresentative employment levels include cases when the level is near the peak or trough of an employment cycle or when large upward or downward shifts in the number of employees occur around the time notice is to be given. A more representative number may be an average number of employees over a recent period of time or the number of employees on an alternative date which is more representative of normal employment levels.

(b) *Transfers.* (1) Notice is not required in certain cases involving transfers, as described under the definition of "employment loss" at § 639.3(f) of this part.

(2) The term "transfer" means that the new job is substantially equivalent in terms of pay and working conditions. The term "reasonable commuting distance" has the same meaning given to it by the Internal Revenue Service in 26 CFR 1.119–1(d)(4), i.e., consideration should be given to the following factors: geographic accessibility of the place of work, the quality of the roads, customarily available transportation, and the usual travel time.

(3) In cases where the transfer is beyond reasonable commuting distance, the employer may become liable for failure to give notice if an offer to transfer is not accepted within 30 days of the offer or of the closing or layoff (whichever is later). Depending upon when the offer of transfer was made by the employer, the normal 60-day notice period may have expired and the plant closing or mass layoff may have occurred. An employer is, therefore, well advised to provide 60-day advance notice as part of the transfer offer.

(c) *Temporary employment.* (1) No notice is required if the closing is of a temporary facility, or if the closing or layoff is the result of the completion of a particular project or undertaking, and the affected employees were hired with the understanding that their employment was limited to the duration of the facility or the project or undertaking.

(2) The employees must clearly understand at the time of hire that their employment is temporary. When such understandings exist will be determined by reference to employment contracts or employment practices of an industry or a locality, but the burden of proof will lie with the employer should questions arise regarding the temporary employment understandings.

(3) Employers in agriculture and construction frequently hire workers for harvesting, processing, or for work on a particular building. Such work may be seasonal but recurring. Such work falls under this exemption if the workers understood at the time they were hired that their work was temporary. In

uncertain situations, it may be prudent for employers to clarify temporary work understandings in writing when workers are hired. The same employers may also have permanent employees who work on a variety of jobs and tasks continuously through most of the calendar year. Such employees are not included under this exemption. Giving written notice will not convert permanent employment into temporary work, making jobs exempt from WARN.

Certain long-term jobs may be related to a specific contract or order. Whether such jobs are temporary depends on the duration of the job, whether the employee was specifically hired to work only on the job and whether the employer expects that the contract or order is part of a long-term relationship. For example, an aircraft manufacturer hires workers to produce a standard airplane for the U.S. fleet with the expectation that its contract will continue to be renewed during the foreseeable future. The employees of this manufacturer would not be considered temporary.

(d) *Strikes or lockouts.* The statute provides an exemption for strikes and lockouts which occur in the normal course of collective bargaining, and which are not intended to evade the requirements of the Act. A lockout not related to collective bargaining which is intended as a subterfuge to evade the Act does not qualify for this exemption. An employer need not give notice when permanently replacing a person who is deemed to be an economic striker under the National Labor Relations Act.

§ 639.6 Who must receive notice?

Section 3(a) of WARN provides for notice to each representative of the affected employees as of the time notice is required to be given or, if there is no such representative at that time, to each affected employee. Notice also must be served on the State dislocated worker unit and the chief elected official of the unit of local government within which such closing or layoff is to occur. Section 2(b)(1) of the Act states that "any person who is an employee of the seller (other than a part-time employee) as of the effective date of the sale shall be considered an employee of the purchaser immediately after the effective date of the sale." This provision preserves the notice rights of the employees of a business that has been sold.

(a) *Representative(s) of affected employees.* Written notice is to be served upon the chief elected officer of the exclusive representative or bargaining agent of affected employees at the time of the notice. If this person is not the same as the officer of each local union representing affected employees, it is recommended that a copy also be given to the local union official(s).

(b) *Affected Employees.* Notice is to be given not only to incumbents in positions that are to be eliminated, but also to employees who will likely lose their jobs because of bumping rights or other factors, to the extent that such workers can be identified. While part-time employees are not counted in determining whether plant closing or mass layoff thresholds are reached, such workers are due notice.

(c) *State dislocated worker unit.* The Act provides that notice is to be served upon the State dislocated worker unit. Since the States are restructuring to implement training under EDWAA, service of notice upon the State Governor constitutes service upon the State dislocated worker unit until such time as the Governor makes public State procedures for serving notice to this unit.

(d) *Chief elected official of the unit of local government.* The identity of the chief elected official will vary according to the local government structure. In the case of elected boards, the notice is to be served upon the board's chairperson.

§ 639.7 What must the notice contain?

(a) *Notice must be specific.* All notices must be specific. If notice is given conditioned upon the occurrence of an event, i.e., the termination of a contract when negotiations for its renewal are in progress, the notice must clearly identify the fact that the notice is conditional and the circumstances upon which the notice is based.

(b) Notice to each representative of affected employees is to contain:

(1) The name and address of the employment site where the plant closing or mass layoff will occur;

(2) The nature of the planned action, i.e., whether it is a plant closing or a mass layoff, and whether it is expected to be permanent or temporary;

(3) The expected date of the first separation and the anticipated schedule for making separations;

(4) The job titles of positions to be affected, the number of employees in each job classification, and the names of the workers currently holding those jobs;

(5) A statement as to the existence of any applicable bumping rights;

(6) Identification of other representatives, if any, of other affected employees at the same site; and

(7) The name, address, and telephone number of a company official to contact for further information.

In addition, it is recommended that the notice include information on available dislocated worker assistance, and, if the planned action is expected to be temporary, the estimated duration, if known.

(c) Notice to each affected employee who does not have a representative is to be written in language understandable to the employee and is to contain:

(1) The name and address of the employment site where the plant closing or mass layoff will occur;

(2) The nature of the planned action, i.e., whether it is a plant closing or a mass layoff, and whether it is expected to be permanent or temporary;

(3) The expected date when the plant closing or mass layoff will commence and the expected date when the individual employee will be separated;

(4) A statement as to the existence of applicable bumping rights, if any.

In addition, it is recommended that the notice include information on available dislocated worker assistance, and, if the planned action is expected to be temporary, the estimated duration, if know.

(d) Notice to the State dislocated worker unit is to contain:

(1) The name and address of the employment site where the plant closing or mass layoff will occur;

(2) The nature of the planned action, i.e., whether it is a plant closing or a mass layoff;

(3) The expected date of the first separation, and the anticipated schedule for making separations;

(4) The job titles of positions to be affected, and the number of affected employees in each job classification;

(5) A statement as to the existence of any applicable bumping rights;

(6) The name of each union representing affected employees, and the name and address of the chief elected officer of each union; and

(7) The name, address, and telephone number of a company official to contact for further information.

In addition, it is recommended that the notice include a statement of whether the planned action is expected to be permanent or temporary, and, if temporary, its expected duration.

(e) Notice to the chief elected official of the unit of local government is to contain:

(1) The name and address of the employment site where the plant closing or mass layoff is to occur;

(2) The nature of the planned action, i.e., whether it is a plant closing or a mass layoff;

(3) The expected date of the first separation and the anticipated schedule for making separations;

(4) The job titles of positions to be affected, and the number of affected employees in each job classification;

(5) A statement as to the existence of any applicable bumping rights;

(6) The name of each union representing affected employees, and the name and address of the chief elected officer of each union; and

(7) The name, and address, and telephone number of a company official to contact for further information.

In addition, it is recommended that the notice include a statement of whether the planned action is expected to be permanent or temporary, and, if temporary, its expected duration.

§ 639.8 How is notice served?

Any reasonable method of delivery to the parties listed under § 639.6 of this part which is designed to ensure receipt of notice at least 60 days before separation is acceptable (e.g., first class mail, personal delivery with optional signed receipt). In the case of notification directly to affected employees, insertion of notice into pay envelopes is another viable option. A ticketed notice, i.e., preprinted notice regularly included in each employee's pay check or pay envelope, does not meet the requirements of WARN.

§ 639.9 When may notice be given less than 60 days in advance?

Section 3(b) of WARN sets forth three conditions under which the notification period may be reduced to less than 60 days. These three exceptions are to be narrowly construed and the employer bears the burden of proof that conditions for the exceptions have been met. If one of the exceptions is applicable, the employer must give as much notice as is practicable, and must, at the time notice actually is given, provide a brief statement of the reason for reducing the notice period, in addition to the other elements set out in § 639.7 at the time notice is actually given.

(a) The exception under Section 3(b)(1) of WARN termed "faltering company" applies to plant closings but not to mass layoffs. To qualify for reduced notice under this exception:

(1) An employer must have been actively seeking capital or business at the time that 60-day notice would have been required. That is, the employer must have been seeking financing or refinancing through the arrangement of loans, the issuance of stocks, bonds, or other methods of internally generated financing; or the employer must have been seeking additional money, credit, or business through any other commercially reasonable method. The employer must be able to identify specific actions taken to obtain capital or business.

(2) There must have been a realistic opportunity to obtain the financing or business sought.

(3) The financing or business sought would have been sufficient, if obtained, to have enabled the employer to avoid or postpone the shutdown. The employer must be able to objectively demonstrate that the amount of capital or the volume of new business sought would have enabled the employer to keep the facility, operating unit, or site open for a reasonable period of time.

(4) The employer must have reasonably and in good faith believed that giving the required notice would have precluded the employer from obtaining the needed capital or business. The employer must be able to objectively demonstrate that it reasonably thought that a potential customer or source of financing would have been unwilling to provide the new business or capital if notice were given, that is, if the employees, customers or the public were aware that the facility, operating unit, or site might have to close. This condition may be satisfied if the employer can show that the financing or business source would not choose to do business with a troubled company or with a company whose workforce would be looking for other jobs.

The actions of an employer relying on the "faltering company" exception will be viewed in a company-wide context. Thus, a company with access to capital markets or with cash reserves may not avail itself of this exception by looking solely at the financial condition of the facility, operating unit, or site to be closed.

(b)(1) The "unforeseeable business circumstances" exception under Section 3(b)(2)(A) of WARN applies to plant closings and mass layoffs caused by business circumstances that were not reasonably foreseeable at the time that 60-day notice would have been required.

(2) The primary objective indicator of a business circumstance that is not reasonably foreseeable is that the circumstance is caused by some sudden and unexpected action or condition outside the employer's control. A principal client's sudden and unexpected termination of a major contract with the employer, a strike at a major supplier of the employer, and an unanticipated and dramatic major economic downturn might each be considered a business circumstance that is not reasonably foreseeable. The test for determining when business circumstances are not reasonably foreseeable focuses on an employer's business judgment. The employer must exercise such commercially reasonable business judgment as would a similarly situated employer in predicting the demands of its particular market. The employer is not required, however, to accurately predict general economic conditions that also may affect demand for its products or services.

(c) The "natural disaster" exception in § 3(b)(2)(B) of WARN applies to plant closings and mass layoffs due to any form of a natural disaster. Floods, earthquakes, droughts, storms, tidal waves or tsunamis and similar effects of nature are natural disasters under this provision. To qualify for this exemption, an employer must be able to demonstrate that its plant closing or mass layoff is a direct result of a natural disaster. While a disaster may preclude full or any advance notice, notice still must be given, whether in advance or after the fact of an employment loss caused by a natural disaster. Where a plant closing or mass layoff occurs as an indirect result of a natural disaster, this exception does not apply but the "unforeseeable business circumstance" exception described in paragraph (b) of this section may be applicable.

§ 639.10 When may notice be extended?

Additional notice is required when the dates of a planned plant closing or mass layoff are extended beyond the date announced in the original notice.

(a) If the postponement is for less than 60 days from the originally scheduled date, the additional notice should be given as soon as possible to the parties identified in § 639.6 and should include reference to the earlier notice, the date to which the planned action is postponed, and the reasons for the postponement.

(b) If the postponement is for 60 days or more from the originally scheduled date, the additional notice should be treated as new notice subject to the provisions of §§ 639.5, 639.6, and 639.7 of this part. Rolling notice, in the sense of routine periodic notice, given whether or not a plant closing or mass layoffs is impending, and with the intent to evade the purpose of the Act rather than give specific notice as required by WARN, is not acceptable.

§ 639.11 Expiration date.

Unless amended to extend its effectiveness, this part shall not be effective on or after April 1, 1989.

Signed at Washington, DC, this 30th day of November 1988.

Ann McLaughlin,

Secretary of Labor.

LIST OF PUBLIC LAWS

Note: The list of public laws enacted during the second session of the 100th Congress has been completed.

Last List November 30, 1988

The list will be resumed when bills are enacted into public law during the first session of the 101st Congress, which convenes on January 3, 1989. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

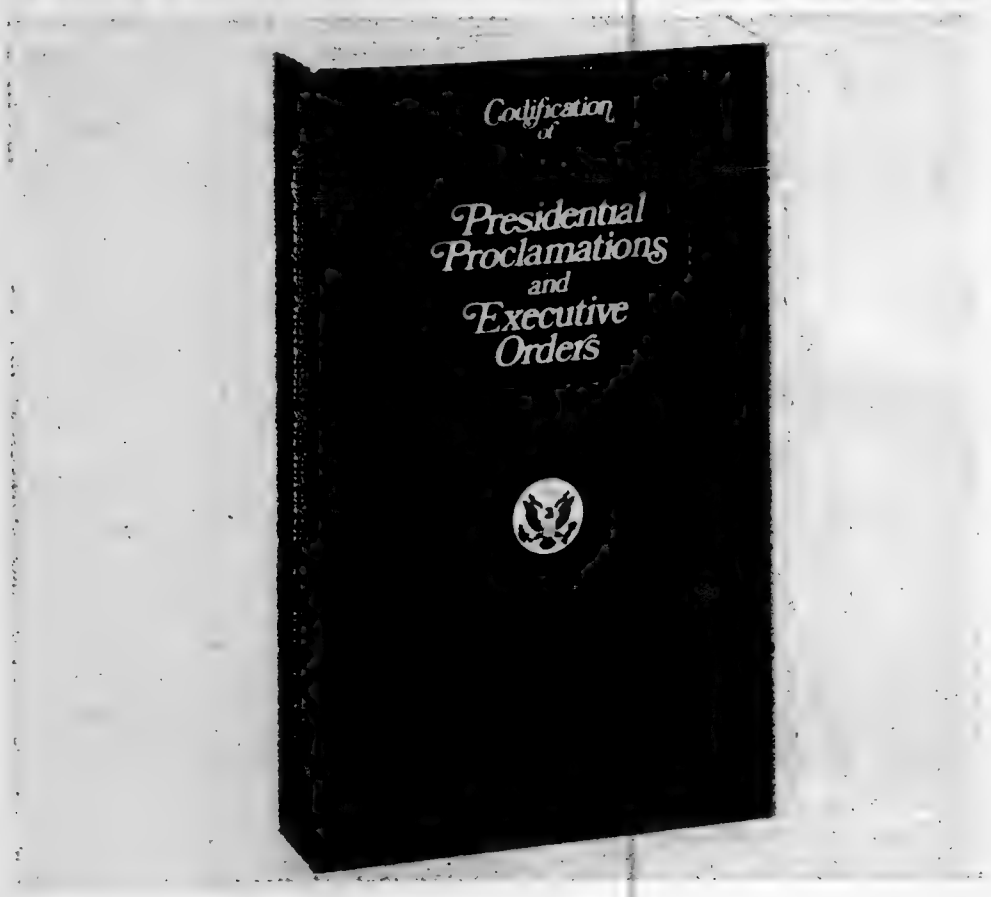
New edition now available....



For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period January 20, 1961, through January 20,1985, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1961-1985 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

Rules and Regulations

Federal Register
Vol. 53, No. 233
Monday, December 5, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 831 and 841

Court Orders Affecting Retirement Benefits

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is adopting its proposed regulations concerning modifications of State court orders affecting survivor annuities under the Civil Service Retirement System (CSRS) and Federal Employees Retirement System (FERS). These rules implement sections 8341(h)(4) and 8445(d) of title 5, United States Code, that, after the retirement or death of the employee, prohibit OPM from honoring modifications of State court orders relating to survivor annuities. These regulations clarify that OPM will not honor a State court order awarding a survivor annuity if issued after the retirement of the employee unless that order actually terminates the marriage or after the employee's death. The regulations also clarify that State courts cannot bypass the statutory prohibition against honoring modifications by reserving jurisdiction in the decree terminating the marriage or by making the award effective retroactively to the date of the judgment terminating the marriage.

EFFECTIVE DATE: January 4, 1989.

ADDRESS: Send court orders affecting CSRS or FERS retirement benefits to Allotment Section, Office of Personnel Management; P.O. Box 17; Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Harold L. Siegelman, (202) 632–4682.

SUPPLEMENTARY INFORMATION: On August 2, 1988, we published (at 53 FR 29057) proposed rules concerning modifications of State court orders affecting survivor annuities under the Civil Service Retirement System (CSRS) and Federal Employees Retirement System (FERS). We received two comments on the proposed rules.

Both commenters apparently were confused by the term "former spouse annuity." One commenter used statutory references that apply only to benefits payable during the lifetime of the employee. As we use that term throughout our retirement regulations, it only applies to the *survivor* benefits. Sections 831.1703 and 841.902 define "former spouse annuity" to mean "a recurring benefit * * * that is payable to a former spouse after the employee's, Member's, or retiree's death." These regulations only apply to awards of survivor benefits.

One commenter asserted that the proposed regulations are directly in conflict with the statutory provision. As applied to survivor benefits, the statutory authority for these regulations is clear.

The Civil Service Retirement Spouse Equity Act of 1984, Pub. L. 98–615, added section 8341(h) to title 5, United States Code. This section permits State courts, when terminating a marriage, to award survivor annuities under CSRS to former spouses of employees and retirees covered by that retirement system. Paragraph (h)(4) of this section nullifies modifications of State court orders or court-approved property settlement agreements after the retirement or death of the employee to the extent that the modification involves a CSRS survivor annuity for a former spouse.

Similarly, the FERS Act of 1986, Pub. L. 99–335, applied a similar provision, in section 8445 of title 5, United States Code, to employees covered by FERS. Subsection (d) of that section contains the same restriction against modifications involving FERS survivor annuities. These regulations merely implement the statutory requirements.

Both commenters suggested that it could be appropriate for the court to consider the termination of the marriage separate from the property division. As it affects survivor benefits based on the service of a retiree, Federal statute does not permit such a "bifurcated" proceeding. The regulations are intended to give notice of the effect of the statutory prohibition against modification of court orders resulting from bifurcated divorce proceedings (i.e., granting the divorce before division of the marital property). Recently, OPM has received an increasing number of State court orders that terminate marriages of Federal employees and retirees but leave property rights of the parties (including the right to survivor annuities under CSRS or FERS) for later adjudication. These regulations give notice that OPM has no legal authority to honor court orders awarding a survivor annuity if issued after the retirement or death of the employee, unless the award is made in, or prior to, the judgment terminating the marriage, regardless of any reservation of jurisdiction or retroactive effective date of the order granting the survivor annuity.

One commenter also questioned the effect of the rule on cases in which the divorce is granted orally in open court but the written judgment with the property division is signed and recorded at a later date. We considered the written judgment as the order terminating the marriage but the regulations did not make this clear. Accordingly, we have clarified §§ 831.1704(e)(4) and 841.903(d)(4).

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulation will only affect Federal agencies and retirement payments to retired Government employees, spouses, and former spouses.

List of Subjects in 5 CFR Parts 831 and 841

Administrative practice and procedure, Claims, Disability benefits, Firefighters, Government employees, Income taxes, Law enforcement officers, Pensions, Retirement.

U.S. Office of Personnel Management.

Constance Horner,

Director.

Accordingly, OPM is amending Title 5, Code of Federal Regulations, as follows:

PART 831—RETIREMENT

Subpart Q—Court Orders Affecting Retirement Benefits

1. The authority citation for Subpart Q of Part 831 continues to read:

Authority: 5 U.S.C. 8347.

2. In § 831.1704, paragraph (e) is revised to read as follows:

§ 831.1704 Qualifying court orders.

* * * * *

(e)(1) For purposes of awarding, increasing, reducing, or eliminating a former spouse annuity, or explaining, interpreting, or clarifying a court order that awards, increases, reduces or eliminates a former spouse annuity, the court order must be—

(i) Issued on a day prior to the date of retirement or date of death of the employee; or

(ii) The first order terminating the marital relationship between the retiree and the former spouse.

(2) In paragraph (e)(1) of this section, "date of retirement" means the later of—

(i) The date that the employee files an application for retirement; or

(ii) The effective commencing date for the employee's annuity.

(3) In paragraphs (e)(1) and (e)(4) of this section, "issued" means actually filed with the clerk of the court, and does not mean the effective date of a retroactive court order that is effective prior to the date when actually filed with the clerk of the court (e.g., order issued *nunc pro tunc*).

(4) In paragraph (e)(1)(ii) of this section, the "first order terminating the marital relationship between the retiree and the former spouse" means the original written order that first ends (or first documents an oral order ending) the marriage, and does not include—

(i) Any order that amends, explains, clarifies, or interprets the original written order regardless of the effective date of the order making the amendment, explanation, clarification, or interpretation; or

(ii) Any order issued under reserved jurisdiction or any other orders issued subsequent to the original written order terminating the marriage that divide marital property (even if no division of marital property was made in the order terminating the marriage) regardless of the effective date of the order.

PART 841—FEDERAL EMPLOYEES' RETIREMENT SYSTEM—GENERAL ADMINISTRATION

Subpart I—Court Orders Affecting Retirement Benefits

3. The authority citation for Subpart I of Part 841 continues to read:

Authority: 5 U.S.C. 8461.

4. In § 841.903, paragraph (d) is revised to read as follows:

§ 841.903 Qualifying court orders.

* * * * *

(d)(1) For purposes of awarding, increasing, reducing, or eliminating a former spouse annuity, or explaining, interpreting, or clarifying a court order that awards, increases, reduces or eliminates a former spouse annuity, the court order must be—

(i) Issued on a day prior to the date of retirement or date of death of the employee; or

(ii) The first order terminating the marital relationship between the retiree and the former spouse.

(2) In paragraph (d)(1) of this section, "date of retirement" means the later of—

(i) The date that the employee files an application for retirement; or

(ii) The effective commencing date for the employee's annuity.

(3) In paragraphs (d)(1) and (d)(4) of this section, "issued" means actually filed with the clerk of the court, and does not mean the effective date of a retroactive court order that is effective prior to the date when actually filed with the clerk of the court (e.g., order issued *nunc pro tunc*).

(4) In paragraph (d)(1)(ii) of this section, the "first order terminating the marital relationship between the retiree and the former spouse" means the original written order that first ends (or first documents an oral order ending) the marriage, and does not include—

(i) Any order that amends, explains, clarifies, or interprets the original written order regardless of the effective date of the order making the amendment, explanation, clarification, or interpretation; or

(ii) An order issued under reserved jurisdiction or any other orders issued subsequent to the original written order terminating the marriage that divide marital property (even if no division of marital property was made in the order terminating the marriage) regardless of the effective date of the order.

[FR Doc. 88-27573 Filed 12-2-88; 8:45 am]

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 16

Restriction on Importation of Meat From Australia and New Zealand

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: This rule adjusts the quantitative restrictions on meat imports from Australia and New Zealand. This adjustment increases the permissible level of meat imports from Australia and New Zealand to reflect changes in the estimated meat imports from other supplying countries. Such an increase was provided for in voluntary restraint agreements with Australia and New Zealand.

EFFECTIVE DATE: November 30, 1988.

FOR FURTHER INFORMATION CONTACT: Norman R. Kallemeyn, (202) 447-8031, Dairy, Livestock and Poultry Division, Foreign Agricultural Service, USDA, Room 6616 South Building, Washington, DC 20250.

SUPPLEMENTARY INFORMATION: Pursuant to the authority of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and Executive Order 11539, as amended, the Office of the United States Trade Representative has negotiated agreements with the Governments of Australia and New Zealand whereby those countries have voluntarily agreed to limit the quantity of certain meats exported to the United States during calendar year 1988. Those agreements provided that, if it is subsequently estimated by the United States that the amount of meat imported from other supplying countries is expected to be less than the projected total used in negotiating the maximum level of imports contained in those agreements, then the United States will promptly increase the total level of permissible imports from Australia and New Zealand by the estimated amount of the shortfall from other supplying countries.

Such a shortfall is now expected to occur. Accordingly, this final rule increases the permissible level of imports from Australia and New Zealand to reflect the allocation of that shortfall to Australia and New Zealand. This final rule also deletes the references to TSUS item 107.61 (Harmonized Tariff Schedule of the United States subheadings 0201.20.20, 0201.30.20, 0202.20.20, and 0202.30.20) from § 16.5 to conform with the

voluntary restraint agreements with Australia and New Zealand.

The concurrence of the Secretary of State and the United States Trade Representative has been obtained for the issuance of these regulations.

The action taken herewith has been determined to involve foreign affairs functions of the United States. Therefore, this regulation falls within the foreign affairs exception of Executive Order 12291 and the provisions of 5 U.S.C. 553 with respect to proposed rulemaking. Further, the provisions of the Regulatory Flexibility Act do not apply to this rule since the proposed rulemaking provisions of 5 U.S.C. 553 do not apply.

List of Subjects in 7 CFR Part 16

Meat and meat products, Imports.

Accordingly, Subpart A of Part 16 of Title 7 of the Code of Federal Regulations is amended as follows:

PART 16—LIMITATIONS ON IMPORTS OF MEAT

1. The authority citation for Part 16 continues to read as follows:

Authority: Sec. 204, Pub. L. 540, 84th Cong., 70 Stat. 200, as amended (7 U.S.C. 1854), and E.O. 11539 (35 FR 10733), as amended by E.O. 12188 (45 FR 989).

2. Section 16.5 is revised as follows:

§ 16.5 Quantitative restrictions.

(a) *Imports for Australia.* During calendar year 1988, no more than 811.57 million pounds of meat exported from Australia in the form in which it would fall within the definition of meat in TSUS items 106.10, 106.22, 106.25, 107.55, or 107.62 (Harmonized Tariff Schedule of the United States subheadings 0201.10.00, 0201.20.40, 0201.20.60, 0201.30.40, 0201.30.60, 0202.10.00, 0202.20.40, 0202.20.60, 0202.30.60, 0204.21.00, 0204.22.40, 0204.23.40, 0204.41.00, 0204.42.40, and 0204.50.00) may be entered or withdrawn from warehouse for consumption in the United States, whether shipped directly or indirectly from Australia to the United States.

(b) *Imports from New Zealand.* During calendar year 1988, no more than 451.43 million pounds of meat exported from New Zealand in the form in which it would fall within the definition of meat in TSUS items 106.10, 106.22, 106.25, 107.55, or 107.62 (Harmonized Tariff Schedule of the United States subheadings 0201.10.00, 0201.20.40, 0201.20.60, 0201.30.40, 0201.30.60, 0202.10.00, 0202.20.40, 0202.20.60, 0202.30.60, 0204.21.00, 0204.22.40, 0204.23.40, 0204.41.00, 0204.42.40, and 0204.50.00) may be entered or withdrawn from warehouse for consumption in the United States, whether shipped directly or indirectly from New Zealand to the United States.

Issued at Washington, DC, this 30th day of November 1988.

Peter Myers,

Secretary of Agriculture.

[FR Doc. 88-27954 Filed 11-30-88; 4:37 pm]

BILLING CODE 3410-10-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 88-ASO-15]

Revision to Control Zone; Augusta, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises the Augusta, GA, Control Zone by eliminating the Daniel Field Airport from the present description. Surface weather observations which govern IFR/VFR operations in the Control Zone are taken at the Bush Field Airport. Due to environmental differences between Bush Field and Daniel Field, weather conditions can vary greatly at the two airports; i.e., Bush Field, located adjacent to the Savannah River, often reports IFR weather conditions when conditions at Daniel Field are VFR. The Airport Manager and local users have requested the Daniel Field Airport be excluded from the Control Zone.

EFFECTIVE DATE: 0901 u.t.c., April 6, 1989.

FOR FURTHER INFORMATION CONTACT: James G. Walters, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On September 13, 1988, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revise the Augusta, GA, Control Zone (53 FR 35323). The proposed revision would eliminate the Daniel Field Airport from the Augusta, GA, Control Zone. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. This amendment is the same as that proposed in the notice. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6D dated January 4, 1988.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations revises the Augusta, GA, Control Zone by excluding the Daniel Field Airport from the present description.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zone.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Public Law 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. Section 71.171 is amended as follows:

Augusta, GA [Amended]

By eliminating the existing description and substituting the following: "Within a 5-mile radius of Bush Field Airport (Lat. 33°22'11"N., Long. 81°57'53"W). This zone is effective during the specific dates and times established in advance by Notice to Airmen. The effective dates and times will thereafter be continuously published in the Airport/Facility Directory."

Issued in East Point, Georgia, on November 16, 1988.

William D. Wood,
Acting Manager, Air Traffic Division, Southern Region.

BILLING CODE 4910-13-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 65

[DOD Directive 1304.19]

Accession of Chaplains for the Military Services

AGENCY: Office of the Secretary, DOD.

ACTION: Final rule.

SUMMARY: This rule is revised to update the terminology, criteria, and DD Form 2088 to coincide with the intended purpose of 32 CFR Part 65. The rule clarifies the criterion and procedures for religious groups that seek DOD recognition as an ecclesiastical endorsing agent for the purpose of nominating clergy for service as chaplains in the Armed Forces.

EFFECTIVE DATE: November 22, 1988.

FOR FURTHER INFORMATION CONTACT: Chaplain, Colonel, John L. Mann, USAF, Office of the Assistant Secretary of Defense (Force Management and Personnel), Armed Forces Chaplains Board, Room 4C759, Pentagon, Washington, DC 20301-4000, telephone (202) 697-9015.

SUPPLEMENTARY INFORMATION:

List of Subjects in 32 CFR Part 65

Armed Forces, Chaplains.

Accordingly, 32 CFR Part 65 is revised as follows:

PART 65—ACCESSION OF CHAPLAINS FOR THE MILITARY SERVICES

Sec.
65.1 Purpose.
65.2 Applicability.
65.3 Policy.
65.4 Responsibilities.
65.5 Procedures.

Authority: 10 U.S.C. 532, 591, and EO 9397, 3 CFR, 1943-1948 Comp., p. 283.

§ 65.1 Purpose.

This part: (a) Revises 32 CFR Part 65 to update policy, procedures, and responsibilities.

(b) Establishes the educational and ecclesiastical requirements for appointment of military chaplains.

(c) Establishes criteria and procedures under which faith groups may become ecclesiastical endorsing agents.

§ 65.2 Applicability.

This part applies to the Office of the Secretary of Defense (OSD), the Military Departments (including their National Guard and Reserve components), and the Joint Staff (hereafter referred to collectively as "DOD Components"). The term "Military Services," as used herein, refers to the Army, Navy, Air Force, and Marine Corps.

§ 65.3 Policy.

It is DOD policy that professionally qualified chaplains shall be appointed to provide for the free exercise of religion for all members of the Military Services, their dependents, and other authorized persons. Persons appointed to the chaplaincy shall be able to perform a ministry for their own specific faith groups, and provide for ministries appropriate to the rights and needs of persons of other faith groups. Persons appointed to the chaplaincy shall be capable of providing professional staff support to the Military Department concerned.

§ 65.4 Responsibilities.

(a) The *Assistant Secretary of Defense (Force Management and Personnel)* (ASD(FM&P)) may issue additions implementing guidance consistent with DOD 5025.1-M, as appropriate.

(b) The *Secretaries of the Military Departments* shall follow the policy and procedures in this Part to ensure that persons appointed to the chaplaincy shall meet the minimum professional and educational qualifications prescribed herein and any additional requirements established by law and regulation for appointment as an officer and a chaplain.

§ 65.5 Procedures.

(a) *Ecclesiastical Certification of Clergy*

(1) To be considered for appointment and to serve as a chaplain, clergy shall be certified by a DOD-recognized ecclesiastical endorsing agent. The ecclesiastical certification shall attest that the applicant:

(i) Is a fully qualified member of the clergy of a religious faith group represented by the certifying Agency.

(ii) Is qualified to provide directly or indirectly for the free exercise of religion by all members of the Military Services, their dependents, and other authorized persons.

(2) The required ecclesiastical certification shall be made on DD Form 2088, "Ecclesiastical Endorsing Agent Certification." If the applicant has completed a number of years of active professional experience after the completion of educational requirements for the chaplaincy, the certifying agent shall so state on DD Form 2088.

(3) Chaplains who fail to maintain their ecclesiastical certification shall be processed in accordance with DOD Directive 1332.31.[1]

(b) *Criteria for Ecclesiastical Endorsing Agencies.* (1) Religious faith groups that seek to become ecclesiastical endorsing agents for the purpose of certifying the professional qualifications of clergy for appointment as chaplains in the Military Services shall obtain DOD recognition through the action of the Armed Forces Chaplains Board (AFCB). To be considered for DOD recognition, each religious faith group shall:

(i) Be organized exclusively or substantially to provide religious services to a lay constituency.

(ii) Be able to exercise ecclesiastical authority to grant or withdraw ecclesiastical certification.

(iii) Be able to provide continuing validation of ecclesiastical certification.

(iv) Be able to certify clergy who are qualified to provide directly or indirectly for the free exercise of religion by all members of the Military Services, their dependents, and other authorized persons.

(v) Abide by the applicable DOD regulations and policies.

(2) Through the action of the AFCB, the Department of Defense may revoke its recognition of an ecclesiastical endorsing agent that fails to continue to meet the criteria of paragraphs (b)(1) (i) through (v) of this section. The AFCB, before revoking the recognition of an ecclesiastical endorsing agent, shall provide written notice to the Agency concerned stating the reasons for the proposed revocation and providing a reasonable opportunity for the Agency to reply in writing to the AFCB.

(3) Religious faith groups recognized by the Department of Defense as ecclesiastical endorsing agents may authorize third parties to act on their behalf for accomplishing the administrative procedures in accession of chaplains for the Military Services, and of maintaining liaison with chaplains of the recognized faith group. Each such authorization shall be made in writing by an official authorized by the faith group to grant such

[1] Copies may be obtained if needed, from the U.S. Naval Publication and Forms Center, 5801 Tabor Avenue, Attn: Code 301, Philadelphia, PA 19120.

authorization, and a copy of the authorization shall be filed with the AFCB.

(c) *Educational Requirements.* (1) To be considered for appointment as a chaplain in the Military Services, an applicant shall:

(i) Possess a baccalaureate degree of not less than 120 semester hours from a college that is listed in the "Education Directory, Colleges and Universities" [2] or from a school whose credits are accepted by a college listed in the Directory Education.

(ii) Have completed 3 resident years of graduate professional study in theology or related subjects (normally validated by the possession of a Master of Divinity degree, an equivalent degree, or 90 semester hours) that lead to ecclesiastical certification as a member of the clergy fully qualified to perform the ministering functions of a chaplain.

(2) The applicant shall complete the graduate professional study referred to in § 65.5(c)(1)(ii), at a graduate school listed in the Education Directory, Colleges and Universities; an accredited school listed in the "Directory, ATS Bulletin, Part 4"; [3] or from a school whose credits are accepted by a school listed in the Directory or listed as accredited in the "Directory, ATS Bulletin, part 4."

(d) *Other Requirements.* Applicants for the chaplaincy also shall meet the requirements established by the Military Departments for appointment as an officer and a chaplain.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

November 30, 1988.

BILLING CODE 3810-01-M

Department of the Army

32 CFR Part 537

Claims on Behalf of the United States

AGENCY: Department of the Army, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Army announces a change of the regulatory provision controlling the processing and settlement of administrative claims filed in behalf of the Army. The change is necessary because of the publication of change 1 to AR 27-20 (July 10, 1987) (Claims). This change will inform third parties of the procedures controlling the processing and settlement of these administrative claims by the Army.

EFFECTIVE DATE: December 5, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. James A. Mounts, Jr., Deputy Director, U.S. Army Claims Service, Office of The Judge Advocate General, Fort Meade, Maryland 20755-5360 (301) 677-7622.

SUPPLEMENTARY INFORMATION: The change to Part 537 reflects the enhanced role of the United States Army Claims Service to manage affirmative claims for the U.S. Army.

Executive Order 12291

This final rule has been reviewed under Executive Order 12291 and the Secretary of the Army has classified this action as non-major. The effect of the final rule on the economy will be less than $100 million.

Regulatory Flexibility Act

This final rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 and the Secretary of the Army has certified that this action does not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act

This final rule does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget under the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

List of Subjects in 32 CFR Part 537

Claims, Foreign Claims, Tort Claims

Jack F. Lane,

Colonel, JA, Commanding United States Army Claims Service, Office of Judge Advocate General.

Part 537 is revised to read as follows:

PART 537—CLAIMS ON BEHALF OF THE UNITED STATES

Sec.

537.1 Claims for damage to or loss or destruction of Department of Army (DA) property.
537.2 Recovery of property unlawfully detained by civilians.
537.6 Maritime casualties; claims in favor of the United States.
537.7 Maritime claims.

Claims for The Reasonable Value of Medical Care Furnished by The Army

537.21 General.
537.22 Basic considerations.
537.23 Predemand procedures.
537.24 Post demand procedures.

Authority: Section 3012, 70A Stat. 157; 10 U.S.C. 3012, unless otherwise noted.

§ 537.1 Claims for damage to or loss or destruction of Department of Army (DA) Property.

(a) *Purpose.* This section prescribes, within the limitations indicated in AR 27-20 and in paragraph (b) of this section, the procedures for the investigation, determination, assertion, and collection, including compromise and termination of collection action, of claims in favor of the United States for damage to or loss or destruction of Department of the Army (DA) property.

(b) *Applicability and scope.* (1) Other regulations establish systems of property accountability and responsibility; prescribe procedures for the investigation of loss, damage, or destruction by causes other than fair wear and tear in the service; and provide for the administrative collection of charges against military and civilian personnel of the United States, contractors and common carriers, and other individuals and legal entities from whom collection may be made without litigation. When the investigation so prescribed results in preliminary indication of pecuniary liability, and no other method of collection is provided, the matter is referred for action under this section. This relationship exists with regard to—

(i) Property under the control of the DA. (AR 735-5.)

(ii) Property of the Defense Logistics Agency in the custody of the DA.

(iii) Property of nonappropriated funds of the DA (except Army and Air Force Exchange Service property unless a special agreement exists). See AR 215-1 and AR 215-2.

(iv) Federal property made available to the Army National Guard (ARNG). (AR 735-5.)

(2) This section does not apply to—

(i) Claims arising from marine casualties.

(ii) Claims for damage to property funded by civil functions appropriations.

(iii) Claims for damage to property of the DA and Air Force Exchange Service.

(iv) Reimbursements from agencies and instrumentalities of the United States for damage to property.

(v) Collection for damage to property by offset against the pay of employees of the United States, or against amounts owed by the United States to common carriers, contractors, and States.

(vi) Claims by the United States against carriers, warehousemen, insurers, and other third parties for amounts paid in settlement of claims by members and employees of the Army, or the Department of Defense (DOD), for loss, damage, or destruction of personal

---

[3] Current edition published by the Association of Theological Schools, Vandalia, Ohio 45377.

property while in transit or storage at Government expense.

(3) The commander of a major overseas command, as defined in paragraph (c)(5) of this section, is authorized to establish procedures for the processing of claims in favor of the United States for loss, damage, or destruction of property which may, to the extent deemed necessary, modify the procedures prescribed herein. Two copies of all implementing directives will be furnished Commander, U.S. Army Claims Service (USARCS). Procedures will be prescribed—

(i) To carry out the provisions of DOD Directive No. 5515.8, assigning single service claims responsibility.

(ii) To carry out provisions of treaties and other international agreements which limit or provide special methods for the recovery of claims in favor of the United States.

(c) *Definitions.* For the purpose of this section only, the following terms have the meaning indicated:

(1) *Claim.* The Government's right to compensation for damage caused to Army property.

(2) *Prospective defendant.* An individual, partnership, association, corporation, governmental body, or other legal entity, foreign or domestic, except an instrumentality of the United States, against whom the United States has a claim.

(3) *Damage.* A comprehensive term, including not only damage to, but also loss or destruction of Army property.

(4) *DA property.* Real or personal property of the United States or its instrumentalities and, if the United States is responsible therefor, real or personal property of a foreign government, which is in the possession or under the control of the DA, one of its instrumentalities, or the ARNG, including that property of an activity for which the Army has been designated the administrative agency, and that property located in an area in which the Army has been assigned single service claims responsibility by appropriate DOD directive.

(5) *Major overseas command.* U.S. Army Europe; U.S. Army Forces Southern Command; Eighth U.S. Army, Korea; Western Command; and any command outside the continental limits of the contiguous States specially designated by The Judge Advocate General (TJAG) under the provisions of AR 27–20.

(6) *Area Claims Office.* The principal office for the investigation, assertion, adjudication and settlement of claims, staffed with qualified legal personnel under the supervision of a Staff Judge Advocate (SJA) or Command Judge Advocate or Corps of Engineers district or Command Legal Counsel under provisions of AR 27–20.

(7) *Recovery judge advocate (RJA).* A JAGC officer or legal adviser responsible for assertion and collection of claims in favor of the United States for medical expenses and property damage.

(d) *Limitation of time.* The Act of July 18, 1966 (80 Stat. 304, 28 U.S.C. 2415) established a 3-year statute of limitations, effective July 19, 1966, upon actions in favor of the United States for money damages founded upon a tort. In computing periods of time excluded under 28 U.S.C. 2416, the RJA concerned shall be deemed the official charged with responsibility and will ensure that action may be brought in the name of the United States within the limitation period.

(e) *Foreign prospective defendants.* Except as indicated below, claims within the scope of this section against foreign prospective defendants will be investigated, processed, and asserted without regard to the nationality of the prospective defendant. Claims against an international organization, a foreign government or a political subdivision, agency, or instrumentality thereof, or against a member of the armed forces or an official or civilian employee of such international organization or foreign government, will not be asserted without prior approval of TJAG. Investigation and report thereof, together with recommendations regarding assertion and enforcement, will be forwarded through command channels to Commander, USARCS, unless the provisions of applicable agreements, or regulations in implementation thereof, negate the requirement for such investigation and report.

(f) *Standards of liability.* (1) The Government's right to compensation for damage caused to Army property will be determined in accordance with the law of the place in which the damage occurred, unless other law may properly be applied under conflict of law rules.

(2) To the extent that the prospective defendant's liability is covered by insurance, liability will be determined without regard to standards of pecuniary liability set forth in other regulations. If no insurance is available, claims will be asserted under this section against military and civilian employees of the United States and of host foreign governments only where necessary to complete the collection of charges imposed upon such persons under the standards established by other regulations.

(g) *Concurrent claims under other regulations.* (1) Claims for damage to DA property and claims for medical care cognizable under §§ 537.21 through 537.24 arising from the same incident will be processed under the sections applicable to each.

(2) If the incident giving rise to a claim in favor of the United States also gives rise to a potential claim or suit against the United States, the claim in favor of the Government will be asserted and otherwise processed only by an RJA who has apparent authority to take final action on the claim against the Government.

(h) *Claims for less than $250.* Such claims need not be asserted or otherwise processed under this section unless the facts and circumstances surrounding the incident indicate that collection will be economically feasible (for example, a good case of liability covered by insurance) or desirable in the best interests of the United States.

(i) *Repayment in kind.* The RJA who asserts a claim under this section may accept, in lieu of full payment of the claim, the restoration of the property to its condition prior to the incident causing the damage, or the replacement thereof. Acceptability of these methods of repayment is conditioned upon the certification of the appropriate staff officer responsible for maintenance, such as is described for motor vehicles in AR 735–5, before a release may be executed. The authority conferred by this paragraph is not limited to incidents involving motor vehicles.

(j) *Delegation of authority.* Subject to the provisions of paragraph (k) of this section, the authority conferred by AR 27–20, to compromise claims and to terminate collection action, with respect to claims that do not exceed $20,000, exclusive of interest, penalties and administrative fees, is further delegated as follows:

(1) An Area Claims Office, as defined in paragraph (c)(6) of this section, is authorized to:

(i) Compromise claims, provided the compromise does not reduce the claim by more than $10,000.

(ii) Terminate collection action, provided the uncollected amount of claim does not exceed $10,000.

(2) The SJA, or if so designated, the chief of the Command Claims Service of a major overseas command, as defined in paragraph (c)(5) of this section, is authorized to:

(i) Compromise claims, not over $20,000 without monetary limitations.

(ii) Terminate collection action, provided the uncollected amount of the claim does not exceed $20,000.

(k) *Compromise and termination of collection action.* (1) The authority delegated in paragraph (j) of this section to compromise claims will be exercised in accordance with the standards set forth in 4 CFR, Part 104.

(2) The authority delegated in paragraph (j) of this section to terminate collection action will be exercised in accordance with the standards set forth in 4 CFR, Part 104.

(3) A debtor's liability to the United States arising from a particular incident shall be considered as a single claim in determining whether the claim is not more than $20,000, exclusive of interest, penalties and administrative fees for the purpose of compromise, or termination of collection action.

(4) Only the Department of Justice may approve claims involving:

(i) Compromise or waiver of a claim asserted for more than $20,000 exclusive of interest, penalties and administrative fees.

(ii) Settlement actions previously referred to the Department.

(iii) Settlement where a third party files suit against the United States or the individual federal tortfeasor arising out of the same incident.

(l) *Releases.* The RJA who receives payment of the claim in full, or who receives full satisfaction of an approved compromise settlement, is authorized to execute a release. A standard form furnished by the prospective defendant or his insurer may be executed, provided no indemnity agreement is included.

(m) *Receipts.* The RJA may execute and deliver to a prospective defendant a receipt for payment in full, installment payment or an offered compromise payment, subject to approval of the SJA. DA Form 2135–R (Receipt for Payment for Damage to or Loss of Government Property) be used.

§ 537.2 Recovery of property unlawfully detained by civilians.

Whenever information is received that any property belonging to the military service of the United States is unlawfully in the possession of any person not in the military service, the procedures contained in AR 735–11, Para. 3–15, Unit Supply UPDATE 10, should be followed.

§ 537.6 Maritime casualties; claims in favor of the United States.

See 32 CFR 536.60, which covers claims on behalf of the United States as well as claims against the United States.

§ 537.7 Maritime claims.

(a) *Statutory authority.* Administrative settlement or compromise of admiralty and maritime claims in favor of and against the United States by the Secretary of the Army or his designee, under the direction of the Secretary of Defense, is authorized by Army Maritime Claims Settlement Act of 1956 (70A Stat. 270), as amended (10 U.S.C. 4801–4804, 4806).

(b) *Related Statutes.* This statute authorizes the administrative settlement or compromise of maritime claims and supplements the following statutes under which suits in admiralty may be brought; the Suits in Admiralty Act of 1920 (41 Stat. 525, 46 U.S.C. 741–752); the Public Vessels Act of 1925 (43 Stat. 1112, 46 U.S.C. 781–790), the Extension of the Admiralty Act of 1948 (62 Stat. 496, 46 U.S.C. 740). Similar maritime claims settlement authority is exercised by the Department of the Navy under title 10, United States Code (U.S.C.), sections 7365, 7621–7623, and by the Department of the Air Force under 10 U.S.C. 9801 through 9804, 9806.

(c) *Scope.* (1) Section 4803 of title 10, U.S.C., provides for the settlement or compromise of claims of a kind that are within the admiralty jurisdiction of a district court of the United States and of claims for damage caused by a vessel or floating object to property under the jurisdiction of the DA or property for which the Department has assumed an obligation to respond in damages, where the net amount payable to the United States does not exceed $500,000.

(2) Section 4804 of title 10, U.S.C., for the settlement or compromise of claims in any amount for salvage services (including contract salvage and towage) performed by the DA for any vessel. The amounts of claims for salvage services are based upon per diem rates for the use of salvage vessels and other equipment; and materials and equipment damaged or lost during the salvage operation. The sum claimed is intended to compensate the United States for operational costs only, reserving, however, the right of the Government to assert a claim on a salvage bonus basis, in accordance with commercial practice, in an appropriate case.

(d) *Amounts exceeding $500,000.* Maritime claims in favor of the United States, except claims for salvage services, may not be settled or compromised under this section at a net amount exceeding $500,000 payable to the United States. However, all such claims othewise within the scope of this section will be investigated and reported to the Commander, USARCS.

(e) *Civil works activities.* Rights of the United States to fines, penalties, forfeitures, or other special remedies in connection with the protection of navigable waters, the control and improvement of rivers and harbors, flood control, and other functions of the Corps of Engineers involving civil works activities, are not dealt with in this section. However, claims for money damages which are civil in nature, arising out of civil works activities of the Corps of Engineers and otherwise under this section, for which an adequate remedy is not available to the Chief of Engineers, may be processed under this section.

(f) *Delegation of authority.* Where the amount to be received by the United States is not more than $10,000, claims under this section, except claims for salvage services, paragraph (c)(2) of this section, may be settled or compromised by the Commander, USARCS, or designee, subject to such limitations as may be imposed by the Commander, USARCS and by engineer area claims offices, subject to such limitations as may be imposed by the Chief of Engineers.

(g) *Demands.* Demand for the payment of claims in favor of the United States under this section may be made by the Commander, USARCS, or designee.

Claims for the Reasonable Value of Medical Care Furnished by the Army

Authority: Sections 537.21 through 537.24 issued under 76 Stat. 593, 594, 42 U.S.C. 2651–2653.

§ 537.21 General.

(a) *Authority.* The regulations in §§ 537.21 through 537.24 are in implementation of the Act of September 25, 1962 (76 Stat. 593, 42 U.S.C. 2651–3), Executive Order Number 11060 (27 FR 10925), and Attorney General's Order Number 289–62, as amended (28 CFR Part 43), providing for the recovery of the reasonable value of medical care furnished or to be furnished by the United States to a person on account of injury or disease incurred after December 31, 1962, under circumstances creating a tort liability upon some third person.

(b) *Applicability and scope.* (1) Sections 537.21 through 537.24 apply to all claims for the reasonable value of medical services furnished by or at the expense of the Army which result from incidents occurring on or after March 1, 1969. Cases which arise from incidents occurring prior to that date:

(i) And which are the responsibility of an SJA or JA who is designated an RJA will be processed under §§ 537.21 through 537.24;

(ii) And which are the responsibility of an SJA or JA not so designated will be processed under the predecessor

regulation until either completed or transferred.

(2) The procedures prescribed herein are to be employed within the DA for the investigation, determination, assertion, and collection, including compromise and waiver, in whole or in part, of claims in favor of the United States for the reasonable value of medical services furnished by or at the expense of DA. TJAG provides general supervision and control of the investigation and assertion of claims arising under the Federal Medical Care Recovery Act.

(3) In Continental U.S., Army SJA's and RJA's will be assigned responsibility under §§ 537.21 through 537.24 on a geographical area basis.

(4) The commander of any major overseas command specified in paragraph (c)(5) of this section is authorized to modify the procedures prescribed herein to accommodate any special circumstances which may exist in the command.

(5) Claims for medical care furnished by the DA on a reimbursable basis (see table 1, AR 40–3) ordinarily will be forwarded for processing directly to the Federal department or agency responsible for reimbursement.

(c) *Definitions.* For the purpose of §§ 537.21 through 537.24 only, the following terms have the meaning indicated.

(1) *Claim.* The Government's right to recover from a prospective defendant the reasonable value of medical care furnished to each injured party.

(2) *Medical care.* Includes hospitalization, out-patient treatment, dental care, nursing service, drugs, and other adjuncts such as prostheses and medical appliances furnished by or at the expense of the United States.

(3) *Injured party.* The person who received an injury or contracted a disease which resulted in the medical care. Such person may be an active duty or retired member, a dependent, or any other person who is eligible for medical care at DA expense. See section III, AR 40–3, and §§ 577.60 through 577.71 of this chapter.

(4) *Prospective defendant.* A person other than the injured party. An individual partnership, association, corporation, governmental body, or other legal entity, foreign or domestic, against whom the United States has a claim.

(5) *Major overseas command.* U.S. Army Forces Southern Command; the U.S. Army, Europe; Eighth U.S. Army, Korea; Western Command; and any command outside the continental limits of the contiguous states specially designated by TJAG under the provisions of AR 27–20.

(6) *Recovery judge advocate.* A JAGC officer or legal adviser responsible for assertion and collection of claims in favor of the United States for medical expenses.

§ 537.22 Basic considerations.

(a) *The right of recovery*—(1) *Applicable law.* The right of the United States to recover the reasonable value of medical care furnished or to be furnished an injured party is based on the Federal Medical Care Recovery Act. It accrues simultaneously with the accrual of the injured party's right to recover damages from the prospective defendant but is independent of any claim which the injured person may have against the prospective defendant. Recovery is allowed only if the injury or diseases resulted from circumstances creating a tort liability under the law of the place where the injury occurred.

(2) *Time limitation.* The Act of July 18, 1966 (28 U.S.C. 2415 et seq.) establishes a 3-year statute of limitation upon actions in favor of the United States for money damages founded upon a tort. The RJA will take appropriate steps within the limitation period to assure that necessary legal action is not barred by the statute.

(3) *Amount.* The Government's right of recovery is limited to amounts expended or to be expended by the United States for medical care from other than Federal sources, and to amounts determined by the rates established by the Office of Management and Budget for medical care from Federal sources, less any amounts reimbursed by the injured party.

(b) *Certain prospective defendants*—(1) *U.S. Government agencies.* No claim will be asserted against any department, agency, or instrumentality of the United States.

(2) *U.S. personnel.* Claims against a member of the uniformed services; or an employee of the United States, its agencies or instrumentalities; or a dependent of a service member or an employee will not be asserted unless the prospective defendant has the benefit of liability insurance coverage or was guilty of gross negligence or willful misconduct. If simple negligence occurring in the scope of a member's or employee's employment is the basis of the claim, no claim will be asserted if such claim is excluded from the coverage of the liability insurance policy involved. No claim, in the absence of specific statutory authorization, will be made directly against a member or employee, or his or her dependents for injuries sustained to himself or herself through acts of simple negligence, gross negligence, or willful misconduct.

(3) *Government contractors.* Claims, the cost or expense of which may be reimbursable by the United States under the terms of a contract, will not be asserted against a contractor without the prior approval of USARCS. Such claims will be investigated and the report thereof, which will include citation to the specific contract clauses involved and recommendations regarding assertion will be forwarded through command channels to Commander, USARCS.

(4) *Foreign persons.* Claims within the scope of §§ 537.21 through 537.24 against foreign prospective defendants will be investigated, processed, and asserted without regard to the nationality of the prospective defendant, unless such action is precluded by treaty or international agreement. Claims against an international organization, or foreign government, will be investigated and reports thereof, together with recommendations regarding assertion and enforcement, will be forwarded through command channels to Commander, USARCS.

(5) *National Guard Members.* Claims arising from the tortious conduct of NG members will be investigated and if assertion appears appropriate, a recommendation shall be made to Commander, USARCS.

(c) *Concurrent claims under other regulations*—(1) Section 537.1. Claims for medical care and claims for damage to DA property arising from the same incident will be processed by the RJA in accordance with § 537.1(g). If an RJA lacks settlement authority sufficient to settle a concurrent claim under § 537.1, he may request additional authority under that section from the appropriate major overseas command SJA or area claims authority, who may delegate such additional authority in an amount not exceeding his own settlement authority. Where time is of the essence, telephonic delegations of authority are encouraged, provided they are confirmed in a writing which will be made a part of the case file.

(2) *Counterclaims.* Claims for medical care and claims against the United States which arise from the same incident will be processed by the RJA in accordance with § 537.1(g)(2). If an RJA lacks authority sufficient to settle the claim against the Government, he will coordinate his action with that claims echelon which has the necessary authority to settle the particular claim against the United States.

(d) *Claims for less than $250.* Such claims need not be asserted or

otherwise processed, unless the facts and circumstances surrounding the incident indicate that collection will be economically feasible (for example, a good case of liability covered by insurance) or desirable in the best interests of the United States.

§ 537.23 Predemand Procedures.

(a) *Relations with the injured party*—(1) *Advice.* The injured party, or, in appropriate cases, his guardian, next-of-kin, personal representative, or the executor or administrator of his estate, will be advised of the following:

(i) That under the Act of September 25, 1962 (76 Stat. 593, 42 U.S.C. 2651–3, the United States may be entitled to recover the reasonable value of medical care furnished or to be furnished him in the future from the person or persons who injured him, or who were otherwise responsible for his injury or disease; and

(ii) That if he is otherwise entitled to legal assistance under AR 27–3, he should seek guidance from a legal assistance officer regarding any claim he may have for personal injury; and

(iii) That he is required to cooperate in the prosecution of all actions of the United States against the person or persons who injured him; and

(iv) That he is required to furnish a complete statement regarding the facts and circumstances surrounding the incident which resulted in the injury or disease; and

(v) That he is required to furnish information concerning any legal action brought or to be brought by or against the prospective defendant, or to furnish the name and address of the attorney representing him; and

(vi) That he should not execute a release or settle any claim which he may have as a result of his injury without first notifying the RJA.

(2) *Statement.* A written statement will be obtained from the injured party, or his representative, in which he acknowledges receipt of the advice in paragraph (a)(1) of this section, and provides the information required by paragraphs (a)(1) (iv) and (v) of this section. If the injured party or representative fails or refuses to furnish necessary information or cooperation, the originator of the notification of potential claims may be requested to withhold records as to medical history, diagnoses, findings, and treatment, from the injured party or anyone acting on his behalf pending compliance with the requirements in paragraph (a)(1) of this section. Mere refusal by the injured party or his representative to include the Government's claim in his claim is not sufficient basis, by itself, for this action.

(b) *Determination and assertion*—(1) *Liability.* The RJA will review all the evidence including any claims officer's report of investigation and, after assuring completeness of the file, will make a written determination as to the liability of the prospective defendant and note his reasons for such determination.

(2) *Value.* If the RJA determines that the prospective defendant is liable, he will also ascertain the reasonable value of medical care furnished or to be furnished to the injured party, in accordance with § 537.22(a)(3) and rates established by the Office of Management and Budget. When a military member has been retained in a military hospital for administrative reasons, or where the patient was absent from the hospital or was in a purely convalescent status, the amount of the claim will be recomputed to apply the outpatient rate, if under circumstances warranting only outpatient treatment in a civilian hospital or eliminate such periods altogether if the injured party received no treatment during those periods. In making these determinations the RJA will coordinate with the registrar or other responsible official of the hospital or medical unit in his area of responsibility.

(3) *Amount.* In the event of doubt concerning the extent of medical care furnished or to be furnished an injured party, the RJA will assert the claim in an indefinite amount. Demand will be made in a definite amount at the earliest possible date, based on an estimate of a reasonable value of medical care to be furnished, if appropriate. The RJA will assure that the file contains complete statements of the value of medical care furnished, including all charges by civilian physicians, medical technicians and civilian hospitals.

§ 537.24 Post demand procedures.

(a) *Coordination with the injured party's claim.* (1) Every effort will be made to coordinate action to collect the claim of the United States with the injured party's action to collect his own claim for damages, in order that the injured party's recovery for his damages, other than the reasonable value of medical care furnished or to be furnished by the United States, is not prejudiced by the Government's claim.

(2) Attorneys representing an injured party may be authorized to assert the claim on behalf of the government as an item of special damages with the injured party's claim or suit except where prohibited by law. Any agreement to this effect will be in writing, and the agreement should expressly recognize the fact that counsel fees may be neither paid by the Government (5 U.S.C. 3106) nor computed on the basis of the Government's portion of the recovery. The agreement must also require the Government's permission to settle its claim.

(3) If the injured party, denies or his attorney or legal representative, fails or refuses to cooperate in the prosecution of the claim of the United States, independent collection action will be vigorously pursued.

(b) *Independent collection action.* Unless suit between the injured party and the prospective defendant is pending, all available administrative collection procedures will be followed prior to reference of the claim to the Department of Justice under paragraph (e) of this section. Direct contact with the prospective defendant's insurer, if known, is desirable. If the prospective defendant is an uninsured motorist, timely and appropriate action will be taken to collect the claim, or to request suspension of driving and registration privileges under the applicable uninsured motorist fund statute, or to seek compensation from the victim's insurer, or otherwise under financial responsibility laws.

(c) *Delegation of authority.* Subject to the provisions of paragraphs (d) and (e) of this section, authority to compromise or waive, in whole or in part, claims of the United States not in excess of $40,000 exclusive of interest penalties and administrative fees is delegated as follows:

(1) The Area Claims Office as defined in paragraph (c)(6) of section 537.1 is authorized to:

(i) Compromise claims, provided the compromise does not reduce the claim by more than $15,000 in any claim not asserted for more than $25,000; and

(ii) Waive claims for the convenience of the Government (but not on account of undue hardship upon the injured party) provided the uncollected amount of the claim does not exceed $15,000 in any claim not asserted for more than $25,000; and

(iii) Redelegation in an amount not to exceed $5,000 compromise authority to any claim processing office with approval authority is permitted.

(d) *Compromise and waiver of claims*—(1) *General.* A debtor's liability to the United States arising from a particular incident will be considered as a single claim in determining whether the claim is not more than $40,000, for the purpose of compromise or waiver. Claims not resolved within the delegation of authority stated in this section or referral to the Department of

Justice, will be forwarded to Commander, USARCS. A claim file forwarded to higher authority will contain a memorandum of opinion supported by necessary exhibits.

(2) *Compromise.* (i) The authority delegated in paragraph (c) of this section to compromise claims will be exercised in accordance with standards set forth in 4 CFR Part 103. When available funds are insufficient to satisfy both the claim of the United States and that of the injured party, the claim of the United States will be compromised to the extent required to achieve an equitable apportionment of the available funds.

(ii) If appropriate, a request by the injured party or his attorney for waiver on the ground of undue hardship may be treated initially as a suggestion for compromise with the tortfeasor, and the compromised amount of the claim of the United States will be determined. In such cases, RJA's may make offers of compromise within their delegated authority. RJA's may also make counteroffers within their delegated authority to offers of compromise beyond their delegated authority. If settlement within the limits of delegated authority is not achieved, the claim will be referred to higher authority.

(iii) When time is a factor, RJA or major overseas command staff JA's may make telephonic delegation within their compromise authority on a case by case basis. When such verbal delegations are made, they will be confirmed in writing and the writing included in the case file.

(3) *Waiver.* (i) The authority delegated in paragraph (c) of this section to waive claims for the convenience of the Government will be exercised in accordance with standards set forth in 4 CFR 103.

(ii) If the injured party or his attorney requests waiver of the full or any compromised amount of the claim on the ground of undue hardship, and the request may not be appropriately treated under paragraph (d)(2)(ii) of this section, the file will be forwarded to appropriate major overseas command claims authority or Commander, USARCS. For the purpose of evaluation of the request for waiver, the file will include detailed information concerning the reasonable value of the injured party's claim for permanent injury, pain and suffering, decreasing earning power, and other items of special damages, pension rights, and other Government benefits accruing to the injured party; and the present and prospective assets, income, and obligations of the injured party, and those dependent on him.

(iii) In the event an affirmative determination is made by TJAG that, as a result of the collection of the Government's claim the injured party has suffered an undue hardship, the RJA will be authorized to direct issuance of the amount waived to the injured party.

(4) A file forwarded to higher authority for waiver of compromise consideration will contain a memorandum by the RJA giving his assessment of the case and his recommendation with regard to the approval or denial of the requested compromise or waiver.

(e) *Only the Department of Justice may approve claims involving*—(1) compromise or waiver of a claim asserted for more than $40,000 exclusive of interest, penalties or administrative fees,

(2) Settlement actions previously referred to the Department,

(3) Settlement where a third party files suit against the United States on the injured party arising out of the same incident.

BILLING CODE 3710-08-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD7-88-32]

Drawbridge Operation Regulations; Gulf Intracoastal Waterway, Florida

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the City of Treasure Island, the Coast Guard is modifying regulations governing the Treasure Island Causeway drawbridge by requiring advance notice for opening be given certain periods. This change is being made because of a lack of requests to open the bridge at night. This action will relieve the bridge owner of the financial burden of having a person constantly available to open the draw and should still provide for the reasonable needs of navigation.

EFFECTIVE DATE: These regulations become effective on January 4, 1989.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Gerald Fleming at (305) 536-4103.

SUPPLEMENTARY INFORMATION: The original Notice of Proposed Rulemaking was published in the **Federal Register** on September 23, 1988. The Commander, Seventh Coast Guard District, also published the proposal as a Public Notice dated September 28, 1988. Interested persons were given until November 7, 1988 to submit comments. No comments were received to either notice

Drafting Information

The drafters of these regulations are Lieutenant Commander Gerald Fleming, Bridge Administration Specialist, project officer, and Lieutenant Commander S.T. Fuger, Jr., project attorney.

Discussion of Comments

No comments were received. The final rule is unchanged from the proposed rule published on September 28, 1988.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. We conclude this because the regulations exempt tugs with tows. Since the economic impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

Regulations

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 177 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46 and 33 CFR 1.05-1(g).

2. Section 117.287(g) is revised to read as follows:

§ 117.287 Gulf Intracoastal Waterway.

* * * * *

(g) The draw of the Treasure Island Causeway bridge, mile 119.0, shall open on signal, except that from 3 p.m. to 6 p.m. Monday through Friday, and from 11 a.m. to 6 p.m. Saturdays, Sundays, and Federal holidays, the draw need be opened only on the hour, quarter hour, half hour, and three-quarter hour. From 11 p.m. to 7 a.m. the draw shall open on signal if at least 10 minutes advance notice is given.

* * * * *

Dated: November 21, 1988.

Martin H. Daniell,

Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

33 CFR Part 117

[CGD1-88-098]

Temporary Drawbridge Operation Regulations; Saugus River, MA

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the Massachusetts Bay Transportation Authority (MBTA), the Coast Guard is issuing temporary regulations permitting the MBTA Saugus railroad bridge over the Saugus River, at mile 2.1, between Lynn and Revere, Massachusetts, to remain closed for 96 days from 25 November 1988 through 28 February 1989. This temporary regulation is needed to accomplish necessary rehabilitation and emergency repairs to the bridge. This action will relieve the bridge owner of the burden to open the draw during the repairs and would only permit marine traffic which can pass under the closed bridge to have access to facilities above the bridge.

EFFECTIVE DATE: This regulation becomes effective on 25 November 1988.

FOR FURTHER INFORMATION CONTACT: William C. Heming, Bridge Administrator, First Coast Guard District, (212) 668-7021.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days after the **Federal Register** publication. Publishing a Notice of Proposed Rulemaking and delaying its effective date would be contrary to the public interest since the bridge has experienced some structural failures, immediate action is needed to repair the bridge and the MBTA has a contractor on site to commence repairs.

Drafting Information

The drafters of this notice are LT J.W. McDonald, project officer and CDR R.A. Brunell, project attorney.

Discussion of Temporary Regulations

Current regulations provide that the draw of the bridge shall open on signal at all times. The temporary regulations would allow the bridge to remain in the closed position from 25 November 1988 through 28 February 1989. Bridge opening logs for the closed period indicate that the waterway is used primarily by pleasure craft, lobster and gill net fishermen and oil barges.

The deteriorated condition of the bascule pier, trunnion and counterweight tower supports and foundations, along with the need to replace all mechanical and electrical equipment has necessitated that the bridge remain in the closed position and supported on temporary support piers to perform the necessary repairs. The bridge is presently inoperative in the closed position.

The MBTA Saugus drawbridge provides a vertical clearance of 7 feet at mean high water and 17 feet at mean low water in the closed position. This is not adequate for the transit of any commercial vessels using the oil facility nor can it accommodate a large number of the lobster and gill net fisherman without severe limitations. Additionally ice breaking activities upstream of the bridge will not be able to be performed.

The temporary regulation will affect the operation of approximately 85 lobster and gill net boats which operate from docks upstream of the bridge in November, approximately 40 boats in December and approximately 24 boats in January and February. Marinas and boat yards, upstream of the bridge, which overhaul vessels during the winter, will also be affected if the vessels cannot pass under the bridge in the closed position. The MBTA has agreed to compensate the lobster and gill net fishermen, boat yards and other marine interests to minimize economic losses during this closure. The MBTA has also agreed to make arrangements to get any vessel trapped upstream and unable to transit the bridge at low water hauled and refloated at a dock downstream of the bridge.

The General Electric Company fuel delivery barge will not be able to pass under the closed bridge during this period. Modification of the facility and trucking arrangements have been completed by General Electric Company with financial assistance of the Massachusetts Bay Transportation Authority.

Economic Assessment and Certification

These temporary regulations are considered to be non-major under Executive Order 12291 on Federal Regulation, and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact, because of compensation by the bridge owner, has been found to be so minimal that a full regulatory evaluation is unnecessary. This determination is based on the fact that work will be done outside the prime boating season; that the bridge is in need of major repairs and both commercial fishing and recreational boaters have frequently been delayed or unable to transit the existing bascule bridge due to unscheduled bridge malfunctions, and the MBTA is now taking reasonable and prudent measures to minimize the impact and the temporary hardships imposed by these regulations.

Since the impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

Federalism Implication Assessment

This action has been analyzed under the principles and criteria in Executive Order 12612, and it has been determined that this final temporary regulation does not have sufficient federalism implications to warrant preparation of a federal assessment.

List of Subjects in 33 CFR Part 117

Bridges.

Temporary Regulations

In consideration of the foregoing, the Coast Guard amends Part 117 of Title 33, Code of Federal Regulations as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05-1(g).

2. Section 117.618 is added to read as follows:

§ 117.618 Saugus River.

The draw of the Saugus MBTA Bridge mile 2.1 need not be opened for the passage of vessels from 25 November 1988 through 28 February 1989 inclusive, to effect emergency repairs to the movable span.

Dated: November 23, 1988.

R.O. Buttrick,

Captain, U.S. Coast Guard, Acting, Commander First Coast Guard District.

33 CFR Part 117

[CGD5-88-073]

Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, Fairfield, NC

AGENCY: Coast Guard, DOT.

ACTION: Notice of temporary deviation.

SUMMARY: The Coast Guard grants a temporary deviation from the regulations for the drawbridge across the Atlantic Intracoastal Waterway at mile 113.8, at Fairfield, North Carolina. The purpose of this deviation from the regulations is to allow the project contractor for the U.S. Army Corps of Engineers, the owner of the bridge, to repair the bridge. The repairs are expected to be completed by December 23, 1988.

DATES: This temporary deviation from the regulations becomes effective on December 5, 1988, and terminates on December 23, 1988, or earlier if bridge repairs are completed ahead of schedule.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, Commander (ob), Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004, (804) 398–6222.

SUPPLEMENTARY INFORMATION:

Drafting Information

The drafters of this notice are Linda L. Gilliam, Project Officer, and LCDR Robin K. Kutz, Project Attorney.

List of Subjects in 33 CFR Part 117

Bridges.

Temporary Deviation From Drawbridge Regulations

In consideration of the foregoing, during the period December 5, 1988 through December 23, 1988, or earlier if bridge repairs are completed ahead of schedule, the regulations in § 117.821(b)(1) of Title 33, Code of Federal Regulations, do not apply to the bridge across the Atlantic Intracoastal Waterway, mile 113.8, at Fairfield, North Carolina, from 8:00 a.m. to 4:00 p.m., Monday through Friday. During this period the bridge shall open on signal for vessels on the hour only on even numbered hours (e.g., 8:00 a.m., 10:00 a.m., etc). Between the hours of 7:00 a.m. and 8:00 a.m. and 4:00 p.m. and 7:00 p.m. the bridge shall open on signal for pleasure vessels only on the hour and the half hour. The bridge shall open on signal for all vessels from 4:00 p.m. to 8:00 a.m.

Authority: 33 U.S.C. 499; 49 CFR 1–46; 33 CFR 1.05–1(g); 33 CFR 117.35(d).

Dated November 22, 1988.

A.D. Breed,

Rear Admiral, U.S. Coast Guard Commander, Fifth Coast Guard District.

BILLING CODE 4910–14–M

33 CFR Part 165

[COTP Honolulu Regulation 88–06]

Security Zone Regulations; Mamala Bay, Oahu, HI

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a security zone in Mamala Bay off Ewa Beach, Oahu, Hawaii within the limits of the following coordinates: 21–17.3′ N., 158–01.8′ W.; to 21–17.3′ N., 158–01.0′ W.; to 21–16.8′ N., 158–01.8′ W.; to 21–16.8″ N., 158–01.0′ W.

This zone is needed to safeguard the U.S. Naval Vessel, EX YW–101 and attending vessels, equipment and personnel against injury from sabotage or other subversive acts, accidents, or other causes of a similar nature during sinking operations involving the EX YW–101. Entry into this zone is prohibited unless authorized by the Captain of the Port.

EFFECTIVE DATES: This regulation becomes effective on December 16, 1988 at 1200 h.s.t. It terminates December 19, 1988 at 1200 h.s.t. unless sooner terminated by the Captain of the Port.

FOR FURTHER INFORMATION CONTACT: Lieutenant Junior Grade E.F. Costa, Port Operations Department, (808) 541–2068, Marine Safety Office, Honolulu, Hawaii.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a Notice of Proposed Rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days after **Federal Register** publication. Publishing an NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to prevent injury or damage to persons and equipment incident to the sinking of the U.S. Naval Vessel EX YW–101, approximately 2 miles off the coast of Ewa Beach, Oahu, Hawaii.

Drafting Information

The drafters of this regulation are Lieutenant Junior Grade E.F. Costa, Project Officer for the Captain of the Port, and Lieutenant Commander B. N. Durham, Project Attorney, Fourteenth Coast Guard District Legal Office.

Discussion of the Regulation

The event requiring this regulation is the sinking of U.S. Naval Vessel EX YW–101 which will be done using a controlled detonation of Naval ordnance some time between 1200 h.s.t., December 16 and 1200 h.s.t., December 19, 1988. This regulation is issued pursuant to 50 U.S.C. 191 as set out in the authority citation for all of Part 165.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, Subpart D of Part 165 of Title 33, Code of Federal Regulations, is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.04–6 and 160.5.

2. A new § 165.T1406 is added as follows:

§ 165.T1406 Security Zone: Mamala Bay, Oahu, Hawaii

(a) *Location:* The area within the following coordinates is a security zone: 21–17.3′ N., 158–01.8′ W.; to 21–17.3′ N., 158–01.0′ W.; to 21–16.8′ N., 158–01.8′ W.; to 21–16.8″ N., 158–01.0′ W.

(b) *Effective date:* This regulation becomes effective on December 16, 1988 at 1200 h.s.t. It terminates on December 19, 1988 at 1200 h.s.t. unless sooner terminated by the Captain of the Port.

(c) *Regulations:*

(1) In accordance with the general regulations in § 165.33 of this part, entry into this zone is prohibited unless authorized by the Captain of the Port. Section 165.33 also contains other requirements.

Dated: November 22, 1988.

G.G. Piche,

Captain, U.S. Coast Guard, Captain of the Port, Honolulu, Hawaii.

[FR Doc. 88–27933 Filed 12–2–88; 8:45 am]

BILLING CODE 491–014–M

33 CFR Part 165

[COTP Philadelphia, PA Reg. 88-05]

Safety Zone Regulations; Marcus Hook Range Ship Channel, Marcus Hook Anchorage (Anchorage 7), Mantua Creek Anchorage (Anchorage 9), and Deepwater Point Anchorage, (Anchorage 6)

AGENCY: Coast Guard DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a safety zone on the Delaware River that includes the Marcus Hook Range ship channel, Marcus Hook Anchorage (Anchorage 7), Mantua Creek Anchorage (Anchorage 9), and Deepwater Point Anchorage (Anchorage 6). The safety zone is needed to protect vessels from safety hazards associated with dredging operations in Marcus Hook Range ship channel and to minimize temporary port congestion while the dredging operations are ongoing.

The Marcus Hook Range ship channel in the vicinity of the dredging operation is closed to vessel traffic. Marcus Hook Anchorage (Anchorage 7) is closed to anchoring to permit vessel traffic to transit the anchorage in lieu of using the Marcus Hook Range ship channel. Vessels over 700 feet in length are subject to anchorage restrictions in Deepwater Point and Mantua Creek Anchorages (Anchorages 6 and 9).

EFFECTIVE DATES: This regulation is effective from 8:00 a.m., November 24, 1988. This regulation terminates at 8:00 a.m., January 21, 1989, unless sooner terminated by the Captain of the Port, Philadelphia, Pennsylvania.

FOR FURTHER INFORMATION CONTACT: LTGJ Gary T. Croot, at the Captain of the Port, Philadelphia, (215) 271-4894.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rulemaking (NPRM) was not published for this regulation and good cause exists for making it effective in less than 30 days after **Federal Register** publication. The Coast Guard was not officially informed of the date dredging operations would commence until early November 1988. Publishing an NPRM and delaying its effective date would be contrary to the public interest, since immediate action is needed to respond to potential hazards to vessel traffic caused by the presence of the dredge in the ship channel.

Drafting Information

The drafters of this regulation are LTJG Gary T. Croot, project officer for the Captain of the Port, Philadelphia, and LCDR Robin K. Kutz, project attorney, Fifth Coast Guard District Legal Staff.

Discussion of the Regulation

The hazards requiring this regulation result from maintenance dredging of the Marcus Hook Range ship channel. The Marcus Hook Range ship channel must be closed and traffic diverted through Marcus Hook Anchorage (Anchorage 7) to reduce the hazards associated with dredging of the channel. Anchorage restrictions in Mantua Creek Anchorage and Deepwater Point Anchorage are being imposed to accommodate those vessels that will be prevented from anchoring in Marcus Hook Anchorage. This regulation takes effect at 8:00 a.m., November 23, 1988 or upon completion of the preliminary pipelaying operation, whichever occurs later. The pipelaying operation originally was to have been completed by November 16, 1988, but it has been delayed twice due to weather.

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, Subpart C of Part 165 of Title 33, Code of Federal Regulations, is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05-1(g), 6.04-1, 6.04-6, and 160.5.

2. A new § 165.T05076 is added to read as follows:

§ 165.T05076 Safety Zone: Marcus Hook Range ship channel, Marcus Hook Anchorage (Anchorage 7), Mantua Creek Anchorage (Anchorage 9), Deepwater Point Anchorage (Anchorage 6), Delaware River.

(a) *Location.* The following areas are a safety zone: The Marcus Hook Range ship channel, as delineated on National Ocean Survey Chart 12312, within 150 yards of dredging operations, Marcus Hook Anchorage (Anchorage 7), Mantua Creek Anchorage (Anchorage 9), and Deepwater Point Anchorage (Anchorage 6), located in the Delaware River, as described in § 110.157 of this Title.

(b) *Regulations.* (1) No vessel may enter or remain in the Marcus Hook Range ship channel within 150 yards of dredging operations. Vessels transiting the area shall pass through the Marcus Hook Anchorage (Anchorage 7).

(2) A vessel may not anchor in Marcus Hook Anchorage (Anchorage 7).

(3) In addition to the general regulations contained in § 110.157(b) of this title, before anchoring in the Mantua Creek or Deepwater Point Anchorages (Anchorages 9 and 6):

(i) Vessels over 700 feet in length shall obtain permission from the Captain of the Port to anchor in Deepwater Point or Mantua Creek Anchorages (Anchorage 6 or 9).

(ii) Vessels between 700 and 750 feet long shall have one tug alongside while anchored in either Deepwater Point or Mantua Creek Anchorage (Anchorage 6 or 9).

(iii) Vessels greater than 750 feet long shall have two tugs alongside while anchored in either Deepwater Point or Mantua Creek Anchorage (Anchorage 6 or 9).

(4) Each tug alongside a vessel meeting the restrictions in either paragraph (b)(3) (ii) or (iii) of this section must have a minimum rating of 1000 shaft horsepower.

(5) Any vessel operating within this zone shall comply with the directions of the Captain of the Port, Philadelphia, Pennsylvania, or his designated representative.

(c) *Effective Date.* This regulation is effective from 8:00 a.m., November 24, 1988. This regulation terminates on 8:00 a.m., January 21, 1989, unless sooner terminated by the Captain of the Port, Philadelphia, Pennsylvania.

Dated: November 22, 1988.

E. K. Roe,

Captain, U.S. Coast Guard, Captain of the Port, Philadelphia.

[FR Doc. 88-27932 Filed 12-2-88; 8:45 am]

BILLING CODE 4910-14-M

33 CFR Part 165

[COTP Cleveland Reg. 88-11]

Safety Zone Regulations; Old River and Cuyahoga River, Cleveland, OH

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is re-establishing ten safety zones in the Old River and the Cuyahoga River and their adjoining shore areas. They are identical to the zones previously-established on July 22, 1988 as published in the **Federal Register** on August 5, 1988 (53 FR 29458). The zones are needed to protect life and property associated with moored, standing or anchored vessels from a safety hazard arising from the transit of vessels over 1,600 gross tons. Entry into these zones is generally prohibited unless authorized by the Coast Guard

BEST COPY AVAILABLE

VOL 53 ISS 233 DE 5 1988 UMI

Captain of the Port, Cleveland, OH. However, vessels may transit, but not moor, stand or anchor in, these zones as necessary to comply with the Inland Navigation Rules or otherwise facilitate safe navigation. And, cargo vessels conducting loading/unloading operations may temporarily moor in the zones until operations are complete.

EFFECTIVE DATES: This regulation becomes effective on December 1, 1988. It terminates on January 31, 1989 unless sooner terminated by the Captain of the Port, Cleveland.

FOR FURTHER INFORMATION CONTACT: CDR Patrick A. Turlo, Captain of the Port, (216) 522–4406.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days after **Federal Register** publication. Publishing an NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to prevent further damage to the vessels involved or further injury to the people involved.

Drafting Information

The drafters of this regulation are CDR Patrick A. Turlo, the Captain of the Port, Cleveland, and LCDR Carl V. Mosebach, project attorney, Ninth Coast Guard District Legal Office.

Discussion of Regulation

The circumstance requiring this regulation results from large vessels (lakers) transiting the Cuyahoga River an average of four times a day through areas used increasingly by a large number of small, mainly recreational vessels. A pattern of collisions between large, underway vessels and small vessels located on the insides of bends in the river has been identified. On August 31, 1987, one such collision resulted in severe damage to two recreational boats, one of which had persons on board.

Ten areas are considered to present the greatest danger to life and property based on collisions that have occurred or are likely to occur. Those areas are in the vicinity of the river bends by Ontario Stone, Shooters, Nautica Stage, Columbus Road bridge, Alpha Precast Products (United Ready Mix), Upriver Marina and Shippers C&D. Preventing mooring, standing or anchoring of vessels in these areas will decrease danger to lives and property.

Seven safety zones were established on September 3, 1987. Those zones were located at specific bends in the Cuyahoga River at which a history of mishaps had developed, and were successful in preventing further mishaps at those designated areas. During the period in which the emergency rules were in effect, the Captain of the Port continued to study the river traffic situation, and determined that three other areas presented a severe hazard to life and property should small craft be allowed to moor there. These areas were incorporated into a proposed regulation which would make all ten areas permanent safety zones, which was published in the **Federal Register** on December 3, 1987 (52 FR 45973).

The comments concerning these proposed regulations resulted in the Captain of the Port holding a public hearing on March 7, 1988 at which several witnesses expressed the desire to form a working group which would study the river situation, and present a mutually agreeable solution to the Captain of the Port within ninety days. The Captain of the Port agreed to this. The ninety day deadline having expired, the working group requested an additional extension of the comment period. The Captain of the Port also agreed to this, and extended the comment period to December 1, 1988.

These emergency regulations are being effected in order to continue to safeguard life and property pending a final decision on permanent rules.

This regulation is issued pursuant to 33 U.S.C. 1225 and 1231 as set out in the authority citation for all of Part 165.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that these temporary rules do not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, Subpart C of Part 165 of Title 33, Code of Federal Regulations, is amended as follows:

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5.

2. A new § 165.T903 is added to read as follows:

§ 165.T903 Safety Zones: Cuyahoga River and Old River, Cleveland, OH.

(a) *Location.* The waters of the Cuyahoga River and Old River extending ten (10) feet into the river at the following ten (10) locations, including the adjacent shorelines, are safety zones:

(1) One hundred (100) feet downriver to one hundred (100) feet upriver from 41 degrees 29′53.5″ N., 81 degrees 42′33.5″ W., which is the knuckle on the north side of Old River entrance at Ontario Stone.

(2) Fifty (50) feet downriver and fifty (50) feet upriver from 41 degrees 29′48.4″ N., 81 degrees 42′44″ W., which is the knuckle adjacent to the Ontario Stone warehouse on the south side of Old River.

(3) From 41 degrees 29′51.1″ N., 81 degrees 42′32.0″ W., which is the corner of Nicky's Pier at Sycamore Slip on the Old River, to fifty (50) feet east of 41 degrees 29′55.1″ N., 81 degrees 42′27.6″ W., which is the north point of the pier at Shooter's Restaurant on the Cuyahoga River.

(4) Twenty-five (25) feet downriver to twenty-five (25) feet upriver of 41 degrees 29′48.9″ N., 81 degrees 42′10.7″ W., which is the knuckle toward the downriver corner of the Nautica stage.

(5) Ten (10) feet downriver to ten (10) feet upriver of 41 degrees 29′45.5″ N., 81 degrees 42′9.7″ W., which is the knuckle toward the upriver corner of the Nautica stage.

(6) The fender on the west bank of the river at 41 degrees 29′45.2″ N., 81 degrees 42′10″ W., which is the knuckle at Bascule Bridge (railroad).

(7) The two hundred seventy (270) foot area on the east bank of the river between the Columbus Road bridge (41 degrees 29′18.8″ N., 81 degrees 42′02.3″ W.) to the chain link fence at the upriver end of Commodore's Club Marina.

(8) Fifty (50) feet downriver to twenty-five (25) feet upriver from 41 degrees 29′24.5″ N., 81 degrees 41′57.2″ W., which is the knuckle at the Upriver Marina fuel pump.

(9) Seventy-five (75) feet downriver and seventy-five (75) feet upriver from 41 degrees 29′33.7″ N., 81 degrees 41′57.5″ W., which is the knuckle adjacent to the warehouse at Alpha Precast Products (United Ready Mix).

(10) Fifteen (15) feet downriver to fifteen (15) feet upriver from 41 degrees 29′41″ N., 81 degrees 41′38.6″ W., which is the end of the chain link fence between Jim's Steak House and Shipper's C&D.

(b) *Effective Date.* This regulation becomes effective on December 1, 1988. It terminates on January 31, 1989, unless

sooner terminated by the Captain of the Port.

(c) *Regulations*—(1) *General Rule.* Except as provided below, entry of any kind or for any purpose into the foregoing zones is strictly prohibited in accordance with the general regulations in § 165.23 of this part.

(3) *Exception.* Vessels may *transit,* but not moor, stand or anchor in, the foregoing zones as necessary to comply with the Inland Navigation Rules or to otherwise facilitate safe navigation. Cargo vessels of 1,600 gross tons (GT) or greater conducting loading/unloading operations may temporarily moor in the zones until operations are complete.

(3) *Waivers.* Owners or operators of docks wishing a partial waiver of these regulations may apply to the Captain of the Port, Cleveland. Waivers received under the previous emergency rule will remain in effect until January 31, 1989. Partial waivers will only be considered to allow for the mooring of vessels in a safety zone when vessels of 1,600 GT or greater are not navigating in the proximate area. Any requests for a waiver must include a plan to ensure immediate removal of any vessels moored in a safety zone upon the approach of a vessel(s) 1,600 GT or greater.

Dated: November 22, 1988.

Patrick A. Turlo,

Captain of the Port, Cleveland, OH.

[FR Doc. 88-27934 Filed 12-2-88; 8:45 am]

BILLING CODE 4910-14-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 22

[CC Docket No. 88-161; FCC 88-339]

Certain Filing Procedures for Mobile Services Division Applications and To Eliminate Form 430; Public Land Mobile Services; Cellular Services

AGENCY: Federal Communications Commission (FCC).

ACTION: Final rule.

SUMMARY: The Commission has determined that all Mobile Services Division (MSD) applications, amendments, correspondence, exhibits and attachments should be submitted on microfiche. Filings of five pages or less will be exempt from this requirement. Non-cellular and non-initial cellular applications will be submitted on microfiche along with an original paper application with their filing. The use of microfiche provides a system of storage and retrieval of filings that will enable the public to use the reference room with greater assurance and confidence. This procedure will enable us to serve the public in a more efficient, secure, and expeditious manner and result in more efficient use of Commission space. The Commission has determined also that the annual filing requirement of FCC Form 430 for Part 22 licensees should be eliminated, since the staff seldom uses the information requested in the form and most of the information is duplicated in section 401 of FCC Form 401. Applicants must continue to file a FCC Form 430 in response to line 18 of FCC Form 490. This is less burdensome than requiring all Part 22 licensees to file FCC Form 430 annually.

EFFECTIVE DATE: A Public Notice will be issued when the new rules have been approved by the Office of Management and Budget.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Sandra Donnell, Mobile Services Division, Common Carrier Bureau, (202) 632-6450.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order adopted October 26, 1988, and released November 16, 1988. The full text of this action is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this action may also be purchased from the Commission's copy contractors, International Transcription Services, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Estimated Average Burden Hours Per Response: 20 minutes

The public reporting burden for providing the microfiche is estimated to average 20 minutes per response. This burden estimate considers the time for processing the original microfiche and additional copies and the time needed to label and insert it into jackets. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Federal Communications Commission, Office of Managing Director, Washington, DC 20554, and to the Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503.

Summary of Report and Order

1. This order requires that all non-cellular applications and non-initial cellular applications, amendments, correspondence, and forms including attachments and exhibits thereto be submitted on microfiche. Non-cellular applicants and non-initial cellular applicants will be required to submit the original as well as three microfiche copies. Filings of five pages or less are exempt from the requirement to file on microfiche. This should substantially reduce the burden in submitting filings on microfiche. This procedure will enable the Commission to serve the public in a more efficient, secure, and expeditious manner and result in more efficient use of Commission space.

The order also eliminates the requirement that Part 22 licensees file FCC Form 430 annually, since the staff seldom uses the information requested in the form and since the information is essentially duplicated in Schedule A of FCC Form 401. Because the information on FCC Form 430 is used in processing FCC Form 490, applicants must continue to file FCC Form 430 in response to line 18 of FCC Form 490. This will be less burdensome than requiring all Part 22 licensees to file FCC Form 430 annually.

2. Final Regulatory Flexibility Analysis. There has been an increasing number of applications filed and stored in the MSD generating a need for a change in procedure that would give the Commission the greatest administrative flexibility in meeting the needs of the public. It was imperative that a system be devised that would provide a system of storage and retrieval of filings that would enable the public to use the reference room with greater assurance and confidence. Our objective is to provide service to the public with greater speed and efficiency.

The order takes into consideration the various issues raised by the public concerning the proposed rules. As a result of these comments, whenever possible, we have modified our proposal. For example, based on suggestions in the comments, we modified our proposal and have exempted filings of five pages or less from the microfiche requirement. This should substantially reduce the burden on small entities to submit filings on microfiche.

3. Paperwork Reduction. This proposal has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to impose new and modified requirements and burdens upon the public which are subject to approval by the Office of Management and Budget as prescribed by the Act.

Ordering Clauses

4. Authority for this Rulemaking is contained in sections 1, 4(i) and (j), 301,

VOL 53 ISS 233 DE 5 1988 UMI

303 and 309 of the Communications Act of 1934, as amended, and section 503 of the Administrative Procedure Act;

5. Wherefore, for the foregoing reasons, Part 22 of the Commission's Rules are hereby amended as specified in the Rules Section appended to this summary. The amendments adopted in this Order for Part 22 licensees will become effective after approval from OMB.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

Title 47, Part 22 of the Code of Federal Regulations is amended as follows:

PART 22—PUBLIC MOBILE SERVICE

1. The authority citation for Part 22 continues to read as follows:

Authority: Secs. 1, 4(i) and 303(r) of the Communications Act of 1934, 47 U.S.C. 151, 154(i) and 303(r), and sec. 553 of the Administrative Procedure Act, 5 U.S.C. 553.

2. Section 22.2 is amended by adding a definition in alphabetical order as follows:

§ 22.2 Definitions.

* * * * *

Non-initial cellular applications. Cellular applications not filed in a Commission announced filing window.

* * * * *

3. Section 22.6 is amended by revising paragraph (d) to read as follows:

§ 22.6 Filing of applications, fees, and numbers of copies.

* * * * *

(d) Except as otherwise specified, all applications, amendments, correspondence, pleadings and forms shall be submitted on microfiche with three microfiche copies, including exhibits and attachments thereto, and shall be signed as prescribed by § 1.743. (*See* § 22.913 for specific filing requirements for applications for initial cellular, and § 22.923 for specific filing requirements for applications for rural cellular radio communications system authorizations.) Filings of five pages or less are exempt from the requirement to submit on microfiche. Non-cellular and non-initial cellular applicants and those filing any amendments, correspondence, pleadings, and forms must simultaneously submit the original hard copy which must be stamped "original".

(1) *Microfiche Copies.* Each microfiche copy should be a copy of the signed original. Each microfiche copy shall be a 148mm X 105mm negative (clear transparent characters appearing on an opaque background) at 24X to 27X reduction for microfiche or microfiche jackets. One of the microfiche sets must be a silver halide camera master or a copy made on silver halide film such as Kodak Direct Duplicatory Film. The microfiche must be placed in paper microfiche envelopes and submitted in a 5" X 7.5" envelope. All applicants must leave Row "A" (the first row for page images) of the first fiche blank for in-house identification purposes.

(2) Non-Cellular and Non-Initial Cellular Applications. All non-cellular and non-initial cellular applications must have the following information printed on the mailing envelope, the microfiche envelope, and on the title area at the top of the microfiche:

(1) The name of the applicant;

(2) The city and state of the application and

(3) If the application refers to an existing station, the call sign of the station.

* * * * *

4. Section 22.11 is amended by revising paragraph (a) as follows:

§ 22.11 Miscellaneous forms shared by all domestic public radio services.

(a) *Licensee qualifications.* FCC Form 430 ("Common Carrier and Satellite Radio Licensee Qualifications Report") shall be filed by Mobile Service licensees only as required by Form 490 (Application for Assignment or Transfer of Control Under Part 22.

* * * * *

BILLING CODE 6712-01-M

GENERAL SERVICES ADMINISTRATION

48 CFR Parts 519 and 552

[Acquisition Circular AC-88-3]

Administration of Small and Small Disadvantaged Business Subcontracting Program

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Temporary rule.

SUMMARY: The General Services Administration Acquisition Regulation (GSAR), Chapter 5 (APD 2800.12), is temporarily amended to revise Subpart 519.7 in order to provide uniform procedures for administration of the small and small disadvantaged business subcontracting program to ensure compliance with the requirements of Pub. L. 95-507 and to add section 552.219-72 to provide the text of a notice to offerors of subcontracting plan requirements.

DATES: *Effective Date:* December 2, 1988.

Expiration Date: December 1, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Paul Linfield, Office of GSA Acquisition Policy and Regulations (VP), (202) 566-1224.

SUPPLEMENTARY INFORMATION:

Background: This rule was not published in the **Federal Register** for public comment because it provides internal operating procedures for GSA contracting activities and implements certain requirements of the Federal Acquisition Regulations (FAR) which have previously undergone the public comment process. The implementation of the FAR requirements in this rule will not result in an additional significant cost or administrative impact on contractors or offerors.

Impact: The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exemption applies to this rule. The rule simply amends the GSAR to provide internal operating procedures for GSA contracting activities and implements certain requirements of the FAR. Therefore, no regulatory flexibility analysis has been prepared. The rule does not contain any information collection requirements that require OMB approval under the Paperwork Reduction Act.

List of Subjects in 48 CFR Parts 519 and 552

Government procurement.

1. The authority citation for 48 CFR Parts 519 and 552 continues to read as follows:

Authority: 40 U.S.C. 486(c).

2. 48 CFR Parts 519 and 552 are amended by the following Acquisition Circular:

General Services Administration Acquisition Regulation Acquisition Circular (AC-88-3)

To: All GSA contracting activities.

Subject: Administration of small and small disadvantaged business subcontracting program.

1. *Purpose.* This Acquisition Circular temporarily amends the General Services Administration Acquisition Regulation (GSAR), Chapter 5 (APD 2800.12), to provide uniform procedures for administration of the small and small disadvantaged business subcontracting program to ensure compliance with the requirements of Public Law 95-507.

2. *Background.* With certain exceptions, section 211 of Public Law

95–507 established a subcontracting plan requirement for all Federal contracts over $500,000 ($1 million for construction). Responding to a recommendation from the Committee on Government Operations, the Office of Small and Disadvantaged Business Utilization has requested that the GSA's procedures for implementing small disadvantaged business involvement in the subcontracting program be strengthened. The changes being made are intended to reinforce both the subcontracting plan review process and the administration of those subcontracting plans to ensure full compliance with the statutory requirements of Public Law 95–507.

3. *Effective date.* December 2, 1988.

4. *Expiration date.* This circular expires December 1, 1989, unless canceled earlier.

5. *Reference to regulation.* Subpart 19.7 of the Federal Acquisition Regulation and Subpart 519.7 of the General Services Administration Acquisition Regulation.

6. *Explanation of changes.*

a. Section 519.701 is added to read as follows:

519.701 Definitions.

"Individual contract plan" means a subcontracting plan that applies to a specific contract and that has goals which are based upon the company's planned subcontracting and purchasing of supplies and services in support of the performance of a specific contract, except that indirect costs incurred for common or joint purposes may be allocated on a prorated basis to the contract. Individual contract plans may incorporate a master subcontracting plan.

"Commercial products plan" means an annual subcontracting plan effective during the offeror's fiscal year for all of the offeror's commercial products, and which has goals based on the offeror's production of both commercial and noncommerical products. This type of plan may apply to the production of the offeror's entire company, or it may be limited to a division or plant.

"Master subcontracting plan" means a subcontracting plan which contains all of the required elements except goals, and which may be incorporated into an individual plan provided (a) the master plan has been approved, (b) the offeror provides a copy of the approved master plan and evidence of its approval to the contracting officer and (c) goals and any deviations from the master plan are approved by the contracting officer. Master subcontracting plans are useful for offerors who anticipate receiving many Government contracts requiring individual subcontracting plans.

b. Section 519.702 is added to read as follows:

519.702 Ststutory requirements.

(a) The statute treats contracts and modifications separately, not cumulatively. Accordingly, if a subcontracting plan is not required at the time of award because the value of the contract is below the threshold, a subcontracting plan will not be required if a subsequent modification increases the value of the contract to an amount which exceeds the threshold, unless the value of the modification itself exceeds $500,000, or $1 million for construction contracts.

(b) It is not necessary to obtain another subcontracting plan for a modification exceeding $500,000 ($1 million for construction contracts) if the contract already includes a subcontracting plan. Modifications may be incorporated into an existing plan and the original plan goals revised to include the new effort.

c. Section 519.704 is added to read as follows:

519.704 Subcontracting plan requirements.

(a) *Subcontracting goals.* (1) Pursuant to section 211 of Public Law 95–507, positive subcontracting goals for small and small disadvantaged business concerns are required to establish a gauge for measuring results, and to provide an incentive for continuing efforts to increase the dollar value of contracts placed with small and small disadvantaged business concerns.

(2) Although there may be no known small or small disadvantaged business concerns that furnish the products or services required by a prospective contractor at the time a subcontracting plan is developed, a zero goal is not acceptable because contractors are expected to make continuing efforts during the contract period to locate and identify newly emerging small and small disadvantaged business concerns as potential suppliers. In addition, there may be subcontracting opportunities in the area of indirect costs.

(3) Goals in individual plans for multiyear contracts or contracts with options to extend the period of performance may be established for a period less than the full term of the contract (including options) when it is impractical to establish goals for the full term if the plan includes a schedule for establishing goals for the balance of the term of the contract.

(b) *Types of plans.* For commercial products and public utility service contracts either a commercial products plan or an individual contract plan must be submitted. Individual contract plans must be submitted for other contracts.

(c) *Duration of plans.* (1) *Individual plans.* The plan must cover the entire period of contract performance, including option periods (but see paragraph (a)(3), above, for goals).

(2) *Commercial products plans.* A commercial products plan is approved by the first Federal agency awarding a contract for commercial products during the contractor's fiscal year, and is applicable to every additional Federal contract for commercial products awarded to that contractor during the contractor's same fiscal year. If the approved plan is limited to a division or plant, it only applies to additional contracts for commercial products of that particular division or plant. The cutoff date for applying a previously approved commercial products plan to additional Federal contracts is the end of the company's fiscal year in which the plan was approved. If the contract extends beyond the contractor's fiscal year, the GSA contracting officer responsible for monitoring the existing plan, under 519.706–70(c), must request a new plan 30 days prior to the end of the contractor's fiscal year.

d. Section 519.705–2 is added to read as follows:

519.705–2 Determining the need for a subcontracting plan.

Before making a determination, under FAR 19.705–2, that no subcontracting opportunities exist on a prospective contract which meets the dollar threshold, the contracting officer must contact the Director, Office of Small and Disadvantaged Business Utilization (AU), and consider any comments or recommendations offered.

e. Section 519.705–4 is revised to read as follows:

519.705–4 Reviewing the subcontracting plan.

(a) The GSA Form 3584, Checklist for Review of Subcontracting Plan, must be used by the procuring contracting officer (PCO) and small business technical advisor (SBTA) when reviewing subcontracting plans. Its use by SBA procurement center representatives is optional.

(b) In the goals section of the plan, small disadvantaged business goals are to be included in small business goals and stated separately. If it is not clear from the plan that the offeror has done this, the contracting officer shall request clarification and have the offeror correct the goals, if necessary.

(c) The contracting officer shall question low subcontracting goals submitted by an offeror required to submit a subcontracting plan and shall require the offeror to document in its plan the steps it has taken to identify subcontracting opportunities for small and small disadvantaged business concerns.

(d)(1) Before determining the responsibility of an offeror on a contract requiring a subcontracting plan, the contracting officer shall review the offeror's compliance with previous subcontracting plans, if any, approved by the contracting activity, including the contractor's performance in submitting subcontracting reports in a timely manner. The findings must be documented on the GSA Form 3584, Checklist for Review of Subcontracting Plan, before forwarding it to the SBTA and the SBA/PCR for review.

(2) In addition to paragraph (d)(1) above, PBS contracting officers must check the quarterly list of PBS contracts with plans provided by AU and contact all other contracting activities holding contracts with the same contractor concerning compliance with the previous year's plan.

(3) When an offeror has consistently failed to submit SF 294 and SF 295 reports in a timely manner or has failed to make a good faith effort to meet its subcontracting goals on previous contracts with plans, the contracting officer shall include on the GSA Form 3584 the basis for finding the offeror responsible including the steps the offeror proposes to take that were not included in previous subcontracting plans to ensure compliance with the subcontracting program requirements on the proposed contract.

f. Section 519.705–5 is amended by redesignating paragraphs (a) and (b) as (c) and (d), respectively, and to substitute the verb "must" for "should" in the second sentence of the redesignated paragraphs (c) and (d), and adding new paragraphs (a) and (b) to read as follows:

519.705–5 Awards involving subcontracting plans.

(a) In the event there is an unresolved disagreement with the SBTA and/or SBA/PCR on a proposed subcontracting plan, the contracting officer, prior to making an award, must contact the Director (AU) and consider any comments or recommendations offered.

(b) When a contractor has a commercial products plan previously approved by another GSA contracting activity or another Federal agency for the company's fiscal year, the GSA contracting officer shall request a copy of the plan and the agency approval document and include them in the contract file. The plan must also be included in and made a part of the resultant contract.

g. Section 519.705–6 is revised to read as follows:

519.705–6 Postaward responsibilities of the contracting officer.

(a) In addition to the requirements of FAR 19.705–6, contracting officers shall notify the SBTA of each contract award or contract modification exceeding $500,000 ($1 million for construction) that contains a subcontracting plan within 5 work days of award. The notice of award must contain the following information:

(1) Contractor's name, address, phone number.

(2) Subcontracting plan administrator's name, address, phone number.

(3) Contract number.

(4) Place of performance.

(5) Dollar amount of contract award.

(6) Period of contract performance.

(7) Description of contract items.

(8) Contracting officer's name, address, phone number.

(9) Administrative contracting office address, phone number.

(10) Type of plan (individual or commercial products).

(b) The subcontracting plan checklist (GSA Form 3584) must be submitted as the notice of award, except in the case of a contract incorporating a previously approved commercial products plan. In this case, notice of award as described in paragraph (a) above, will be necessary as there will be no subcontracting plan checklist. The SBTAs shall forward a copy of notices and checklists to AU on a weekly basis and retain a file copy.

(c) AU will notify Congress of subcontracting goals established for each contract.

h. Section 519.706–70 is revised to read as follows:

519.706–70 Monitoring contractor compliance with subcontracting plans.

(a) Contract administration may be performed by the procuring contracting officer who awarded the contract or it may be delegated to an administrative contracting officer (ACO). When contract administration is delegated, the subcontracting plan must be included in the contract file transmitted to the contract administration office.

(b) The contracting officer administering contracts with subcontracting plans shall monitor receipt of SF 294 reports for individual contract plans and SF 295 reports for company-wide plans and review the reports for progress in meeting subcontracting plan goals by comparing the reports with the plan. If percentage goals are not met, the contractor must be required to explain the shortfall in the "Remarks" block on the subcontracting reports and may be required to submit evidence of their outreach efforts to locate and provide subcontracting opportunities to small business and small disadvantaged business concerns. The requirement for compliance with plans may be fulfilled by evidence of satisfactory outreach efforts, as described in the plan, as well as by meeting plan goals. The contracting officer responsible for monitoring receipt of the reports shall also obtain delinquent SF 295 reports from contractors for both individual and company-wide plans upon request from AU.

(c) In the case of commercial products plans approved by GSA, the first contracting officer who enters into a contract with a company during the company's fiscal year approves the plan and monitors receipt of reports and compliance with the plan. This responsibility is generally assigned to the ACO if contract administration is delegated. Subsequent GSA contracts awarded during the company's same fiscal year and incorporating the previously approved plan will not require submission of subcontracting reports.

(d) In the case of commercial products plans approved by another agency, the first GSA contracting officer entering into a contract with the company during the company's same fiscal year in which the plan was approved requires the contractor to submit the SF 295 report and monitors receipt of the report. No other monitoring of this plan is required by GSA.

(e) Contractor compliance with plans must be documented in the contract file in accordance with FAR 19.706 and must be considered by the contracting officer when determining contractor responsibility for future awards. In case of noncompliance, the contracting officer shall notify AU through the SBTA.

(f)(1) Contractors who fail to submit SF 294 and SF 295 reports within 10 days of the due date must be reminded in writing that the report is past due.

(2) Contractors who do not respond to the first notice must be issued a second written notice by certified mail which must contain the following information:

(i) A statement that the named report has not been received.

VOL 53 ISS 233 DEC 5 1988 UMI

(ii) A statement that failure to submit the report is a material breach of the contract (see FAR 52.219–9, Small Business and Small Disadvantaged Business Subcontracting Plan).

(iii) A statement that if the report is not received within 10 days from the date of the notice, the contracting officer will consider withholding payments as deemed appropriate under the circumstances until the report is received and may terminate the contract for default.

(iv) The contractor is also to be reminded that failure to submit the report may affect its ability to receive future awards from GSA (see FAR 9.104–3(c)) and that willful failure to perform or a history of failure to perform may result in debarment from future contracting with the Government for a period of time (see FAR 9.406–2(b)).

(v) The notice must also contain the address of the contracting officer or administrative contracting officer to whom the report must be sent and instructions that a copy of the report must be sent to AU, if it is a SF 295 report, and to the appropriate SBTA, if it is a SF 294 report.

(3) Copies of delinquency notices concerning SF 295 or SF 294 reports must be sent to AU or the appropriate SBTA, respectively.

(4) If the contracting officer administering the contract has reason to believe that the contractor is otherwise not complying in good faith with the subcontracting plan, in addition to the requirements at FAR 19.706(b), the contracting officer must contact the Director (AU) and consider any comments or recommendations offered.

i. Section 519.706 is added to read as follows:

519.706 Solicitation provisions and contract clauses.

For contracting activities using GSA Form 1602, Notice Concerning Solicitation, or a similar form as a cover page of the solicitation, the contracting officer shall insert the provision at 552.219–72 on that cover page when the contract amount is expected to be over $500,000 ($1 million for construction) and the acquisition (a) is not set aside for small business, (b) is not for personal services, or (c) will not result in a contract that will be performed outside of any state, territory, or possession of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

j. Section 519.770–1 is revised to read as follows:

519.770–1 Report forms.

(a) *Standard Form 294, Subcontracting Report for Individual Contracts.* This report is required for reporting subcontracting activity under contracts with individual contract plans. A separate report must be made on this form for each contract with an individual contract plan. This report is not required for commercial products plans.

(1) Contractors shall submit the SF 294 report to the contracting office administering the contract and a copy to the SBTA.

(2) Reports are due semiannually (within 25 days after March 31st and September 30th) and at contract completion.

(b) *Standard Form 295, Summary Subcontracting Report.* This form is required for reporting subcontracting activity under both individual contract plans and commercial products plans.

(1) *Individual contract plans.* (i) Contractors shall submit the SF 295 reports to AU.

(ii) The reports are quarterly, and are due 25 days after the end of each Government quarter (December 31st, March 31st, June 30th, and September 30th).

(iii) The reports are cumulative from quarter to quarter and aggregate subcontracting activity under all GSA contracts held by the contractor, except those covered by commercial products plans.

(2) *Commercial products plans.* (i) Contractors shall submit the SF 295 reports to the contracting office administering the contract and a copy to AU.

Note: This instruction applies only for the first GSA contract covered by a commercial products plan awarded during the contractor's fiscal year. Contractors are not required to submit SF 295 reports for subsequent contracts awarded during their current fiscal year and covered by the same commercial products plan.

(ii) Reports are due annually, on or before October 25th of each year. The reports should cover the contractor's subcontracting activity under company-wide plans for commercial products in effect during the reporting period, which is October 1st to September 30th (Government fiscal year).

k. Section 519.770–3 is revised to read as follows:

519.770–3 Reporting on contractual actions under Section 211 of Public Law 95–507.

(a) *Contracting office reporting requirements.* A quarterly report of the number and dollar value of contracts awarded in excess of $500,000 ($1 million for construction) requiring subcontracting plans or a written determination that so subcontracting opportunities exist, must be prepared by contracting offices and submitted to the SBTA by the 10th calendar day after the end of the quarter. Report Control Symbol ADM 64 is assigned to this report. Negative reports are required. The SBTA will forward the reports to AU by the 20th calendar day following the end of the quarter.

(b) *Report format.* The following format is prescribed for the quarterly report.

Reporting office _____
Quarter beginning _____
Ending _____

Report on Contracting Actions Under Section 211 of Pub. L. 95–507

(contracts estimated or actual value over $500,000)

[$1 million for construction]

Note: Do not include Contracts with Small Business Concerns.

1. Total number of contracts awarded over $500,000 ($1 million for construction)
No. _____
$ value _____

2. Contracts awarded over $500,000 ($1 million for construction) which contain subcontracting plans
No. _____
$ value _____

3. Contracts awarded over $500,000 ($1 million for construction) without subcontracting plans. (Attach written justification for each contract awarded without a plan, see FAR 19.705–2).
No. _____
$ value _____

(End of format)

l. Section 552.219–72 is added to read as follows:

552.219–72 Notice to offerors of subcontracting plan requirements.

As prescribed in 519.708 insert the following provision:

Notice to Offerors of Subcontracting Plan Requirements (November 1988)

Offerors, prior to being awarded any contract exceeding $500,000 ($1 million for construction), shall be required to submit an acceptable subcontracting plan (see FAR 52.219–9) or demonstrate that no subcontracting opportunities exist. This provision does not apply to small business concerns.

(End of Provision)

Richard H. Hopf III,

Associate Administrator for Acquisition Policy.

November 28, 1988.

BILLING CODE 6820–61–M

Proposed Rules

Federal Register
Vol. 53, No. 233
Monday, December 5, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 214

[INS Number 1126-88]

Nonimmigrant Classes

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: This proposed rule would add paragraph (e)(2) to 8 CFR 214.2, defining the term "trade" as it relates to treaty traders. The purpose of this rule is to define a term which has never been defined in this Service's regulations and which has new meaning in the international business community.

DATE: Written comments must be received on or before January 4, 1989.

ADDRESS: Please submit comments in duplicate to the Director, Office of Policy Directives and Instructions, Immigration and Naturalization Service, 425 Eye Street, NW., Room 2011, Washington, DC 20536.

FOR FURTHER INFORMATION CONTACT: Edward H. Skerrett, Senior Immigration Examiner, Immigration and Naturalization Service, 425 Eye Street, NW., Washington, DC 20536, Telephone (202) 633-3946.

SUPPLEMENTARY INFORMATION: The treaty trader provision appeared first in the Immigration Act of 1924 and was revised by the Act of July 6, 1932, and by the Immigration and Nationality Act of 1952. On none of these occasions was the term "trade" defined. Traditionally, the United States Immigration and Naturalization Service has held that the term includes only the exchange of goods and some quasi-services.

The quasi-services referred to above are found in the Department of State's note 4.1 to 22 CFR 41.51. These "include international banking, insurance, transportation, tourism, communications, and newsgathering activities." All these activities, with the exception of tourism, were noted as being acceptable activities under the treaty trader provision in *The Report of the Committee on the Judiciary* prior to enactment of the 1952 Act. Including the aforementioned quasi-services as acceptable activities under the treaty trader provision and the evolution of the concept of trade itself make it necessary at this time to clearly define the term "trade." The evolution of the term is most recently and most clearly seen in the Trade and Tariff Act of 1984 wherein the term "international trade" is described as including trade in goods and services.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

This rule is not a major rule within the meaning of section 1(b) of E.O. 12291.

List of Subjects in 8 CFR Part 214

Administrative practice and procedure, Aliens, Authority delegation, Employment, Organization and functions, Passports and visas.

Accordingly, Chapter I of Title 8 Code of Federal Regulations would be amended as follows:

PART 214—NONIMMIGRANT CLASSES

1. The authority citation for Part 214 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1184, 1186a, 1187.

2. In § 214.2, paragraph (e) is redesignated (e)(1), and (e)(i) heading and (e)(2) are added to read as follows:

§ 214.2 Special requirements for admission, extension, and maintenance of status.

* * * * *

(e) *Traders and Investors*—(1) *General.* ***

(2) *Definition of the term "trade."* The term "trade," as used in this section, means the exchange, purchase, or sales of goods and/or services. Goods are tangible commodities or merchandise having intrinsic value, excluding money, securities, and negotiable instruments. Services are economic activities whose outputs are other than tangible goods. Such activities include, but are not limited to, banking, insurance, transportation, communications, and data processing, advertising, accounting, design and engineering, management consulting, and tourism.

FEDERAL RESERVE SYSTEM

12 CFR Part 205

[Reg. E; EFT-2]

Electronic Fund Transfers; Proposed Update to Official Staff Commentary

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Proposed official staff interpretation.

SUMMARY: The Board is publishing for comment proposed changes to the official staff commentary to Regulation E (Electronic Fund Transfers). The commentary applies and interprets the requirements of Regulation E and is a substitute for individual staff interpretations of the regulation. The proposed revision addresses questions that have arisen about the disclosure requirements of the regulation.

DATES: Comments must be received on or before February 3, 1989.

ADDRESSES: Comments should refer to Docket No. EFT-2 and be sent to Mr. William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551. They may be delivered to Room B-2222 of the Eccles Building between 8:45 a.m. and 5:15 p.m. weekdays or delivered to the guard station in the Eccles Building Courtyard on 20th Street, NW. (between Constitution Avenue and C Street, NW.) any time. All comments received at the above address will be available for inspection and copying by any member of the public in the Freedom of Information Office, Room B-1122 of the Eccles Building between 9:00 a.m. and 5:00 p.m. weekdays.

FOR FURTHER INFORMATION CONTACT: Sharon Bowman or Kathleen S. Brueger, Staff Attorneys, Division of Consumer Affairs, at (202) 452-3667 or (202) 452-2412. For the hearing-impaired *only*,

Earnestine Hill or Dorothea Thompson, Telecommunications Device for the Deaf, at (202) 452–3544, Board of Governors of the Federal Reserve System, Washington, DC 20551.

SUPPLEMENTARY INFORMATION: (1) *General.* The Electronic Fund Transfer Act (15 U.S.C. 1693 *et seq.*) governs any transfer of funds that is electronically initiated and that debits or credits a consumer's account. This statute is implemented by the Board's Regulation E (12 CFR Part 205).

The Board has published an official staff commentary (Supp. II to 12 CFR Part 205) to interpret the regulation. The commentary is designed to provide guidance to financial institutions and others in applying the regulation to specific situations. The commentary is updated periodically to address significant questions that arise. This notice contains the proposed seventh update, which the Board expects to adopt in final form in March 1989.

(2) *Proposed revisions.* Following is a brief description of the proposed revisions to the commentary:

Section 205.7—Initial Disclosure of Terms and Conditions

Question 7–1

Question 7–1 addresses the situation where a financial institution provides EFT disclosures when a consumer opens an account. The question is revised to clarify that the regulation does not impose a time limit by which a consumer must sign up for an EFT service with a third party in order for the disclosures originally provided by the account holding institution to satisfy the regulation's requirements.

Question 7–2

Question 7–2 is revised to clarify that, in cases where a financial institution does not receive notice that a consumer has signed up for direct deposit of Social Security payments (because there has been no prenotification and no Form 1199A has been completed by the consumer and the financial institution), the financial institution must provide the necessary disclosures as soon as possible after the first electronic fund transfer has been made. In cases where the financial institution does receive prior notice of the consumer's enrollment in the direct deposit program, the financial institution must provide disclosures before the first EFT occurs. The institution has the option, of course, of providing disclosures to customers when an account is opened, as described in Question 7–1.

List of Subjects in 12 CFR Part 205

Banks, Banking, Consumer protection, Electronic fund transfers, Federal Reserve System, Penalties.

Certain conventions have been used to highlight the revisions. New language is shown inside bold-faced arrows while language to be removed is set off with brackets.

(3) *Text of proposed revisions.* Pursuant to authority granted in section 904 of the Electronic Fund Transfer Act, 15 U.S.C. 1693b, the Board proposes to amend the official staff commentary to Regulation E (12 CFR Part 205, Supp. II) as follows:

1. The authority citation for Part 205 continues to read:

Authority: Pub. L. 95–630, 92 Stat. 3730 (15 U.S.C. 1693b).

2. The official staff commentary on Regulation E, Supp. II to 12 CFR Part 205, is amended by revising Q and A 7–1 and 7–2 for § 205.7 to read as follows:

Supplement II—Official Staff Interpretations

* * * * *

Section 205.7—Initial disclosure of terms and conditions.

Q 7–1: *Timing of disclosures—early disclosure.* An institution is required to give initial disclosures either (1) when the consumer contracts for an EFT service or (2) before the first electronic fund transfer to or from the consumer's account. If an institution provides initial disclosures when a consumer opens a checking account and the consumer does not sign up for an EFT service until [11 months later,] ►a later time,◄ has the institution satisfied the disclosure requirements?

A: Yes, if the EFT contract is between the consumer and a third party for preauthorized electronic transfers to be initiated by the third party to or from the consumer's account. In this case, the financial institution need not repeat disclosures previously given unless the terms and conditions required to be disclosed are different from those that were given.

If, on the other hand, the EFT contract is directly between the consumer and the financial institution—for the issuance of an access device, or for a telephone bill-payment plan, for example,—the institution should provide the disclosures at the time of contracting. Disclosures given before the time of contracting will satisfy the regulation only if they occurred in close proximity thereto. (§ 205.7(a)).

Q 7–2: *Timing of disclosures—Social Security direct deposits.* In the case of Social Security direct deposits, [the financial institution receives no prenotification. How] ►how◄ can the ►financial◄ institution comply with the disclosure requirements ►, absent prenotification, in cases where a Form 1199A is no longer used by the Social Security Administration◄?

A: Before direct deposit of Social Security payments ►takes place, usually◄ [can occur, both] the consumer and the institution ►both◄ must complete a Form 1199 [. The] ►A, and the◄ institution can make disclosures at that time. ►However, if a Form 1199A is not used and there is no prenotification, the institution should provide the required disclosures as soon as possible after the first direct deposit is received (unless the institution has previously given the disclosures; see question 7–1).◄ (§ 205.7(a))

12 CFR Part 225

[Regulation Y; Docket No. R–0652]

Bank Holding Companies and Change in Bank Control; Rescission of Existing Regulation Regarding Investments in Voting Shares of Nonbanking Companies by State Banks Owned by Bank Holding Companies

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Soliciation of public comment.

SUMMARY: In light of a number of recent developments, the Federal Reserve Board is soliciting public comment regarding a proposal to rescind its existing regulation permitting bank holding companies to acquire, through their subsidiary state banks, shares of companies engaged in activities that the bank is permitted to conduct under state law, so-called operations subsidiaries. If the existing rule is rescinded, bank holding companies would be required by the Bank Holding Company Act to obtain approval under section 4(c)(8) of the Act prior to establishing or acquiring, through their state banks, operations subsidiaries, unless the transaction is otherwise authorized under the Act.

The Board is also requesting comment regarding a proposal to grandfather all or most existing subsidiaries of holding company banks acquired in reliance on, and in conformance with, this regulation. In addition, the Board requests comment on a proposal to establish an expedited notice procedure for future proposals by bank holding companies, through their state banks, to establish or acquire operations subsidiaries under section 4(c)(8) of the Bank Holding Company Act.

DATE: Comments must be received by January 30, 1989.

ADDRESS: All comments, which should refer to Docket No. R–0652, should be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, or delivered to Room B–2222, 20th and Constitution Avenue NW., Washington, DC, between 8:45 a.m. and 5:15 p.m. weekdays. Comments may be inspected in Room B–1122 between 8:45 a.m. and 5:15 p.m. weekdays.

FOR FURTHER INFORMATION CONTACT: J. Virgil Mattingly, Deputy General Counsel (202/452–3583), Scott G. Alvarez, Senior Counsel (202/452–3583), Legal Division; or Sidney M. Sussan, Assistant Director (202/452–2638), Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, Washington, DC 20551. For the hearing impaired *only*, Telecommunications Service for the Deaf, Earnestine Hill or Dorothea Thompson (202/452–3544).

SUPPLEMENTARY INFORMATION:

I. Introduction

The Board has had under review for some time the legal and policy issues associated with the application of the nonbanking provisions of section 4 of the Bank Holding Company Act ("BHC Act") to subsidiaries of holding company banks. In light of a number of developments, including the enactment of the insurance amendments to section 4(c)(8) of the Act, the expansion of the powers authorized for subsidiaries of state banks under a number of state statutes, petitions and requests for rulemaking by a number of parties regarding the coverage of these subsidiaries under the Act, and the recent decision by the U.S. Court of Appeals for the District of Columbia Circuit in *AMBAC*,[1] the Board has decided that it is now appropriate to resolve these issues.

Accordingly, after reexamining the governing provisions of the Act, the Board has decided to ask for public comment on a proposal that would rescined its existing regulation that permits state banks owned by bank holding companies to acquire, without approval under the Bank Holding Company Act, so-called operations subsidiaries—companies that are wholly-owned by the state bank and that engage only in activities that the bank may conduct directly under state law.[2] The result of this proposed amendment would be to require bank holding companies to obtain approval under the closely related to banking standards of section 4(c)(8) of the Act for their subsidiary state banks to acquire or retain control of such operations subsidiaries or their voting shares, unless control of the subsidiary is permitted without an application under one of the other limited exemptions in the Act (*e.g.*, for servicing activities (12 U.S.C. 1843(c)(1)). The proposal would provide grandfather rights for certain existing operations subsidiaries and establish expedited notice procedures for future acquisitions of operations subsidiaries by holding company state banks.

The Board's state bank operations subsidiary rule, which was adopted in 1971, provides that state banks owned by bank holding companies may, without Board approval under the Act, acquire or retain all of the voting shares of companies that engage solely in activities that the bank may conduct directly under applicable state law, at locations at which the bank may conduct the activity and subject to other limitations that would be applicable if the bank were conducting the activity.[3] The Board has a similar rule for operations subsidiaries of national banks authorized in accordance with regulations of the Comptroller of the Currency.[4]

In adopting these rules in 1971, the Board noted that it did so based upon notions of competitive equity between independent banks and holding company banks and in the absence of evidence that acquisitions by holding company banks were resulting in evasions of the Act. 36 FR 9292 (1971).[5] At that time, the powers of operations subsidiaries of banks were limited and approval for operations subsidiaries was required by the banking authorities. Thus, there was no significant conflict between the scope of activities permitted for bank holding companies and their direct and indirect nonbank subsidiaries under the closely related to banking and proper incident standards of section 4(c)(8) of the Act and the Board's rules. The Board, however, recognized that over time these rules could become the focus for evasion of section 4(c)(8) of the Act and cautioned that it would review the merits of its decisions not to apply the Act to these subsidiaries from time to time based upon its experience in administering the Act. *Id.*

In 1982, Congress amended section 4(c)(8) of the BHC Act to provide that, with certain exceptions, insurance activities are not closely related to banking, thereby eliminating the Board's discretion to permit bank holding companies to engage in these activities.[6] This amendment raised the question of the continued appropriateness of the Board's operations subsidiaries rules because, for the first time, these rules potentially permit nonbank subsidiaries of holding companies to engage in activities that the Board had no discretion to permit for bank holding companies and their direct and indirect nonbank subsidiaries. In addition, in connection with its 1983 update and revision of Regulation Y, the Board received substantial comment that these rules were not consistent with the terms and intent of the BHC Act because they permitted holding companies to acquire, through subsidiary banks, companies engaged in activities not permissible under the Act. The Board has also become concerned that the risk nonbanking activities in subsidiaries of banks outside the framework and safeguards Congress established in the BHC Act for the conduct of nonbanking activities within a bank holding company organization.

For these reasons, the Board deferred final action on the operations subsidiary rules in its 1983 Regulation Y rulemaking pending completion of certain related proceedings involving the insurance and real estate investment and development powers of bank holding companies and consideration by Congress of the appropriateness of expanded powers for banking organizations and the structural arrangements and prudential limitations that should govern the exercise of these powers.[7] The recent decision by the Court of Appeals in AMBAC that a holding company national bank may not acquire an operations subsidiary without compliance with section 4(c)(8)

[7] 49 FR 794, 797, 811 (1984); 52 FR 543, 545 (1987).

of the BHC Act has focused the Board's attention on the need to resolve the issues raised by these rules.

A. Acquisition of Voting Shares and Subsidiaries by Holding Company State Banks Under the Nonbanking Porvisions of the Bank Holding Company Act

In light of the above developments, the Board has reexamined the legal basis for the state bank operations subsidiary rule, including, particularly, the scope of coverage of the nonbanking provisions of section 4(a) of the act as they apply to subsidiaries of holding company banks, and the existence of any provisions in the Act that would permit acquisitions of operations subsidiaries without section 4(c)(8) approval. Based upon that reexamination and in light of judicial decisions regarding the Board's discretionary authority under the Act, the Board is concerned that the current state bank opeations subsidiary rule may not be consistent with the terms of the Act. Accordingly, the Board is proposing to rescind this rule and is requesting public comment on the proposal.

Since enactment of the Act in 1956, the Board has consistently held that the nonbanking provisions of section 4(a) of the Act apply to the acquisition and retention of the voting shares of nonbank companies by holding company banks because such shares are deemed indirectly held by the parent holding company under the Act. *See e.g.* 12 CFR 225.101 and 102. As discussed in Part III, the literal language of the Act leaves no room for doubt as to the correctness of this position.[8] The overall structure of the Act, reflecting the line drawn by Congress in the Act between banking and nonbanking companies, and its legislative history and itnent support this position.

Accordingly, the Board believes that when a bank controlled by a bank holding company seeks to acquire or retain control of a nonbank company or its voting shares, that transaction is subject to the nonbanking provisions of section 4(a) of the BHC Act and, to be permissible, must fall within one of the exemptions to these prohibitions.

There is no express exemption in the Act that permits a state bank owned by a bank holding company, without compliance with section 4(c)(8), to acquire or retain control of a company engaged in any activity that may be authorized for the bank under state law or of the voting shares of such a company; and the Board cited no such exemption when the rule was adopted in 1971. Moreover, in light of judicial decisions since the operations subsidiary rules were adopted in 1971 concerning the scope of the Board's authority under the Act,[9] the Board does nto believe that it is authorized under the Act, as a matter of regualtory discretion or forbearance, to provide a regulatory exemption permitting such acquisitions without compliance with the closely related to banking and public interest standards and procedural requirements of section 4(c)(8).

For the foregoing reasons, the Board is asking for comment on a proposal to rescind the state bank operations subsidiary rule (12 CFR 225.22(d)(2)(ii)), thereby requiring that the acquisition and retention of operations subsidiaries and their voting shares meet the closely related to banking and proper incident standards of section 4(c)(8) of the Act (unless the transaction fits under any of the other limited exemptions in the Board's Regulation Y).

B. Consistency of Proposal With Dual Banking System Principles

The Board wishes to emphasize that the principles of the dual banking system as reflected in the terms and legislative intent of the BHC Act would be unaffected by application of the Act to operations subsidiaries of holding company state banks. In the 1956 Act, Congress recognized these principles by limiting the coverage of the nonbanking provisions of the Act to bank holding companies and their direct and indirect nonbank subsidiaries. The appropriate range of activities for state and national banks, which are authorized, respectively, by the states and the Comptroller, was deliberately left unaffected by the prudential limitations established under section 4(c)(8) of the BHC Act. The Board has adhered to this view of the line drawn by Congress in section 4 of the Act between banks and nonbanking companies since its enactment in 1956, and has recently reaffirmed that position. See *Merchants National Corporation*, 73 Federal Reserve Bulletin 876, 878–80 (1987).[10]

Because the nonbanking provisions of the Act apply only to holding companies and their nonbank subsidiaries, the direct activities of state and national banks and the actions of regulatory and state legislative bodies as they apply to the direct activities of banks are entirely unaffected by section 4 of the BHC Act. Thus, a decision that section 4 of the BHC Act applies to nonbank subsidiaries of holding company state banks does not limit the authority of states to determine the appropriate range of activities for banks, whether or not owned by holding companies, and does not upset the principles of the dual banking system.

C. Impact of the Decision on Operations Subsidiaries of State Banks

Similarly, the Board does not believe that a decision to rescind the state bank operations subsidiary rule would unduly disrupt existing relationships or result in substantial new regulatory burdens. For example, the Board's proposal to eliminate the state bank operations subsidiary rule does not mean that it would be unlawful for state banks in a holding company system to establish operations subsidiaries or that their activities must be terminated or moved into the bank.

In this regard, the Board notes that most of the activities permitted for state banks are also permissible for bank holding companies under the BHC Act and that many bank holding companies already have approval to engage in the activities on the Regulation Y list directly and through their subsidiaries, including operations subsidiaries. Moreover, as discussed in Part II, the Board would emphasize that the proposal to rescind its state bank operations subsidiary rule gives appropriate consideration to grandfathering acquisitions by banks in reliance on the Board's current regulation.

In those cases where BHC Act approval has not been secured, the Board is proposing rules that would permit approval under an expedited notice procedure. The procedure would give full consideration to the authorizing actions of state bank regulatory authorities and would allow holding companies banks to proceed to acquire operations subsidiaries engaged in activities listed in Regulation Y unless notified within a short period of time

[8] Under section 4(a) of the Act, a bank holding company many not acquire or retain direct or indirect control of the voting shares of any company other than a bank and may not control any subsidiary other than banks and other subsidiaries authorized under the Act. 12 U.S.C. 1843(a). Under the Act's definitions, a subsidiary of a holding company bank is deemed to be an indirect subsidiary of the holding company and its shares are deemed to be indirectly held by the holding company. 12 U.S.C. 1841(g)(1).

[9] *See, e.g., Board of governors of the Federal Reserve System* v. *Dimension financial Corp.*, 474 U.S. 361, 368 (1986) (if the language of the BHC Act "is clear and unambiguous, 'that is the end of the matter, for the court, as well as the agency, must give effect to the unambiguously expressed intent of Congress' ", quoting *Chevron U.S.A., Inc.*, v. *Natural Resources Defense Council, Inc.*, 467 U.S. 837, 842–843 (1984).

[10] *vacated on other grounds sub nom. Independent Ins. Agents of America* v. *Board of Governors*, 838 F.2d 627 (2d Cir. 1988).

that the activity of the subsidiary was inconsistent with the safety and soundness and other prudential provisions of section 4(c)(8) of the Act.

D. Implications for Bank Regulation

Application of the BHC Act to holding company state bank operations subsidiaries would further a fundamental policy objective of bank regulation in the powers area. The Board has taken the position that it is necessary to expand the activities in which banking organizations may engage, particularly in the securities area, in order to assure their competitive vitality in a rapidly changing financial environment. To accomplish this objective the Board has considered it essential that these activities take place in a subsidiary of a holding company rather than in a holding company bank or in a subsidiary of a bank.

The purpose of this organizational structure is to separate more effectively than through other available techniques these new functions from the benefits of the federal safety net, which consists of access to Federal Reserve credit and federal deposit insurance. This separation is required for two reasons: (1) To assure that the risks of these activities are not passed on to the federal safety net, and (2) to assure that competition is not distorted by the support for depository institutions that is an aspect of the federal safety net.

Application of the Act to holding company state bank subsidiaries would help to accomplish these goals by assuring that activities that pose a risk to the federal safety net will be conducted in entities that are much more effectively insulated from their bank affiliates. The Board is sensitive to the concern that these goals might be achieved only as a result of additional regulatory burdens and at the cost of limiting the scope of initiative at the state level. The Board believes, however, that effective and flexible administration of the BHC Act, such as through the options discussed in Part II, will allow these goals to be accomplished without imposing substantial new regulatory burdens, or unduly limiting the initiative of state authorities to adapt banking powers to market realities.

E. Applicability of Section 4(c)(5) of the Act to Permit Acquisition of Shares by Holding Company State Banks.

The Board notes that section 4(c)(5) of the Act also does not by its terms authorize the acquisition of operations subsidiaries by holding company state banks. Under section 4(c)(5), a holding company may acquire, without an application or compliance with the prudential safeguards of section 4(c)(8) of the Act, "shares which are the kinds and amounts eligible for investment by national banking associations under the provisions of section 5136 of the Revised Statutes", 12 U.S.C. 1843(c)(5). It is clear that section 4(c)(5) does not authorize bank holding companies or their subsidiaries to make either direct or indirect investments that may be permissible for state banks under state law. As noted above, there is no other provision in the BHC Act that would have this effect for state bank acquisitions.

The Board has interpreted section 4(c)(5) as permitting holding company state banks to acquire shares of companies only of the kinds and in the amounts listed or cross-referenced in section 5136 of the Revised Statutes as eligible for investment for national banks.[11] The Board continues to believe that this section of its rules is fully consistent with the terms of the Act, and thus is proposing to readopt this rule.

This existing rule is also consistent with the Board's rules implementing section 4(c)(5) as they apply to the acquisition of shares by bank holding companies directly and by their direct nonbank subsidiaries. 12 CFR 225.22(c)(4). In 1971, at the time it adopted the state bank operations subsidiary rule, the Board also adopted rules implementing section 4(c)((5) that provide that a bank holding company and its nonbank subsidiaries may acquire voting shares under section 4(c)(5), but *only* if the shares were of the limited range explicitly eligible by federal statute for investment by a national bank.[12] At that time, the Board recognized that if section 4(c)(5) is deemed to go beyond the limited range of shares authorized by statute for national banks to invest in, the carefully established Congressional framework in section 4(c)(8) for authorization of the activities of holding companies and their nonbank subsidiaries would be upset.[13]

In this regard, the Board notes that, unless section 4(c)(5) is read as reflected in § 225.22(c)(4) of Regulation Y, direct acquisitions by holding companies of finance, mortgage banking, leasing, data processing, and similar companies engaged in activities permissible for national banks would be permissible without regard to the capital adequacy, conflict of interest, safety and soundness and other public benefits criteria of section 4(c)(8). Moreover, these acquisitions, in many cases involving substantial portions of the capital resources of the holding company, would be subject to no regulatory review.

The Board notes that the Court of Appeals in *AMBAC* has granted a petition by the Comptroller for rehearing of the BHC Act issues in that case which involve the acquisition of shares by a holding company national bank in reliance on section 4(c)(5) and the Board's national bank operations subsidiary rule (12 CFR 225.22(d)(1)). Accordingly, the Board is taking no action to complete its rulemaking proceeding with respect to § 225.22(d)(1) at this time. Depending on the outcome of the *AMBAC* case and this rulemaking proceeding, the Board will consider appropriate action regarding this section of its rules.

F. Applicability of Section 7 of the Act to the Acquisition By Holding Company State Banks of Operations Subsidiaries and Their Shares.

The Board has also considered whether, as some argue, section 7 of the Act authorizes the Board's state bank operations subsidiary rule. Section 7 provides that "the enactment by the Congress of the (BHC) Act shall not be construed as preventing any State from exercising such powers and jurisdiction which it now has or may hereafter have with respect to companies, banks, bank holding companies, and subsidiaries thereof." 12 U.S.C. 1846.

That section does not, and was not intended to, limit the applicability of the nonbanking provisions of section 4, or provide an exemption for state bank operations subsidiaries. As the Supreme Court has noted, section 7 is intended only "to define the extent of the (Act's) pre-emptive effect on state law." *Lewis v. BT Investment Managers, Inc.* 447 U.S. 27, 49 (1980). The Senate Report on

---

[11] 12 CFR 225.22(d)(2)(i). The voting shares which are listed as eligible for investment under section 5136 include those of bankers' banks and bankers' bank holding companies up to 10 percent of capital and surplus, agricultural credit companies up to 20 percent of capital and surplus, and safe-deposit companies up to 15 percent of capital and surplus. Section 5136 also cross-references investments in stock specifically authorized under other statutes, which also are limited in amount. *E.g.*, shares of Edge Act and Agreement Corporations up to 10% of capital and surplus, (12 U.S.C. 601, 618), small business investment companies up to 5% of capital and surplus, (15 U.S.C. 681), and bank service corporations up to 10% of capital and surplus (12 U.S.C. 1862).

[12] 12 CFR 225.22(c)(4).

[13] The Board stated that unless section 4(c)(5) were so interpreted "Congress' purpose in amending section 4(c)(8) might be substantially nullified." 36 FR 1430, 1431; *see id.* at 9292 (1971). In its 1984 rulemaking regarding section 4(c)(5), the Board reaffirmed this view, a view that has been accepted by the banking industry, insofar as the bank holding companies themselves are concerned, without dissent. 48 FR 23,529 (1983).

the original 1956 Act is explicit that section 7 was intended to make it clear that, while the states retained concurrent jurisdiction over banks and bank holding companies, "a State could not enact legislation inconsistent with the bill and therefore nullify its effect." [14]

The fact that, under this interpretation of section 7 of the Act, the Board and the state banking authorities would share concurrent jurisdiction over nonbank subsidiaries of holding company state banks is not new in the federal banking laws. For example, the Board and the states share supervisory authority over state member banks, including the scope of their activities,[15] as do the FDIC and the states with respect to nonmember banks.[16] Moreover, the BHC Act grants the Board full examination, reporting, and subpoena authority over national and state banks owned by bank holding companies, even though the Comptroller and the states have similar authority over national and state banks, respectively. 12 U.S.C. 1844(c). The Supreme Court has recognized that the regulatory framework of the BHC Act overlaps with statutes administered by other banking authorities, and has left no doubt that, in such situations, the requirements of the BHC Act prevail. *Board of Govenrors* v. *First Lincolnwood Corp.*, 439 U.S. 234, 240–41, 250–51 (1978).

II. Proposed Rules Governing the Acquisition and Retention of Operations Subsidiaries by Holding Company State Banks under the Bank Holding Company Act.

A. Generally

Rescission of the state bank operations subsidiary rule would require bank holding companies to obtain approval under section 4(c)(8) of the Act in order for their subsidiary state banks to acquire operations subsidiaries or for these subsidiaries to commence nonbanking activities (unless the acquisition falls under one of the other exemptions in the Act, *e.g.*, servicing activities). In order to minimize the impact and regulatory burdens on these future acquisitions or proposals, the Board is requesting comment on an expedited 30-day notice procedure under which bank holding companies could seek the necessary approval under section 4(c)(8).

The Board also recognizes that a number of bank holding companies have acquired operations subsidiaries, through their subsidiary state banks, without approval under section 4(c)(8), in reliance on the Board's existing state bank operations subsidiary regulation. Rescission of this rule would require these bank holding companies to obtain approval under section 4(c)(8) of the Act to retain these operations subsidiaries unless the retention is otherwise authorized under the Act.

The Board notes that a great number of bank holding companies already have the necessary approval under section 4(c)(8) to acquire or retain operations subsidiaries engaged in a broad range of activities. For these companies, no further approval under the Act would be required if the operations subsidiary rule were rescinded. Under existing rules, a bank holding company that has secured approval under section 4(c)(8) to engage in a nonbanking activity, either directly or through a subsidiary, may open a new office or create a new subsidiary to conduct the activity, generally without further approval under the Act. 12 CFR 225.23(b)(1). For example, a bank holding company that has secured approval under section 4(c)(8) to engage in lending activities without geographic limit could conduct this activity on a *de novo* basis through any of its subsidiaries, including through an operations subsidiary of one of its state banks, without further approval under the Act.

Where the bank holding company has not previously obtained approval under section 4(c)(8) of the Act for a particular activity conducted by an operations subsidiary, the Board is proposing for comment a rule that would permit bank holding companies, without an application under section 4(c)(8) of the Act, to retain all or most existing operations subsidiaries acquired in reliance on the Board's current rule.

B. Future Acquisitions of Operations Subsidiaries

1. *Listed Activities.* The Board proposes to establish an expedited 30-day notice procedure for banking holding companies seeking approval under section 4(c)(8) of the Act to acquire, through a subsidiary state bank, an operations subsidiary engaged in activities the Board has previously found by regulation to be closely related to banking or for such a subsidiary to commence, or acquire assets or shares of a company engaged in, these activities. Under the proposed procedure, holding company state banks may establish operations subsidiaries, insofar as the BHC Act is concerned, after the holding company provides the appropriate Reserve Bank with 30 days prior written notice of the proposal. This expedited notice procedure would apply to operations subsidiaries that are wholly owned by the state bank, as under the existing rule, and that engage in activities that are both permissible under state law for the bank directly and that the Board has determined, by regulation, to be closely related to banking under section 4(c)(8). The Board asks for comment on whether the notice procedures should also be available for activities that have been found closely related to banking by order in an individual case.[17]

The notice required under this procedure would be limitd to a brief description of the proposal and the activity that would be conducted by the operations subsidiary, a reference to the relevant provisions of Regulation Y or Board order that found the activity to be closely related to banking, and a copy of any notice or application submitted by the state bank to its primary regulator for approval to establish or acquire the operations subsidiary under state law or for the subsidiary to commence a new activity.

The appropriate Reserve Bank would act on all notices submitted under this procedure within 30 days of their submission in accordance with the existing expedited notice procedures in § 225.23(a)(1) of Regulation Y. the proposed notice procedure would be available not only for *de novo* proposals, but also could be used for proposals to acquire the shares or assets of going concerns. As an alternative, the Board asks for comment on whether the notice procedure should be limited to proposals to engage *de novo* in listed activities, and a fuller application required for acquisitions of going concerns, as is the case under existing rules for bank holding companies. 12 CFR § 225.23(a)(2).

The Reserve Bank would have the discretion to require an application or fuller information regarding a proposal described in the notice, but would generally do so only where the bank holding company does not meet the Board's capital adequacy guidelines, or where the condition of the bank holding company organization or the nature of the proposed new activity warrants a more extensive analysis.

---

[14] S. Rep. No. 1095, pt. 2, 84th Cong., 2d Sess. 5 (1986); 102 Cong. Rec. 6751, 6758 (1956) (remarks of Senator Robertson).

[15] *See e.g.* 12 U.S.C. 322, 12 CFR 208.7(a)(1).

[16] *See* 12 U.S.C. 1816.

[17] If the Board adopts this procedure, it proposes to amend its existing rules to allow bank holding companies to file notices for such acquisitions also. 12 CFR 225.23(a)(1).

The Board asks for comment on whether there are certain activities on the Regulation Y list of closely related to banking activities that should not be permitted for a subsidiary of a holding company bank, but only allowed through a direct subsidiary of the bank holding company.

2. *Unlisted Activities.* In the case of proposals by operations subsidiaries involving activities that have not been added to the list of permissible activities in § 225.25(b) of Regulation Y, the Board proposes to require an application under the procedures currently established in the Board's regulations for such proposals. *See* 12 CFR 225.23(a)(3).

In considering these applications, the Board will give full consideration to the finding by the state that the activity is permissible for state banks in that state. In this regard, in determining whether an activity is closely related to banking, the Board and the courts have looked primarily to whether banks in fact conduct the activity.[18]

C. Retention of Existing Operations Subsidiaries

To deal with the impact of the proposed rescission of § 225.22(d)(2) on existing operations subsidiaries, the Board is requesting public comment on a proposal that would permit bank holding companies, without further approval under the BHC Act, to retain operations subsidiaries held by their subsidiary state banks in compliance with that regulation on November 21, 1988, the date of the proposal to rescind § 225.22(d)(2). Entitlement to this provision would be available only if the operations subsidiary was in compliance with that rule on November 21, 1988, that is, the subsidiary must be wholly-owned by the parent bank (except for directors' qualifying shares) and the subsidiary must be engaged only in activities that the parent bank could conduct directly under relevant state law at locations at which the bank could conduct the activities.

The Board notes that the courts have ruled in a number of cases that changes in regulations that adversely affect parties should ordinarily be applied only prospectively.[19] The courts have been particularly concerned about retroactive application of new regulations in circumstances in which affected parties have reasonably relied on the existing regulation in conducting their affairs and would suffer detriment under the new rule.[20]

The Board believes it important to consider that the great majority of operations subsidiaries acquired in reliance on § 225.22(d)(2)(ii) engage in lending, leasing, trust and other activities that are closely related to banking and permissible for bank holding companies under section 4(c)(8). In addition, many of these operations subsidiaries were formed *de novo*, rather than through acquisition of going concerns, and their retention and continued operation would be likely to promote competition, increase customer convenience, and enhance operating efficiencies. Retention of these subsidiaries also would not involve additional expenditures of funds or increased debt. Consequently, the financial impact of the retention proposal should in most cases be negligible. For these reasons, the Board believes retention of these subsidiaries would, as a general matter, satisfy the requirements under section 4(c)(8) that the activity be closely related to banking and that the public benefits of the proposal outweigh its adverse effects.

The Board notes that under the grandfather proposal, bank holding companies, in some cases, could retain indirectly operations subsidiaries that engage in activities that the Board has not determined to be closely related to banking, such as certain insurance or real estate development activities.[21] The Board requests comment on whether under the principles articulated by the courts regarding the retroactive application of agency rules, as discussed in the cases noted above, the Board is authorized to apply any rescission of its operations subsidiary rule only prospectively, thereby permitting bank holding companies to retain these subsidiaries as well as subsidiaries conducting activities that have been determined to be closely related to banking. The Board also seeks comment on whether, if it is so authorized, it should permit these subsidiaries to be retained or should prohibit their retention without an application and compliance with the standards of section 4(c)(8) of the Act.

The Board further asks for comment on whether, from the point of view of the prudential standards in section 4(c)(8), the Board should permit activities that involve high risk, such as real estate development if it were authorized under section 4(c)(8) of the Act for bank holding companies, to be conducted only through a direct subsidiary of the bank holding company subject to appropriate prudential limitations and not through subsidiaries of holding company banks.

The Board further asks for comment on whether the proposed grandfather rule should contain a provision permitting the Board to determine, in an individual case, after notice and opportunity for the affected bank holding company to comment, that a particular activity that has not previously been determined by the Board to be closely related to banking, is not permissible under the standards set forth in section 4(c)(8) of the Act and must, therefore, be terminated by the company.

Finally, the Board asks for comment as to whether to limit the grandfather proposal for operations subsidiaries established under § 225.22(d)(2) prior to November 21, 1988, to only those subsidiaries engaged in activities previously found by the Board, by regulation or order, to be closely related to banking under section 4(c)(8). Because these subsidiaries would meet the Act's closely-related to banking standard and because, as discussed above, the retention of the subsidiary would be likely to result in public benefits that outweigh potential adverse effects, the Board believes that this option would satisfy the terms of section 4(c)(8) and that individual applications to retain these subsidiaries would not be required. In support of this proposal, the Board notes that under section 4(c)(8) the Board may act by order or by regulation in authorizing nonbanking proposals. As discussed above, the Board is asking for comment on whether it should require that certain of these activities that may involve high risk should be conducted only through direct subsidiaries of the bank holding company.

As discussed in Part I, as a result of the Garn-St Germain Act insurance amendments, the Board has no discretion under section 4(c)(8) to permit bank holding companies or their nonbank subsidiaries to engage in the United States in insurance activities, except as specifically authorized in those amendments.[22] One of these

---

[18] *National Courier Assn.* v. *Board of Governors*, 516 F.2d 1229 (D.C. Cir. 1975)

[19] *See, e.g., Georgetown University Hospital* v. *Bowen*, 821 F.2d 750 (D.C. Cir. 1987), *cert. granted*, 108 S. Ct. 1073 (1988); *Sam* v. *United States*, 682 F.2d 925 (Ct. Cl. 1982), *cert. denied*, 459 U.S. 1146 (1983).

[20] *See Anderson, Clayton & Co.* v. *United States*, 562 F.2d 972 (5th Cir. 1977), *cert. denied*, 436 U.S. 944 (1978).

[21] The Board currently has a proposed rule under consideration to authorize real estate investment and development activities for bank holding companies under section 4(c)(8) within certain prudential limits. 52 FR 543 (January 7, 1987); 50 FR 4519 (January 31, 1985).

[22] For example, the amendments permit bank holding companies to sell credit-related life, accident, health and unemployment insurance.

provisions permits a holding company subsidiary to continue any insurance agency activity it conducted on May 1, 1982. The U.S. Court of Appeals for the District of Columbia Circuit recently affirmed a Board decision recognizing that an operations subsidiary of a holding company state bank selling insurance on May 1, 1982, in reliance on the Board's state bank operations subsidiary rule, qualifies for this grandfather exception and may continue to sell insurance under section 4(c)(8).[23] Accordingly, the Board believes that, if the state bank operations subsidiary rule is rescinded, state banks could continue to hold operations subsidiaries engaged in general or other insurance agency activities that they conducted on May 1, 1982, in accordance with the Board's state bank operations subsidiary rule and without further application under the BHC Act.

In the event the grandfather rule is limited, as discussed above, the Board asks for comment on a proposal to permit bank holding companies to retain operations subsidiaries that do not qualify under the grandfather rule for two years in order to permit the bank holding company time to seek a determination from the Board that the particular activity satisfies the standards of section 4(c)(8).[24] The Reserve Banks would be authorized to extend this two-year period for three additional one-year periods in appropriate cases.

III. Legal Framework Relating to the Proposed Rescission of the State Bank Operations Subsidiary Rule.

A. The Literal Terms of the BHC Act Cover the Acquisition and Retention by Holding Company Banks of Control of Companies (other than Banks) and Their Voting Shares

The BHC Act establishes a comprehensive framework governing the acquisitions and activities of bank holding companies. Section 4 of the Act contains two prohibitions that together limit the nonbanking acquisitions and activities of bank holding companies to those expressly permitted under various specific provisions in the statute. Under these prohibitions, a holding company may not acquire or retain, directly or through a subsidiary, voting shares or subsidiaries unless the shares or subsidiary are authorized under one of the Act's exemptions.

Section 4 of the Act provides that, except as set forth in the Act, bank holding companies may not (1) acquire or retain direct or *indirect* control of voting shares of "any company which is not a bank," or (2) engage in activities other than banking or managing and controlling banks and other subsidiaries authorized under the Act and those activities permitted under the closely related to banking standards of section 4(c)(8) of the Act.[25] Section 4 then sets out certain exceptions from these general prohibitions, the principal one being for companies engaged in activities the Board, after notice and opportunity for hearing, has determined to be so closely related to banking as to be a proper incident thereto.[26]

By their terms, the prohibitions of section 4 apply not only to voting shares and nonbank companies controlled directly by a bank holding company but also to shares and nonbank companies controlled by the bank holding company *indirectly* through any of its subsidiaries.[27] Section 2(g)(1) of the Act is explicit that "shares owned or controlled *by any subsidiary* of a bank holding company shall be deemed to be *indirectly* owned or controlled by such bank holding company." 12 U.S.C. 1841(g)(1)(emphasis added). The attribution provisions in this section apply to voting shares held by "any subsidiary" of a holding company and do not distinguish between shares held by a subsidiary bank of a bank holding company or by a nonbank subsidiary of a bank holding company.[28]

Thus, under the unambiguous language of the statute, the voting shares of a company held by a holding company bank are indirectly owned or controlled by the parent holding company and, in order for the shares or subsidiary to be retained, they must fit within one of the exceptions to the general prohibitions in section 4(a).

This reading of the statutory language is confirmed by its legislative history. Congress added the attribution provisions in section 2(g)(1) to the Act in 1966 [29] "to confirm current interpretations of the Board (that) provide that a bank holding company shall be deemed to control indirectly any shares owned or controlled by any of its subsidiaries * * *." S. Rep. No. 1179, 89th Cong., 2d Sess. 8 (1966). One of the interpretations codified in section 2(g)(1) expressly stated that the prohibition against retention of shares of a company applies to indirect control of shares of a nonbanking company held by a banking subsidiary of a bank holding company. 12 CFR 225.101(a)–(c); *see also* § 225.102. The statutory provisions concerning the scope of section 4(a) have not been subsequently amended.

B. Other Provisions of the Act Demonstrate that the BHC Act Applies to Shares of Nonbank Companies Held by Holding Company Banks

Two other sections of the BHC Act demonstrate that section 4 applies to the voting shares of nonbank companies owned by a holding company bank. The original sections 4(c)(2) and 4(c)(4) of the Act provided exemptions from the

---

[23] *National Association of Casualty and Surety Agents* v. *Board of Governors*, 856 F.2d 282 (D.C. Cir. 1988), *petition for rehearing pending*.

[24] In the event the Board does not extend grandfather rights to real estate development activities, operations subsidiaries engaged in such activities would be permitted to complete any projects commenced by the subsidiary prior to November 21, 1988, but could not invest in any additional projects without approval under section 4(c)(8) of the Act.

[25] Section 4(a) of the Act provides:

Except as otherwise provided in this Act, no bank holding company shall—

(1) * * * acquire direct or indirect ownership or control of any voting shares of any company which is not a bank, or

(2) * * * retain direct or indirect ownership or control of any voting shares of any company which is not a bank or bank holding company, or engage in any activities other than (A) those of banking, or of managing or controlling banks and other subsidiaries authorized under this Act * * *, and (B) those permitted under paragraph (8) of subsection (c) (that is, those found by the Board to be closely related to banking) * * * 12 U.S.C. 1843(a)(1) and (2).

The activity provision in section 4(a)(2) of the Act limits the direct activities of a bank holding company. The authorization to engage in banking pertains to those banks that were themselves bank holding companies. *Merchants National Corp.*, 73 Fed. Res. Bull. 876, 879, n.11 (1987).

[26] 12 U.S.C. 1843(c)(8). The other exceptions to the general nonbanking provisions of the Act are set out in paragraphs (1) through (14) of section 4(c) of the Act and include exemptions for holding shares of servicing subsidiaries, of companies acquired in satisfaction of debts previously contracted or in a fiduciary capacity, shares of the kinds and amounts eligible for investment by a national bank under section 5136 of the Revised Statutes, shares of an investment company, shares amounting to less than 5 percent of a company's outstanding shares, shares of certain foreign companies, and shares of an export trading company. 12 U.S.C. 1843(c)(1) through (14). There are certain other grandfather exceptions found in section 4(a)(2) of the Act. 12 U.S.C. 1843(a)(2).

[27] A holding company's subidiaries include direct as well as indirect subsidiaries. 12 U.S.C. 1841(d)(1). Thus, under the provisions of section 4(a)(2), a bank holding company could not manage or control an operations subsidiary unless control of that subsidiary was authorized under the Act.

[28] A bank owned or controlled by a holding company is clearly its subsidiary. 12 U.S.C. 1841(d). A "subsidiary" of a bank holding company is defined to include "any company" 25 percent or more of the voting shares of which is directly or indirectly owned or controlled by that holding company. *Id.* That the term "subsidiary" as used in the BHC Act encompasses banks is evident in provisions throughout the Act. *E.g.*, 12 U.S.C. 1842(a)(2), 1844(c). Section 4(a)(2) itself confirms this when it limits holding companies to controlling "banks and other subsidiaries authorized under this Act." 12 U.S.C. 1843(a)(2).

[29] Pub. L. No. 89–485, 6, 80 Stat. 236, 237 (1966).

nonbanking restrictions of section 4 for voting shares acquired by "any banking subsidiary * * * in satisfaction of a debt previously contracted in good faith" ("DPC") [30] and for shares acquired "by any banking subsidiary of a bank holding company, in good faith in a fiduciary capacity * * *." [31] It is obvious that there would be no need for these exemptions to section 4 for holding company banks unless the prohibition in section 4 applies to shares held by a holding company bank. The fact that Congress added these exemptions to the Act to exempt the fiduciary and DPC acquisitions of holding company banks is explainable only by the conclusion that Congress recognized and intended the Act to apply to the acquisition of nonbank shares by a holding company bank.

The legislative history confirms this view. As originally drafted, the exemptions extended only to shares acquired by a bank *that was itself* a bank holding company or any of its banking subsidiaries.[32] In the version that was enacted, these provisions, however, were deliberately revised to include an exemption for shares acquired by "any banking subsidiary of a bank holding company." [33] Thus, the legislative history shows that in 1956, Congress specifically focused on the question of whether the nonbanking provisions of the Act applied to acquisitions by holding company banks, found that they did, and provided a specific exemption for DPC and fiduciary acquisitions.

The Board also notes that a 1987 amendment to the BHC Act further confirms Congressional recognition that shares of companies held by subsidiary banks are subject to section 4. A new section 3(f)(1) creates a "specical rule" which exempts subsidiaries of certain holding company savings banks from section 4.[34] This authorization would be unnecessary if section 4 of the Act is inapplicable to subsidiaries of banks controlled by holding companies.

C. The Board Has Consistently held that Section 4 Applies To Voting Shares and Subsidiaries Controlled by Holding Company Banks

The Board has, since the enactment of the BHC Act in 1956, consistently held the view that the nonbanking prohibitions of section 4 apply to shares of a nonbank company held by a holding company bank. As explained above, Board interpretations expressing this view, issued in 1956 and 1957 contemporaneously with passage of the Act, were subsequently codified in section 2(g)(1) of the Act. 12 CFR 225.101 and 102. Moreover, the Comptroller of the Currency in congressional testimony in 1970, has stated that "there is no legal doubt" regarding this construction of the Act:

> The opening language of section 4(a) of the present Act * * * states that no bank holding company shall "acquire direct or *indirect* ownership etc." of a nonbank company. There is no legal doubt that any acquisition by the national bank subsidiary would be an "indirect" acquisition by the [one bank holding company).[35]

In 1971, the Board reaffirmed its view that section 4 applies to nonbank subsidiaries of holding company banks in connection with its promulgation of § 225.22(d) of Regulation Y (then § 225.4(e)), providing a regulatory exemption from the nonbanking prohibitions of the Act but only for wholly owned operations subsidiaries doing business at locations at which the state bank could conduct the activity and subject to limitations applicable to the bank.[36] Since 1956, acquisitions of companies engaged in activities not permissible for the bank or of less than 100 percent of the shares of a company engaged in bank-eligible activities has not been permitted under the Board's rules without compliance with section 4 of the Act.

The Board recently reaffirmed its view that the nonbanking provisions of the BHC Act apply to acquisitions by holding company banks of voting interests in nonbank companies and required divestiture by a holding company bank of such an interest that did not comply with the Board's regulations.[37]

D. Views of Commenters on Act's Coverage to Acquisitions of Shares by Holding Company Banks

In response to the Board's request for comments regarding the real estate development activities of bank holding companies, a number of commenters have argued that the Board has no authority to regulate the activities of nonbank subsidiaries of holding company banks. The commenters argue that the BHC Act does not by its terms permit the Board to regulate the direct activities of holding company banks and that the legislative history of the Act indicates that Congress did not intend the BHC Act to confer such authority on the Board. Based on the argument that the BHC Act does not extend to the activities of banks owned by holding companies, the commenters argue that a nonbank subsidiary of a bank is also exempt from the Act because it is merely an incorporated department or division of the bank operating under color of the bank's charter and authority. These commenters suggest that Congress could not have intended to create the anomalous result of excluding holding company banks from the Board's authority under the BHC Act while granting the Board authority over the nonbank operating subsidiaries of those same banks.

The Board notes, however, that this view appears to advocate an interpretation of the Act that is inconsistent with the express terms of the BHC Act, which as noted apply to the direct or indirect nonbanking subsidiaries of a bank holding company without distinction between nonbank companies owned by the holding company and those owned by a bank subsidiary of the holding company.[38]

---

[30] *See* Bank Holding Company Act of 1956, Pub. L. No. 84–511, section 4(c)(2), 70 Stat. 133, 136 (1956). This section was amended in 1977 to provide an exception for shares acquired "by a bank holding company or any of its subsidiaries," in order to extend this exemption to nonbank subsidiaries of a holding company. 12 U.S.C. 1843(c)(2) (1982); H.R. Rep. No. 95–774, 95th Cong., 1st Sess. 11 (1977).

[31] *See* Bank Holding Company Act of 1956, Pub. L. No. 511, section 4(c)(4), 70 Stat. 133, 136 (1956). This section was amended in 1971, but continues to provide an exception for "shares held or acquired by a bank in good faith in a fiduciary capacity * * *." 12 U.S.C. 1843(c)(4) (1982).

[32] H.R. 6227, 84th Cong., 1st Sess. (1955); S. 2577, 84th Cong. 1st Sess. (1955).

[33] S. Rep. No. 1095, pt. 2, 84th Cong., 2d Sess. 3–4 (1956). *See also* 102 Cong. Rec. 6048 (1956) (Remarks of Sen. Robertson to the same effect).

[34] 12 U.S.C. 1842(f), as added by Pub. L. No. 100–86, Title I, section 101(d), 101 Stat. 552, 561; S. Rep. No. 100–19, 100th Cong., 1st Sess. 35 (1987); H.R. Rep. No. 261, 100th Cong., 1st Sess. 130 (1987).

[35] *One-Bank Holding Company Legislation of 1970: Hearings Before the Senate Comm. on Banking and Currency*, 91st Cong., 2d Sess. 198 (1970) (Statement of William B. Camp) ("Senate Hearings").

[36] In its notice of rulemaking, the Board stated its view that the proposed limitation "would not affect the scope of activities permitted to a banking subsidiary of a bank holding company, but could affect acquisitions of a nonbanking company by such a bank since any acquisition by a subsidiary bank would represent an indirect acquisition by the parent holding company." 36 FR 1431 (1971).

[37] *Security Pacific Corp./Arizona Bancwest*, 72 Federal Reserve Bulletin 800 (1986). *See also The South Dakota Loophole: Hearing Before the Subcomm. on Financial Institutions Supervision, Regulation and Insurance of the House Comm. on Banking, Finance and Urban Affairs*, 99th Cong., 1st Sess. 7 (1985) (statement of J. Charles Partee, Member, Board of governors, Federal Reserve System). ("The Board has long held that the provisions of the Act apply to acquisitions by holding company banks of voting shares of a nonbanking company.")

[38] In support of their view that section 4(a) does not apply to subsidiaries or nonvoting shares held by holding company banks, some commenters rely on *Cameron Financial Corp.* v. *Board of Governors*, 497 F.2d 841, 848 (4th Cir. 1974). That decision, however, held only that since section 4(a) does not apply to banks, activities conducted directly by banks do not qualify under the grandfather proviso

Continued

Since nonbank subsidiaries of holding company banks are by definition not banks, they are not excluded from section 4 of the Act.

Moreover, the commenters' view that a nonbank subsidiary of a bank is merely part of its bank parent appears to conflict with the facts generally associated with the formation of many such subsidiaries. They are separately incorporated entities, in many cases with different names, offices, and employees, and are formed largely in order to permit the parent to separate and insulate itself from the activities of the subsidiary in order to limit its liability for the activities conducted by the subsidiary.

In this regard, the Board notes that the other federal banking agencies have often expressed the view that subsidiaries of banks provide an effective mechanism to separate and insulate nonbanking activities from the bank and the support of the federal safety net. For example, the Comptroller of the Currency has recently stated that the functions of subsidiaries of national banks—at least those conducting certain new types of activities—should be insulated from the parent bank in order to protect the insured deposits of the parent from risks arising from its ownership of the subsidiary.[39] The FDIC has specifically recognized that a subsidiary of a bank is a separate entity, which should not be confused with the bank itself.[40]

1. *Divestiture Provisions of Section 5(e) of BHC Act.* Commenters also point to section 5(e) of the BHC Act, which allows the Board to order a bank holding company to terminate ownership or control of any nonbank subsidiary "other than a nonbank subsidiary of a bank" where the nonbank constitutes a serious risk to the safety and soundness of a holding company bank. 12 U.S.C. 1844(e). This provision was added to the Act in 1978 and is pointed to as evidence of Congressional intent that the Act does not apply to nonbank subsidiaries of holding company banks.

This exemption, however, merely recognizes that primary responsibility for the ongoing supervision of the bank and its safety and soundness rests with the bank's primary supervisor, which has adequate enforcement authority to protect the bank against safety and soundness risks from nonbank subsidiaries. This section does not in any way attempt to regulate the kinds of nonbanking activities that the nonbank subsidiary may conduct or by its terms exempt the activities of such a nonbank subsidiary from the Act. Indeed, the Board notes that the fact that Congress excluded nonbank subsidiaries of holding company banks from only this provision of the Act suggests that such subsidiaries are to be included as subsidiaries of the bank holding company for all other provisions of the Act where they are not so excluded, including the nonbanking provisions of section 4. Moreover, if nonbank subsidiaries of holding company banks are not subject to the Act, the exclusion in section 5(e) is unnecessary.

2. *Board Authority Over Nonbank Subsidiaries of Holding Company Banks Under the Financial Institutions Supervisory Act of 1966.* Similarly, some commenters have argued that the cease-and-desist authority of the Board under the Financial Institutions Supervisory Act of 1966 ("FISA") (12 U.S.C. 1818(b)(3)) does not extend to nonbank subsidiaries of holding company banks and that this demonstrates that the BHC Act also does not apply to such subsidiaries. This argument, however, appears based on a misreading of the statute. In fact, the terms of the cease-and-desist statute (12 U.S.C. 1818(b)(3)) confirm that section 4(a) of the BHC Act applies to subsidiaries of holding company banks as indirect subsidiaries of the bank holding company. FISA grants the Board cease and desist authority over "any bank holding company and [to] any subsidiary (other than a bank) of a holding company, as those terms are defined in the Act." As noted, a subsidiary of a holding company bank is, as a matter of law, a subsidiary of the holding company and is, thus, contrary to the commenters' claims, subject to the Board's cease-and-desist authority.

The second sentence of section 1818(b)(3), in recognition of the Board's exclusive jurisdiction over holding companies, establishes the rule that the other federal banking agencies may not issue a cease and desist order against bank holding companies or their subsidiaries "(other than a bank or a subsidiary of that bank)".[41] The parenthetical language is necessary to prevent the primary federal supervisor from losing cease and desist authority over banks and their subsidiaries that are also subsidiaries of a bank holding company. The parenthetical does not, however, mean, as some claim, that the Board has no cease and desist authority over nonbank subsidiaries of holding company banks.[42]

Thus, the cease and desist provisions recognize a distinction between holding company banks and nonbank subsidiaries of such banks and grant the Board concurrent authority over the nonbank subsidiaries of holding company banks. The concurrent cease and desist authority over nonbank subsidiaries of holding company banks is necessary to enable the Board to enforce the BHC Act as it applies to these subsidiaries while allowing the appropriate banking authority to enforce provisions of law for which it has responsibility. This grant of authority to the Board under FISA would be unnecessary if Congress had intended, as the commenters suggest, that nonbank subsidiaries of holding company banks were to be considered as part of the parent bank and outside the Board's jurisdiction for purposes of the BHC Act.

3. *Legislative History of 1970 Amendments to BHC Act.* Some commenters point to the following testimony of Chairman Burns regarding the 1970 Amendments to the BHC Act as support for the claim that Congress did not intend the BHC Act to cover subsidiaries of holding company banks:

> We now have three Federal agencies regulating banks. The agencies that now regulate banks would continue to regulate banks.
>
> Let us say that you gave the power of regulation to the Federal Reserve Board. The Board would then be simply regulating the

---

in section 4(a)(2). In that context, the reference to the term subsidiary in the grandfather proviso means a subsidiary that is not a bank and that would, therefore, not be subject to the nonbank provisions of section 4(a) in the first place. This case does not address the question raised by the commenters in this proceeding whether section 4 applies to activities conducted by a subsidiary of the bank and not by the bank itself.

Some commenters have also referred to the fact that section 4 is entitled "Interests in Nonbanking Organizations." That argument supports only the position that section 4 applies to nonbank companies wherever located within a bank holding company organization.

[39] *Reform of the Nation's Banking and Financial Systems, Hearings Before the House Committee on Banking, Finance, and Urban Affairs*, 100th Cong., 1st Sess. 283, 287 (1987) (Statement of Comptroller Clarke). *See also* Statement of FDIC Chairman Seidman, *Id.*, at 128, 128.

[40] *See also*, 50 FR 23964 (1985); Mandate for Change: Restructuring the Banking Industry, A Staff Study, FDIC (August 18, 1987).

[41] 12 U.S.C. 1818(b)(3) states: "Nothing in this subsection * * * shall authorize any Federal banking agency, *other than the Board of Governors of the Federal Reserve System*, to issue a notice of charges or cease-and-desist order against a bank holding company or any subsidiary thereof (*other than a bank or subsidiary of that bank*)."

[42] If the commenters' view were correct that the Board's cease and desist authority does not extend to subsidiaries of the holding company banks, the exclusion in the first sentence of 12 U.S.C. 1818(b)(3) would read as does the exclusion in the second sentence, that is, the Board's cease and desist authority under the first sentence would be limited to "any bank holding company, and to any subsidiary (other than a bank or subsidiary of that bank)"

bank holding companies, not the banks themselves. The banks would continue to function under their present supervisory authorities.

(W)e would not be examining the banks which we are not presently examining.

All that we would do, if this came to us at the Federal Reserve Board, would be to determine whether a given acquisition is or is not in accordance with the principles of the legislation and regulations that we might have drawn; or whether a divestiture is or is not proper in the circumstances or whether it is or is not being carried out.

But, we would not be examining the banks which we are not presently examining. We would not supervise banks we are not presently supervising. Therefore, the distribution of regulatory authority functions, as far as the banks are concerned, would remain entirely unchanged.[43]

The testimony of Chairman Burns, however, reflects the Board's long-standing position that the Board would not exercise its authority to examine holding company banks and will defer to the primary supervisor with respect to safety and soundness matters.[44] The testimony carefully points out that the 1970 Amendments would make no change in the distribution of regulatory authority "as far as banks are concerned." The testimony, however, says nothing about nonbank subsidiaries of holding company banks and in no way indicates that section 4(a) does not apply to the acquisition of shares or subsidiaries by holding company banks. As discussed above, the Board's long-held position predating Chairman Burns' testimony had been that the Act does apply to the acquisition of shares of nonbank companies by holding company banks. Moreover, three weeks after enactment of the 1970 Amendments, the Board reiterated this view in proposing rules to implement that legislation. 30 FR 1430, 1431, and 9292 (1971).

The Board has also considered the reference by some commenters to the House Banking Committee report associated with the 1970 Amendments stating that the nonbanking restrictions of section 4 apply only to bank holding companies and their nonbank subsidiaries and "not to the bank subsidiaries" whose activities are governed by other Federal and State law. H. Rep. No. 387, 91st Cong., 1st Sess. 15 (1969). This comment, however, is directed at the permissible activities of the subsidiary *bank* itself, and therefore does not address the applicability of section 4 to the *nonbank* subsidiaries of a holding company bank.

4. *Consistency of Board Interpretation with Intent of BHC Act.* In establishing the BHC Act framework, Congress was required to draw the line between banking and nonbanking activities in the Act in some manner. As the terms of the Act demonstrate, Congress rationally did so on the basis of whether the company conducting the activity is a bank or a nonbank. Thus, where the company is chartered and operated as a bank under the definition in the BHC Act, it is outside the scope of the nonbanking provisions of the Act. But where the company is not a bank, it is, consistent with the line drawn by Congress in section 4, subject to the nonbanking provisions of the Act—wherever located within a bank holding company system—and in order for these activities to be permissible, they must fit within one of the Act's authorizing provisions.

IV. Regulatory Flexibility Act Analysis

This rulemaking has been initiated to permit public comment on whether the Board is required to rescind its existing state bank operations subsidiary rule in light of the terms of section 4 of the BHC Act. If the Board is required to rescind its rule, the Board has proposed several procedures that are designed to mitigate the effect of this action on bank holding companies, including the economic impact on bank holding companies that may be small business entities within the meaning of the Reguatory Flexibility Act (5 U.S.C 601 *et seq*). In particular, the Board has proposed several alternatives for permitting bank holding companies, including small bank holding companies, to retain all or most existing operations subsidiaries held through state bank subsidiaries. The Board has also proposed an expedited notice procedure for future acquisitions of operations subsidiaries that has been designed to minimize any procedural burden on bank holding companies, including small bank holding companies.

The Board notes that a great number of bank holding companies already have received Board approval to engage in the activities conducted by operations subsidiaries of holding company state banks, and may, therefore, retain and establish such operations subsidiaries engaged in these activities without further approval. As a result, this proposal may have little or no effect on many bank holding companies, including in particular small bank holding companies, that engage in activities already approved by the Board under the Act.

List of Subjects in 12 CFR Part 225

Banks, Banking, Federal Reserve System, Holding companies, Reporting and recordkeeping requirements.

For the reasons set out in this notice, and pursuant to the Board's authority under section 5(b) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1844(b)), the Board proposes to amend 12 CFR Part 225 as follows:

PART 225—[AMENDED]

1. The authority citation for Part 225 continues to read as follows:

Authority: 12 U.S.C. 1817(j)(13), 1818, 1843(c)(8), 1844(b), 3106, 3108, 3907 and 3909.

§ 225.2 [Amended]

2. The Board proposes to amend § 225.2 by redesignating existing paragraphs (g) through (l) as paragraphs (h) through (m), and adding a new paragraph (g) to read as follows:

* * * * * *

(g) "Operations subsidiary" means a company (other than a bank) (1) all (but, except for directors' qualifying shares, not less than all) of the shares of which are owned by a state bank, and (2) that engages solely in activities that the state bank may itself conduct directly under relevant law, subject to the same limitations on those activities, including geographic limitations, as are applicable to its parent bank.

* * * * *

3. The Board proposes to amend § 225.22 by revising paragraph (d)(2) to read as follows:

§ 225.22 Exempt nonbanking activities and acquisitions.

* * * * * *

(d) * * *

(2) *State Bank*—(i) *Securities Eligible For Investment.* Insofar as the Bank Holding Company Act is concerned and without the Board's prior approval under this subpart, a state-chartered bank owned by a bank holding company may acquire or retain, on the basis of section 4(c)(5) of the BHC Act, securities of the kinds and amounts explicitly eligible for investment by a national bank under section 5136 of the Revised Statutes.

(ii) *Grandfathered operations subsidiaries.* Without the Board's prior approval under this subpart, a bank holding company may retain indirect ownership and control of an operations subsidiary and its voting shares that it owned and controlled through a subsidiary state bank on November 21, 1988, so long as the operations subsidiary:

---

[43] *Senate Hearings* at 157–158.

[44] The Board is given extensive authority under the BHC Act over holding company banks, including direct authority to examine any holding company subsidiary, including subsidiary banks, and to require reports and to issue subpoenas against such institutions. 12 U.S.C. 1844

(A) Was acquired and held in compliance with the Board's regulations governing operations subsidiaries of state banks in effect on November 21, 1988; and,

(B) Does not thereafter commence new activities or acquire shares or assets of another company except as otherwise authorized under this subpart.

* * * * *

§ 225.23 [Amended]

4. The Board proposes to amend § 225.23 by adding a new paragraph (a)(4) to read as follows:

(a) * * *

(4) *Acquiring an operations subsidiary*—(i) *Listed activities.* A notice is required under paragraph (a)(1) of this section for a bank holding company indirectly to acquire and control voting shares of an operations subsidiary engaged in activities listed in § 225.25, and for such an operations subsidiary to commence, or acquire the assets of a company engaged in, any such activity. The notice under this paragraph shall be processed pursuant to paragraph (a)(1) of this section as a notice to engage *de novo* in an activity listed in § 225.25.

(ü) *Unlisted activities.* An application is required under paragraph (a)(3) of this section for a bank holding company indirectly to acquire and control voting shares of an operations subsidiary engaged in an activity that is not listed in § 225.25, and for such an operations subsidiary to commence, or acquire the assets of a company engaged in, any such activity.

* * * * *

5. The Board proposes to amend the reference to "12 CFR 262.2" in the introductory text to paragraph (a) of § 225.23 to read "12 CFR 262.3".

By order of the Board of Governors of the Federal Reserve System, November 29, 1988.

William W. Wiles,

Secretary of the Board.

[FR Doc. 88-27847 Filed 12-2-88; 8:45 am]

BILLING CODE 6210-01-M

12 CFR Part 226

[Reg. Z; TIL-1]

Truth in Lending; Proposed Update to Official Staff Commentary

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Proposed official staff interpretation.

SUMMARY: The Board is publishing for comment proposed revisions to the official staff commentary to Regulation Z (Truth in Lending). The commentary applies and interprets the requirements of Regulation Z and is a substitute for individual staff interpretations of the regulation. The proposed revisions address a variety of questions that have arisen about the regulation, and include new material and changes in existing material. The proposed comments address, for example, disclosure questions raised by the emergence of reverse mortgage products, questions concerning the amendments to Regulation Z affecting disclosures for adjustable-rate mortgages, and questions concerning when a third party fee may be a finance charge in a credit transaction.

DATES: Comments must be received on or before February 3, 1989.

ADDRESSES: Comments should refer to Docket No. TIL-1 and be sent to Mr. William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551. They may be delivered to Room B-2222 of the Eccles Building between 8:45 a.m. and 5:15 p.m. weekdays or delivered to the guard station in the Eccles Building Courtyard on 20th Street, NW. (between Constitution Avenue and C Street, NW.) any time. All comments received at the above address will be available for inspection and copying by any member of the public in the Freedom of Information Office, Room B-1122 of the Eccles Building between 9:00 a.m. and 5:00 p.m. weekdays.

FOR FURTHER INFORMATION CONTACT: The following attorneys in the Division of Consumer and Community Affairs, at (202) 452-3667 or (202) 452-2412: Sharon Bowman, Michael Bylsma, Leonard Chanin, Adrienne Hurt, Thomas Noto, or Linda Vespereny.

For the hearing impaired only, Telecommunications Device for the Deaf (TDD), Earnestine Hill or Dorothea Thompson, at (202) 452-3544, Board of Governors of the Federal Reserve System, Washington, DC 20551.

SUPPLEMENTARY INFORMATION: (1) *General.* The Truth in Lending Act (15 U.S.C. 1601 *et seq.*) governs consumer credit transactions and is implemented by the Board's Regulation Z (12 CFR Part 226). Effective October 13, 1981, an official staff commentary (TIL-1, Supp. I to 12 CFR Part 226) was published to interpret the regulation. The commentary is designed to provide guidance to creditors in applying the regulation to specific transactions and is updated periodically to address significant questions that arise. There have been seven general updates and one limited update so far. This notice contains the proposed eighth general update. It is expected that it will be adopted in final form in March 1989 with optional compliance until the uniform effective date of October 1 for mandatory compliance.

(2) *Proposed revisions.* The following is a brief description of the proposed revisions to the commentary:

Subpart A—General

Section 226.4—Finance Charge

4(a) Definition

Comment 4(a)-3 would be revised to clarify that charges imposed on the consumer by someone other than the creditor are finance charges if the creditor requires the services of the third party. For example, if a consumer cannot obtain the same credit terms from the creditor without using a loan broker, any fee imposed by the broker is a finance charge.

4(b) Examples of Finance Charges

Paragraphs 4(b) (7) and (8)

Comment 4(b) (7) and (8)-2 would be revised to clarify that insurance "written in connection with a credit transaction" includes insurance sold to a consumer at any time during an open-end credit plan. Thus, premiums for property insurance or credit life insurance sold to a consumer in an open-end credit plan would be finance charges unless excluded under § 226.4(d).

Subpart C—Closed-End Credit

Section 226.17—General Disclosure Requirements

17(a) Form of Disclosures

Paragraph 17(a)(1). Comment 17(a)(1)-5 would be revised to provide that creditors with variable-rate transaction subject to § 226.18(f)(2) may also provide the information set forth in § 226.18(f)(1) as information directly related to the required disclosures.

17(c) Basis of Disclosures and Use of Estimates

Paragraph 17(c)(1). Comment 17(c)(1)-8 would be revised to clarify the basis of disclosures for variable-rate transactions with no initial discounted or premium rate. The comment explains that creditors should base their disclosures only on the initial rate and not on any potential rate increases.

Comments 17(c)(1)-14 and 17(c)(1)-15 would be renumbered as 17(c)(1)-15 and 17(c)(1)-16, respectively. New comment 17(c)(1)-14 would be added to clarify how lenders should provide disclosures for reverse mortgages. These mortgages, also known as reverse annuity or home equity conversion mortgages, typically

involve the disbursement of monthly or other periodic advances to the consumer for a fixed period or until the occurrence of an event such as the sale of the house by the consumer. Repayment of the loan may be required at the end of the disbursement period or at a later time; both accrued interest and principal are often payable in one payment.

Some reverse "term" mortgages have a fixed term for the disbursement of funds to the consumer, but provide that the consumer does not have to repay the loan until a later time, such as when the consumer sells the house. The proposed comment provides that the creditor should assume repayment is required on the date that disbursements to the consumer are scheduled to end even if repayment is due upon the occurrence of a future event that might follow the final disbursement.

The new comment would also provide guidance on how creditors should make disclosures when both the period for advances and the date for repayment are determined solely by a future event, such as when the consumer moves out of the house. In such cases, the creditor would be required to base all of the disclosures on the assumption that both the advances will end and repayment will be required at the time of the event most likely to occur first. For example, if disbursements cease and repayment is required either upon the sale of the house or the death of the consumer, all disclosures would be based on the event the creditor estimates is most likely to occur first. Alternatively, if the creditor is unable to estimate which event is most likely to occur first, it may base the disclosures on the consumer's life expectancy (such as by using actuarial tables).

The proposed comment also addresses the disclosure of shared-appreciation features associated with reverse mortgages. The commentary provides that the appreciation feature should be disclosed in accordance with either § 226.18(f)(1) or § 226.19(b), as appropriate.

Section 226.18—Content of Disclosures

18(f) Variable Rate

Paragraph 18(f)(2). Comment 18(f)(2)–1 would be revised by adding a cross-reference to the commentary to § 226.17(a)(1) regarding the disclosure of additional variable-rate information as directly related information.

Section 226.19—Certain Residential Mortgage Transactions

19(b) Certain Variable-Rate Transactions

Comment 19(b)–1 would be revised to clarify the disclosure of construction loans that may be permanently financed. Under the current rules in § 226.17(c)(6), a creditor may disclose the construction and permanent financing arrangements, under § 226.18, as a single transaction or as separate transactions. Under the proposed revision to comment 19(b)–1, a creditor would be permitted to apply a similar analysis in determining the applicability of § 226.19(b). Under the proposed revision, the creditor could treat the construction phase as a separate transaction and, if the term is one year or less, disclosures under § 226.19(b) would not be required for the construction phase. Furthermore, the revised comment would make clear that a creditor could treat the construction and permanent phases as distinct transactions for purposes of determining coverage under § 226.19(b), yet still provide a single § 226.18 disclosure in accordance with the rules in § 226.17(c)(6).

Comment 19(b)–1 also would be amended to address the disclosure requirements for non-creditor holders who permit new consumers to assume variable-rate transactions secured by the consumer's principal dwelling with a term longer than one year. The comment explains that such holders, like creditors in assumptions, should provide disclosures under §§ 226.18(f)(2)(i) and 226.20(c), but need not provide disclosures under §§ 226.18(f)(2)(ii) or 226.19(b).

Paragraph 19(b)(2). Comment 19(b)(2)–1 would be revised to clarify the timing requirements for disclosures provided in response to a subsequent expression of interest by the consumer. The comment would also make clear that if the consumer and creditor agree on a program different than that set forth in the disclosures that were already provided, disclosures for the new program must be provided.

Paragraph 19(b)(2)(iii). Comment 19(b)(2)(iii)–1 would be revised to clarify that, in loans that call for a final balloon payment of the outstanding balance, the creditor must disclose that fact, but need not reflect the balloon payment in the historical example or in the disclosure of the initial and maximum rates and payments.

Paragraph 19(b)(2)(v). Comment 19(b)(2)(v)–1 would be revised to clarify that consumer buydowns and third-party buydowns that are reflected in the legal obligation should be disclosed in accordance with the rules for discounted variable-rate transactions. The revised comment would also make clear that no additional disclosures relating to the buydown need be provided on the program disclosure.

Paragraph 19(b)(2)(viii). Comment 19(b)(2)(viii)–1 would be amended to clarify that, in transactions that end before the last year in the historical example, the example must illustrate all significant loan program terms such as rate limitations that would have affected the interest rate for the remaining years shown in the example.

Paragraph 19(b)(2)(ix). Comment 19(b)(2)(ix)–1 would be revised to clarify that, in transactions where the latest payment shown in the historical example is not for the latest year of index values shown, a creditor may base the disclosure of how to calculate the consumer's actual payments on the initial or maximum payment disclosed under § 226.19(b)(2)(x).

Section 226.20—Subsequent Disclosure Requirements

20(b) Assumptions

Comment 20(b)–6 would be amended to add a cross reference to § 226.19(b) concerning the disclosure requirements for non-creditor holders of variable-rate transactions secured by the consumer's principal dwelling with a term longer than one year.

20(c) Variable-Rate Adjustments

Paragraph 20(c)(4). Comment 20(c)(4)–1 would be revised to clarify that the provisions of this paragraph apply to balloon payment transactions. The comment explains that the creditor should disclose any change in a balloon payment that results from an interest rate adjustment.

Paragraph 20(c)(5). Comment 20(c)(5)–1 would be amended to clarify that the provisions of this paragraph apply only when negative amortization occurs in a transaction, and not merely because a payment is a non-amortizing or partially amortizing payment.

Section 226.23—Right of Rescission

23(b) Notice of Right to Rescind

Comment 23(b)–3 would be revised to clarify the requirements for the disclosure of security interests on rescission notices. Recently, there has been some dispute over the specificity required in such a disclosure. The revised comment would make clear that where security interests taken in connection with prior transactions remain of record and a new security

interest is taken, the rescission notice need not detail each interest that the creditor may hold in the property. Rather, a simple disclosure of the fact that the transaction is secured by the consumer's principal dwelling is sufficient.

Section 226.24—Advertising

24(b) Advertisement of Rate of Finance Charge

Although not reprinted in this notice, comment 24(b)–5 would be revised to change the references to comment 18(f)–8 to be 17(c)(1)–10. No substantive change is intended.

Subpart D—Miscellaneous

Section 226.25—Record Retention

25(a) General Rule

Comment 25(a)–3 would be added to address the record retention requirements for variable-rate transactions that are subject to the disclosure requirements of § 226.19(b). The comment explains that maintaining written procedures for compliance with the disclosure provisions as well as retaining a sample disclosure form for each loan program will be adequate evidence of compliance.

Section 226.30—Limitation on Rates

Comment 30–8 would be revised to clarify that this paragraph applies to the manner of stating the maximum interest rate in the credit contract only. This paragraph does not govern how interest rate ceilings should be stated in Truth in Lending disclosures. The disclosures are governed by provisions found elsewhere in the regulation and commentary.

Comment 30–13, concerning footnote 50, would be revised to clarify the requirements of the regulation after October 1, 1988. For purposes of § 226.30, the rate must be stated in the credit contract as prescribed in comment 30–8. The disclosure requirements for limitations of rate increases are described elsewhere in the regulation and commentary.

Appendix D—Multiple-Advance Construction Loans

Although not reprinted in this notice, the first sentence of comment app. D–2 would be revised to delete the word "most" and to change the reference to § 226.18(f)(4) to be § 226.18(f)(1)(iv). No substantive change is intended by either revision.

List of Subjects in 12 CFR Part 226

Advertising, Banks, Banking, Consumer protection, Credit, Federal Reserve System, Finance, Penalties, Rate limitations, Truth in Lending.

Certain conventions have been used to highlight the proposed revisions. New language is shown inside bold-faced arrows, while language that would be deleted is set off with brackets.

Text of proposed revisions

Pursuant to authority granted in section 105 of the Truth in Lending Act (15 U.S.C. 1604 as amended) and section 1204 of the Comprehensive Equality Banking Act, Pub. L. 100–86, 101 Stat. 552, the Board proposes to amend the official staff commentary to Regulation Z (12 CFR Part 226 Supp. I) as follows:

PART 6—[AMENDED]

1. The authority citation for Part 226 continues to read:

Authority: Sec. 105, Truth in Lending Act, as amended by sec. 605, Pub. L. 96–221, 94 Stat. 170 (15 U.S.C. 1604 *et seq.*); sec. 1204(c), Competitive Equality Banking Act, Pub. L. 100–86, 101 Stat. 552.

2. The proposed revisions amend the commentary (TIL–1, 12 CFR Part 226 Supp. I) by adding a sentence and a bullet paragraph at the end of comment 4(a)–3; revising the heading and adding a sentence at the end of comment 4(b)(7) and (8)–2; adding a bullet paragraph at the end of comment 17(a)(1)–5; adding two sentences and parenthetical material after the second sentence in comment 17(c)(1)–8; redesignating comments 17(c)(1)–14 and –15 to be comments 17(c)(1)–15 and –16, respectively; adding comment 17(c)(1)–14; adding parenthetical material at the end of comment 18(f)(2)–1; adding three sentences at the end of comment 19(b)–1; revising the fourth sentence of comment 19(b)(2)–1; adding a sentence after the second sentence in comment 19(b)(2)(iii)–1; adding a new sentence before the parenthetical material at the end of comment 19(b)(2)(v)–1; revising the third sentence in the parenthetical material after the first sentence in comment 19(b)(2)(viii)–1; adding a sentence after the second sentence in comment 19(b)(2)(ix)–1; adding parenthetical material at the end of comment 20(b)–6; adding a sentence after the second sentence in comment 20(c)(4)–1; revising comment 20(c)(5)–1; adding two sentences after the second sentence in comment 23(b)–3; changing the references to "comment 18(f)–8" in the first sentence and in the first bullet paragraph of comment 24(b)–5 to "comment 17(c)(1)–10"; adding comment 25(a)–3; revising the first sentence of comment 30–8; revising the last sentence in comment 30–13; removing the word "most" and changing the reference to "§ 226.18(f)(4)" in comment app. D–2 to "§ 226.18(f)(1)(iv)" to read as follows:

Subpart A—General

* * * * *

Section 2264—Finance Charge

4(a) Definition.

* * * * *

3. *Charges by third parties.* * * * ►In contrast, charges imposed on the consumer by someone other than the creditor are finance charges if the creditor requires the services of the third party. For example:

• Any fee charged by a loan broker if the consumer cannot obtain the same credit terms from the creditor without using a broker.◄

* * * * *

4(b) Examples of Finance Charges

* * * * *

Paragraph 4(b) (7) and (8)

* * * * *

2. *Insurance written [after consummation.] ►in connection with a transaction.◄* * * * *►In open-end credit plans, insurance "written in connection with a credit transaction" includes insurance sold at any time during the existence of the plan.◄*

* * * * *

Subpart C—Closed-End Credit

Section 226.17—General Disclosure Requirements

17(a) Form of Disclosures

Paragraph 17(a)(1)

* * * * *

5. *Directly related.* * * * ►• The disclosures set forth under § 226.18(f)(1) for variable-rate transactions subject to § 226.18(f)(2).◄

17(c) Basis of Disclosures and Use of Estimates Paragraph 17(c)(1)

* * * * *

8. *Basis of disclosures in variable-rate transactions.* * * *

►Creditors should base the disclosures only on the initial rate and should not assume that this rate will increase. For example, in a loan with an initial rate of 10 percent and a 5 percentage points rate cap, creditors should base the disclosures on the initial rate and should not assume that this rate will increase 5 percentage points. (See, however, the commentary to § 226.17 concerning disclosures for discounted and premium variable-rate transactions.)◄ * * *

►14. *Reverse mortgages.* Reverse mortgages, also known as reverse annuity or home equity conversion mortgages, typically involve the disbursement of monthly advances to the consumer for a fixed period or until the occurrence of an event such as the consumer's selling or moving out of the home. Repayment of the loan (generally a single payment of principal and accrued interest) may be required to be made at the end of the disbursements or, for example, at the time the consumer moves out of the home. In disclosing these transactions, creditors must apply the following rules, as applicable:

• If the reverse mortgage has a specified period for advances, but repayment is due

BEST COPY AVAILABLE

only upon the occurrence of a future event such as the sale of the house by the consumer (which could occur after the last disbursement), the creditor must assume repayment will occur on the date disbursements to the consumer will end. This assumption should be used even if repayment might not occur when the disbursements end. In such cases, the creditor may include a statement such as "The disclosures assume that repayment will be required at the time our payments to you end. As provided in your agreement, your repayment may be required at a different time."

• If the reverse mortgage has neither a specified period for advances nor a specified repayment date and these terms will be determined solely by reference to future events, the creditor must base the disclosures on the event estimated to be most likely to occur first. For example, if the plan provides that repayment will occur either upon the sale of the home or the death of the consumer, the creditor must base the disclosures on the creditor's estimate of the date the home will be sole, if the sale of the house is determined to be more likely to occur before the death of the consumer. If the creditor is unable to estimate which event is most likely to occur first, the disclosures may be based on the consumer's life expectancy (such as by using actuarial tables).

• In making the disclosures, creditors must assume that all disbursements and accrued interest must be paid by the consumer. For example, if the note has a nonrecourse provision providing that the consumer is not obligated for an amount greater than the value of the house, the creditor will nonetheless assume that the full amount to be disbursed will be repaid. In this case, however, the creditor may include a statement such as "The disclosures assume full repayment of the debt, although the amount you may be required to pay is limited by your agreement."

• Some reverse mortgages provide that some or all of the appreciation in the value of the property will be shared between the consumer and the creditor. Such loans are considered variable-rate mortgages, as described in comment 17(c)(1)–11, and the appreciation feature must be disclosed in accordance with § 226.18(f)(1). If the reverse mortgage has a variable interest rate, is written for a term greater than one year, and is secured by the consumer's principal dwelling, the shared appreciation feature must be described under § 226.19(b)(2)(vii).◄

* * * * *

Section 226.18—Content of Disclosures

* * * * *

18(f) Variable Rate

* * * * *

Paragraph 18(f)(2)

1. *Disclosure required.* * * * ►(See the commentary to § 226.17(a)(1) regarding the disclosure of certain directly related information in addition to the variable-rate disclosures required under § 226.18(f)(2).)◄

* * * * *

Section 226.19—Certain Residential Mortgage Transactions

* * * * *

19(b) Certain Variable-Rate Transactions

1. *Coverage.* * * * ►In determining whether a construction loan that may be permanently financed by the same creditor is covered under this section, the creditor may treat the construction and the permanent phases as separate transactions with distinct terms to maturity or as a signle transaction. For purposes of the disclosures required under § 226.18, the creditor may nevertheless treat the two phases either as a signle transaction or as a combined transaction in accordance with § 226.17(c)(6). Finally, in cases where a subsequent holder permits a new consumer to assume a variable-rate transaction secured by the consumer's principal dwelling with a term greater than one year, the holder, like a creditor, need not provide new disclosures under § 226.18(f)(2)(ii) or 226.19(b), but must provide the disclosures required under §§ 226.18(f)(2)(i) and 226.20(c).◄

* * * * *

Paragraph 19(b)(2)

1. *Disclosure for each variable-rate program.* * * *

If the consumer subsequently expresses an interest in other available variable-rate programs subject to § 226.19(b)(2), the creditor must provide disclosures for such additional programs ►as soon as reasonably possible after the subsequent expression of interest. In addition, if the creditor and consumer agree upon program terms for which the consumer has not received disclosures, the appropriate program disclosures must be provided as soon as reasonably possible after the agreement◄. * * *

* * * * *

Paragraph 19(b)(2)(iii)

1. *Determination of interest rate and payment.* * * * ►In transactions that call for a final balloon payment of the outstanding balance, the creditor must disclose this fact. For example, the disclosure might read, "At the end of the loan term, a single payment of the entire outstanding balance will be required." The creditor, however, need not reflect the balloon payment in the historical example or in the disclosure of the initial and maximum rates and payments.◄ * * *

* * * * *

Paragraph 19(b)(2)(v)

1. *Discounted and premium interest rate.* * * *

►In a transaction with a consumer buydown or with a third-party buydown that will be incorporated in the legal obligation, the creditor should disclose the program as a discounted variable-rate transaction, but need not disclose additional information regarding the buydown in its program disclosures.◄ * * *

* * * * *

Paragraph 19(b)(2)(viii)

1. *Index movement.* * * * For the remaining ten years, 1982–1991, the creditor need only show the remaining index values, margin and interest rate [.] ►and must continue to reflect all significant loan program terms such as rate limitations affecting them.◄ * * *

* * * * *

Paragraph 19(b)(2)(ix)

1. *Calculation of payments.* * * * ►However, in transactions in which the latest payment shown in the historical example is not for the latest year of index values shown (such as in a five-year loan), a creditor may base the disclosure required under this paragraph on the initial or maximum payment disclosed under § 226.19(b)(x).◄ * * *

* * * * *

Section 226.20—Subsequent Disclosure Requirements

* * * * *

20(b) Assumptions

* * * * *

6. *Disclosures.* * * * ►(See the commentary to § 226.19(b) for the disclosure requirements for non-creditor holders of variable-rate transactions secured by the consumer's principal dwelling with a term greater than one year.)◄

* * * * *

20(c) Variable-Rate Adjustments

* * * * *

Paragraph 20(c)(4)

1. *Contractual effects of the adjustment.* * * * ►In balloon payment transactions, if an effect of the adjustment will be to change the balloon payment, the amount of the adjusted ballon payment must be disclosed.◄ * * *

Paragraph 20(c)(5)

1. *Fully-amortizing payment.* [A disclosure is required if the payment disclosed in § 226.20(c)(4) is not sufficient to pay off the loan balance (including capitalized interest) in the remaining term of the loan at the adjusted interest rate. In such cases, the] ►This paragraph requires a disclosure only when negative amortization occurs as a result of the adjustment. A disclosure is not required simply because a loan calls for non-amortizing or partially amortizing payments. For example, in a five-year balloon loan with payments based on a longer amortization schedule, the creditor would not have to disclose the payment necessary to fully amortize the loan in the remainder of the five-year term. A disclosure is required, however, if the payment disclosed under § 226.20(c)(4) is not sufficient to prevent negative amortization in the loan. The◄ adjustment notice must state the payment required to [fully amortize the loan over the remainder of the term.] ►prevent negative amortization◄. (This paragraph does not apply if the new payment disclosed in § 226.20(c)(4) is [fully amortizing] ►sufficient to prevent negative amortization in the loan◄ but the final payment will be a different amount due to rounding.)

* * * * *

Section 226.23—Right of Rescission

* * * * *

23(b) Notice of Right to Rescind

* * * * *

3. Content. * * * ►In disclosing the retention or acquisition of a security interest, a creditor need not separately disclose multiple security interests that it may hold in the property. The creditor need only disclose that the transaction is secured by the consumer's principal dwelling, even when security interests from prior transactions remain of record and a new security interest is taken in connection with the transaction.◄ * * *

* * * * *

Subpart D—Miscellaneous

Section 226.25—Record Retention

25(a) General Rule

* * * * *

►3. *Certain variable-rate transactions.* In variable-rate transactions that are subject to the disclosure requirements of § 226.19(b), written procedures for compliance with those requirements as well as a sample disclosure form for each loan program represent adequate evidence of compliance.◄

* * * * *

Section 226.30—Limitation on Rates

* * * * *

8. *Manner of stating the maximum interest rate.* The maximum interest rate must be stated ►in the credit contract◄ either as a specific amount or in any other manner that would allow the consumer to easily ascertain, at the time of entering into the obligation, what the rate ceiling will be over the term of the obligation. * * *

* * * * *

13. *Transition rules.* * * * On or after that date, creditors must have the maximum rate set forth in their credit contracts and, where applicable, as part of their truth in lending disclosures [.] ►in the manner prescribed in the applicable sections of the regulation.◄

* * * * *

Board of Governors of the Federal Reserve System, November 29, 1988.

William W. Wiles,

Secretary of the Board.

[FR Doc. 88-27858 Filed 12-2-88; 8:45 am]

BILLING CODE 6210-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 88-NM-147-AD]

Airworthiness Directives; Fokker Model F-28 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to Fokker Model F-28 series airplanes, which would require repetitive inspections of the lower windshield center bracket for cracks, and repair, if necessary. This proposal is prompted by reports of cracks found during major structural inspection on three airplanes. This condition, if not corrected, could lead to decompression of the airplane during flight.

DATE: Comments must be received no later than January 27, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 88-NM-147-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 89168. The aplicable service information may be obtained from Fokker Aircraft USA, Inc., 1199 N. Fairfax Street, Alexandria, Virginia 22314. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Quam, Standardization Branch, ANM-113; telephone (206) 431-1978. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications recieved on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 88-NM-147-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The Rijksluchtvaartdienst (RLD), which is the airworthiness authority of the Netherlands, in accordance with existing provisions of a bilateral airworthiness agreement, has notified the FAA of an unsafe condition which may exist on Fokker Model F-28 series airplanes.

The manufacturer has reported three separate cases where fatigue cracks were found during major structural inspections of the frame 1600 center bracket. Examination of the brackets has revealed that the cracks started from the two center bolt holes, traveling in a forward and aft direction. This condition, if not corrected, could lead to decompression of the airplane during flight.

Fokker has issued Service Bulletin F28/53-A92, Revision 1, dated July 15, 1988, which describes procedures for inspection of the frame 1600 center bracket located behind the lower windshield girders, and repair, if necessary. The RLD has classified this service bulletin as mandatory, and has issued Netherlands Airworthiness Directive BLA No. 88-45, dated June 17, 1988.

This airplane model is manufactured in the Netherlands and type certificated in the United States under the provision of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require repetitive inspections of the lower windshield frame 1600 center bracket for cracks, and repair, if necessary, in accordance with the service bulletin previously mentioned.

It is estimated that 48 airplanes of U.S. registry would be affected by this AD, that it would take approximately 2 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $3,840.

VOL
53
ISS

1988
UMI

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Model F-28 series airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Fokker: Applies to Model F-28 series airplanes, Serial Numbers 11003 through 11241, 11991 and 11992, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent decompression of the aircraft during flight, accomplish the following:

A. For airplanes in pre-Service Bulletin F28/21-16 configuration, within 30 days after the effective date of this AD, or upon the accumulation of 75,000 landings, whichever occurs later, inspect the frame 1600 center bracket for cracks, and repair, if necessary, in accordance with Fokker Service Bulletin F28/53-A92, Revision 1, dated July 15, 1986. Repeat this inspection at intervals not to exceed 4,500 landings.

B. For airplanes in Post-Service Bulletin F28/21-16 configuration, within 30 days after the effective date of this AD, or upon the accumulation of 50,000 landings, whichever occurs later, inspect the frame 1600 center bracket for cracks, and repair, if necessary, in accordance with Fokker Service Bulletin F28/53-A92, Revision 1, dated July 15, 1986. Repeat this inspection at intervals not to exceed 3,000 landings.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Standardization Branch, ANM-113.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Fokker Aircraft USA, Inc., 1199 N. Fairfax Street, Alexandria, Virginia 22314. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on November 21, 1988.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 88-ASW-44]

Proposed Establishment of Transition Area; Coushatta, LA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish a transition area at Coushatta, LA. The development of a new standard instrument approach procedure (SIAP) to the Red River Airport, utilizing the soon to be commissioned Coushatta Nondirectional Radio Beacon, has made this proposal necessary. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the new NDB SIAP to the Red River Airport. Coincident with this action is the changing of the status of the Red River Airport from visual flight rules (VFR) to instrument flight rules (IFR).

DATES: Comments must be received on or before January 10, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 88-ASW-44, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530; telephone: (817) 624-5561.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 88-ASW-44." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel

concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530. Communications must identify the notice number of this NPRM. Person interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) by establishing a transition area at Coushatta, LA. The development of a new SIAP to the Red River Airport, utilizing the soon to be commissioned Coushatta NDB, has necessitated this proposal. The intended effect of this proposal is to provide adequate controlled airpace for aircraft executing the new NDB SIAP. Coincident with this action is the changing of the status of the Red River Airport from VFR to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6D dated January 4, 1988.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAY, AREA LOW ROUTES CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Coushatta, LA [New]

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Red River Airport (latitude 31°59'26" N., longitude 93°18'26" W.), and within 3.5 miles each side of the 002° bearing of the Coushatta NDB (latitude 32°04'17" N., longitude 93°18'17" W.), extending from the 6.5-mile radius area to 16.5 miles north of the Red River Airport.

Issued in Fort Worth, TX, on November 21, 1988.

Larry L. Craig,

Manager, Air Traffic Division, Southwest Region.

[FR Doc. 88–27876 Filed 12–2–88; 8:45 am]

[Airspace Docket No. 88–ASW–42]

Proposed Establishment of Transition Area; Robstown, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish a transition area at Robstown, TX. The development of a new VOR/DME–A standard instrument approach procedure (SIAP) to the Nueces County Airport, utilizing the Corpus Christi Very High Frequency Omnidirectional Radio Range/Tactical Air Navigation (VORTAC), has made this proposal necessary. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the new VOR/DME–A SIAP to the Nueces County Airport. Coincident with this action is the changing of the status of the airport from visual flight rules (VFR) to instrument flight rules (IFR) .

DATES: Comments must be received on or before January 10, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 88–ASW–42, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530; telephone: (817) 624–5561.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 88–ASW–42." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530. Communications must identify the notice number of the NPRM. Persons interested in being placed on a

VOL 53 ISS 233 DE 5 1988 UMI

mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) by establishing a transition area at Robstown, TX. The development of a new VOR/DME–A SIAP to the Nueces County Airport, utilizing the Corpus Christi VORTAC, has necessitated the proposal. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the new VOR/DME–A SIAP to the Nueces County Airport. The new transition area will exclude that portion which overlies the Corpus Christi, TX, Control Zone and Transition Area. Coincident with this action is the changing of the status of the Nueces County Airport from VFR to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6D dated January 4, 1988.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAY, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Robstown, TX [New]

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Nueces County Airport (latitude 27°46'41" N. longitude 97°41'24" W.), excluding that portion which overlies the Corpus Christi, TX, Control Zone and Transition Area.

Issued in Fort Worth, TX, on November 21, 1988.

Larry L. Craig,

Manager, Air Traffic Division, Southwest Region.

[FR Doc. 88–27875 Filed 12–2–88; 8:45 am]

BILLING CODE 4910–13–M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

15 CFR Part 776

[Docket No. 81137–8237]

Definition of Supercomputer

AGENCY: Bureau of Export Administration, U.S. Department of Commerce.

ACTION: Proposed rule.

SUMMARY: This rule proposes to amend § 776.10 of the Export Administration Regulations (EAR) by adding a new paragraph (c) that contains a definition of the term "supercomputer". Inclusion of the supercomputer definition in the EAR is mandated by Section 5(a)(6) of the Export Administration Act of 1979, as amended by the Omnibus Trade and Competitiveness Act of 1988.

The Commerce Department will consider comments on this definition and on the supercomputer licensing process.

DATE: Comments must be received by January 19, 1989.

ADDRESS: Written comments (six copies) should be sent to: Willard Fisher, Office of Technology and Policy Analysis, Bureau of Export Administration, Department of Commerce, Room 1622, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Willard Fisher, Regulations Branch, Bureau of Export Administration, Telephone: (202) 377–3856.

SUPPLEMENTARY INFORMATION:

Background

Section 5(a)(6) of the Export Administration Act of 1979 (the Act), as amended by the Omnibus Trade and Competitiveness Act of 1988, requires that the Export Administration Regulations (EAR) be amended to provide a definition of the term "supercomputer" for export control purposes.

This rule proposes to implement section 5(a)(6) of the Act by revising § 776.10 of the EAR to include the definition. When the final rule is published, this definition will cross-reference sections of the EAR concerning supercomputers.

The term "supercomputer" refers to advanced architecture, very high speed, computer systems that can solve highly complex problems in strategically relevant time frames. Because of their high-speed problem solving capabilities, supercomputers have unique applications in a variety of critical military areas. The United States and certain of its Western allies have a commanding edge in supercomputer technology over the Soviet Union and its allies. This technological edge translates into a specific strategic military advantage. If this technological edge were eroded by diversion of a supercomputer system to the Soviet Bloc, our national security could be seriously jeopardized. Accordingly, the Bureau of Export Administration licenses the export of a supercomputer only when it is satisfied that special security safeguards—covering security during shipment, physical security of the system, and computational access security—are in place and will be adhered to.

Congress has recognized the strategic importance of this technology, and has exempted supercomputers from certain reexport control liberalizations otherwise mandated by the Omnibus Trade and Competitiveness Act of 1988.

The supercomputer definition proposed in this rule contains specific technical guidelines for measuring a computer's performance. It also includes a threshold performance level above which a computer would be considered a "supercomputer" for export control purposes. This definition, of course, will be subject to periodic review as this technology advances.

In addition to establishing a performance threshold for "supercomputers", Commerce is exploring the possibility of streamlining the licensing process for supercomputers, while maintaining the level of control that this advanced

technology warrants. One possible approach would be to focus on the ultimate destination of the supercomputer and differentiate among imports by specific groups of countries. For example, security safeguards could vary according to whether or not the ultimate destination is a COCOM/5(k) country.

The Commerce Department will consider public comments that address the supercomputer definition, the threshold level of performance, and the supercomputer licensing process, including comments concerning the linkage between security safeguards and the importing country. Publication of a final rule will follow after consultations with appropriate U.S. allies.

Rulemaking Requirements and Invitation to Comment

1. Because this rule concerns a foreign and military affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has to be or will be prepared.

2. This rule does not contain a collection of information subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign and military affairs function of the United States. Because this rule is being issued in proposed form, this rule complies with section 13(b) of the Export Administration Act. Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule.

However, because of the importance of the issues raised by these regulations, this rule is issued in proposed form and comments will be considered in the development of final regulations. Accordingly, the Department encourages Interested persons who wish to comment to do so at the earliest possible time to permit the fullest consideration of their views.

The period for submission of comments will close January 19, 1989. The Department will consider all comments received before the close of the comment period in developing final regulations. Comments received after the end of the comment period will be considered if possible, but their consideration cannot be assured. The Department will not accept public comments accompanied by a request that part or all of the material be treated confidentially because of its business proprietary nature or for any other reason. The Department will return such comments and materials to the person submitting the comments and will not consider them in the development of final regulations. All public comments on these regulations will be a matter of public record and will be available for public inspection and copying. In the interest of accuracy and completeness, the Department requires comments in written form. Oral comments must be followed by written memoranda, which will also be matter of public record and will be available for public review and copying. Communications from agencies of the United States Government or foreign governments will not be made available for public inspection.

The public record concerning these regulations will be maintained in the Bureau of Export Administration Freedom of Information Records Inspection Facility, Room 4886, Department of Commerce, 14th Street and Pennsylvania Avenue NW., Washington, DC 20230. Records in this facility, including written public comments and memoranda summarizing the substance of oral communications, may be inspected and copied in accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations. Information about the inspection and copying of records at the facility may be obtained from Margaret Cornejo, Bureau of Export Administration Freedom of Information Officer, at the above address or by calling (202) 377–2593.

5. This proposed rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612.

List of Subjects in 15 CFR Part 776

Exports, Reporting and recordkeeping requirements.

Accordingly, Part 776 of the Export Administration Regulations is proposed to be amended as follows:

1. The authority citation for 15 CFR Part 776 continues to read as follows:

Authority: Pub. L. 96–72, 93 Stat. 503 (50 U.S.C. app. 2401 *et seq.*), as amended by Pub. L. 97–145 of December 29, 1981, by Pub. L. 99–64 of July 12, 1985, and by Pub. L. 100–418 of August 23, 1988; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985).

PART 776—[AMENDED]

2. Section 776.10 is amended by redesignating paragraph (c) as (d) and by adding a new paragraph (c) to read as follows:

§ 776.10 Electronic computers and related equipment

* * * * *

(c) *Supercomputers.* Any computer that has a theoretical peak performance capability greater than or equal to 160 MFLOPS (million floating-point operations per second) will be considered a supercomputer. This performance capability will apply equally to all vector, array, and parallel processors, as well as other architectures, as appropriate. The computer manufacturer will provide the information necessary to identify the variables in the standard formula for determining performance capability. The standard formula that must be used in calculating the theoretical peak performance capability of a single processor is as follows:

$$\frac{\text{Number of operations}}{\text{1 cycle}} \times \frac{\text{1 cycle}}{\text{cycle time}} = \text{Number of MFLOPS}$$

Note.—There are three basic assumptions in standardizing the measurement:

(1) The theoretical peak performance will be measured on a 50/50 ratio of multiply/add calculations.

(2) The results will be measured on 64-bit word lengths, regardless of the word length of the processor.

(3) For machines with more than one processor, the MFLOPS number for a single processor is multiplied by the number of processors.

* * * * *

Dated: November 29, 1988.

Michael E. Zacharia,

Assistant Secretary for Export Administration.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Parts 56 and 57

Safety Standards for Explosives; Extension of Comment Period

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice to extend period for public comment.

SUMMARY: Due to requests from the public, the Mine Safety and Health Administration (MSHA) is extending the period for public comment regarding its proposed rule for explosives at metal and nonmetal mines.

DATE: Written comments on the proposed rule must be received on or before February 10, 1989.

ADDRESS: All comments should be sent to: Mine Safety and Health Administration, Office of Standards, Regulations, and Variances, Room 631, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances, MSHA, phone (703) 235-1910.

SUPPLEMENTARY INFORMATION: On November 10, 1988, MSHA published a proposed rule (53 FR 45487) revising the explosives standards for the metal and nonmetal mining industry. The comment period was scheduled to end on January 9, 1989.

In response to requests from the public, MSHA is extending the time for commenting on this proposed rule to February 10, 1989. All interested members of the mining community are encouraged to submit comments prior to that date.

Dated: November 29, 1988.

David C. O'Neal,

Assistant Secretary for Mine Safety and Health.

[FR Doc. 88-27884 Filed 12-2-88; 8:45 am]

BILLING CODE 4510-43-M

30 CFR Part 57

Safety Standards for Methane in Metal and Nonmetal Mines

AGENCY: Mine Safety and Health Administration (MSHA), Labor.

ACTION: Proposed rule.

SUMMARY: MSHA is proposing to revise two sections of the Safety Standards for Methane in Metal and Nonmetal Mines to conform the standards to recently issued approval requirements for brattice cloth and ventilation tubing. The methane standards currently require that those materials have a flame spread rating of 25 or less if used in underground metal and nonmetal mines with a history of, or a potential for methane liberation. The reference to flame spread rating would be replaced with a requirement that brattice cloth and ventilation tubing be approved by MSHA in accordance with 30 CFR Part 7.

DATE: Written comments must be received on or before February 3, 1989.

ADDRESSES: Send written comments to the Office of Standards, Regulations and Variances, MSHA, Room 631, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, VA 22203.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations and Variances, MSHA, (703) 235-1910.

SUPPLEMENTARY INFORMATION:

Background and Effect of Rule

The final rule of Safety Standards for Methane in Metal and Nonmetal Mines was published as a new Subpart T of Part 57 on July 1, 1987 (52 FR 24924). Editorial corrections and clarifying amendments were published on July 24, 1987 (52 FR 27903), October 27, 1987 (52 FR 41394) and March 24, 1988 (53 FR 9615). Sections 57.22215 and 57.22222 of the methane standards specify the use of brattice cloth and ventilation tubing with a flame spread rating of 25 or less as determined by American Society of Testing Materials (ASTM) test method E-162. Under § 57.22215, rigid ventilation tubing is required to be constructed of noncombustible material. The July 1, 1987 preamble noted that MSHA was engaged in development of an improved test method to evaluate the flame resistance of brattice cloth and ventilation tubing. The new test method has now been issued as part of new approval regulations in 30 CFR Part 7, (53 FR 23486, June 22, 1988). MSHA stated in the July 1, 1987 preamble that upon promulgation of Part 7, §§ 57.22215 and 57.22222 would be revised to require the use of approved brattice cloth and ventilation tubing. This rule would make those revisions, effective August 22, 1989. As of this date, brattice cloth and ventilation tubing newly installed in a mine would be required to be approved by MSHA in accordance with 30 CFR Part 7. This proposed delay in the effective date coincides with the phase-in of new approval requirements under Part 7 and will provide sufficient time for mine operators to obtain approved ventilation materials. To the extent that ventilation materials approved under Part 7 become available sooner, they may be installed and will be considered in compliance with current §§ 57.22215 and 57.22222. Operators may also continue to install currently acceptable ventilation materials until the effective date of this rule. The approval status of those products previously tested and accepted by the Approval and Certification Center and issued an MSHA BC or VT acceptance number will remain unaffected allowing those products to be manufactured and used as MSHA approved.

Executive Order 12291 and the Regulatory Flexibility Act

This proposed rule would revise two previously issued standards to update technical performance requirements for brattice cloth and ventilation tubing. The cost impact of the new requirements on mine operators will be negligible. The cost impact of the test requirements of the ventilation materials has been analyzed in the context of the Part 7 rulemaking. Accordingly, the Agency has determined that this rule would not result in a major cost increase or have an incremental effect of $100 million or more on the economy. Therefore, a regulatory impact analysis is not required. The Agency has also determined that the final rule will not have a significant impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required.

Paperwork Reduction Act

The proposal does not contain any information collection requirements subject to the Paperwork Reduction act of 1980.

List of Subjects in 30 CFR Part 57

Mine safety and health, Metal and nonmetal mining, Safety standards for methane.

Date: November 29, 1988.

David C. O'Neal,

Assistant Secretary for Mine Safety and Health.

Accordingly, Subpart T, Part 57, Subchapter N, Chapter I, Title 30 of the Code of Federal Regulations is proposed to be amended as follows:

PART 57—[AMENDED]

1. The authority citation for Subpart T continues to read as follows:

Authority: 30 U.S.C. 811.

2. Section 57.22215(b)(1) is revised to read as follows:

§ 57.22215 Separation of intake and return air (I–A, II–A, III, and V–A mines.

* * * * *

(b) * * *

(1) Ventilation tubing approved by MSHA in accordance with 30 CFR Part 7 of previously issued a BC or VT acceptance number by the MSHA Approval and Certification Center may be used for separation of main air currents in the same opening. Flexible ventilation tubing shall not exceed 250 feet in length.

* * * * *

3. Section 57.22222 is revised to read as follows:

§ 57.22222 Ventilation materials (I–A, I–B, I–C, II–A, III, V–A, and V–B mines).

Brattice cloth and ventilation tubing shall be approved by MSHA in accordance with 30 CFR Part 7, or shall bear a BC or VT acceptance number issued by the MSHA Approved and Certification Center

SUPPLEMENTARY INFORMATION:

Regulatory Information Number

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

Request for Comments

The public is invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each person submitting a comment should include his or her name and address, identify this notice as CGD 86–079, and give the reasons for the comment. Persons desiring acknowledgement that their comment has been received should enclose a stamped self-addressed postcard or envelope.

All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned.

Drafting Information

The principal persons involved in drafting this proposed rulemaking are: Margie G. Hegy, Project Manager, and Christena G. Green, Project Counsel, Office of Chief Counsel.

Discussion of Proposed Regulations

Responsibility for the administration and enforcement of anchorage regulations was transferred from the U.S. Army Corps of Engineers (COE) to the U..S Coast Guard in 1967. Many of these regulations have remained basically unchanged since that time. In 1979, the authority to designate special anchorage areas and anchorage grounds and to issue regulations pertaining to anchorage grounds was delegated to Coast Guard district commanders. State and local governments have also promulgated ordinances which apply in some of these designated anchorages.

On March 11, 1988, (53 FR 7949) the Coast Guard proposed to amend the anchorage regulations by placing a general statement at the beginning of Part 110 advising mariners that state and/or local ordinances may apply; by removing other notes and textual references to state and/or local ordinances; by removing non-regulatory, obsolete or duplicative language; by relocating, to Part 165, sections which regulate navigation outside the boundaries of established anchorages; and by renumbering the sections in Part 110 to eliminate non-standard section designations and facilitate future amendments. After reviewing the comments received as a result of the NPRM, the Coast Guard proposes to expand the editorial revision of Part 110.

Two commenters expressed concern that the proposed removal of notes and references to state and local ordinances from the anchorage regulations would, in effect, transfer control of the anchorages from the Coast Guard to local authorities. These comments are based on a misunderstanding of the Coast Guard's authority with regard to anchorages.

The Coast Guard does not regulate vessel activities within special anchorage areas as it does in anchorage grounds. The only effect of designating a special anchorage area under the authority of 33 U.S.C. 2071 is that vessels under 20 meters in length (65 feet) anchored in these areas do not have to exhibit the lights and shapes or sound signals required by Rules 30 and 35 of the Inland Rules. Other vessel activity within these special anchorage areas may be regulated by local authorities as long as the local regulations do not conflict with Federal regulations which may be promulgated under other statutory authority.

Anchorage grounds are established under 33 U.S.C. 471. This statute also authorizes the Coast Guard to adopt suitable rules and regulations in relation to these anchorages.

To clarify the distinction between special anchorage areas and anchorage grounds, which are established under

different statutory authorities and serve different purposes, the Coast Guard proposes to separate the contents of existing Part 110 into two parts: Subpart A, Special Anchorage Areas, will remain in Part 110 and Subpart B, Anchorage Grounds will become Part 111. The distinction between special anchorage areas and anchorage grounds can best be drawn by separating them into two parts, each with its own distinct statutory authority.

Comments from Coast Guard field offices pointed out the need to amend anchorage descriptions currently in the CFR because buoy numbers or landmarks referred to as part of anchorage descriptions have changed or no longer exist. Currently, a variety of reference points, including buoys, piers, property boundaries, streets, yacht clubs, etc. are used in Part 110 to describe the boundaries of special anchorage areas and anchorage grounds. The Coast Guard proposes to standardize the format for anchorage descriptions by using latitudes and longitudes, expressed in degrees, minutes, and seconds, to the nearest tenth. This format would eliminate the need for future rulemaking merely to correct anchorage descriptions when a landmark no longer exists, or when buoys are renumbered but the anchorage boundaries have not changed. Figure 1 is an example of a present anchorage description and how it would appear in the proposed standardized format. Although the description format is different, the existing anchorage boundaries and location are not changed. The anchorage remains as presently charted.

Regulatory Evaluation

These regulatory changes are considered to be non-major under Executive Order 12291 and non-significant under the DOT regulatory policies and procedures (44 FR 11034; Feb. 26, 1979). The economic impact of this amendment has been found to be so minimal that further evaluation is unnecessary. The Coast Guard certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities.

Federalism

This rulemaking has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Dated: September 21, 1988.

R.T. Nelson,

Rear Admiral, U.S. Coast Guard; Chief, Office of Navigation Safety and Waterway Services.

BILLING CODE 4910–14–M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

36 CFR Part 1234

Electronic Records Management

AGENCY: National Archives and Records Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: Because of technological changes, NARA is proposing to revise its regulations concerning Federal agencies' electronic records. This revision mandates procedures to manage electronic records, to provide for the selection and maintenance of electronic storage devices, and to follow the legal requirements for the disposition of such records. As a result, regulations will more effectively deal with the issues associated with data base management systems and office automation technologies. Identical regulations will be issued simultaneously by the General Services Administration and published at FIRMR 201–45.2.

DATE: Comments must be received by January 4, 1989.

ADDRESS: Comments should be sent to Director, Policy and Program Analysis Division, National Archives and Records Administration (NAA), Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT: Adrienne C. Thomas or Nancy Allard at 202–523–3214 (FTS 523–3214).

SUPPLEMENTARY INFORMATION: NARA's current electronic records management regulations were in large part developed when processing numeric data on mainframe computers in a batch mode with compiler programs was state-of-the-art data processing. Since those regulations were developed, technology has advanced, especially in the areas of data base management systems and online access. Magnetic computer tape storage is now supplemented by a variety of direct access storage devices. Centralized data processing has been transformed by the spread of official automation technologies, such as word processing, spreadsheets, electronic calendaring, electronic messaging, and data base management systems.

Because of these changes in technology, in 1985 NARA issued a bulletin that provided extensive advice and information about the management of records created, stored, or transmitted using microprocessors. This bulletin was reissued in February 1987 as NARA Bulletin No. 87–5. This proposed rule further updates NARA guidance on electronic records management by issuing new or revised regulations in those areas where clear procedures have been developed. Namely, the regulation requires agencies to establish an administrative structure to deal with electronic records, to implement procedures for the selection and maintenance of electronic storage devices, and to follow the legal requirements for the disposition of such records.

This rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981. As required by the Regulatory Flexibility Act, it is hereby certified that this proposed rule will not have a significant impact on small business entities.

List of Subjects in 36 CFR Part 1234

Archives and records.

For the reasons set forth in the preamble, NARA proposes to revise Part 1234 of Chapter XII of Title 36 of the Code of Federal Regulations as follows:

PART 1234—ELECTRONIC RECORDS MANAGEMENT

Sec.

Subpart A—General

1234.1 Scope of part.

Subpart B—Program Requirements

1234.10 Agency responsibilities.

Subpart C—Standards for the Creation, Preservation, and Disposition of Electronic Records

1234.20 Creation and use of data bases and numeric data files.
1234.22 Creation and use of text information in an office automation system.
1234.24 Judicial use of electronic records.
1234.26 Security of electronic records.
1234.28 Selection and maintenance of electronic records storage media.
1234.30 Retention of electronic records.
1234.32 Destruction of electronic records.

Authority: 44 U.S.C. 2904, 3101, 3102, and 3105.

Subpart A—General

§ 1234.1 Scope of part.

This part establishes the basic requirements related to the creation, maintenance, use, and disposition of electronic records, which include all data files and data bases as well as text information in an office automation system. Unless otherwise noted, these requirements apply to all electronic records, systems, whether on microprocessors, mini- or main-frame computers, regardless of storage media, in network or stand-alone configurations. Guidance on electronic records management and related issues may be obtained from the National Archives and Records Administration, Agency Services Division (NIA), Washington, DC 20408 and the General Services Administration, Office of Innovative Office Systems (KO), Washington, DC 20405.

Subpart B—Program Requirements

§ 1234.10 Agency responsibilities.

The head of each Federal agency shall establish a program for the management of electronic records that incorporates the following elements:

(a) Assigning to an office of the agency the responsibility to develop and implement an agencywide program for the management of all records created, received, maintained, used, or stored on electronic media; and notifying the National Archives and Records Administration, Office of Records Administration (NI), Washington, DC 20408 and the General Services Administration, Regulations Branch (KMPR), Washington, DC 20405, of the assignment.

(b) Integrating the management of electronic records with other records and information resources management programs of the agency by requiring close coordination between the office designated in § 1234.10(a) and the office assigned overall records management responsibility in accordance with § 1220.40 of this chapter, if the two are different.

(c) Issuing a directive establishing program objectives, responsibilities, and authorities and disseminating the directive throughout the agency as appropriate.

(d) Establishing procedures for the participation of records management officials in the approval review process for new electronic records systems or enhancements to existing systems.

(e) Ensuring that adequate training is provided for users of electronic records systems in the operation, care, and handling of all systems equipment and media.

(f) Developing and maintaining a complete and accurate inventory of all electronic records systems. The inventory should include: Name and control number of records system and any implementing directives; purpose(s) and uses of the system; programs and program offices supported by the system; system manager; information content of the system including major outputs; software environment; date of first input; location of documentation needed to read and understand the information in the system; identification of restricted information; authorized disposition of the electronic records as determined by General Records Schedule (GRS) 20, Electronic Records, GRS 23, Records Common to Most Offices Within Agencies, or a NARA-approved records schedule; the disposition authority citation; and the location of any storage media containing permanent or unscheduled records.

(g) Specifying the location, manner, and media in which records will be maintained to meet operational and archival requirements.

(h) Developing and securing NARA approval of records disposition schedules, and ensuring implementation of their provisions.

(i) Issuing internal agency procedures for system documentation of software and electronic records including application programs, functional and operational flowcharts, and output format plans for all applications; record layouts and codebooks and basic machine run instructions (run books) for batch processing applications; and data dictionaries and software user guides for data base management systems.

(j) Specifying the method of implementing controls over national security-classified, sensitive, proprietary, and Privacy Act records stored and used electronically.

(k) Establishing procedures to ensure that contractors deliver to the agency those data files, data bases, and related documentation that are necessary to provide adequate and proper documentation of agency functions, policies and activities, and to protect legal and financial rights of the Government and of persons directly affected by the agency's activities (see Part 1222 of this chapter).

(l) Ensuring compliance with applicable governmentwide policies, procedures, and standards such as those issued by the Office of Management and Budget, the General Services Administration, the National Archives and Records Administration, and the National Institute of Standards and Technology.

(m) Reviewing electronic records systems periodically for conformance to established agency procedures, standards, and policies as part of the periodic reviews required by 44 U.S.C. 3506. The review should determine if the data files and data bases have been properly identified and described, and whether the schedule descriptions and retention periods reflect the current informational content and use. If not, or if substantive changes have been made in the structure, design, codes, purposes, or uses of the system, submit an SF 115, Request for Records Disposition Authority, to NARA.

Subpart C—Standards for the Creation, Preservation, and Disposition of Electronic Records

§ 1234.20 Creation and use of data bases and numeric data files.

Agencies shall maintain adequate and up-to-date technical and informational documentation for data files and data bases. Minimum documentation required is a narrative description of the system; physical characteristics; recording mode information, including the coding structure (code books); recording system information; and a record layout that describes each field including its name, size, starting or relative position, and a description of the form of the data (such as alphabetic, zoned decimal, packed decimal, or numeric), or a data dictionary or the equivalent information associated with a data base management system including a description of the relations between data elements in relational data bases.

VOL 53 ISS 233 DE 5 1988 UMI

§ 1234.22 Creation and use of text information in an office automation system.

(a) In office automation systems which maintain the official file copy of documents on electronic media, the software shall meet the following minimum requirements:

(1) Provide a method for all authorized users of the system to retrieve desired documents, such as an indexing or text search system;

(2) Provide an appropriate level of security to ensure integrity of the documents;

(3) Provide a standard interchange format when necessary to permit the exchange of documents on electronic media between computers using different software/operating systems and the conversion or migration of documents on electronic media from one system to another; and

(4) Accommodate, when necessary, the requirements for transporting permanent records to NARA (see § 1228.188 of this chapter).

(b) Before a document is created electronically on office automation systems which will maintain the official file copy on electronic media, each document shall be identified sufficiently to enable authorized personnel to retrieve, protect and dispose of documents in the system. Appropriate identifying information for each document maintained on the electronic media may include: office of origin, file code, key words for retrieval, addressee (if any), signator, author, date, authorized disposition (coded or otherwise), and security classification (if applicable). Agencies shall ensure that records maintained in such systems can be correlated with related records on paper, microform, or other media.

§ 1234.24 Judicial use of electronic records.

Electronic records may be admitted in evidence to Federal courts for use in court proceedings (Federal Rules of Evidence 803(6)) if trustworthiness is established by thoroughly documenting the recordkeeping system's operation and the controls imposed upon it. Agencies should implement the following procedures to enhance the legal admissability of electronic records.

(a) Document that similar kinds of records generated and stored electronically are created by the same processes each time and have a standardized retrieval approach.

(b) Substantiate that security procedures prevent unauthorized modification of a record and ensure system protection against such problems as power interruptions.

(c) If a vital record is kept in electronic form, document the vital records procedures, including a description of the informational content of the various generations, i.e., the original and vital record copies.

(d) Identify the electronic media on which records are stored throughout their life cycle, the maximum time span that records remain on each storage medium, and the NARA-approved disposition of all records.

(e) Coordinate all of the above with legal counsel and senior IRM and records management staff.

§ 1234.26 Security of electronic records.

Agencies shall implement and maintain an effective records security program which incorporates the following:

(a) Ensures that only authorized personnel have access to electronic records.

(b) Provides for adequate backup and recovery of records to protect against information loss.

(c) Ensures that appropriate agency personnel are trained to safeguard sensitive or classified electronic records.

(d) Prevents the unauthorized alteration or erasure of electronic records.

(e) Ensures that electronic records security is included in computer systems security plan prepared pursuant to the Computer Security Act of 1987 (40 U.S.C. 759 note).

§ 1234.28 Selection and maintenance of electronic records storage media.

(a) Agencies shall select appropriate media and systems for storing agency records throughout their life cycle, which meet the following requirements:

(1) Permit easy retrieval in a timely fashion;

(2) Retain the records in a usable format until their authorized disposition date; and

(3) When appropriate, meet requirements for transferring permanent records to NARA (see § 1228.188 of this chapter).

(b) The following factors shall be considered before selecting a storage medium or converting from one medium to another:

(1) The authorized life of the records, as determined during the scheduling process;

(2) The maintenance necessary to retain the records;

(3) The cost of storing and retrieving the records;

(4) The records density;

(5) The access time to retrieve stored records;

(6) The portability of the medium (that is, selecting a medium that will run on equipment offered by multiple manufacturers); and

(7) Whether the medium meets the current applicable Federal Information Processing Standards.

(c) Agencies shall prohibit the use of floppy disks for the exclusive long-term storage of permanent or unscheduled electronic records.

(d) Agencies shall ensure that all authorized users can identify and retrieve the information stored on diskettes, removable disks, or tapes by establishing or adopting procedures for external labeling.

(e) Agencies shall ensure that information is not lost because of changing technology or deterioration by converting storage media to provide compatability with the agency's current hardware and software. Before conversion to a different medium, agencies must determine that the authorized disposition of the electronic records can be implemented after conversion.

(f) Agencies shall back up electronic records on a regular basis to safeguard against the loss of information due to equipment malfunctions or human error. Duplicate copies of permanent or unscheduled records shall be maintained at a separate location.

(g) Maintenance of magnetic computer tape.

(1) Agencies shall test magnetic computer tapes no more than 6 months perior to using them to store electronic records that are unscheduled or scheduled for permanent retention. This test should verify that the tape is free of permanent errors and in compliance with National Institute of Standards and Technology or industry standards.

(2) Agencies shall maintain the storage and test areas for permanent and unscheduled computer magnetic tapes at the following temperatures and relative humidities:

Constant temperature—62 to 68° F.
Constant relative humidity—35% to 45%

(3) Agencies shall rewind under controlled tension all tapes containing unscheduled and permanent records every 3½ years.

(4) Agencies shall annually read a 3-percent statistical sample of all permanent and unscheduled reels of magnetic computer tape to identify any loss of data and to discover and correct the causes of data loss. Tapes with 10 or more errors shall be replaced and, when possible, lost data shall be restored. All other tapes which might have been affected by the same cause (i.e. poor

quality tape, hugh usage, poor environment, improper handling) shall be read and corrected as appropriate.

(5) Agencies shall copy permanent or unscheduled data on magnetic tapes before the tapes are 10 years old onto tested and verified new tapes.

(6) External labels (or the equivalent automated tape management system) for magnetic tapes used to store permanent or unscheduled electronic records shall include the following information: Name of the organizational unit responsible for the data; system and file title(s); dates of creation; dates of coverage; the recording density; type of internal labels; volume serial number, if, applicable; number of tracks; character code/software dependency; information about block size; and reel sequence number, if the file is part of a multi-reel set. For numeric data files, the external label should include record format and logical record length, if applicable; data set name(s) and sequence, if applicable; and number of records for each data set.

(7) Agencies shall prohibit smoking and eating in magnetic computer tape storage libraries and test or evaluation areas that contain permanent or unscheduled records.

(h) Maintenance of direct access storage devices.

(1) Agencies shall issue written procedures for the care and handling of direct access storage devices which draw upon the recommendations of the manufacturers.

(2) External labels for diskettes or removable disks used when processing or temporarily storing permanent or unscheduled records shall include the following information: name of the organizational unit responsible for the records, descriptive title of the contents, dates of creation, and identification of the software and hardware used.

§ 1234.30 Retention of electronic records.

Agencies shall establish policies and procedures to ensure that electronic records and their documentation are retained as long as needed by the Government. These retention procedures shall include provisions for:

(a) Scheduling the disposition of all electronic records, as well as related documentation and indexes, by applying GRS 20 or GRS 23 as appropriate or submitting an SF 115, Request for Records Disposition Authority, to NARAZ (see Part 1228 of this chapter). Electronic records systems, including those operated for the Government by a contractor, shall be scheduled as soon as possible but no later than one year after their implementation.

(b) Transferring a copy of the electronic records and any related documentation and indexes to the National Archives at the time specified in the records disposition schedule in accordance with instructions found in § 1228.188 of this chapter. Transfer may take place at an earlier date if convenient for both the agency and the National Archives and Records Administration.

(c) Establishing procedures for regular recopying, reformatting, and other necessary maintenance to ensure the retention and usability of electronic records throughout their authorized life cycle (see § 1234.28).

§ 1234.32 Destruction of electronic records.

Electronic records may be destroyed only in accordance with a records disposition schedule approved by the Archivist of the United States. At a minimum each agency shall ensure that:

(a) Electronic records scheduled for destruction are disposed of in a manner that ensures protection of any sensitive, proprietary, or national security information.

(b) Magnetic recording media previously used for electronic records containing sensitive, proprietary, or national security information are not reused if the previously recorded information can be compromised by reuse in any way.

Dated: November 8, 1988.

Don W. Wilson,

Archivist of the United States.

[AD-FRL-3486-2; Docket No. A-88-04]

Fourth Conference on Air Quality Modeling; Extension of Public Comment Period on New Air Quality Modeling Techniques

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Extension of public comment period.

SUMMARY: The EPA published information on new ambient air quality dispersion modeling techniques and other modeling related matters on August 23, 1988 (53 FR 32081-32084), and held a public conference on October 12 and 13, 1988, under section 320 of the Clean Air Act. The purpose of the conference was to advise the public of these new modeling techniques and to solicit public comment to guide EPA in its consideration of further revisions to the "Guideline on Air Quality Models (Revised)" (1986) and Supplement A (1987). The new modeling techniques and other items are fully discussed in the August 23, 1988, **Federal Register** notice mentioned above and will not be discussed in today's notice. The deadline for written public comments was set for December 15, 1988. Documents related to the modeling items are contained in Central Docket No. A-88-04. Information pertaining to the docket can be found in the Address Section of this notice.

In response to requests from various interested persons for additional time to examine and review documents contained in the docket and to assure that the public has ample opportunity to fully comment, EPA is today extending the time period in which to submit comments to February 13, 1989.

DATE: The new deadline for submitting written public comments is February 13, 1989.

ADDRESSES: Written comments should continue to be submitted (duplicate copies are preferred) to: Central Docket Section (LE-131), Attention: Docket A-88-04, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Docket No. A-88-04 is located in the Central Docket Section of the U.S. Environmental Protection Agency, South Conference Center, Room 4, 401 M Street SW., Washington, DC. The docket may be inspected at the above address between 8:00 a.m. and 12:00 p.m. and 1:00 p.m. and 3:30 p.m. on weekdays. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Joseph A. Tikvart (919) 541-5562 or Sharon Reinders (919) 541-5684.

Date: November 28, 1988.

Don R. Clay,

Acting Assistant Administrator for Air and Radiation.

40 CFR Part 52

[FRL-3483-4]

Approval and Promulgation of Air Quality Implementation Plans; Disapproval of an Exemption to Louisiana Air Quality Regulation 22.8 for the Sid Richardson Carbon and Gasoline Co. Carbon Black Plant in Addis, LA

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to disapprove a revision to the Louisiana State Implementation Plan (SIP) which would exempt the Sid Richardson Carbon and Gasoline Company (Sid Richardson), Addis, West Baton Rouge Parish, Louisiana, plant from further controls on acetylene as is now required by the Louisiana Air Quality Regulation (LAQR) 22.8.

EPA proposes to disapprove this SIP revision for the following reasons: (1) The revision involves a major volatile organic compound (VOC) source located in an urban ozone nonattainment area that must meet the standard of Reasonably Available Control Technology (RACT); (2) the revision request does not contain adequate support that the emission limitations now in the Louisiana SIP for this source are *not* RACT; (3) the Agency's review of the company's RACT analysis report shows that alternative controls are economically and technically feasible; and (4) EPA considers acetylene to be a reactive compound that has not been excluded from SIP demonstrations and thus, must be controlled.

EFFECTIVE DATE: Comments must be received on or before January 4, 1989.

ADDRESSES: Written comments on this action should be addressed to Mr. Thomas H. Diggs at the address below: U.S. Environmental Protection Agency, Region VI, Air Programs Branch, 1445 Ross Avenue, 6T–AN, Dallas, Texas 75202–2733.

Copies of the documents relevant to this proposed action may be examined at the location above or at the following location during normal business hours: Louisiana Department of Environmental Quality, Air Quality Division, Land and Resources Building, 625 N. 4th. Street, Baton Rouge, Louisiana 70804.

FOR FURTHER INFORMATION CONTACT: Barbara Durso at (214) 655–7214, or FTS 255–7214.

SUPPLEMENTARY INFORMATION: On April 4, 1979, at 44 FR 20372, EPA published its policy for approving 1979 SIP revisions for nonattainment areas under Part D of the Clean Air Act. One of the provisions required the States to adopt regulations that represent RACT for stationary sources covered by an EPA Control Technology Guidance (CTG) document and for any other major source as needed to assure reasonable further progress (RFP) and attainment. On February 14, 1980, at 45 FR 9903, EPA approved the Louisiana Ozone Attainment Plan and incorporated it into the SIP. As part of the attainment plan, Louisiana adopted regulation 22.8, the waste gas stream regulation. This rule requires sources to combust waste gas streams containing nonhalogenated compounds at 1300° Fahrenheit for 0.3 seconds or greater in a direct-flame afterburner or an equally effective device and applies across the State to all sources regardless of size. A company can seek an exemption if it can demonstrate that it emits less than 100 tons per year (tpy), and that it either cannot support the combustion without it using auxiliary fuel or it cannot practically or safely accomplish the combustion without causing economic hardship. EPA must approve any such exemption before the SIP can be amended federally.

The Baton Rouge nonattainment area was to have achieved the National Ambient Air Quality Standard for ozone by December 31, 1982. Both East and West Baton Rouge parishes continued to exceed the standard after the deadline, and on February 14, 1984, EPA requested a revision to the ozone SIP for those parishes.

Although other air quality control regions (AQCRs) in Louisiana were also not in attainment by that date, EPA excluded rural areas from the SIP calls, because the Agency believed that attainment in urban areas would assure reasonable further progress (RFP) and attainment in those rural areas.

EPA's post '82 SIP policy requires RACT for stationary sources in urbanized areas for which EPA has issued a CTG document, and it requires control of additional sources where necessary to achieve RFP in the area of the SIP call. To satisfactorily demonstrate RFP, a SIP must include among other things RACT for all major source categories besides those that were covered by a CTG document. (See 44 FR 20377.) Because Sid Richardson is a major non-CTG source located in the metropolitan Baton Rouge AQCR, the company must implement RACT. EPA holds that LAQR 22.8(a) is RACT for Sid Richardson and that control of acetylene emissions is required.

The State of Louisiana argues, on the contrary, that the proposed SIP revision is acceptable for several reasons. First, available data show that acetylene has low photochemical reactivity and toxicity. Second, the ozone modeling that includes the demonstration of attainment in the Baton Rouge area did not consider controlling acetylene emissions from the Sid Richardson Addis plant. Third, incineration of the tail gas would require auxiliary fuel, extensive capital cost and significantly increased operating costs.

In addition to the arguments put forth by the State in its official submittal to EPA, Sid Richardson prepared a RACT analysis, which was sent to the Louisiana Department of Environmental Quality (LDEQ) in a letter dated December 12, 1986. The State passed along a copy of this report to EPA for informal consideration. Later, in a letter dated March 12, 1987, Sid Richardson sent LDEQ two other documents to supplement its RACT analysis. Finally, the State submitted an updated SIP revision on May 29, 1987, that clarified some language and also incorporated the company's December RACT analysis and the March amendments. Meanwhile, Sid Richardson identified some of the information contained in its RACT analysis as "confidential" in a letter to EPA on May 29, 1987. EPA has reviewed this information and the company's support for its claims of confidentiality and agrees that this information cannot be released for public inspection. This information includes, among other things, pre-tax profit margin, product manufacturing costs, and fuel costs for a defunct flare at the facility. The information in the public docket includes the following: the Sid Richardson RACT analysis, the Agency's initial review of that document, the Agency's revised review of that document, and the EPA technical evaluation and any other relevant document or information that has not been declared confidential. EPA Review

A. Reactivity of Acetylene

In response to the State's claim that data show acetylene to have low reactivity, EPA counters that because the existing, published data show the reactivity of acetylene to range from 0.6 to 3 times that of ethane (EPA's standard for atmospheric photochemical reactivity), the best statement on the matter is that the data are inconclusive. Recent studies show acetylene to be 2.73 times more reactive than ethane, which contradicts previously published evidence that acetylene is only 0.6 times more reactive than ethane. Since 1977, EPA's policy has been that all VOCs are to be included in SIP control strategies except those which have been listed specifically as exempt in the **Federal Register**. So far, four compounds were listed as exempt on July 8, 1977, at 42 FR 35314; another was listed as exempt on June 4, 1979, at 44 FR 32042; and six freon compounds were listed on July 22, 1980, at 45 FR 48941. EPA exempted these eleven chemicals from consideration, because scientists have determined that the compounds have "negligible" photochemical reactivity.

Acetylene is not an exempt agent, nor has it been proposed for exemption.

B. Sid Richardson's Present Control

The Sid Richardson Addis plant vents about sixty percent of its tail gases through the primary filter stacks. The emissions from these stacks contain an average of 0.21 percent acetylene, or slightly more than 1500 tpy. The actual composition of these emissions varies with the grade of carbon black being produced.

The tail gases not emitted from the primary filter stacks, approximately forty percent, are routed to the pellet dryers as low BTU fuel. The emissions from the dryer stacks do not contain acetylene.

C. Louisiana's Modeling Support

The State contends that its air quality modeling supports the position that acetylene emissions from Sid Richardson will have no adverse effect upon attainment of the ozone standard in the Baton Rouge area. The modeling submitted by the State in support of its post '82 SIP demonstrates that a twenty-one percent VOC reduction is necessary in the Baton Rouge area to attain the standard by December 31, 1987.

In a letter dated January 30, 1987, the State discussed supplemental ozone modeling performed by LDEQ using the OZIPM–2 model for each day that could have any impact on the ozone SIP. LDEQ determined that the parcel of air passed over the plant on three days and adjusted the value for the VOC emissions put into the calculations to reflect the plant's acetylene emissions in accordance with the carbon bond III photochemical mechanism used in the model. The results showed that none of the VOC requirement changed and the level of reduction remained at twenty-one percent. EPA is not surprised by the State's finding, because the model used is an EKMA model that is not sufficiently sensitive to small changes in emissions and would not produce significant changes in ambient ozone levels or the resulting control target. Therefore, EPA rejects the State's analysis of the ozone modeling results.

D. RACT Analysis

As mentioned above, EPA has reviewed Sid Richardson's RACT analysis submitted to LDEQ and disagrees with the conclusion that any of the three methods of control presented in the document will cause economic hardship. Sid Richardson evaluated three alternatives for control of acetylene emissions: flaring, thermal combustion, and cogeneration. The company concludes that none of the alternatives is economically feasible. However, EPA's analysis shows that the installation of any of these three options will not cause an adverse economic impact. Indeed, installation of a cogeneration unit with the use of the tail gas emissions as fuel in steam boilers—which according to EPA's evaluation is the most capital intensive option—will generate savings.

1. Economic Review

EPA prepared its economic analysis with financial estimates that would be directly comparable to information prepared for NSPS and CTG analyses over the past ten to fifteen years for various industries. Therefore, EPA used constant 1986 dollars and a 5% discount rate without tax consideration rather than annual inflation adjusted dollars and a 10.3% discount rate with tax consideration. Sid Richardson based its economic review upon standard accounting tax, depreciation, and debt retirement. The company believes that its method is superior for a site specific RACT analysis, because it uses factors that it asserts are what businesses actually consider when determining whether or not to spend capital dollars on a long-term project.

EPA, on the other hand, maintains that tax effects and inflation are two factors which produce the greatest distortions among industries when preparing cost analyses. EPA's approach to regulate these distortions is to ignore tax effects and to use constant dollars to adjust for inflation. The result of ignoring tax effects is to actually overstate the cost of the project. Finally, EPA's decision to use constant 1986 dollars and a discount rate of five percent produces essentially the same results as Sid Richardson's use of five percent inflation and a ten and one-half percent discount rate (i.e., 5.5% real discount rate for Sid Richardson's calculations versus 5% discount rate for EPA's figures).

Another major disagreement between the two economic analyses concerns the estimation of the useful life of the hardware for the cogeneration unit. EPA considers twenty years as a reasonable estimate for calculating depreciation; whereas, Sid Richardson contends the unit will have a much shorter life of five to ten years. The company argues that EPA agreed to the ten-year expected life for the flares and for the combustor and that similar consideration should be given to the cogeneration facility. However, EPA stands by its decision to use the depreciation values published by the Internal Revenue Service in its publication 534, "Depreciation," for Electric Utility Combustion Turbine Production Plant and considers the equipment lifespan given in this publication to be generally acceptable. EPA believes that the company would have to provide more documentation to support an accelerated schedule for depreciation.

In general EPA finds little support for economic infeasibility or adverse economic impact. EPA concludes that the cost per ton of VOC control is reasonable and is lower than for many other regulated sources. Furthermore, EPA finds that each of the options for control of acetylene seems economically viable, and, in fact, the cogeneration control option would result in a net savings.

2. Technical Review

a. Flares

In its RACT analysis, Sid Richardson claims that installation of flare stacks could not comply with the combustion parameters of 1300 °F for 0.3 seconds as specified in LAQR 22.8. EPA does not fully agree with this statement, because while flares may not comply with such parameters, the efficiency of flares is measured by other criteria, e.g., BTU content of gas, gas velocity and residence time. Generally, flares have an efficiency of about 98% or greater combustion of hydrocarbons.

Given this estimation of efficiency, installation of flares for control of acetylene emissions will burn more waste gas than the 41% now combusted at the Addis plant. Sid Richardson believes that the installation of flares will "pose a significant hazard to plant personnel and process equipment." However, certain factors regarding the design and the location of the flare need to be taken into account when determining the potential hazard. Sid Richardson does not address issues like these in its RACT analysis.

b. Combustors

Sid Richardson's second alternative in the RACT analysis for control of acetylene emissions is the installation of a thermal combustor. Basically, a combustor is a furnace especially designed to burn waste gases. For combustion to take place, additional fuel of approximately 10% enrichment with natural gas and air must be exposed to a temperature high enough to oxidize the VOCs. With this alternative, as with the previously discussed installation of flares, the combustion products are released to the atmosphere. This alternative is energy consumptive, yet, at the same time, it generates heat that may be of some use to another process.

VOL 53 ISS 233 DE 5 1988 UMI

Sid Richardson alleges that the plant has no use for the heat generated by the combustor, and it also asserts that extreme care must be taken to control the tail gas flow from the combustor. Excess suction on the system, for example, could collapse the primary filters or pull in atmospheric air that could then cause an explosion anywhere in the collection and combustion system. While EPA agrees that there are safety concerns associated with a combustor, the Agency believes that this means is technically feasible with proper engineering safeguards to serve as a control on acetylene emissions.

c. Cogeneration

Sid Richardson's third alternative is cogeneration. This alternative does not consume as much energy as a combustor and can produce electricity. Also, this alternative does not pose a hazard to plant personnel or process equipment. The installation of a cogeneration unit for the purpose of controlling acetylene emissions is economically and technically feasible.

The company claims that alternative is impractical, because the electricity is of no use to the local consumer power company. EPA notes that Sid Richardson does not state if the energy is of use within its own plant. EPA believes that the energy produced could be useful to the local power company given a rate increase.

E. Major Sources in Nonattainment Areas

The Sid Richardson Addis plant emits 1,514 tons per year acetylene and thus qualifies as a major source. The plant is located in West Baton Rouge Parish, an urban ozone nonattainment area under a SIP call for failure to meet the 1982 ozone attainment deadline. EPA's policy requires RACT for all sources covered by a CTG document and for all other major sources in any ozone nonattainment area that failed to meet the December 31, 1982, deadline. Because of Sid Richardson's size and location, the company must control its acetylene emissions to the RACT standard. At this time, the only applicable RACT control in the existing SIP covering vent gas emissions is LAQR 22.8; therefore, an exemption from control limits for emission of acetyelene cannot be approved. Of course, LDEQ may propose to EPA an alternative method of control equivalent to RACT.

Proposed Action

EPA proposes to disapprove the exemption of further control of acetylene emissions for the Sid Richardson Carbon and Gasoline Company, Addis, Louisiana, for the following reasons:

(1) The source is located in an urban area currently designated as nonattainment for ozone and must be covered by a SIP that requires RACT for all major sources;

(2) The revision request does not adequately support its argument that the emission limitations already in the Louisiana SIP for this source are not RACT;

(3) The State has not demonstrated to EPA that Regulation 22.8 of the LAQR for control of VOC from tail gas emissions cannot be technically or economically met; and

(4) Even though acetylene may have a low reactivity compared to certain other VOCs, EPA still considers it to be a reactive chemical and has not specifically exempted it from SIP demonstrations. Therefore, acetylene emissions must be controlled.

Pursuant to the provision of 5 U.S.C. 605(b), I certify that this action will not have a significant economic impact on a substantial number of small entities, because it affects only one source and imposes no new requirements on the source.

Under Executive Order 12291, this action is not "MAJOR." EPA submitted this proposed rulemaking action to the Office of Management and Budget (OMB) for review.

[FRL 3486–1]

Approval and Promulgation of State Implementation Plans; Utah; Stack Height Analyses and Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed approval.

SUMMARY: EPA is today proposing to approve the Kennecott stack height demonstration analyses as submitted in the Utah Stack Height State Implementation Plan (SIP) on May 2, 1986, with subsequent submittals on October 6, 1986, December 3, 1986, November 13, 1987, and May 17, 1988. The effect of this action is to propose approval of the stack height credits of the Kennecott Minerals Company smelter in Magna, Utah, with respect to EPA's revised stack height regulations.

The revised stack height regulations, promulgated on July 8, 1985, 50 FR 27892, required review of stack height credits in each State's implementation plan for consistency with the regulations. Today's action addresses only the Kennecott stack height analyses which were submitted as part of the Utah Stack Height SIP. EPA is addressing all the other parts of the Utah Stack Height SIP in a separate rulemaking (proposed approval, February 3, 1988, 53 FR 3052).

Approval of the Kennecott stack height credits would satisfy the condition stated in EPA's prior approval of the Kennecott portion of the Utah SO_2 SIP (February 20, 1985, 50 FR 7056) and thereby fully approve the Utah SO_2 SIP.

DATES: Comments must be received on or before January 4, 1989.

ADDRESS: Written comments should be addressed to: Douglas M. Skie, Chief, Air Programs Branch, Environmental Protection Agency, Denver Place, Suite 500, 999 18th Street, Denver, Colorado 80202–2405.

Copies of the State's submittals are available for public inspection between 8:00 a.m. and 4:00 p.m., Monday through Friday, at the following office: Environmental Protection Agency, Region VIII, Air Programs Branch, Denver Place, Suite 500, 999 18th Street, Denver, Colorado 80202–2405.

FOR FURTHER INFORMATION CONTACT: Lee Hanley, Air Programs Branch, Environmental Protection Agency, Denver Place, Suite 500, 999 18th Street, Denver, Colorado 80202–2405, (303) 293–1762, FTS 564–1762.

SUPPLEMENTARY INFORMATION:

I. Background

A. Regulatory History

On February 8, 1982 (47 FR 5864), EPA promulgated final regulations limiting stack height credits and other dispersion techniques as required by section 123 of the CAA. These regulations were challenged in the U.S. Court of Appeals for the D.C. Circuit by the Sierra Club Legal Defense Fund, Inc., the Natural Resources Defense Council, Inc., and the Commonwealth of Pennsylvania in *Sierra Club* v. *EPA*, 719 F.2d 436 (D.C. Cir. 1983). On October 11, 1983, the court issued its decision ordering EPA to reconsider portions of the stack height

regulations, while upholding other portions. As a result, EPA promulgated revisions to the stack height regulations on July 8, 1985 (50 FR 27892) [1]. The revisions redefined a number of specific terms including "excessive concentrations", "dispersion techniques", "nearby", and other important concepts, and modified some of the bases for determining good engineering practice (GEP) stack height credit.

Pursuant to section 406(d)(2) of the CAA, each state was required to (1) review and revise, as necessary, its SIP to include provisions that limit stack height credit and other dispersion techniques in accordance with the revised regulations, and (2) review all existing emission limitations to determine whether any of these limitations have been affected by stack height credits greater than GEP, or any other dispersion techniques. For any limitations so affected, each state was to prepare revised limitations consistent with the revised stack height regulation.

Subsequently, EPA issued detailed guidance on carrying out the necessary reviews. For the review of emission limitations, each state was to prepare an inventory of stacks greater than 65 meters in height and sources with emissions of sulfur dioxide (SO_2) in excess of 5,000 tons per year. These limits correspond to the *de minimis* stack height and the *de minimis* SO_2 emission level provision in the regulations. These sources were then subjected to detailed review for conformance with the revised federal regulations. State submissions were to contain an evaluation of each stack and source in the inventory.

Subsequent to the July 8, 1985, promulgation, the stack height regulations were again challenged in *NRDC* v. *Thomas*, 838 F.2d 1224 (D.C. Cir. 1988). On January 22, 1988, the U.S. Court of Appeals for the D.C. Circuit issued its decision affirming the regulations, for the most part, but remanding three provisions to the EPA for reconsideration. These are:

1. Grandfathering pre-October 11, 1983, within-formula stack height increases from demonstration requirements [40 CFR 51.100(kk)(2)];

2. Dispersion credit for sources originally designed and constructed with merged or multiflue stacks [40 CFR 51.100(hh)(2)(ii)(A)]; and

3. Grandfathering pre-1979 use of the refined H + 1.5L formula [40 CFR 51.100(ii)(2)].

However, none of these provisions is at issue here.

B. Regulatory Requirement for Stacks Greater Than GEP

GEP has been established by the regulations to be the greater of: (1) 65 meters, (2) the height derived through application of one of two formulas which base GEP on the dimensions of nearby buildings, or (3) the height demonstrated through a field study or fluid modeling demonstration to be necessary to avoid excessive concentrations of any air pollutant due to downwash, eddies, or wakes caused by the source itself or nearby buildings or terrain obstacles (40 CFR 51.100(ii). where EPA or a State finds that a source emission limit is affected by dispersion from a stack in excess of GEP, the State must then model to establish an emission limit which will provide for attainment of the national ambient air quality standards (NASAQS) when stack height credit is restricted to GEP.

The term "excessive concentration" is defined in the regulations to be a 40 percent increase in concentrations of any air pollutant due to downwash which also results in an exceedance of an applicable NAAQS or prevention of significant deterioration (PSD) increment. In order to demonstrate that stack height in excess of the GEP formulas is needed, a source owner must shop through the use of fluid modeling that, when meeting emission rates equivalent to the new source performance standard applicable to the source category, excessive concentrations would result from the use of a shorter stack height. However, a source may demonstrate that the NSPS emission limit is infeasible, establishing an alternative emission limit that represents the most stringent degree of emissions control feasible for the particular source. In making this demonstration, source owners may generally rely on EPA's Guidelines for the Determination of Best Available Retrofit Technology for Coal-Fired Power Plants and Other Existing Stationary Facilities, EPA 450/3–80–009b, November 1980 (BART Guideline) [2].

C. The Utah Stack Height SIP

The Utah Stack Height SIP was submitted with a letter dated May 2, 1986, by Governor Norman H. Bangerter. The submittal included regulations to address (1) GEP stack height credit and dispersion techniques, (2) a new Section 17 of the SIP that lists all existing stacks in Utah greater than 65 meters, and (3) a technical support document for section 17G of the SIP. The Kennecott Magna stack analyses were part of this submittal. Subsequent submittals to support the Kennecott analyses were received in letters dated October 6, 1986, December 3, 1986, November 13, 1987, and May 17, 1988.

The Kennecott smelter stack height credit is a significant comonent of the Utah SO_2 emission limits conditionally approved on February 20, 1985. Briefly, a condition in that approval required the State to determine whether the 1215 ft. stack would be GEP once the revised stack height regulations were promulgated. If not, the emission limit would then be revised as necessary.

II. Stack Height Evaluation

A. Applicability of the NSPS Regulation

The federal NSPS regulation for primary copper smelters applies to any such facility that commences construction or modification after October 16, 1974 [3] (42 FR 37937, July 25, 1977 and 40 CFR 60.160). Modification generally means any physical or operational change which results in an increase in the emission rate to the atmosphere. NSPS requires, among other things, control of the strong gas streams with a double contact acid plant (i.e., a stack gas of 650 ppm or less SO_2, based on a 6–hour average [3, 4] (EPA 450/3–83–018a)).

The Kennecott Magna smelter expansion/modification began in the early 1970s, with a commitment to the 1215 ft. stack in 1973 [5] and completion of the project in 1977 [6, 7]. The modification of the acid plant system resulted in an increase from 60% sulfur capture to 86%; approximately a 65% reduction of sulfur emission [5, 6]. Based on the above information, EPA concluded that the 1970s Kennecott expansion/modification did not subject the smelter to NSPS requirements.[8]

B. Stack Height Analyses

The Kennecott stack height analyses were undertaken to comply with the July 8, 1985 stack height regulation as well as the condition specified in the approval of the Utah SO_2 SIP. The reader should refer to the February 20, 1985, final approval (50 FR 7056) and March 23, 1984, proposed approval (49 FR 10946) **Federal Register**,[9, 10] actions for additional information on the Utah SO_2 SIP.

Kennecott originally had two 400 ft. stacks (grandfathered stack heights) from which SO_2 emissions from the smelter were vented. The 1970s modification/expansion included the replacement of the 400 ft. stacks with a single 1215 ft. stack. The formula height (H+1.5L), considering the nearby buildings, is 212.5 ft. Therefore, to

demonstrate that the 1215 ft. stack is GEP, Kennecott was required to perform a fluid modeling or a field study.

There are two basic parts of the Kennecott analyses: the GEP demonstration and BART analysis. The GEP demonstration consists of three subparts: The fluid modeling protocol, the fluid modeling results, and an evaluation of the fluid modeling results with respect to the stack height regulations.

The BART analysis is peformed if the source contends that the NSPS emission limits are infeasible. Relevant factors for this analysis include: High cost-effectiveness ratio, excessive local community impact, and excessive plant impact, and technology infeasibility.

These issues, and the responses to these issues, are discussed below.

1. GEP Determination

a. *Fluid Modeling Protocol.* As stated above (under Regulatory History), the purpose of the fluid modeling study,[11] for determining GEP stack height, is to demonstrate the stack height needed to avoid excessive concentrations caused by the effects from nearby structures or terrain obstacles. The construction of a fluid model requires that the flow in the test facility (e.g., wind tunnel) be appropriately fixed and, along with the surface roughness, terrain, and/or buildings, scaled to accurately reproduce atmospheric phenomena. Wind tunnel modeling is ideally suited for this type of determination, since the model structure or terrain feature being studied can be easily removed to assess its effect. More importantly, a properly designed wind tunnel study can account for the aerodynamically-induced influences affecting the dispersion of the stack effluent. The stack and plume from the source are also similarly scaled.

Upon promulgation of the July 8, 1985 rules, Kennecott initiated efforts to conduct a fluid modeling study. A meeting between Kennecott and the State of Utah was held on September 17, 1985, to discuss the fluid modeling study protocol. EPA attended this meeting and identified requirements regarding stack parameters, number of concentration profiles and sampling positions. The need for modeling fugitive emissions for the purpose of providing estimates of background concentrations was also identified by EPA. Kennecott then made revisions to the protocol to address these issues. EPA evaluated the final GEP analyses and determined that the study followed the proposed protocol.[12]

b. *Fluid Modeling Results.* A two-part test must be met in justifying the excessive concentration definition. That is, the fluid model must show that the downwash effect of nearby terrain on the 1215 ft. stack height results in a 40% increase in the ground maximum level concentrations compared to the maximum concentration without the nearby terrain. The fluid model must also show that the increase of these concentrations will cause an exceedance of the NAAQS or applicable PSD increment.

The Kennecott fluid model results are documented in the Good Engineering Practice Stack Height Demonstration report dated February 1, 1986. The report discusses the excessive concentration caused by the nearby terrain, the Oquirrh Mountains, which rise 4,720 feet above the base of the stack. In documenting an exceedance of the SO_2 NAAQS, the actual emissions during 1982 were used, in conjunction with a calculated wind persistence frequency for the conditions used in the wind tunnel. (1982 constituted a year in which essentially full operation occurred and measured stack emission rates are available.)

Two critical issues which were raised concerning the adequacy of the fluid model were: The emission rates used, and the terrain amplification factor (TAF). Kennecott had stated that the NSPS presumptive rate was infeasible, and proceeded to use the emission rate approved in the SO_2 SIP of February 20, 1985 (50 FR 7056). the acceptability of this approach was questioned by EPA during the early discussion of the fluid modeling protocol. Discussion of the BART review is provided below.

TAF is a relatively recent documented concept, useful for expressing how the enhanced atmospheric turbulence caused by a terrain obstacle affects emissions released at various heights above the ground near the obstacle. Within the terrain wake region, the value of the TAF will generally be greater than one indicating that the concentration will be higher with the presence of the terrain feature than the concentration in flat terrain. For a few simple types of terrain obstacle, TAF values based on wind tunnel studies have been published.

The issue relating to TAF was raised during EPA's review of the Kennecott report of February 1, 1986. For this study, it appears that the TAF values decrease at certain levels below stack top. There is a possibility, therefore, that the values less that the threshold 1.4 ratio may occur at a height less than those tested in the wind tunnel.

In a response dated November 13, 1987, Kennecott provided discussion on the TAF findings by stating its approach to the fluid modeling study. That is, fluid modeling beginning at the GEP formula height was not done, rather, it followed EPA guidance in starting at actual stack height.

As stated earlier, formula height based on a nearby building is 212.5 ft.; the grandfathered stack height is 400 ft. Since the study was to demonstrate whether the existing stack height met the 40% increase in ground level criterion, Kennecott, therefore, with the State of Utah and EPA participation, decided to initiate the fluid modeling for a stack equivalent to the existing 1215 ft. (370.4m) stack, and subsequently examine stack heights above (431m and 492m) and below (248m) the existing stack until the 40% excess concentration was defined. The TAF values for the Utah stack apparently exhibit an envelope downwind from the terrain obstacle not entirely anticipated in EPA's 1985 guidance. The TAFs documented by Kennecott define a portion of the lower part of the envelope for the specific location of the stack.

From the modeling results, the existing stack height of 370.4m has been shown to meet the 40% criterion due to terrain effects; and, an exceedance of the NAAQS at Multi-point Rollback (MPR) emission rates.[13] This stack height evaluation satisfies the excessive concentration criteria in EPA's regulations if MPR reflects the proper emission rates. (Discussion of the MPR emission rates for Kennecott can be found in 49 FR 10948, March 12, 1983, proposed rulemaking.) After review, EPA concluded that Kennecott's analyses are acceptable since Kennecott performed a fluid modeling study consistent with existing guidance and the study was approved by EPA.

2. BART Analyses

a. BART Concept. Determining BART for stack height submittals necessarily must be a case-by-case demonstration. The basic conclusion which must be reached to justify an emission limit different than the NSPS is that the presumptive NSPS limitation cannot feasibly be met by the individual facility.[14]

Most of the relevant factors for a feasibility determination will fall into one or more of four categories as discussed in detail below.

High Cost Effectiveness Ratios. In order to assess cost effectiveness of compliance options, a submittal should document the incremental number of tons of emission reduction expected for each level of compliance stringency, and the incremental cost to achieve that level. This incremental cost should be put into context by comparing it to

incremental compliance costs incurred by new sources.

In assessing compliance costs which involve control devices, the new control equipment's useful life should be consistent with that used by EPA in assessing the NSPS. An exception to this is in evaluating a facility which can document that it has a limited remaining useful life. In this case, the amortization period for the equipment should be the same as that of the facility.

The basis used to estimate costs should be clearly delineated and documented. For some sources, the costs should be consistent with the appropriate NSPS background information document, adjusted for plant-specific circumstances, or should be based on plant-specific engineering analysis. For sources proposing process changes, the costs should be net of any other benefits (e.g., additional saleable product, reduced maintenance costs, etc.). Because the annualization of capital costs can be somewhat sensitive to the discount rate chosen, EPA would recommend that calculations be made using real discount rates of 5, 7, and 10%. Since the real discount rate is in constant-year dollars, there is no need to incorporate any inflation estimates.

Excessive Employment/Community Impacts. This portion of an impact assessment will necessarily be less quantitative than other sections. In essence, it should look at the impacts of the changes necessary for compliance in the context of people external to the firm. For instance, jobs lost due to the closing of the facility, impacts on major customers of price increases to the extent they will be passed on to these customers, or other significant impacts, should be documented.

Excessive Plant Impacts. For a source in a competitive market, any unrecovered costs incurred will adversely impact the profitability of a facility. Reduced profitability is not a sufficient basis by itself to judge adverse plant impacts. It is important to place these impacts on profitability in context, such as demonstration of the impact on the viability of the facility. While closure is not the only impact contemplated, the impact needs to be tangible and significant. If the plant will suffer other impacts short of closure, the impact projected for the facility, the basis for this conclusion, and the impact on the firm should be documented. If closure is expected, the evaluation should demonstrate that, as a result of the emission limit, revenues will not be sufficient to recover compliance costs and plant variable charges.

Technological Infeasibility. In some measure, technological infeasibility is tied to cost effectiveness since, in most cases, it is technologically feasible to comply at some cost, however large. However, there may be a few circumstances for some NSPS categories where NSPS compliance cannot be achieved regardless of cost. Where technological factors relating to the facility adversely impact the feasibility of operation, these factors should be clearly delineated in the analysis.

b. Kennecott BART Review. Responses to the above factors were presented in the November 13, 1987 and May 17, 1988 Kennecott submittals. Responses were provided regarding the community and plant impact, however, the key to this review is the determination on the adequacy of the cost-effectiveness ratio and the technical infeasibility issues. The cost-effectiveness ratio and the technical infeasibility issues, however, cannot be discussed separately from the emission limits used in the GEP analyses.

Emission limits for Kennecott's Magna smelter are set in consideration of the much higher degree of variability in SO_2 emissions in the smelting process than occurs in combustion sources of SO_2 such as coal-fired boilers. The technique used for deriving these emission limits is MPR. Very simply described, this technique establishes a series of emission rates which are each permitted to occur no more than a certain specified number of hours out of each year. These emission rates reflect a number of operating conditions at the smelter, including start-up and shutdown emissions, upset and malfunction conditions, and emissions from stable operating conditions.

The purpose for establishing a BART emission rate in the 1985 stack height regulations was to prevent source owners from using unreasonably high emission rates to justify credit for excessive stack heights. The regulations require that sources faced with excessive concentrations due to downwash should be required to attempt to reduce those concentrations by reducing those emissions to the degree feasible before seeking credit above the GEP formula. The benchmark for this requirement is the NSPS, or an alternative level of control established through the application of BART if NSPS is found to be infeasible.

Application of the level of control required by NSPS would reduce the emissions of SO_2 at the Magna smelter during the stable process phase, but would not affect emission rates under start-up, shutdown, malfunction, and upset conditions (as defined in 40 CFR 60.2). This is because the NSPS emission rate is for normal operations and includes express exclusion for such process conditions (see 40 CFR 60.2). Thus, when a downwash analysis is performed, the highest permissible emission rates established through NSPS or MPR (which includes the upset conditions) would not be affected by any additional controls impacting the stable process stage and would continue to produce the same determination of GEP.

From the assessment Kennecott has performed, considering only long-term averages, the cost portions are consistent with the tons of SO_2 reduction expected from similar NSPS applications. However, as noted above, in the case of the Kennecott BART analysis, the controlling emissions for the determination of GEP appear to be those under upset, malfunction, start-up, and shutdown conditions. Hence, while there would be no difference in emission rates under these other conditions as a result of meeting NSPS, there would be a substantial additional cost.

In summary, the emissions at the Magna smelter from start-ups, shutdowns, upsets, and malfunctions are included in the MPR emission limits and must be considered in the NAAQS attainment and GEP analyses. Application of NSPS technology will not affect these emission rates and will, therefore, result in no change in demonstrated GEP. Thus, it may be possible to reduce annual emissions by requiring additional controls on the Magna smelter, but such reductions will have no relevance to the limiting case for determination of GEP. EPA, therefore, concludes that the existing emission limits are the appropriate emissions to apply in Kennecott's GEP analysis.[15]

III. Clarification of the Issues

As stated above, EPA has reviewed the Utah Stack Height SIP and subsequent submittals from Kennecott. With these submittals, EPA concludes that the existing stack height of 1215 ft. is GEP, and that the NSPS does not apply to the GEP determination.

However, assumptions that were part of this decision should be clarified. In the analyses, and in the determination to use the actual SIP emission limits, the capacity and efficiency of the acid plants and the cost associated with these plants to maintain, upgrade, and/or replace, were critically evaluated. In the Kennecott evaluation:

1. 1982 emission data were used; 1982 constituted a year in which essentially full smelter capacity occurred following the modification/expansion.

2. The MPR limit was justified as part of the GEP demonstration.

3. The analyses considered the upgrading and replacing of four single contact acid plants. (The acid plants, #5, 6, 7, and 8, capacities and efficiencies were the key elements to the MPR emission limit.) However, from the May 17, 1988 submittal:

a. #5 acid plant was retired in 1982 "because it leaked so much gas at low elevation that is did more environmental harm than good. No maintenance has been done on it since 1982. Replacement is the only option."

b. #6 is presently shut down but could be restarted "for increased smelting capacity."

c. #7 and #8 are presently operating. In addition, #7 and #8 are operating under an approved permit [16] issued by the State of Utah, dated June 23, 1987. Although the permit was not part of the actual State or Kennecott submittal, it is a part of the public information document and is subject to EPA's NSR oversight. The permit restricts the smelter operation to two vessels (two reactors, two converters, or one of each) at any one time, prohibits bypassing of the acid plants except for start-up, shutdown and upset conditions, and contains recordkeeping requirements. The permit is, for the most part, consistent with EPA's approval of the State's NSR program and the Utah Air Conservation Regulation (UACR) 4.3.2. UACR 4.3.2. was part of EPA's approval of the Utah SO_2 SIP which requires specific compliance measures of the smelter, specifically for SO_2 emission control. Such provision cannot be made less stringent without a SIP revision.

4. EPA is not requiring Kennecott to upgrade to the NSPS levels. However, should modification to acid plants #5, #6, #7 or #8 occur outside the normal operation defined in the existing permits, the SO_2 SIP, and that described in these analyses, Kennecott would be subject to review under UACR 3.1.8., and any other applicable State and Federal regulations. EPA is citing UACR 3.1.8. to clarify that replacement of #5 or upgrading of #6 acid plants, would require compliance with any now existing State and Federal requirements. Further, replacement of #5 or upgrading or replacement of #6, #7, or #8 should be evaluated for applicability of the NSPS reconstruction provision (40 CFR 60.15).

EPA expects that the State will follow its past practice in reviewing any changes to the Kennecott facility. Under the existing NSR program, any change that constituted a modification would require application of additional controls consistent with the BACT requirement in that program, and in no event shall the required controls be less stringent than NSPS (49 CFR Subpart P).

An additional area that EPA expects should be addressed in any future permit revision is the definition of what situations constitute start-up, shutdown, and upset conditions. Definitions of these terms appear at 40 CFR 60.2; and EPA recommends that these definitions be evaluated for inclusion in any such permit.

EPA Action

EPA today proposes to approve the Kennecott GEP analyses justifying the 1215 ft. stack and affirms the previously approved MPR emission limit. The fluid modeling study and BART analysis satisfy the requirements of the revised stack height regulations.

With the proposed approval of the GEP height, today's action would also remove the condition in the prior approval of the Utah SO_2 SIP.

Under 5 U.S.C. Section 605(b), I certify that this SIP approval will not have a significant economic impact on a substantial number of small entities.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Authority: 42 U.S.C. 7401–7642.

Date: November 26, 1988.

40 CFR Part 435

[FRL-3486-3]

Oil and Gas Extraction Point Source Category, Offshore Subcategory; Effluent Limitations Guidelines and New Source Performance Standards; Extension of Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Extension of comment period on notice of data availability.

SUMMARY: On October 21, 1988, EPA published in the **Federal Register** a notice of data availability pertaining to effluent limitations guidelines and new source performance standards for the offshore subcategory of the oil and gas extraction point source category (53 FR 41356). The comment period on that notice of data availability was announced to end on December 5, 1988. EPA is today extending the comment period to end on January 19, 1989.

DATE: Comments on the October 21, 1988, notice of data availability must be submitted by January 19, 1989.

ADDRESSES: Comments should be sent to Mr. Dennis Ruddy, Industrial Technology Division (WH-552), Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

The supporting information and data described in the October 21, 1988, notice of data availability are available for inspection and copying at the EPA Public Information Reference Unit, Room 2402 (rear of EPA Library), 401 M Street SW., Washington, DC. The EPA public information regulation (40 CFR Part 2) provides that a reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Technical information may be obtained from Mr. Dennis Ruddy at the above address, or call (202) 382-7131. Economic information may be obtained from Ms. Ann Watkins, Economic Analysis Branch (WH-586), at the above address or call (202) 382-5387. Environmental assessment information may be obtained from Ms. Alexandra Tarnay, Monitoring and Data Support Division (WH-553), at the above address or call (202) 382-7036.

SUPPLEMENTARY INFORMATION: On October 21, 1988, EPA published a notice of data availability in the **Federal Register** (53 FR 41356) presenting and analyzing new information for the purpose of establishing best available technology (BAT) effluent limitations guidelines and new source performance standards (NSPS) for the drilling fluids and drill cuttings waste streams generated by offshore oil and gas extraction facilities.

The October 21, 1988, notice established a 45-day period in which the general public was invited to submit comments on all aspects of the information presented and discussed in that notice. The comment period was to end on December 5, 1988.

On November 3, 1988, the American Petroleum Institute (API), on behalf of itself and its interested member companies, submitted a request to EPA to extend the comment period on the October 21, 1988, notice of data availability by 45 days. On November 7, 1988, the Alaska Oil and Gas Association (AOGA) also submitted a request to EPA to extend the comment period on the notice of data availability by 45 days.

In light of the volume of new information presented and discussed in the notice of data availability and the complex issues involved in the formulation of final regulations for the drilling, waste streams, EPA has decided to grant the requests for extension of the comment period in full. Therefore, comments on the October 21, 1988, notice of data availability must be submitted by Janaury 19, 1989.

Dated: November 23, 1988.

Rebecca W. Hanmer,

Acting Assistant Administrator.

GENERAL SERVICES ADMINISTRATION

41 CFR Part 201-45

Electronic Records Management

AGENCY: Information Resources Management Service, GSA.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed final regulation establishes Governmentwide policies and procedures for the management of electronic records. Specifically, agency responsibilities for the creation, maintenance, use, and disposition of electronic records are prescribed. The intent is to increase economy and efficiency in the management of electronic records. Identical regulations will be issued simultaneously by the National Archives and Records Administration and published in the Code of Federal Regulations (CFR) at 36 CFR Chapter XII, Part 1234.

DATE: Comments are due on or before January 4, 1989.

ADDRESS: Comments should be sent to General Services Administation, Information Resources Management Service (KMPR), Project 86.83A, Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: R. Stewart Randall, Jr. or Carolyn A. Thomas, Regulations Branch (KMPR), Information Resources Management Service, telephone (202) 566-0194 or FTS, 566-0194. The full text of the proposed rule is available upon request.

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981. GSA decisions are based on adequate information concerning the need for and the consequences of the rule. The rule is written to Governmentwide management regulation that will have little or no net cost effect on society. The proposed rule is therefore not likely to have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Special Committee on Ethics in Government; Meeting

ACTION: Special Committee on Ethics in Government; notice of public meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Special Committee on Ethics in Government of the Administrative Conference of the United States. The committee has scheduled the meeting to discuss a draft report on the Ethics in Government Act's financial reporting requirements by Professor Thomas Morgan and a draft report on conflict-of-interest rules for federal advisory committee members by Richard K. Berg. Requests for copies of these draft reports may be made to the Office of the Chairman at the address and telephone number given below.

DATE: Monday, December 19, 1988 at 9:30 a.m.

Location: Library of the Administrative Conference, 2120 L Street NW., Suite 500, Washington, DC.

Public Participation: The committee meeting is open to the interested public, but limited to the space available. Persons wishing to attend should notify the contact person at least two days prior to the meeting. The committee chairman may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with the committee before, during, or after the meeting. Minutes of the meeting will be available on request.

FOR FURTHER INFORMATION CONTACT: Michael W. Bowers, Office of the Chairman, Administrative Conference of the United States, 2120 L Street NW., Suite 500, Washington, DC 20037. Telephone: (202) 254-7065.

Dated: November 29, 1988.

Jeffrey S. Lubbers,

Research Director.

BILLING CODE 6110-01-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Extention of Invitation To Serve on Federal Grain Inspection Service Advisory Committee

Pub. L. 100-518 recently amended the United States Grain Standards Act (Act) to direct the Secretary of Agriculture to establish an advisory committee to provide advice to the Administrator of the Federal Grain Inspection Service (FGIS) with respect to the implementation of the Act. The Advisory Committee consists of 15 members, appointed by the Secretary, representing the interests of all segments of the grain producing, processing, storing, merchandising, consuming, and exporting industries, including grain inspection and weighing agencies and scientists with expertise in research related to the policies established in section 2 of the Act. Members of the committee serve without compensation except that members, while away from their homes or regular places of business in the performance of service, are reimbursed for travel expenses, including per diem in lieu of subsistence, as authorized under section 5703 of Title 5, United States Code.

In anticipation of Congress establishing the Advisory Committee, a notice was published in the **Federal Register** on July 13, 1988, inviting nominations for persons to serve on the Advisory Committee. The period for nominations closed on August 15, 1988.

Because more than three months have lapsed since the date for accepting nominations closed, FGIS is extending by 15 days the period to receive *additional* nominations for persons to serve on the Advisory Committee. Nominations received previously will be considered along with any additional nominations received. Persons interested in serving on the Advisory Committee should contact, in writing, W. Kirk Miller, Administrator, FGIS, Room 1094, P.O. Box 96454, Washington, DC 20090-6454, not later than December 20, 1988, and furnish the following information: Name, home address, social security number, business address, employer, occupation and title, statement of reason for nomination, and major source of income. Nominations are open to all individuals without regard to race, color, religion, sex, national origin, age, mental or physical handicap, or marital status.

The final selection of committee members and alternates will be made by the Secretary. It is the Secretary's policy that membership on USDA boards and committees reflect, to the extent practicable, the diversity of individuals served by the programs.

Dated: November 30, 1988.

Robert Melland;

Deputy Assistant Secretary, Marketing and Inspection Services.

[FR Doc. 88-27989 Filed 12-2-88; 8:45 am]

BILLING CODE 3410-EN-M

Federal Grain Inspection Service

Grain Standards; Dockage and Foreign Material in Wheat

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Request for public comment.

SUMMARY: Using data from May, 1987 through October, 1988 the Federal Grain Inspection Service (FGIS or Service) will study the effects on wheat grades that would have occurred if dockage and foreign material and been combined into one factor. The study will evaluate the combined portions as a grading factor versus a deductible by weight. Public comments are being requested to determine the level of interest in combining dockage and foreign material into a single factor.

DATE: Comment must be submitted on or before February 3, 1989.

ADDRESS: Comments must be submitted in writing to Lewis Lebakken, Jr., Resources Management Division, USDA, FGIS, Room 0628-S, P.O. Box 96454, Washington, DC 20090-6454. Alternatively, telemail users may respond to [IRSTAFF/FGIS/USDA] telemail; telex users may respond to Lewis Lebakken, Jr, TLX: 7607351, ANS:FGIS UC; and telecopy users may send response to the automatic telecopier machine at (202) 447-4628.

All comments received will be made available for public inspection at room 0628 South Building, 1400 Independence Avenue SW., Washington, DC, during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., address as above, telephone (202) 475–3428.

SUPPLEMENTARY INFORMATION: Pursuant to section 5 of the United States Grain Standards Act Amendments of 1988 (Pub. L. No. 100–518), the Service is required to study the effects of combining wheat dockage and foreign material into one grade factor and to submit a report on the results of the study to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate, not later than June 1, 1989. The study will use data recorded from individual, graded wheat samples from May, 1987 through October, 1988. The Economic Research Service of USDA will use the statistically generated FGIS data to prepare an economic impact study.

The study to be conducted during FY 89, will include both export and inland locations. All classes and grades of wheat for which there are individual sample data will be studied. The Service's computer system will generate theoretical combinations of dockage and foreign material as both a grading factor and a deductible by weight.

Public comments are requested and any data, views or arguments are welcome.

(Section 5, Pub. L. No. 100–518)

Dated: November 29, 1988.

W. Kirk Miller,

Administrator.

[FR Doc. 88–27877 Filed 12–2–88; 8:45 am]

BILLING CODE 3410-EN-M

ARMS CONTROL AND DISARMAMENT AGENCY

Visiting Scholars Program

The U.S. Arms Control and Disarmament Agency (ACDA) will conduct a competition for selection of visiting scholars to participate in ACDA's activities during the 1989–90 school year.

Section 28 of the Arms Control and Disarmament Act (22 U.S.C. 2568) provides that "A program for visiting scholars in the field of arms control and disarmament shall be established by the Director [of the U.S. Arms Control and Disarmament Agency] in order to obtain the services of scholars from the faculties of recognized institutions of higher learning."

The law states that "The purpose of the program will be to give specialists in the physical sciences and other disciplines relevant to the Agency's activities an opportunity for active participation in the arms control and disarmament activities of the Agency and to gain for the Agency the perspective and expertise such persons can offer. * * * Fellows shall be chosen by a board consisting of the Director, who shall be the chairperson, and all former Directors of the Agency." In honor of the first Director of ACDA, William C. Foster, who served from the inception of ACDA in 1961 to 1969 and died on October 15, 1984, scholars are known as William C. Foster Fellows.

ACDA initially implemented this program by competitively selecting six visiting scholars for the 1984–85 school year to perform specific activities at ACDA for which their services had been identified as being needed. This process was repeated for the 1985–86, 1986–87, 1987–88 and 1988–89 school years and it is intended that the process will be used again this year with one-year assignments beginning at a mutually agreeable time during the period from July 1989 lasting until mid September 1990 for the positions in ACDA's four bureaus described in the Appendix to this announcement. Note that the emphasis is on the expertise and service which the visiting scholars can provide rather than on general interest in arms control and the pursuit of the scholars' own research.

It is planned that the visiting scholars will be assigned by detail and compensated in accordance with the Intergovernmental Personnel Act. In addition to pay based on their regular salary rates, the visiting scholars will receive travel to and from the Washington, DC area for their one-year assignment and either per diem allowance during the one-year assignment or relocation costs.

Visiting scholars must be citizens or nationals of the United States and on the faculty of a recognized institution of higher learning. Prior to appointment they will be subject to full-field background security and loyalty investigation for a top secret security clearance including access to Restricted Data, as required by Section 45 of the Arms Control and Disarmament Act. Visiting scholars also will be subject to applicable Federal conflict of interest laws and standards of conduct.

Selections will be made without regard to race, color, religion, sex, national origin, age, or physical handicap which does not interfere with performance of duties, and all qualified persons are encouraged to apply.

Applications should be in the form of a letter indicating the position(s) in which the applicant is interested and the perspective and expertise which the applicant offers. The letter should be accompanied by a curriculum vitae, and any other materials such as letters of reference and samples of published articles which the applicant believes should be considered in the selection process. (If published materials are submitted, it is requested that they be provided in twelve copies, if possible.)

Applications, and any requests for additional information, should be sent to: Visiting Scholars Program, Attention: Personnel Office, Room 5722, U.S. Arms Control and Disarmament Agency, Washington, DC 20451. The application deadline for assignments for the 1989–90 school year is January 31, 1989, subject to extension at ACDA's option. Announcement of selection, subject to security clearance procedures, is expected early spring 1989.

Dated: November 7, 1988.

William J. Montgomery,

Administrative Director.

Appendix

A. Visiting Scholar Assignments to the Bureau of Multilateral Affairs of ACDA

1. Description of the Bureau of Multilateral Affairs

The Bureau of Multilateral Affairs (MA) has primary responsibility within ACDA for arms control issues dealt with in multilateral forums. MA provides both technical backstopping and diplomatic support to the US Delegations to the Conference on Disarmament in Geneva, where negotiations on a chemical weapons ban takes place, to the various negotiating forums dealing with conventional arms control in Europe, and to the United Nations.

2. Nature of Assignment

The European Security Negotiations (ESN) Division of the Bureau of Multilateral Affairs has responsibility for supporting two negotiations concerning conventional forces in Europe. The Conventional Stability Talks will take place in Vienna, Austria, among the 23 members of NATO and the Warsaw Treaty Organization, and will address conventional force reductions and associated stability and verification measures. The Conference on Disarmament in Europe will resume in Vienna, Austria, among the 35 states participating in the Conference on Security and Cooperation in Europe (CSCE). These negotiations will consider further Confidence- and Security-

VOL
53
ISS
2
3
3
DE
5
1988
UMI

Building Measures (CSBMs), building on the Stockholm Document of 1986.

Conventional arms control in Europe will be gaining increased attention in coming years, as a result of the progress made in US-Soviet bilateral negotiations on nuclear reductions, represented in particular by the INF Treaty. At the same time, NATO will be in the process of determining its post-INF nuclear and conventional force requirements for the next decade. While these two conventional forces negotiations are independent forums, their substance is clearly related. The interactions of the two negotiations and NATO force planning requirements will require careful analysis in the ESN Division.

3. Candidate Qualifications

Specific useful background for a candidate would include knowledge of European political and military issues and familiarity with NATO defense doctrine. Previous experience and research on arms control and national security issues would be valuable.

B. Visiting Scholar Assignments to the Bureau of Verification and Intelligence of ACDA

1. Description of the Bureau of Verification and Intelligence

The Bureau of Verification and Intelligence (VI) has responsibility for ACDA's work in verification, compliance, intelligence, operations analysis, and computer support. VI provides the support in these subject areas for the strategic and theater nuclear arms control negotiations; the Standing Consultative Commission; the Anti-Ballistic Missile, SALT I and SALT II Treaties, the Limited Test Ban Treaty and Threshold Test Ban Treaty, INF, START, CST, Defense In Space, Nuclear Testing and the agreements on chemical and biological weapons.

2. Nature of the Assignment

VI develops verification requirements for arms control agreements being negotiated; reviews compliance with existing arms control agreements; conducts operations analysis of relevant arms control issues and Soviet views thereof; and evaluates the potential of various collection technologies for monitoring compliance with provisions of arms control agreements. A Visiting Scholar would be expected to participate in one or more of these activities by performing studies, drafting policy papers, and/or performing analyses both for use within ACDA and for coordination with other agencies. In some cases, the Visiting Scholar would represent ACDA on interagency working groups and would be called upon to exercise a relatively high degree of individual judgment.

Subject areas where a Visiting Scholar might contribute include: verification of a treaty on chemical weapons, vertification of limits on space-based weapons and weapons which can attack space-based military assets, compliance with existing—and verification of proposed—treaty limitations on ballistic missiles and nuclear testing, or analysis of Soviet views on stability and their impact on verification.

3. Candidate Qualifications

Because of the complex technical and analytical content in these areas, VI seeks a physical scientist, operations analyst, or expert in Soviet strategy and doctrine with a broad background. Specific useful background for a candidate would include: knowledge of basic physics, chemistry, aerospace systems, operations research, or Soviet strategic studies. The Visiting Scholar should have facility in analytical writing and general communication and a proven ability to innovate. Specific background in the areas of VI responsibility would be a value, but is not a requirement.

C. Visiting Scholar Assignments to the Bureau of Strategic Programs of ACDA

1. Description of the Bureau of Strategic Programs

The Bureau of Strategic Programs (SP) has responsibility for support of the Director of ACDA on arms control matters concerning limitations on U.S. and Soviet strategic and theater nuclear offensive forces and defensive and space forces. This includes providing technical and policy guidance to the Director in these areas and participating in the policy deliberation of Interagency Groups responsible for these areas. SP also has responsibility for ACDA's participation in the Nuclear and Space Talks (NST) in Geneva, other bilateral U.S.-USSR nuclear arms control negotiations, and other defense related matters including ACDA participation in US decisions regarding research on ballistic missile defenses. NST includes strategic and theater nuclear arms control and defense and space issues. Other bilateral discussions include meetings of the Standing Consultative Commission (SCC) and preparation for the periodic Anti-Ballistic Missile (ABM) Treaty reviews as well as meetings of the Special Verification Commission (SVC) on INF implementation and compliance. SP also has interagency responsibility for backstopping of the NST negotiations, the SVC, the SCC, and ABM Treaty reviews. SP has three divisions: Strategic Affairs, Theater Affairs, and Defense and Space.

2. Nature of the Assignment

A visiting scholar assigned to SP would assist in policy formation in one or more of the areas cited above. Because of the high technical content in these areas, SP seeks a physical scientist with a broad theoretical or applied background.

The visiting scholar's responsibilities would include drafting position papers, background studies, and policy analyses, both for use within ACDA and for coordination with other agencies such as the Central Intelligence Agency, the Office of the Secretary of Defense, the Joint Chiefs of Staff, the Department of State, and Interagency Groups. In some cases, the individual would represent ACDA on interagency working groups. The visiting scholar would be called upon to exercise a relatively high degree of individual judgment in developing policy recommendations. There may be an opportunity to volunteer to serve on the staff of U.S. delegations to arms control negotiations. The most likely area of concentration for the visiting scholar would be strategic arms reduction policy, but this could vary according to the scholar's background and the needs of ACDA/SP.

3. Candidate Qualifications

Specific useful background for a candidate would include: knowledge of basic physics, facility in concise writing, general communication skills, and proven ability to innovate. Background in areas of SP responsibility would be of value but is not a requirement.

D. Visiting Scholar Assignment to the Bureau of Nuclear and Weapons Control of ACDA

1. Description of the Bureau of Nuclear and Weapons Control

The Bureau of Nuclear and Weapons Control (NWC) has responsibility for proliferation issues, including nuclear, missile, and conventional armaments. Functions include the review of nuclear exports, support of the international safeguards system, and the promotion of the Nuclear Non-Proliferation Treaty and the Treaty of Tlatelolco. NWC also assesses the arms control implications of proposed arms transfers and technology transfers, prepares Arms Control Impact Statements on U.S. programs and prepares arms control policy assessments and proposals. In addition, NWC is responsible for ACDA's economic analysis work and

coordinates publication of *World Military Expenditures and Arms Transfers.*

2. Nature of the Assignment

A visiting scholar assigned to NWC would work on selected topics within that Bureau's responsibility, with emphasis on issues raised by the interrelationships among U.S. policies on nuclear non-proliferation, the transfer of conventional arms, and the export of missile technology. The visiting scholar's responsibilities would include the preparation of analyses of these issues and recommendations on their implications for arms control.

The position would involve close coordination with officials in the Departments of State and Defense and other concerned agencies. In carrying out assigned duties, the individual would need to exercise initiative and function effectively with minimum direct guidance and supervision.

3. Candidate Qualifications

Desirable attributes for a candidate would include an understanding of the role of arms control in national security planning, familiarity with weapons characteristics and capabilities, knowledge of political-military conditions in developing regions, a highly-developed analytical ability, and facility in written and oral communications. Because of the complex political-military issues involved, the individual should have a strong background in national security studies or international relations.

BILLING CODE 6820-32-M

DEPARTMENT OF COMMERCE

International Trade Administration

Initiation of Antidumping and Countervailing Duty Administrative Reviews

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of initiation of antidumping and countervailing duty administrative reviews.

SUMMARY: The Department of Commerce has received requests to conduct administrative reviews of various antidumping and countervailing duty orders and findings. In accordance with the Commerce Regulations, we are initiating those administrative reviews.

EFFECTIVE DATE: December 5, 1988.

FOR FURTHER INFORMATION CONTACT: Bernard T. Carreau or Richard W. Moreland, Office of Countervailing Compliance or Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-4733/2786.

SUPPLEMENTARY INFORMATION:

Background

On August 13, 1985, the Department of Commerce ("the Department") published in the **Federal Register** (50 FR 32556) a notice outlining the procedures for requesting administrative reviews. The Department has received timely requests, in accordance with §§ 353.53a (a)(1), (a)(2), (a)(3), and 355.10(a)(1) of the Commerce Regulations, for administrative reviews of various antidumping and countervailing duty orders and findings.

Initiation of Reviews

In accordance with §§ 353.53a(c) and 355.10(c) of the Commerce Regulations, we are initiating administrative reviews of the following antidumping and countervailing duty orders and findings. We intend to issue the final results of these reviews no later than November 30, 1989.

	Periods to be reviewed
Antidumping Duty Proceedings and Firms	
Canada: Replacement Parts for Self-Propelled Bituminous Paving Equipment (A-122-057).	9/01/87 to 8/31/88.
Fortress Allatt	
Italy: Pressure Sensitive Ptastic Tape (A-475-059).	10/01/87 to 9/30/88.
Manuli	
N.A.R.	
Boston	
Japan: Tapered Roller Bearings and Parts thereof, Finished and Unfinished (A-588-604).	3/23/87 to 9/30/88.
Koyo Seiko	
PRC: Barium Chloride (A-570-007)	10/01/87 to 9/30/88.
Sinochem	
PRC: Greige Polyester/Cotton Printcloth (A-570-101).	9/01/87 to 8/31/88.
Sinochem	
PRC: Shop Towels of Cotton (A-570-003).	10/01/87 to 9/30/88.
CNART	
Chinatex	
Cussmere	
Fabnc Enterprise	
China Resources	
Transatlantic Sales	
United Kingdom: Certain Forged Steel Crankshafts (A-412-602).	5/13/87 to 8/31/88.
United Engineering & Forging	
Countervailing Duty Proceedings	
Brazil: Certain Agricultural Tillage Tools (C-351-406).	1/1/87 to 12/31/87.
India: Certain Iron Metal Castings (C-533-063).	1/1/87 to 12/31/87.
Israel: Fresh Cut Roses (C-508-064)	10/1/87 to 9/30/87.
Mexico: Lime (C-201-402)	1/1/87 to 12/31/87.
Mexico: Portland Hydraulic Cement and Cement Clinker (C-201-013).	1/1/87 to 12/31/87.
New Zealand: Lamb Meat (C-614-503).	4/1/87 to 3/31/88.
New Zealand: Steel Wire (C-614-601).	7/1/87 to 6/30/88.
Sweden: Certain Carbon Steel Products (C-401-401).	1/1/87 to 12/31/87

Interested parties are encouraged to submit applications for administrative protective orders as early as possible in the review process.

These initiations and this notice are in accordance with section 751(a) of the Tariff Act of 1930 (19 U.S.C. 1675(a)) and 19 CFR 353.53a(c) and 355.10(c).

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

Date: November 22, 1988.

[FR Doc. 88-27960 Filed 12-2-88; 8:45 am]

BILLING CODE 3510-05-M

National Institute of Standards and Technology

[Docket No. 81005-8205]

Intention To Adopt a Test Method and Establish a Validation Service for the Federal Information Processing Standard (FIPS 120) for Graphical Kernel System (GKS)

AGENCY: National Institute of Standards and Technology (NIST), (formerly the National Bureau of Standards (NBS)), Commerce.

ACTION: Request for comments. Notice of intention to adopt a test method and conduct a one-year trial validation service for the Federal Information Processing Standard (FIPS) 120, Graphical Kernel System (GKS).

SUMMARY: The NIST intends to adopt the GKS-FORTRAN Validation Test Suite as the test method to be used for validating GKS implementations for conformance to GKS FIPS 120, Graphical Kernel System (GKS). This validation system will be used to assess the degree to which GKS implementations conform to FIPS 120. Beta testing with this software has been completed, and Version 2.1 is the current version of the software.

The NIST will use the trial validation service period to verify the accuracy and completeness of the GKS validation procedures. To assess the suitability of the test method for testing conformance

to the FIPS, NIST solicits the views of industry, the public, and State and local governments.

DATE: The test service will start immediately and will continue for a one-year trial period through September 1989.

ADDRESS: Written comments concerning the GKS Test Service should be sent to: National Institute of Standards and Technology; ATTN: GKS Test Service, Technology Building, Room B154, Gaithersburg, MD 20899.

FOR FURTHER INFORMATION CONTACT: Mark Skall, National Institute of Standards and Technology, Gaithersburg, MD 20899, telephone (301) 975–3265.

SUPPLEMENTARY INFORMATION:

Background

The Federal Information Processing Standard Publication (FIPS PUB) 120, Graphical Kernel System, was approved on April 18, 1986, and became effective November 3, 1986. In accordance with FIPS PUB 120, two-dimensional graphics toolbox packages acquired for Federal use after this date should implement the standard. The purpose of the graphics software standard is to promote portability of graphics applications for use on a variety of graphics workstations.

Federal agencies may require conformance to FIPS PUB 120 whether toolbox packages are developed internally, acquired as part of an ADP system procurement, used under an ADP leasing arrangement, or specified for use in contracts for programming services. Testing may be required in order for agencies to determine if the GKS implementations conform to the FIPS PUB. The GKS-FORTRAN Validation Test Suite and the test results provided from the NIST trial validation service are sources for Federal agencies to use in making this determination.

Updates to the Test Method

The Test Suite will be periodically updated and used as the basis for validating FIPS PUB 120 implementations. The update process will be used to correct errors identified in the GKS-FORTRAN Validation Test Suite and to introduce new or modified programs as appropriate. Modification to the Test Suite is also intended to ensure that implementations are being built according to the technical specifications of the standard. Should an interpretation of the FIPS be made that would affect the test suite, these changes would also be reflected during the update process.

Obtaining Validation Services

The NIST provides validation services on a cost-reimbursable basis. These services are available to both the producers and users of GKS implemetations. Upon receipt of a request for validation, NIST will supply the client with a GKS Information Pack which will include a description of the test service and procedures, an Order Form, a Software License Agreement, and a Scheduling Request. To obtain the GKS-FORTRAN Validation Test Suite and documentation the client must return a completed Order Form and Software License Agreement, along with proper payment to the NIST.

Authority: Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Institute of Standards and Technology after approval by the Secretary of Commerce pursuant to section 111(d) of the Federal Property and Administrative Services Act of 1949 as amended by the Computer Security Act of 1987, Pub. L. 100–235.

Ernest Ambler,

Director.

Dated: November 30, 1988.

[FR Doc. 88–27909 Filed 12–2–88; 8:45 am]

BILLING CODE 3510–CN–M

National Oceanic and Atmospheric Administration

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The New England Fishery Management Council will convene a public meeting on December 14, 1988, at 10 a.m., at the Howard Johnson's Hotel, 65 Newbury Street, Danvers, MA, to discuss reports of the Large Pelagics, Groundfish, Coastal Anadromous, Enforcement and Scallop Committees. There will be presentations and discussion on the recent U.S./U.S.S.R. meeting concerning the "donut hole", fisheries habitat, amendments to the Magnuson Fishery Conservation and Management Act, and New England Council work priorities. The public meeting will recess at approximately 5 p.m., reconvene December 15 at 9 a.m., and will adjourn when agenda items are completed.

For further information, contact Douglas G. Marshall, Executive Director, New England Fishery Management Council, Suntaug Office Park, 5 Broadway (Route One), Saugus, MA 01906; telephone: (617) 231–0422.

Date: November 30, 1988.

Joe P. Clem,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[FR Doc. 88–27970 Filed 12–2–88; 8:45 am]

BILLING CODE 3510–22–M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

[CESPK-PD-R]

Intent to Prepare a Draft Environmental Impact Statement (EIS); Third Phase, Sacramento River Bank Protection Project, California

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of Intent to prepare an EIS.

SUMMARY: The action being taken is to prepare a plan for a Third Phase of additional bank protection and setback levee construction to protect the levees throughout the Sacramento River Flood Control Project. The Third Phase Plan would be presented to Congress for approval. The reason for the action is to protect the structural integrity of the flood control system. The project will remove riparian vegetation, and have fish and wildlife impacts which will be mitigated. Construction is anticipated to begin in 1994.

FOR FURTHER INFORMATION CONTACT: Questions regarding the EIS should be addressed to Mr. Mike Welsh, Planning Division, Corps of Engineers, 650 Capitol Mall, Sacramento, California 95814–4794, telephone (916) 551–1861.

SUPPLEMENTARY INFORMATION:

1. Proposed Action

The Sacramento River Bank Protection Project was authorized by the 1960 Flood Control Act. The project comprises a modification of the existing Sacramento River Flood Control Project to include a long-range program of bank erosion control works and levee setbacks to protect the integrity of the Sacramento River Flood Control Project levee system. The present project area extends along the Sacramento River and its tributaries from Collinsville at river mile (RM) O to Chico Landing at RM 194; and includes project levees along the Feather, Bear, and Yuba Rivers; the Sutter and Yolo Bypasses; and additional sloughs and creeks included in the Sacramento River Flood Control Project.

The Sacramento River Bank Protection Project is being constructed in separate phases. Construction of the Congressionally authorized First Phase work of approximately 430,000 LF of bank protection was completed in 1974. In 1974, Congress authorized a Second Phase bank protection program of 405,000 LF. Construction has been completed on approximately 300,000 LF, and 105,000 LF of bank protection work remains to be constructed under the Second Phase authorization.

The objectives of the present studies are: (1) To determine if additional work is needed to protect the integrity of the project levee system, and (2) if additional work is required, to develop a plan(s) that will provide adequate protection consistent with the Sacramento River Bank Protection Project authorization. If an implementable plan(s) is developed, a Third Phase report and accompanying environmental impact statement will be submitted for Congressional authorization. The Reclamation Board of the State of California is the non-Federal cost sharing sponsor for the Third Phase studies. In addition, the Reclamation Board will be preparing a draft Environmental Impact Report (EIR) for potential Third Phase work, pursuant to the California Environmental Quality Act. It is expected the two documents will be jointly published as a draft EIS/EIR.

Alternatives

The alternatives discussed in the Third Phase Report and the EIS/EIR will include a without-project condition, non-structural alternatives, and structural alternatives including bank protection and setback levee plans.

2. Scoping of the Third Phase Report and EIS/EIR

Close coordination will be maintained with Federal, State, and local agencies, interested organizations, and concerned individuals. A series of public meetings and workshops will be held. Notices concerning the time and location of the meetings and subsequent workshops will be mailed separately. Information will be provided on the following: potential for levees failures, consequences of levee failures, impacts due to flooding in urban and rural areas, and engineering studies regarding bank protection and levee setbacks; potential impacts to fishery resources, endangered species, wildlife resources, riparian vegetation, and cultural resources; and methods of improving mitigation success.

Scoping Comments, Meetings, and Workshops

Comments should be provided by letter or at the scoping meetings and workshops. The topics described above will be discussed in the scoping meetings and workshops along with other topics that arise during the planning process. Comments received will be considered during the development of project alternatives. Comments will also be used to identify and evaluate significant resources in the project area, and to identify possible impacts and mitigation alternatives. Impacts to significant resources will be analyzed in detail in the EIS/EIR. A public participation program for this project is being developed by a consultant and will be implemented by the Corps and the Reclamation Board.

3. Estimated Schedule

The initial public meetings are presently set for Yuba City, California; Sacramento, California; and Rio Vista, California. These meetings are scheduled for December 6, 7, and 8, 1988. The workshops are tentatively scheduled for February 1989 and August 1989. Additional public meetings will be held during the public review period for the draft documents. As the schedule becomes finalized, dates, times, and locations will be made available. The Third Phase Report and the draft EIS/EIR are anticipated to be ready for public review and comment in April 1990.

Date: November 10, 1988.

Jack A. Le Cuyer,

Colonel, Corps of Engineers, District Engineer.

Acting Assistant Secretary for Postsecondary Education

[FR Doc. 88-27959 Filed 12-2-88; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Financial Assistance Award; Intent to Award Cooperative Agreement to the State of Illinois, Department of Energy and Natural Resources

AGENCY: Department of Energy.

ACTION: Announcement of Noncompetitive Financial Assistance (Cooperative Agreement) Award.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.7(b)(2), it intends to make a noncompetitive financial assistance (cooperative agreement) award to the State of Illinois, Department of Energy and Natural Resources for "Support of High-Sulfur Coal Research."

Scope: The proposed research effort offered by the State of Illinois focuses on the development and utilization of high-sulfur coal, the predominant generic coal type found in the Illinois Basin, as well as in numerous other important bituminous coal-producing regions in the United States. The State of Illinois is currently spending in excess of $3 million for research and development in the area of high-sulfur coal research. In conjunction with other sponsors, a total of 42 projects are being conducted, and of this total, approximately 11 are classified as coal cleaning and related studies. Research in coal preparation includes the areas of physical; microbial, and chemical coal cleaning, along with ancillary operations. These areas parallel and are of specific interest to the U.S. Department of Energy, Pittsburgh Energy Technology Center's Coal Preparation Program.

Authority for this noncompetitive award is 10 CFR 600.7(b)(2)(i)(B). The research activities presently being conducted by the State of Illinois, using its own resources, with the additional DOE financial support being provided by this award will enhance the public benefits to be derived by this research and development program.

The term of the Cooperative Agreement is for twelve (12) months at an estimated value of approximately $2,250,000.00, with the DOE sharing $1,500,000.00.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Pittsburgh

Energy Technology Center, Acquisition and Assistance Division, P.O. Box 10940, MS 921–165, Pittsburgh, PA 15236, Attn: Keith R. Miles. Telephone: AC 412/892–5984.

Dated: November 21, 1988.

Gregory J. Kawalkin,

Director, Acquisition and Assistance Division (Acting).

[FR Doc. 88–27974 Filed 12–2–88; 8:45 am]

BILLING CODE 6450–01–M

San Francisco Operations Office; Research Announcement Solicitation for Laser Fusion Research Proposals; Rescission of Proposal Submission Date

AGENCY: Department of Energy (DOE).

ACTION: Notice.

SUMMARY: DOE advises that the closing date of December 15, 1988, for submission of proposals, has been rescinded for the Research Announcement contained in the Federal Register Vol. 53 No. 57 dated Thursday, March 24, 1988. This notice concerned the solicitation of proposals for Laser Fusion Research. The DOE will, in the near future be issuing a revised request for proposals including a new submission date. Field responsibility for the conduct of basic research experiments in high-energy density studies at the National Laser User's Facility (NLUF), located at the University of Rochester Laboratory for Laser Energetics, has been transferred to DOE's San Francisco Operations Office from the Nevada Operations Office. Dennis Neely is the new Program Manager (Telephone 415–273–4188).

Dorothy Lacey,

Branch Chief, Contracts Management Division.

[FR Doc. 88–27973 Filed 12–2–88; 8:45 am]

BILLING CODE 6450–01–M

Financial Assistance Award; Cooperative Agreements; Southern Co. Services, Inc.

AGENCY: Department of Energy (DOE).

ACTION: Notice of noncompetitive financial assistance application for a cooperative agreement.

SUMMARY: The DOE, Morgantown Energy Technology Center, in accordance with 10 CFR 600.7(b)(2)(i) (B) and (D), gives notice of its plans to award a 12-month Cooperative Agreement to Southern Company Services, Inc., P.O. Box 2625, Birmingham, AL 35202 in an amount estimated to be $783,702.

The pending award is based on an unsolicited application for a research project entitled, "Integrated Gasification Combined Cycle (IGCC) Systems Analysis." The purpose of the project is to conduct a site specific evaluation of various power generation options for an integrated gasification combined cycle (IGCC) system and to determine the system electricity cost, load response, fuel flexibility, and environmental benefits. This study assesses the integration of air-blown coal gasification/hot gas cleanup systems with advanced gas turbine power plants which will improve the understanding of cost/benefit tradeoffs inherent in advanced systems. The involvement of a host utility to conduct a site specific evaluation of advanced systems will ensure the credibility of the results with the power generation community. The results of this assessment will allow the energy production and research communities to directly compare natural gas-fired and coal gas-fired systems. In furtherance of the DOE mission to commercialize DOE supported technologies, performance of this activity would greatly enhance the public benefit olf this work by making results of the study publicly available to a wider distribution base. The technical transfer of these results will provide a significant step toward the adoption of DOE sponsored technologies by addressing several of the current gaps in systems development data.

Southern Company Services and its major subcontractors possess proprietary and confidential process, technical, economic and site specific data necessary for successful completion of the site specific system assessment. In order to facilitate the adoption of DOE sponsored technologies, the results of the project must be directly comparable to results obtained under EPRI Project Number RP2773–5 entitled, "IGCC Site Specific Plant Study at Georgia Power Company's Plant Wansley." This common basis will allow the power generation community to compare DOE sponsored advanced IGCC systems with previously commercialized power generation systems. Due to the proprietary and site specific information required to satisfactorily conduct the assessment, and the need for comparability to the previously conducted EPRI study, the project team is considered uniquely qualified to perform the assessment.

FOR FURTHER INFORMATION CONTACT: Brenda L. Summers (M/S I07), Morgantown Energy Technology Center, P.O. Box 880, Morgantown, West Virginia 26507–0880. Telephone: (304) 291–4340. Procurement Request No. 21–89MC26019.000.

Date: November 28, 1988.

Louie L. Calaway,

Acting Director, Acquisition and Assistance Division, Morgantown Energy Technology Center.

[FR Doc. 88–27975 Filed 12–2–88; 8:45 am]

BILLING CODE 6450–01–M

Financial Assistance Award; Cooperative Agreement; University of Washington

AGENCY: Department of Energy (DOE).

ACTION: Notice of intent to make a noncompetitive financial assistance award.

SUMMARY: The DOE Richland Operations Office, in accordance with 10 CFR 600.7(b)(2), gives notice of its plan to award a noncompetitive financial assistance cooperative agreement to the University of Washington, acting on behalf of the Tri-Cities University Center in Richmond, Washington.

Scope: The cooperative agreement will help support an educational program of course work leading to MS & PhD degrees in the physical and biological sciences, in engineering, and in business.

The DOE has determined that the award on a noncompetitive basis is appropriate for the following reasons: The activity to be supported is a continuation of an existing cost sharing arrangement which DOE has previously supported through a contractual arrangement.

It is currently being conducted at the Tri-Cities University Center primarily by the two state research universities which offer advanced degrees, with the University of Washington acting as legal and fiscal agent. Through the University of Washington, the State of Washington provides the facilities for the program and about 66 percent of the cost currently estimated at about $2,300,000 per year. DOE wishes to insure that the program continues in order to continue to attract and retain qualified employees at the Hanford site.

The present arrangement is the only one through which advanced degrees in the sciences and engineering are available in this area. No other awardee is presently available, and any other arrangement would seriously distrupt the educational programs of students pursuing advanced degrees. It has therefore been determined that it is appropriate to provide assistance to this activity on a noncompetitive basis.

FOR FURTHER INFORMATION CONTACT: Marji W. Parker, U.S. Department of Energy, Richland Operations Office, Procurement Division, P.O. Box 550, Richland, WA 99352 Telephone: (509) 376–2039.

Robert D. Larson,

Director, Procurement Division, Richland Operations Office.

[FR Doc. 88–27976 Filed 12–2–88; 8:45 am]

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. QF89–41–000]

Exxon Chemical Co. and Exxon Co., U.S.A.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

November 30, 1988

On November 7, 1988, Exxon Chemical Company and Exxon Company, U.S.A.; (Applicants), of P.O. Box 100, Baytown, Texas 77522–0100 and P.O. Box 3950, Baytown, Texas 77522–3950 respectively, submitted for filing an application for certification of a facility as qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Baytown, Texas. The facility will comprise of twelve combustion turbine generating units, twelve heat recovery steam generators (HRSGs) equipped with supplementary firing and four steam turbine generators. Steam produced by the facility will be used in refining and processing crude oil and other petrochemicals. The primary energy source is natural gas. Refinery and by-product gas will be used for supplemental firing of HRSGs. The net electric power production capacity of the facility will be 315 MW. Seven of the twelve combustion turbines and associated HRSG's, and four steam turbine generators were in operation prior to March 13, 1980.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 88–27910 Filed 12–2–88; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. ER89–33–000, et al.]

Florida Power Corp., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

November 25, 1988.

Take notice that the following filings have been made with the Commission:

1. Florida Power Corp.

[Docket No. ER89–33–000]

Take notice that on October 24, 1988, Florida Power Corporation (Florida) filed a letter agreement between itself and Seminole Electric Cooperative, Inc. (Seminole) extending the term of a letter of commitment providing for negotiated interchange service under an interchange agreement between Florida Power and Seminole. The letter of commitment provided for service from Florida Power during the period June 1, 1988 through August 31, 1988 when Seminole needed the service because of an emergency outage at Seminole's Unit No. 1. The outage has continued beyond August 31, 1988 and Florida Power and Seminole have agreed to continue the letter of commitment in effect until the unit has been returned to service; i.e., it has been operated at a net output level of 400 MW or higher for a period of 16 consecutive hours.

Comment date: December 9, 1988, in accordance with Standard Paragraph E at the end of this notice.

2. The Kansas Power and Light Co.

[Docket No. ES89–7–000]

Take notice that on November 9, 1988, The Kansas Power and Light Company (Applicant) filed an application seeking authority pursuant to Section 204 of the Federal Power Act to issue up to $190,000,000 (with the maximum amount not to exceed 15% of the aggregate of the amount of outstanding securities as defined in the Company's Restated Articles of Incorporation filed as Exhibit A of the Application) in the aggregate principal amount of short-term unsecured Promissory Notes in the form of bank loans and commercial paper, on or before December 31, 1990, with a final maturity date of no later than December 31, 1991.

Comment date: December 9, 1988, in accordance with Standard Paragraph E at the end of this notice.

3. Ocean State Power

[Docket No. EC89–4–000]

Take notice that on November 21, 1988, Ocean State Power (Ocean State) filed an Application with the Federal Energy Regulatory Commission (Commission), in Docket No. EC89–4–000, for Authorization to Transfer Utility Assets pursuant to Section 203 of the Federal Power Act (FPA), 16 U.S.C. 824b and the Commission's regulations promulgated thereunder at 18 CFR Part 33. Ocean State seeks action on its Application by December 13, 1988 to permit financial closing of the Ocean State Project to occur on schedule.

Ocean State proposes to construct, own and operate an approximately 250 mw combined cycle electric generating facility in Burrillville, Rhode Island (the Project). The Project will be interconnected with an existing 345 KV substation adjacent to the site. Ocean State intends to construct the necessary interconnection facilities as a party of the construction of the combined cycle facility and seeks authorization to transfer those interconnection facilities to Blackstone Valley Electric Company (BVE) on the commercial date of the Project. Thereafter, BVE will maintain and operate the transmission facilities for the exclusive use of Ocean State.

Comment date: December 9, 1988, in accordance with Standard Paragraph E at the end of this notice.

4. Blackstone Valley Electric

[Docket No. EC89–69–000]

Take notice that on November 17, 1988, Blackstone Valley Electric Company (BVE) tendered for filing an interconnection agreement between itself and Ocean State Power (OSP). This Agreement provides for the construction, ownership and payment for facilities to be built in order to interconnect OSP's generating station to BVE's transmission facilities. The Agreement provides that once OSP's generating unit commences commercial operation OSP shall pay 100% of the yearly cost of service for the Interconnection Facilities.

While the Agreement will not become effective as a rate schedule until the commercial operation date OSP needs prompt acceptance of this filing in order to proceed with its financing. At OSP's request and for reasons which OSP will explain in a separate pleading BVE requests waiver of the 120 maximum

notice requirement and requests that the Commission accept this filing no later than December 13, 1988, to become effective on the commercial operation date of OSP's unit. BVE will inform the Commission when the unit enters service.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this notice.

5. Niagara Mohawk Power Corp.

[Docket No. ER88–55–000]

Take notice that on November 4, 1988, Niagara Mohawk Power Corporation (Niagara Mohawk), tendered for filing an agreement between Niagara Mohawk and Consolidated Edison Company of New York, Inc. (Con Ed) dated June 8, 1988, providing for certain transmission services to Con Ed. This agreement is designated as Niagara Mohawk Power Corporation Rate Schedule FERC No. 90. This new agreement is being transmitted as a supplement to the existing agreement.

Under Rate Schedule No. 90, Niagara Mohawk delivers Fitzpatrick power and energy between the New York Power Authority and Con Ed. Paragraph 2.3 of Rate Schedule No. 90, as amended on August 28, 1980, states that Niagara Mohawk will recalculate the annual fixed-charge rate effective September 1 of each year for the ensuing 12-month period using previous year-end data and cost of capital data as determined by the New York State Public Service Commission in Niagara Mohawk's most recent retail electric rate proceeding. Niagara Mohawk requests an effective date of September 1, 1987.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this notice.

6. Southern California Edison Co.

[Docket No. ER89–67–000]

Take notice that on November 17, 1988, Southern California Edison Company (Edison) tendered for filing, as an initial rate schedule, the following agreement, executed on October 25, 1988, by the respective parties: Edison-IID, *Economy Energy Agreement* Between Southern California Edison Company and Imperial Irrigation District.

The filed agreement establishes the terms and conditions under which Economy energy may be purchased or sold by either Party.

Copies of this filing were served upon the Public Utilities Commission of the State of California and all interested parties.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this notice.

7. New York State Electric & Gas Corp.

[Docket No. ER89–68–000]

Take notice that New York State Electric & Gas Corporation (NYSEG) on November 17, 1988, tendered for filing pursuant to § 35.12 of the regulations under the Federal Power Act, as a rate schedule, an agreement with Central Vermont Public Service (Central Vermont). The short term agreement provides that NYSEG shall sell surplus capability and associated energy to Central Vermont. Service under this agreement will commence on November 1, 1988 and shall terminate on April 30, 1989 unless extended in writing by mutual agreement.

NYSEG states that a copy of this filing has been served upon Central Vermont Public Service and with the Public Service Commission of the State of New York.

NYSEG requests that the 60-day filing requirement be waived and that November 1, 1988 be allowed as the effective date of the filing.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this document.

8. Public Service Co. of New Hampshire

[Docket No. ER89–70–000]

Take notice that Public Service Company of New Hampshire (PSNH), on November 21, 1988, tendered for filing proposed changes in its Wholesale for Resale Contracts with New Hampshire Electric Cooperative, Inc. (NHEC) for Total Requirements Service (FERC No. 50) and Partial Requirements Service (FERC No. 71). If accepted, the proposed agreement would provide credits to be applied to bills rendered to NHEC if certain of the NHEC's retail customers voluntarily curtail energy intensive loads during periods when PSNH is highly likely to experience a winter system peak.

The proposed changes would reduce PSNH's need for purchasing capacity outside of its system at a cost in excess of the credits paid to NHEC.

PSNH requests waiver of the Commission's notice requirements to permit the agreement to take effect on December 1, 1988.

Copies of the filing were served upon NHEC and the New Hampshire Public Utilities Commission.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this notice.

9. Montana Light & Power Co.

[Docket No. ER89–72–000]

Take notice that Montana Light & Power Company (Montana), formerly, a subsidiary of Champion International Corporation, on November 21, 1988, tendered for filing, in accordance with Section 35 of the Commission's Regulations, a Notice of Cancellation of FERC Electric Rate Schedule No. 2.

Montana states that this tariff is being terminated because of the dissolution of Montana, effective February 1, 1988. The FERC Rate Schedule Designation is as follows:

FERC Rate Schedule No.	Party
FERC Electric Rate Schedule No. 2 (Supersedes Rate Schedule FPC No. 1).	Pacific Power & Light Company.

Montana requests waiver of the Commission's notice requirements to permit the Tariff to terminate on February 1, 1988.

Copies of the filing were served upon all parties hereto, and the Montana Public Service Commission.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this notice.

10. Wisconsin Power and Light Co.

[Docket No. ER88–605–001]

Take notice that on November 14, 1988, Wisconsin Power and Light Company (WP&L) tendered for filing, on behalf of itself and Wisconsin Electric Power Company (WEP), with the Federal Energy Regulatory Commission an amended Transmittal Letter intended to revise language used in the Transmittal Letter of the original filing made in this docket (September 15, 1988), and to detail and clarify the intended pricing arrangements associated with the use of Service Schedule G—Short Term Shared Risk Power.

WP&L requests waiver of the Notice requirements in order to permit an effective date of July 18, 1988. WP&L states that copies of this filing have been provided to WEP and also that a copy of the filing has been mailed to each of the Parties identified on the original Service List.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this notice.

11. The Washington Water Power Co.

[Docket No. ER89–2–000]

Take notice that on November 7, 1988, The Washington Water Power Company (Washington) submitted an amendment to the filing of a service schedule applicable to what Washington refers to as an Energy Exchange Agreement between Washington and the Public Utility District No. 1 of Snohomish County (Snohomish). Washington states that this amendment is pursuant to a request for additional information regarding the service energy which is payment for providing the availability of exchange energy.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this notice.

12. Northeast Utilities Co.

[Docket No. ER88–566–000]

Take notice that on November 14, 1988, the Northeast Utilities Service Company (NUSCO) as agent for the Connecticut Light and Power Company and Western Massachusetts Electric Company (NU Companies) tendered for filing an amend to proposed rate schedules with respect to Transmission Service Agreements (Agreements), with Boston Edison Company (BECO) and Public Service Company of New Hampshire (PSNH) dated May 1, 1988.

NUSCO states that the amendment was filed in response to a deficiency letter from the Commission. NUSCO states that it proposes to revise the Agreements in response to the Commission's letter.

NUSCO states that a copy of this material has been mailed to NECO and PSNH.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this notice.

13. Pacific Power & Light Co. an assumed business name of PacifiCorp.

[Docket No. ER89–71–000]

Take notice that Pacific Power & Light Company (Pacific), an assumed business name of PacifiCorp, on November 21, 1988, tendered for filing, in accordance with § 35.30 of the Commission's Regulations, Pacific's Revised Appendix 1 for the state of Montana and Bonneville Power Administration's (Bonneville) Determination of Average System Cost (ASC) for the state of Montana (Bonneville's Docket No. 5–A4–8801). The Revised Appendix 1 calculates the ASC for the state of Montana applicable to the exchange of power between Bonneville and Pacific.

Pacific requests waiver of the Commission's notice requirements to permit this rate schedule to become effective March 16, 1988, which it claims is the date of commencement of service.

Copies of the filing were supplied to Bonneville, the Montana Public Service Commission and Bonneville's Direct Service Industrial Customers.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 88–27911 Filed 12–2–88; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. ER88–540–001, et al.]

Louisiana Power & Light Co., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

November 28, 1988.

Take notice that the following filings have been made with the Commission:

1. Louisiana Power & Light Corp.

[Docket No. ER88–540–001]

Take notice that on October 27, 1988, Louisiana Power & Light Company (LP&L) tendered for filing its compliance report in compliance with the Commission's order dated September 30, 1988. In compliance with this order LP&L filed revised service schedules for replacement energy service designated in the attachment of that order.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this notice.

2. Montana Electric Company

[Docket Nos. ER88–584–000 and ER88–585–000]

Take notice that on November 10, 1988, Montaup Electric Company supplemented its filings in these dockets by furnishing certain information requested by the Commission Staff concerning the sale of Somerset No. 6 unit power and energy. The information supplied consists of an explanation of Montaup's decision to sell that unit power and energy at an energy price below average energy costs as calculated by Staff.

Montaup's explanation consists of two points. First, that by entering into the unit sale it obtained the right to convert that sale on November 1, 1990 to additional contract demand service to continue through the year 2000. Montaup expected at the time of the negotiations in July 1987 (and continues to expect that the revenues from the additional contract demand service will more than offset any incremental costs of providing it. Montaup had to agree to the unit sales in order to obtain the right to convert. Secondly, at the time of the negotiations the revenues from the unit sale were expected to more than offset the costs which Montaup expected to incur as a result of making the sale.

Montaup furnished statistical information in support of its explanation on both points.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this notice.

3. East Carrolltown Co-Gen Inc.

[Docket No. QF89–48–000]

On November 16, 1988, EAST CARROLLTOWN CO-GEN INC. (Applicant), of 353 Pittsburgh Road, Butler, Pennsylvania 16001, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located on the proposed new Rt. 219 near the town of Carrolltown, Pennsylvania. The facility will consist of three steam boilers, three extraction/condensing turbine generators, and a 138 kV transmission line. Thermal energy recovered from the facility will be used for industrial and commercial processes in a mini steel mill, a hospital, offices, a greenhouse, and other light industry. Primary energy source will be natural gas. The net electric power production capacity of the facility will be 120 MW. Startup of the new facility is expected to begin in September 1989.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. ST88-5508-000, et al.]

Southern Natural Gas Co., et al.; Self-Implementing Transactions

December 1, 1988.

Take notice that the following transactions have been reported to the Commission as being implemented pursuant to Part 284 of the Commission's Regulations, and sections 311 and 312 of the Natural Gas Policy Act of 1978 (NGPA).[1]

The "Recipient" column in the following table indicate the entity receiving or purchasing the natural gas in each transaction.

The "Part 284 Subpart" column in the following table indicates the type of transaction. A "B" indicates transportation by an interstate pipeline on behalf of an intrastate pipeline or a local distribution company purusant to § 284.102 of the Commission's Regulations and section 311(a)(1) of the NGPA.

A "C" indicates transportation by an intrastate pipeline on behalf of an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.122 of the Commission's Regulations and section 311(a)(2) of the NGPA. In those cases where Commission approval of a transportation rate is sought pursuant to § 284.123(b)(2), the table lists the proposed rate and the expiration date of the 150-day period for staff action. Any person seeking to participate in the proceeding to approve a rate listed in the table should file a motion to intervene with the Secretary of the Commission on or before December 21, 1988.

[1] Notice of a transaction does not constitute a determination that the terms and conditions of the proposed service will be approved or that the noticed filling is in compliance with the Commission's Regulations.

A "D" indicates a sale by an intrastate pipeline to an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.142 of the Commission's Regulations and section 311(b) of the NGPA. Any interested person may file a complaint concerning such sales pursuant to § 284.147(d) of the Commission's Regulations.

An "E" indicates an assignment by an intrastate pipeline to any interstate pipeline or local distribution company pursuant to § 284.163 of the Commission's Regulations and section 312 of the NGPA.

A "G" indicates transportation by an interstate pipeline on behalf of another interstate pipeline pursuant to § 284.222 and a blanket certificate issued under § 284.221 of the Commission's Regulations.

A "G(LT)" or "G(LS)" indicates transportation, sales or assignments by a local distribution company on behalf of or to an interstate pipeline or local distribution company pursuant to a blanket certificate issued under § 284.224 of the Commission's Regulations.

A "G(HT)" or "G(HS)" indicates transportation, sales or assignments by a Hinshaw Pipeline pursuant to a blanket certificate issued under § 284.224 of the Commission's Regulations.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CP87-92-004, et al.]

Texas Eastern Transmission Corp., et al.; Natural Gas Certificate Filings

November 28, 1988.

Take notice that the following filings have been made with the Commission:

1. Texas Eastern Transmission Corporation

[Docket No. CP87-92-004]

Take notice that on November 10, 1988, Texas Eastern Transmission Corporation (Texas Eastern), One Houston Center, Houston, Texas 77010-2070, filed in Docket No. CP87-92-004 an application pursuant to section 7(c) of the Natural Gas Act for authorization to construct and operate pipeline facilities necessary to restore capacity on Texas Eastern's system to render existing certificated service under its Rate Schedule SS, all as more fully set forth in the application on file with the Commission and open for public inspection.

Texas Eastern states that by orders issued April 29, 1966, and October 30, 1967, in Docket No. CP66-43, the Commission authorized the construction and operation of certain facilities including the Staten Island LNG facility to render a firm storage service to certain customers pursuant to Rate Schedule SS, that the total certificated Maximum Daily Quantity was 151,354 Mcf per day delivery capacity and was used in conjunction with Texas Eastern's Accident storage field to meet peak-day requirements under Rate Schedule SS, and that on February 10, 1973, the facility was severely damaged by fire while the LNG tank liner was undergoing repair.

Texas Eastern states that on November 24, 1986, it filed its Capacity Restoration Program (CRP) application in Docket No. CP87-92-000, as amended CP87-92-002, for authority to replace the 102,130 dt per day of peak day delivery capacity lost due to the destruction of the Staten Island LNG storage facility, as well as to replace certain mainline transmission facilities, and to add mainline transmission capacity necessary to provide certain incremental services.

Texas Eastern further states that on September 7, 1988, the settlement judge certified to the Commission as an additional discrete project the portion of CRP not included in the APEC

settlement, that the settlement judge found specifically with regard to the 102,130 dt per day of LNG capacity reinstatement, that no pending open season proposal to provide new service could be mutually exclusive, and that the settlement judge reasoned that the LNG capacity reinstatement concerned service that is already certificated under Docket No. CP66–43.

Texas Eastern states that by its order of October 26, 1988, the Commission found the LNG reinstatement portion of the CRP project to be eligible for processing as a discrete project and directed Texas Eastern to file an application to implement that portion of the CRP project, and that the instant application is filed in response to that directive. Specifically, Texas Eastern requests authorization to construct and operate the following facilities: scraper traps and mainline piping inside yard limits at Compressor Stations 21–A, 21, 22 and 22–A; install up to 11,000 horsepower to compression at Compressor Station 21–A; install up to 11,000 horsepower of compression at Compressor Station 26; place in idle service 169.91 miles of 24-inch pipeline between Stations 21–A and 24–A. Additionally, Texas Eastern proposes to charge, commencing the later of November 1, 1990 or the date upon which the proposed facilities are placed in service, its Rate Schedule SS customers the SS reinstatement Demand Rate.

Texas Eastern states that the estimated capital cost of the proposed facilities is $44,113,500 financing. Texas Eastern further states that the cost of service associated with the Rate Schedule SS capacity reinstatement facilities proposed herein will be borne by all Buyers receiving the Rate Schedule SS service, and requests that the SS reinstatement Demand Rate of $6.0723 be accepted as the initial rate to be charged, together with the effective Rate Schedule SS rates, commencing the later of November 1, 1990, or the date upon which the proposed facilities are placed in service.

Texas Eastern alleges that approval of its proposal herein will remedy a long-standing capacity deficiency on its system which was created by the abandonment of the Staten Island LNG facility, that restoration of the 102,130 dth per day capacity is absolutely essential to maintain Texas Eastern's system design integrity to meet the certificated obligations to its SS customers, and for the foregoing reasons, Texas Eastern submits that its proposal is required by the present and future public convenience and necessity.

Comment date: December 19, 1988, in accordance with Standard Paragraph F at the end of this notice.

2. Northwest Pipeline Corporation

[Docket No. CP89–219–000]

Take notice that on November 16, 1988, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–219–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under its blanket certificate issued in Docket No. CP86–578–000 pursuant to section 7 of the Natural Gas Act for Conterra Natural Gas, Inc. (Conterra), all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest proposes to transport natural gas for Conterra, on an interruptible basis, pursuant to a transportation agreement dated February 10, 1988, as amended April 13, 1988, and September 6, 1988. Northwest explains that service commenced September 26, 1988, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–318–000 on October 24, 1988. Northwest further explains that the peak day quantity would be 20,100 MMBtu, the average daily quantity would be 150 MMBtu, and that the annual quantity would be 55,000 MMBtu. Northwest explains that it would receive natural gas for Conterra's account at the existing Sumas receipt point in Whatcom County, Washington, and transport the gas to an existing interconnection with El Paso Natural Gas Company at Ignacio in La Plato County, Colorado, and to an existing interconnection with a Colorado Interstate Gas Company in Sweetwater County, Wyoming, for delivery for the account of Conterra to any appropriate local distribution company or affiliate of Conterra.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

3. Williston Basin Interstate Pipeline Company

[Docket No. CP89–206–000]

Take notice that on November 16, 1988, Williston Basin Interstate Pipeline Company (Williston Basin), Suite 200, 304 East Rosser Avenue, Bismarck, North Dakota 58501, filed in Docket No. CP89–206–000 a request pursuant to §§ 157.212 and 157.205 of the Commission's Regulations under the Natural Gas Act for authorization to abandon service and add delivery points under its blanket authorization issued in Docket Nos. CP82–487–000, *et al.* pursuant to section 7 of the Natural Gas Act, all as more fully set forth in its request which is on file with the Commission and open to public inspection.

It is stated that Williston Basin would abandon its certificate authority to serve Byron Natural Gas Utility, Inc., which has been purchased by Wyoming Gas Company, and would add the two delivery points previously used for service to Byron Natural Gas Utility, Inc. to its service agreement under Rate Schedule G–1 with Wyoming Gas Company.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

4. Texas Eastern Transmission Corporation

[Docket No. CP89–144–000]

Take notice that on November 8, 1988, Texas Eastern Transmission Corporation (Texas Eastern), P.O. Box 2521, Houston, Texas 77252–2521, filed in Docket No. CP89–144–000 an application pursuant to section 7(c) of the Natural Gas Act and Part 157 of the Commission's Regulations for a certificate of public convenience and necessity authorizing the rebuilding and upgrading of five centrifugal compressor units located at the Danville and Owingsville, Kentucky, compressor stations and at the Gillis, Louisiana, compressor station, all as more fully set forth in the application which is on file with the Commission and open to public inspections.

Texas Eastern proposes to rebuild five early-model gas turbine compressor engines that are badly worn and nearing obsolescence rather than purchasing new more expensive units.[1] The compressor engines that Texas Eastern plans to rebuild are General Electric Model MS3002 turbines two of which are located in its Danvile Compressor Station in Lincoln County, Kentucky, and two units in the Owingsville Compressor Station in Bath County, Kentucky, and one unit in the Gillis Compressor Station in Beauregard Parish, Louisiana. In addition, Texas Eastern also requests Commission authorization to capitalize the costs of the proposed rebuilding program estimated to be $14,690,000.

[1] Texas Eastern was authorized by Commission order issued July 23, 1984, in Docket No. CP84–380–000, to upgrade by rebuilding ten compressor engines in a program similar to the subject application.

From past experience with the previously rebuilt units, Texas Eastern states that it expects the rebuilding program will increase horsepower output, thermal efficiencies and a greater use of these upgraded units while reducing fuel usage, maintenance costs and compressor outages. It is stated the compressor engine ratings, as a result of the rebuilding, will be increased an average of 400 horsepower per unit. Texas Eastern states that it does not intend to use the additional horsepower to increase pipeline capacity on its system.

Texas Eastern estimated this project will cost $14,690,000, and proposes to finance that cost internally with funds on hand.

Comment Date: December 19, 1988, in accordance with Standard Paragraph F at the end of the notice.

5. Northwest Pipeline Corporation

[Docket No. CP89–249–000]

Take notice that on November 18, 1988, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–249–000, a prior notice request, pursuant to §§ 157.205 and 284.223 of the Commission's Regulations for authorization to transport natural gas for Ash Grove Cement West, Inc. (Ash Grove), an end user of natural gas, under the blanket certificate issued Northwest in Docket No. CP86–578–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northwest states that pursuant to a Transportation Agreement dated September 2, 1988, as amended September 6, 1988, under Rate Schedule TI–1, it proposes to transport up to 23,000 MMBtu of natural gas per day for Ash Grove from various existing receipt points on Northwest's system in Utah, Colorado, Wyoming, New Mexico and Washington and redeliver the gas to the Portland West and Scappoose delivery meter in Multnomah County, Oregon, the Durkee delivery meter to Cascade Natural Gas Corporation in Baker County, Oregon, the Idaho Portland Cement delivery meter to Intermountain Gas Company in Bannock County, Idaho, the North Seattle delivery meter in Snohomish County, Washington and the South Seattle delivery meter in King County, Washington to Washington Natural Gas Company.

Northwest states that no construction of facilities would be required to provide the transportation service.

Northwest further states that the maximum day, average day, and annual transportation volumes would be approximately 23,000 MMBtu, 330MMBtu and 120,000 MMBtu, respectively.

Northwest advises that service under § 284.223(a) commenced September 30, 1988, as reported in Docket No. ST89–303–000.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. Tennessee Gas Pipe Line Company

[Docket No. CP89–268–000]

Take notice that on November 22, 1988, Tennessee Gas Pipe Line Company (Tennessee) Post Office Box 2511, Houston, Texas 77252, filed in Docket No. CP89–268–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide a transportation service for its affiliate Tenngasco Corporation (Tenngasco), a marketer, as agent for Chevron, U.S.A., Inc. under its blanket authorization issued in Docket No. CP87–115–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Tennessee would perform the proposed interruptible transportation service for Tenngasco, pursuant to an interruptible transportation service agreement dated October 4, 1988. The term of the transportation agreement is from the date of the contract and shall continue for a primary term of two years, and shall continue month to month thereafter unless cancelled by thirty days prior notice by either party. Tennessee proposes to transport on a peak day up to 1,000,000 dekatherms (dt) per day, the maximum daily quantity pursuant to the transportation agreement; on an average day up to 1,000,000 dt; and on an annual basis 365,000,000 dt of natural gas for Tenngasco. Tennessee proposes to transport natural gas for Tenngasco from multiple receipt points along the Tennessee system for redelivery to Chevron's processing plant located in LaFourche Parish, Louisiana.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. Tennessee commenced such self-implementing service on October 6, 1988, as reported in Docket No. ST89–556–000.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. Northwest Pipeline Corporation

[Docket No. CP89–265–000]

Take notice that on November 21, 1988, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–265–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Unocal Canada Limited (Unocal), under its blanket authorization issued in Docket No. CP89–578–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northwest would perform the proposed interruptible transportation service for Unocal, a producer of natural gas, pursuant to a transportation agreement dated June 10, 1988, under its Rate Schedule TI–1. It is stated that the natural gas to be transported under the transportation agreement would be received on behalf of Unocal by its affiliate, Union Oil Company of California (Union Oil), an end user. The transportation agreement became effective on June 10, 1988 and shall remain in full force and effect until February 8, 1990. Northwest proposes to transport on a peak day up to 25,000 MMBtu; on an average day up to 3,000 MMBtu; and on an annual basis 1,100,000 MMBtu for Unocal. Northwest proposes to receive the subject gas from the existing Sumas receipt point in Whatcom County, Washington and transport such volumes to the Union Oil Parachute Plant Delivery Point located in Garfield County, Colorado. Northwest avers that no new facilities are required to provide the proposed service.

It is explained that the proposed service is currently being performed pursuant to the 120-day self-implementing provision of § 284.223(a)(1) of the Commission's Regulations. Northwest commenced such self-implementing service on November 6, 1988, as reported in Docket No. ST89–611–000.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

8. Panhandle Eastern Pipe Line Company

[Docket No. CP88–213–001]

Take notice that on August 29, 1988, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston,

Texas 77251, filed in Docket No. CP88–213–001 an amendment as supplemented on November 15, 1988, to its pending application filed in Docket No. CP88–213–000, pursuant to sections 7(b) and 7(c) of the Natural Gas Act; for authorization to modify sales and storage services, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Specifically, Panhandle states that this amendment reflects the following changes to its original proposal.

(1) Panhandle states that it is deleting the proposed mechanism for recovery of take-or-pay, buy-out and buy-down costs.

(2) It is also stated that Panhandle is deleting its proposed Gas Supply Inventory Charge.

(3) It is further stated that Panhandle is withdrawing its proposed Rate Schedule ST for firm storage service to its sales customers and, therefore, is not proposing any change to the terms for existing firm storage services provided under Rate Schedules TS–2, TS–3, TS–4, TS–5 and TS–6.

(4) Panhandle further states that it is withdrawing its request, effective November 1, 1988, to abandon firm sales service to all customers pursuant to its Rate Schedule LS and G and the effectuation of the proposed new form of firm sales service pursuant to Rate Schedules S–1, S–2 and S–3. It is stated that Panhandle proposes that following authorization, the abandonment of existing Rate Schedule LS and G service and effectuation of the new firm sales service become effective as to each customer only upon expiration of that customer's currently effective sales contract.

(5) Panhandle also states that it is requesting to terminate its currently effective Rate Schedule S.

(6) Panhandle states that to the extent any existing sales customer seeks to convert any portion of its firm service to firm transportation to be effective at the expiration of its existing sales Service Agreement, Panhandle seeks authority to provide such firm transportation in accordance with Rate Schedule PT–Firm. Panhandle further states that such conversion shall be deemed to be in lieu of conversion rights specified by § 284.10 of the Commission's Regulations.

(7) Finally, Panhandle states that it is proposing modifications of the terms of the pro-forma tariff sheets as follows: (a) Deletion of the specific limitation on hourly quantity of firm sales deliveries, in section 2 of the pro-forma S Rate Schedules; (b) determination of deliveries in dekatherms based on the heating value of deliveries during the second preceding month, for purposes of applying the overrun provisions of section 7 of the pro-forma S Rate Schedules; and (c) revision of the proposed procedures for updating of the curtailment, end-use requirements to delete the originally proposed use of a three-year, rolling base period.

For services performed under Panhandle's new Rate Schedule S and I, it proposes to charge the rates set forth in Exhibit P of Panhandle's November 15, 1988, supplement to the proceeding herein.

Comment date: December 19, 1988, in accordance with Standard Paragraph F at the end of this notice.

9. Williams Natural Gas Company

[Docket No. CP89–251–000]

Take notice that on November 18, 1988, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP89–251–000 a request pursuant to §§ 157.205 and 284.223(2)(b) of the Commission's Regulations under the Natural Gas Act for authorization to provide transportation for Hadson Gas Systems, Inc. (Hadson) under WNG's blanket certificate issued in Docket No. CP89–631–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

WNG requests authorization to transport, on an interruptible basis, up to a maximum of 79,380 MMBtu of natural gas per day for Hadson from various receipt points in Kansas, Missouri, Oklahoma and Wyoming to various delivery points on WNG's pipeline system located in Kansas, Missouri and Texas. The receipt and delivery points are listed in Exhibits A through B–1 of the September 14, 1988 transportation agreement which provides for this service, and on file with the Commission and open to public inspection. WNG states that it anticipates transporting 79,380 MMBtu on an average day and 28,973,700 MMBtu on an annual basis.

WNG states that the transportation of natural gas for Hadson commenced on October 4, 1988, as reported in Docket No. ST89–527–000, for a 120-day period pursuant to § 284.223(a)(1) of the Commission's Regulations and the blanket certificate issued to WNG in Docket No. CP86–631–000. WNG proposes to continue this service in accordance with §§ 284.221 and 284.223 of the Commission's Regulations.

WNG further states that it has no knowledge of any agency relationship under which a local distribution company or an affiliate of Hadson will receive natural gas on behalf of Hadson.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

10. Panhandle Eastern Pipe Line Company

[Docket No. CP89–247–000]

Take notice that on November 18, 1988, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas, 77251–1642, filed in Docket No. CP89–247–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to transport natural gas for Amgas, Inc. (Amgas), a marketer of natural gas pursuant to Panhandle's blanket certificate issued in Docket No. DP86–585–000 and Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Specifically, Panhandle requests authority to transport up to 200 dt equivalent of natural gas per day on an interruptible basis on behalf of Amgas pursuant to a transportation agreement dated September 19, 1988, between Panhandle and Amgas. Panhandle states that the transportation agreement provides for Panhandle to receive gas from various existing points of receipt on its system in Texas, Oklahoma, Kansas, Wyoming, and Colorado and to redeliver the gas, less fuel used and unaccounted for line loss, to Central Illinois Light Company in Tazewell County, Illinois.

Panhandle indicates it would provide the service for a primary term of one month from the date of initial transportation and continue to provide the service on a month-to-month basis until terminated by either party upon at least 30 days prior notice to the other. Panhandle states that it would charge the rates and abide by the terms and conditions of its Rate Schedule PT.

It is indicated that the estimated maximum daily volume, average volume, and annual volumes would be 200 dt equivalent of natural gas, 100 dt equivalent of natural gas, and 36,500 dt equivalent of natural gas, respectively. Panhandle states it commenced a 120-day transportation service for Amgas on October 12, 1988, as reported in Docket No. ST89–608–000.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

11. Natural Gas Pipleline Company of America

[Docket No. CP89–199–000]

Take notice that on November 15, 1988, Natural Gas Pipleline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP89–199–000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas, on an interruptible basis, for Natural Gas Clearinghouse, Inc. (NGC) under its blanket certificate issued in Docket No. CP86–582–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Natural states that pursuant to an Interruptible Transportation Service Agreement dated September 7, 1988, Natural is obligated to accept for transportation, on an interruptible basis, no more than 150,000 MMBtu per day of natural gas for NGC. Natural further states that NGC may request and Natural may agree to accept additional quantities as overrun gas. Natural states that NGC has advised Natural that the volumes anticipated to be transported on an average day would be 10,000 MMBtu. Natural further states that based on that average day figure, the annual volume to be transported would be 3,650,000 MMBtu. Natural indicates that the receipt point would be located in Oklahoma and the delivery point would be located in Texas.

Natural indicates that it commenced the transportation of natural gas for NGC on October 1, 1988, at Docket No. ST89–755, for a one hundred and twenty (120) day period pursuant to § 284.223(a)(1) of the Commission's Regulations (18 CFR 284.223(a)(1).

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

12. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89–237–000]

Take notice that on November 17, 1988, Transcontinental Gas Pipe Line Corporation (Transco), Post Office Box 1396, Houston, Texas 77251, filed in Docket No. CP89–237–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas for Houston Gas Exchange Corporation (Shipper), under the blanket certificate issued in Docket No. CP88–328–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Transco states that it proposes to transport for Shipper 340,000 dt on a peak day, 200,000 dt on an average day and 73,000,000 dt on an annual basis. Transco also states that it will receive gas at Brazos Block 437/436, offshore Texas and deliver the gas at an existing interconnect between Transco and Channel Industries, Inc. at Markham, Matagorda, Texas.

Transco further states that it commenced this service October 1, 1988, as reported in Docket No. ST89–355.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

13. United Gas Pipe Line Company

[Docket No. CP89–192–000]

Take notice that on November 14, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–192–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to provide an interruptible transportation service on behalf of E. I. Du Pont De Nemours and Company, an end user of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United states that the interruptible gas transportation service agreement #T1–21–1662/Ref. #2889, dated June 1, 1988, proposes to transport a maximum daily quantity of 3,090 MMBtu and an annual quantity of 1,127,850 MMBtu, using existing facilities to provide transportation service pursuant to that agreement. It is stated that the executed agreement contains the location of the receipt and delivery points in Exhibits A and B. United further states that service commenced October 19, 1988, as reported in Docket No. ST89–382 pursuant to § 284.223(a) of the Regulations.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

14. United Gas Pipe Line Company

[Docket No. CP89–185–000]

Take notice that on November 14, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–185–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to provide an interruptible transportation service on behalf of Enron Gas Marketing, Inc., a marketer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open for public inspection.

United states that the interruptible gas transportation service agreement #T1–21–1818/Ref. #3380, dated August 22, 1988, proposes to transport a maximum daily quantity of 51,500 MMBtu and an annual quantity of 18,797,500 MMBtu, using existing facilities to provide transportation service pursuant to that agreement. It is stated that the executed agreement contains the location of the receipt and delivery points in Exhibits A and B. United further states that service commenced October 19, 1988, as reported in Docket No. ST89–378 pursuant to Section 284.223(a) of the Regulations.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

15. Northwest Pipeline Corporation

[Docket No. CP89–217–000]

Take notice that on November 16, 1988, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–217–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under its blanket certificate issued in Docket No. CP86–578–000 pursuant to section 7 of the Natural Gas Act for Evanite Fiber Corporation (Evanite), all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest proposes to transport natural gas for Evanite, on an interruptible basis, pursuant to a transportation agreement dated July 14, 1988. Northwest explains that service commenced October 8, 1988, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–587–000. Northwest further explains that the peak day quantity would be 3,000 MMBtu, the average daily quantity would be 2,900 MMBtu, and that the annual quantity would be 1,100,000 MMBtu. Northwest explains that it would receive natural gas from various sources in Wyoming, Colorado, Utah, New Mexico, and Washington, and would redeliver the gas to

BEST COPY AVAILABLE

Northwest Natural Gas Company, a local distribution company, for the account of Evanite in the states of Washington and Oregon.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

16. Northwest Pipeline Corporation

[Docket No. CP89–220–000]

Take notice that on November 16, 1988, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–220–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under its blanket certificate issued in Docket No. CP86–578–000 pursuant to section 7 of the Natural Gas Act for Norpac Foods, Inc. (Norpac), all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest proposes to transport natural gas for Norpac, on an interruptible basis, pursuant to a transportation agreement dated February 10, 1988, as amended July 15, 1988. Northwest states that service commenced September 30, 1988, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–339–000. Northwest further explains that the peak day quantity would be 2,500 MMBtu, the average daily quantity would be 160 MMBtu, and that the annual quantity would be 60,000 MMBtu. Northwest explains that it would receive natural gas for Norpac's account from various sources in Wyoming, Colorado, Utah and Washington, and would redeliver the gas to Northwest Natural Gas Company (Northwest), a local distribution company, for the account of Norpac at existing delivery points in Washington and Oregon.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

17. Northwest Pipeline Corporation

[Docket No. CP89–218–000]

Take notice that on November 16, 1988, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–218–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under its blanket certificate issued in Docket No. CP86–578–000 pursuant to section 7 of the Natural Gas Act for G. Heileman (Heileman), all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest proposes to transport natural gas for Heileman, on an interruptible basis, pursuant to a transportation agreement dated July 15, 1988. Northwest explains that service commenced September 30, 1988, under § 284.223(a) of the Commission's Regulation, as reported in Docket No. ST89–317–000 on October 24, 1988. Northwest further explains that the peak day quantity would be 2,800 MMBtu, the average daily quantity would be 100 MMBtu, and that the annual quantity would be 40,000 MMBtu. Northwest explains that it would receive natural gas from various sources and interconnects in Wyoming, Colorado, Utah, Washington, and Oregon and would redeliver the gas for the account of Heileman to Washington Natural Gas Company (Washington Natural) in the state of Washington.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

18. Northwest Pipeline Corporation)

[Docket No. CP89–216–000]

Take notice that on November 16, 1988, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–216–000 a request pursuant to § 157.205 and 284.223 of the Commission's regulations under the Natural Gas Act for authorization to transport natural gas under its blanket certificate issued in Docket No. CP86–578–000 pursuant to Section 7 of the Natural Gas Act for Eastex Canadian Hunter (Eastex), all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest proposes to transport natural gas for Eastex, on an interruptible basis, pursuant to a transportation agreement dated June 10, 1988. Northwest explains that service commenced September 22, 1988, under § 284.223(a) of the Commission's Regulations, as reported on October 24, 1988, in Docket No. ST89–304–000. Northwest further explains that the peak day quantity would be 500,000 MMBtu, the average daily quantity would be 2,500 MMBtu, and that the annual quantity would be 900,000 MMBtu. Northwest explains that it would receive natural gas from various sources in Wyoming, Colorado, Utah, Washington, and New Mexico and would redeliver the gas for Eastex's account to Washington Water Power Company a local distribution company in the state of Washington.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

19. PennEast Gas Service Company CNC Transmission Corporation Texas Eastern Transmission Corporation

[Docket No. CP88–182–001]

Take notice that on November 10, 1988, PennEast Gas Services Company (PennEast), a general partnership, CNG Transmission Corporation (CNG), 445 West Main Street, Clarksburg, WV 26301, and Texas Eastern Transmission Corporation (Texas Eastern), P.O. Box 2521, Houston, TX 77252, jointly known as applicants (Applicants), filed a Compliance Amendment to their Joint application for certificates of public convenience and necessity and related authorizations filed on January 15, 1988, pursuant to section 7(c) of the Natural Gas Act, and the rules and regulations of the Commission. The compliance amendment supplements and modifies Applicants' original application solely to reflect a modification of the design of certain of the proposed facilities for which Commission authorization to construct and operate is requested. The Compliance Amendment is currently on file with the Federal Energy Regulatory Commission (Commission) and is available for public inspection.

Applicants state that in the January 15, 1988, application PennEast specifically sought construction and operation authorization for facilities, which would consist of incremental pipeline, compression and metering facilities, which would be operated in conjunction with existing facilities owned and operated by CNC and Texas Eastern to render the proposed transportation services from the proposed receipt points to the proposed New York and New Jersey shippers' delivery points. By the original application, PennEast proposed to construct and operate the following facilities:

In conjunction with CNG:

—83 miles of 24-inch pipeline from the northern terminus of CNG's Line No. TL–460 at Biddlecum road to Point Vivian, New York, near the international border, to be known as Line No. PE–468;

—5,800 horsepower of compression to be located at CNG Transmission's existing Greenlick Compressor Station;

—13,500 horsepower of compression at a site on CNG Transmission's existing Line No. PL–1 near Doylesburg, Pennsylvania;

—6,000 horsepower of compression to be located at CNG Transmission's existing Sabinsville Compressor Station;
—measuring and regulations facilities to be located at the existing interconnection between the facilities of CNG Transmissions and Texas Eastern at Leidy Storage Pool;

In conjunction with Texas Eastern:

—20.25 miles of 36-inch pipeline looping on Texas Eastern's Leidy pipeline between PennEast's proposed Centre Hall compressor station and Texas Eastern's Perulack Station;
—8.50 miles of 36-inch pipeline loop and the discharge side of Texas Eastern's compressor station 23;
—3.93 miles of 36-inch pipeline replacing a like quantity of Texas Eastern's Line No. 2 between station No. 25 and station No. 26;
—5.25 miles of 36-inch pipeline replacing a like quantity of Texas Eastern's 24-inch Hanover Lateral;
—38.70 miles 30-inch pipeline from Texas Eastern's compressor station No. 27–A to Long Island, N.Y.;
—additional 4,800 horsepower gas turbine/compressor unit and upgrade the 3,500 horsepower unit to 4,800 horsepower, at PennEast's proposed Centre Hall compressor station;
—one 11,000 horsepower gas turbine/compressor unit at Texas Eastern's compressor station 24–A;
—two 11,000 horsepower gas turbine/compressor units at Texas Eastern's compressor station 24–A;
—two 11,000 horsepower gas turbine/compressor units at Texas Eastern's compressor station 25;
—measuring and regulating facilities at Texas Eastern's measuring and regulating stations Nos. 087, 1075, 953. Perulack and Chambersburg compressor station and PennEast's proposed Long Island measuring and regulation station.

Applicants state that the original application was filed in response to the Commission's notice of July 24, 1987, soliciting applications for authority to provide new natural gas service to the Northeast United States.

Applicant states that on August 15, 1988, the Associated PennEast Customer (APEC) Group filed an offer of settlement that provided for the severance from the open-season proceedings of various projects, the portions of projects in order to provide service to the APEC members by the winter 1989–90.

Applicants state that as a result of the filing by Texas Eastern of the Fence-to-Fence Capacity Restoration Project facilities, and the separate LNG reinforcement facilities, modifications are necessary to facilities proposed for other PennEast projects which were designed in conjunction with Texas Eastern's system, and were in a subsequent design sequence. Applicants further state that this compliance Amendment is submitted solely in response to the October 26, 1988, order.[2]

PennEast requests authorization to construct and operate the following facilities in conjunction with Texas Eastern's system:

—24.66 miles of 36-inch pipeline looping on Texas Eastern's Leidy pipeline from M.P. 24.66 to Texas Eastern's Perulack Station;
—3.25 miles of 36-inch pipeline loop on the discharge side of Texas Eastern's compressor station 23;
—5.18 miles of 36-inch pipeline replacing a like quantity of Texas Eastern's Line No. 2 between station No. 25 and station No. 26 (M.P. 1430.72 to M.P. 1434.90);
—1.75 miles of 36-inch pipeline replacing a like quantity of Texas Eastern's 24-inch Hanover Lateral;
—38.70 miles of 30-inch pipeline from Texas Eastern's compressor station No. 27–A to Long Island, N.Y.;
—one 11,000 horsepower gas turbine/compressor unit at Texas Eastern's compressor station 24–A;
—two 11,000 horsepower gas turbine/compressor units at Texas Eastern's compressor station 25;
—measuring and regulation facilities at Texas Eastern's measuring and regulating stations Nos. 087, 953, and PennEast's proposed Long Island measuring and regulation station.

The estimated capitol cost of the proposed Facilities is $314,602,500. In all other respects, the original application including the facilities in conjunction with CNG Transmission system and the proposed service remains unchanged.

Comment date: December 19, 1988, in accordance with Standard Paragraph F at the end of his notice.

20. PennEast Gas Services Company

[Docket No. CP88–181–001]

Take notice that on November 10, 1988, PennEast Gas Services Company (PennEast), a general partnership, filed a Compliance Amendment to its application for a certificate of Public Convenience and Necessity filed on January 15, 1988, pursuant to section 7(c) of the Natural Gas Act, and the Rules and Regulations of the Commission, and in compliance with the Commission's Order Finding Additional Discrete Projects issued October 26, 1988.[3]

PennEast states that on January 15, 1988, it filed an application for authorization to render a firm natural gas sales service pursuant to Rate Schedule CDS in interstate commerce to designated local distribution companies; to render firm transportation services in interstate commerce; to construct and operate facilities necessary therefore; and for a blanket certificate pursuant to 18 CFR 284.221 authorizing open-access, non-discriminatory transportation of natural gas.

PennEast states that it in the January 15, 1988 application proposed to construct and operate the following facilities in conjunction with the pipeline system of Texas Eastern:

—2.56 miles of 42-inch pipeline looping on Texas Eastern's existing pipeline in Pennsylvania.
—24.5 miles of 36-inch pipeline replacing a like quantity of Texas Eastern's 20-inch Line No. 2 at the discharge of Texas Eastern's Compressor Station No. 25 in Pennsylvania.
—1.0 miles of 36-inch pipeline replacing a like quantity of Texas Eastern's 24-inch Hanover Lateral Line No. 20–B in New Jersey.
—11,000 HP gas turbine/compressor unit at Station 21–A.
—11,000 HP gas turbine/compressor unit at Station 23.
—Expand capacity of Texas Eastern's Measuring and Regulating Stations No. 087 and No. 949.

PennEast states that on August 15, 1988, the Associated PennEast Customer ("APEC") Group filed an offer of settlement that provided for the severance from the open-season proceedings of various projects or portions of projects in order to provide service to the APEC members by the winter of 1989–90. PennEast further states that by its order of October 26, 1988, the Commission found the LNG reinstatement portion of the CRP project to be eligible for processing as a discrete project and directed Texas Eastern to file an application to implement that portion of the CRP project.

PennEast states that as a result of the filing by Texas Eastern of the Fence-to-Fence Capacity Restoration Project facilities, and the separate LNG reinstatement facilities, modifications are necessary to facilities proposed for other PennEast projects which were designed in conjunction with Texas Eastern's system, and were in a

[2] *Northeast and U.S. Pipeline Projects*, 45 FERC ¶ 61,098.

[3] *Northeast U.S. Pipeline Project*, 45 FERC ¶ 61,006

subsequent design sequence, and that its Compliance Amendments are submitted solely in response to that necessity and the October 26, 1988, order.

PennEast requests authorization to construct and operate the following facilities:

—7.50 miles of 36-inch pipeline replacing a like quantity of Texas Eastern's 20-inch Line No. 2 at the discharge of Texas Eastern's Compressor Station No. 25 in Pennsylvania (M.P. 1397.97 to M.P. 1405.47).
—11,000 HP gas turbine/compressor unit at Station 21–A.
—Modify Texas Eastern's Measuring and Regulating Stations Nos. 949 and 1209.
—Aerodynamic assembly changeouts at Station No. 23.

The estimated capital cost of the proposed facilities is $28,286,500.

Applicant states that in all other respects, the proposed services of the original application remain unchanged.

Comment date: December 19, 1988, in accordance with Standard Paragraph F at the end of this notice.

21. Williston Basin Interstate Pipeline Company

[Docket No. CP89–156–000]

Take notice that on November 10, 1988, Williston Basin Interstate Pipeline Company (Williston Basin), Suite 200, 304 East Rosser Avenue, Bismarck, North Dakota 58501, filed in Docket No. CP89–156–000 an application pursuant to section 7(c) of the Natural Gas Act for authorization to modify and enhance certain metering facilities at 18 metering stations of wells in Williston Basin's Baker Storage Field, all as more full set forth in the application which is on file with the Commission and open to public inspection.

At 16 of the stations, Williston Basin proposes to install new above-ground meter runs of the same size as the existing facilities but compatible with the 400 lb. psig design of other field facilities. These stations are identified as Station Nos. 3, 7, 8, 18, 28, 43, 47, 120, 126, 140, 394, 395, 396, 397, 398, and 399 (see appendix for complete list and legal description of all 18 meter stations).

Williston Basin further proposes to install a 4-inch meter run in addition to the existing 6-inch meter run at Station No. 12. It is stated that this would allow for more efficient operation of this group meter station.

Williston Basin also proposes to measure the storage withdrawals from well No. 81 through a group meter at Meter Station No. 108. It is stated that this would allow Williston Basin to operate this well on a most cost-efficient basis due to the low volume of gas injected into this well. It is indicated that group metering these two storage wells would require the installation of 50 feet of 3-inch pipeline and miscellaneous gauges and valves.

Williston Basin states that the proposed facilities would be installed on existing pipeline right-of-way. It is estimated that the total construction cost would be $180,000, which cost would be financed through internally generated funds and/or short-term bank loans.

Comment date: December 19, 1988, in accordance with Standard Paragraph F at the end of this notice.

Appendix

Storage Meter Stations

1. Well #3 Group Meter Station—Unit 3, located in the SW ¼ of Section 27, T1ON, R58E, in Fallon County, Montana.
2. Well #7 Group Meter Station—Unit 3, located in the NE ¼ of Section 28, T1ON, R58E, in Fallon County, Montana.
3. Well #8 Group Meter Station—Unit 3, located in the NE ¼ of Section 3, T9N, R58E, in Fallon County, Montana.
4. Well #12 Group Meter Station—Unit 4, located in the NE ¼ of Section 14, T9N, R58E, in Fallon County, Montana.
5. Well #18 Meter Station—Unit 3, located in the NE ¼ of Section 34, T1ON, R58E, in Fallon County, Montana.
6. Well #47 Group Meter Station—Unit 3, located in the SE ¼ of Section 34, T1ON, R58E, in Fallon County, Montana.
7. Well #394 Meter Station—Unit 3, located in the SE ¼ of Section 21, T1ON, R58E, in Fallon County, Montana.
8. Well #28 Group Meter Station—Unit 4, located in the SE ¼ of Section 25, T9N, R58E, in Fallon County, Montana.
9. Well #43 Group Meter Station—Unit 4, located in the NW ¼ of Section 24, T9N, R58E, in Fallon County, Montana.
10. Well #120 Meter Station—Unit 4, located in the NW ¼ of Section 11, T9N, R58E, in Fallon County, Montana.
11. Well #140 Group Meter Station—Unit 4, located in the NW ¼ of Section 24, T9N, R58E, in Fallon County, Montana.
12. Well #395 Meter Station—Unit 4, located in the SW ¼ of Section 11, T9N, R58E, in Fallon County, Montana.
13. Well #396 Meter Station—Unit 4, located in the SE ¼ of Section 14, T9N, R58E, in Fallon County, Montana.
14. Well #397 Meter Station—Unit 4, located in the NE ¼ of Section 23, T9N, R58E, in Fallon County, Montana.
15. Well #398 Meter Station—Unit 4, located in the SW ¼ of Section 24, T9N, R58E, in Fallon County, Montana.
16. Well #399 Meter Station—Unit 4, located in the SE ¼ of Section 36, T9N, R58E, in Fallon County, Montana.
17. Well #126 Group Meter Station—Unit 5, located in the ¼ of Section 4, T8N, R59E, in Fallon County, Montana.
18. Well #81 Meter Station—Unit 5, located in the NW ¼ of Section 10, T8N, in Fallon County, Montana.

22. Northern Natural Gas Company, Division of Enron Corp.

[Docket No. CP89–241–000]

Take notice that on November 18, 1988, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, Houston, Texas 77002, filed in Docket No. CP89–241–000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to operate an existing delivery point and appurtenant facilities as a jurisdictional sales facility, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern proposes to operate an existing delivery point to Northern States Power Company of Wisconsin (NSP–Wisc.) to accommodate jurisdictional natural gas deliveries to the State Fish Hatchery near Bayfield, Wisconsin, to be served by NSP–Wisc. It is stated that the volume of gas delivered to the State Fish Hatchery would be served from the existing firm entitlement of NSP–Wisc.

Northern states that the facility was constructed pursuant to Section 311 of the Natural Gas Policy Act of 1978. It is estimated that a maximum of 145 Mcf of gas per day would be delivered at this point.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

23. Northwest Pipeline Corporation

[Docket No. CP89–222–000]

Take notice that on November 16, 1988, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–222–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under its blanket certificate issued in Docket No. CP86–578–000 pursuant to section 7 of the Natural Gas Act for Cascade Steel Rolling Mills, Inc. (Cascade), all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest proposes to transport natural gas for Cascade, on an

interruptible basis, pursuant to a transportation agreement dated July 15, 1988, as amended August 17, 1988. Northwest states that service commenced October 6, 1988 under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–588–000. Northwest further explains that the peak day quantity would be 2,900 MMBtu, the average daily quantity would be 33 MMBtu, and that the annual quantity would be 12,000 MMBtu. Northwest explains that it would receive natural gas from various sources and in Wyoming, Colorado, Utah, and Washington, and would redeliver the gas to Northwest Gas Company and/or CP National Corporation, local distribution companies, for the account of Cascade in the States of Washington and Oregon.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

24. Northwest Pipeline Corporation

[Docket No. CP89–221–000]

Take notice that on November 16, 1988, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–221–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under its blanket certificate issued in Docket No. CP86–578–000 pursuant to section 7 of the Natural Gas Act for Pennwalt Corporation (Pennwalt), all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest proposes to transport natural gas for Pennwalt, on an interruptible basis, pursuant to a transportation agreement dated June 10, 1988. Northwest explains that service commenced September 22 1988, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–316–000. Northwest further explains that the peak day quantity would be 3,700 MMBtu, the average daily quantity would be 550 MMBtu, and that the annual quantity would be 200,000 MMBtu. Northwest explains that it would receive natural gas from various sources and in Wyoming, Colorado, Utah, New Mexico and Washington, and would redeliver the gas to Northwest Gas Company (Northwest), a local distribution company, for the account of Pennwalt in Multnomah and Clackmas Counties, Oregon.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

25. Northwest Pipeline Corporation

[Docket No. CP89–261–000]

Take notice that on November 21, 1988, Northwest Pipeline Corporation (Northwest), P.O. Box 8900, Salt Lake City, Utah 84108–0900, filed in Docket No. CP89–261–000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas for Smurfit Newsprint Corporation (Smurfit), as end user, under its blanket certificate issued in Docket No. CP86–578–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest states that the volumes of natural gas to be transported for Smurfit would be approximately 12,000 MMBtu on a peak day, approximately 4,000 MMBtu on an average day and approximately 1,500,000 MMBtu on an annual basis. Northwest further states that it would transport the natural gas through its transmission system from various receipt points on its system in Colorado, Wyoming, New Mexico, Utah and Washington to the Portland West and Scappoose Meter Station and the Portland Northeast Meter Station located in Multnomah County, Oregon and the Portland Southeast Meter Station located in Clackmas County, Oregon. Northwest indicates that the delivery point meter stations connect to Northwest Natural Gas Company.

Northwest states that it commenced the transportation of the natural gas for Smurfit on October 11, 1988, at Docket No. ST89–564–000, for a 120-day period pursuant to § 284.223(a)(1) of the Commission's Regulations (18 CFR 284.223(a)(1)).

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

26. Trunkline Gas Company

Docket No. CP89–259–000

Take notice that on November 21, 1988 Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas, 77251–1642, filed in Docket No. CP89–259–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations, for authorization to transport natural gas for American Central Gas Marketing Company (American Central), a shipper of natural gas, under Trunkline's blanket certificate issued in Docket No. CP86–586–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open for public inspection.

Specifically, Trunkline requests authority to transport up to 100,000 Dt. per day on behalf of American Central pursuant to a Transportation Agreement dated September 2, 1988, between Trunkline and American Central (Transportation Agreement). The Transportation agreement provides for trunkline to receive gas from various existing points of receipt on its system. Trunkline will then transport and redeliver subject gas, less fuel and unaccounted for line loss, to Northern Indiana Public Service Company (Northern Indiana) in Marshall, Pulaski, Elkhart, and Jasper Counties, Indiana.

Trunkline further states that the estimated daily and estimated annual quantities would be 20,000 Dt. and 7,300,000 Dt., respectively. Service under § 284.223(a) commenced on October 12, 1988, as reported in Docket No. ST89–0560.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

27. United Gas Pipe Line Company

[Docket No. CP89–235–000]

Take notice that on November 17, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–235–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to provide an interruptible transporation service on behalf of The Resource Group, a marketer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open for public inspection.

United states that the interruptible gas transportation service agreement T1–21–1894/Ref. #3656, dated October 5, 1988, proposes to transport a maximum daily quantity of 10,300 MMBtu and an annual quantity of 3,759,500 MMBtu, using existing facilities to provide transporation service pursuant to that agreement. It is stated that the executed agreement contains the location of the receipt and delivery points in Exhibits A and B. United further states that service commenced October 7, 1988, as reported in Docket No. ST89–580 pursuant to § 284.223(a) of the Regulations.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

28. Williams Natural Gas Company

Docket No. CP89–244–000

Take notice that on November 18, 1988, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP89–244–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide transportation for Cabot Energy Marketing Corporation (Cabot) under WNG's blanket certificate issued in Docket No. CP86–6341–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

WNG requests authorization to transport, on an interruptible basis, up to a maximum of 150,000 MMBtu of natural gas per day for Cabot from various receipt points of Kansas, Oklahoma, Texas and Wyoming to various delivery points on WNG's pipeline system located in Kansas, Missouri and Oklahoma. WNG anticipates transporting 50,000 MMBtu on an average day and 54,750,000 MMBtu on an annual basis. WNG states that the transportation of natural gas for Cabot commenced on October 1, 1988, as reported in Docket No. ST89–613–000, pursuant to § 284.223(a) of the Commission's Regulations.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

29. United Gas Pipe Line Company

[Docket No. CP89–271–000]

Take notice that on November 22, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001 filed in Docket No. CP89–271–000 a request pursuant to §§ 157.205, 157.212 and 157.216 of the Commission's Regulations under the Natural Gas Act of authorization to abandon in place certain pipeline facilities and to add a delivery point to Mississippi Valley Gas Company (MVG) under the blanket certificate issued in Docket No. CP82–430–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

It is stated that MVG is an existing distributor customer of United. United proposes to abandon in place by sale to MVG approximately three miles of 8-inch diameter pipeline and related facilities in Hinds County, Mississippi. It is stated that the facilities to be abandoned are known as the Woodrow Wilson Pipeline. United explains that in order to continue to serve MVG at this location, it proposes to construct and operate a 6-inch dual meter station at the proposed point of division between United-owned facilities and those to be owned by MVG. It is indicated that the proposed change in delivery points will not affect United's delivery capacity to MVG and is not prohibited by United's tariff.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

30. Natural Gas Pipeline Company of America

[Docket No. CP89–254–000]

Take notice that on November 21, 1988, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP89–254–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of Panhandle Trading Company (Panhandle), under Natural's blanket certificate issued in Docket No. CP86–582–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Natural requests authorization to transport, on an interruptible basis, up to a maximum of 100,000 MMBtu of natural gas per day from receipt points located in Louisiana, Offshore Louisiana and Offshore Texas to delivery points located in Louisiana, Illinois, Texas, Arkansas, Iowa, Missouri and Kansas. Natural anticipates transporting, on an average day 15,000 MMBtu and an annual volume of 5,475,000 MMBtu.

Natural states that the transportation of natural gas for Panhandle commenced October 1, 1988, as reported in Docket No. ST89–812–000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to Natural in Docket No. CP86–582–000.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

31. Tennessee Gas Pipeline Company

[Docket No. CP89–280–000]

Take notice that on November 23, 1988, Tennessee Gas Pipeline Company, (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89–280–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide a transportation service for LL&E Gas Marketing, Inc. (LL&E), a marketer, under the blanket certificate issued in Docket No. CP87–115–000 on June 18, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Tennessee states that pursuant to a transportation agreement dated October 25, 1988, it proposes to transport up to 10,000 dekatherms (dt) per day equivalent of natural gas on an interruptible basis for LL&E from points of receipt listed in Exhibit "A" of the agreement to delivery points also listed in Exhibit "A". Such transportation service involves interconnections between Tennessee and various transporters. Tennessee states that it would receive the gas at existing points on its system located offshore Louisiana, and that it would transport and redeliver the gas in the State of Louisiana and that the ultimate delivery point is the State of Wisconsin.

Tennessee advises that service under § 284.223(a) commenced October 26, 1988, as reported in Docket No. ST89–764 (filed November 17, 1988). Tennessee further advises that it would transport 10,000 dt on an average day and 3,650,000 dt annually.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

32. United Gas Pipe Line Company

[Docket No. CP89–273–000]

Take notice that on November 22, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251, filed in Docket No. CP89–273–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under the blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United proposes to transport natural gas on an interruptible basis for Consolidated Fuel Corporation (Consolidated Fuel). United explains that service commenced October 1, 1988, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–599. United explains that the peak day quantity would be 77,250 MMBtu, the average daily quantity would be 77,250 MMBtu, and that the annual quantity would be 28,196,250 MMBtu. United explains that it would receive natural gas for Consolidated Fuel's

VOL 53 ISS 233 DE 5 1988 UMI

account at existing points of receipt in the state of Louisiana, and would redeliver for Consolidated Fuel's account at the existing interconnection between United and Southern Natural Gas Company in Ouachita Parish, Louisiana.

Comment date: January 12, 1989, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs:

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-m

[Project No. 9731-001]

Summit Hydropower; Surrender of Preliminary Permit

November 30, 1988.

Take notice that Summit Hydropower, permittee for the Willimantic No. 3 Project No. 9731, has requested that the preliminary permit be terminated. The preliminary permit for Project No. 9731 was issued on May 8, 1986, and would have expired on April 30, 1989. The project would have been located on the Willimantic River, in Windham County, Connecticut.

The permittee filed the request on November 16, 1988, and the preliminary permit for Project No. 9731 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday, or holiday as described in 18 CFR 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TC89-4-001, Docket No. TC89-4-002]

Arkla Energy Resources; Tariff Filing

November 30, 1988.

Take notice that on November 16 and 17, 1988,[1] Arkla Energy Resources, a Division of Arkla, Inc. (Applicant), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Dockets No. TC89-4-001 and TC89-4-002, pursuant to § 281.204(b)(2) of the Commission's Regulations the following revised tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1, to become effective December 1, 1988: First Substitute Tenth Revised Sheet No. 3E. Cancel, Tenth Revised Sheet No. 3F.

The filings reflect changes in the Applicants Index of Entitlements.

Any person desiring to be heard or to make any protest with reference to said tariff sheet filings should on or before December 9, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

BILLING CODE 6717-01-M

[Docket No. RP88-115-006]

Texas Gas Transmission

November 30, 1988.

Take notice that on November 23, 1988, Texas Gas Transmission Corporation (Texas Gas) filed revised tariff sheets to its FERC Gas Tariff, to be effective November 1, 1988.

Texas Gas states that in compliance with the Commission's order of May 31, 1988, this filing reflects the following changes:

(a) The base demand and commodity costs of purchased gas were determined from the PGA filing made on September 30, 1988, to be effective November 1, 1988, and are reflected on Third Revised Sheet No. 107 and Substitute Second Revised Sheet No. 108.

(b) The revised tariff sheets and supporting workpapers reflect currently effective contract demand volume levels in the design of the D-1 rates to the extent that certificate authority for the revised contract demand levels is not received before November 1, 1988.

Texas Gas requests any necessary waivers and moves the Commission to accept the revised tariff sheets to be effective November 1, 1988, subject to refund and to the final determination of the Commission in the instant proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825

[1] The submission of TC89-4-002 on November 17, 1988, was made to correct clerical errors in the original filing of November 16th.

North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commissions Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1988)). All such motions or protests should be filed on or before December 7, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3486-8]

Ambient Air Monitoring Reference and Equivalent Methods; Designation

Notice is hereby given that EPA, in accordance with 40 CFR Part 53 has designated another equivalent method for the determination of lead in suspended particulate matter collected from ambient air. The new designated method is:

EQL-1288-070, "Determination of Lead Concentration in Ambient Particulate Matter by Inductively Coupled Argon Plasma Optical Emission Spectrometry (Silver Valley Laboratories)."

The applicant's request for an equivalent method determination for the above method was received on October 17, 1988.

This method has been tested by the applicant, Silver Valley Laboratories, Inc., in accordance with the test procedures prescribed in 40 CFR Part 53. After reviewing the results of these tests and other information submitted by the applicant, EPA has determined, in accordance with Part 53, that this method should be designated as an equivalent method. The information submitted by the applicant will be kept in file at EPA's Atmospheric Research and Exposure Assessment Laboratory, Research Triangle Park, North Carolina, and will be available for inspection to the extent consistent with 40 CFR Part 2 (EPA's regulations implementing the Freedom of Information Act).

This method uses the sampling procedure specified in the reference method for the determination of lead in suspended particulate matter collected from ambient air (43 FR 46258). Lead in the particulate matter is solubilized by extraction with nitric acid facilitated by heat. The lead content of the sample is analyzed by a Thermo-Jarrell Ash inductively coupled argon plasma optical emission spectrometer using the 220.35 nm lead emission line and instrument conditions optimized by the user laboratory. A sample of the extract solution is nebulized to form an aerosol which is excited with high temperature argon gas produced by passing of argon through a powerful radio frequency field. Radiation emitted from the plasma enters a spectrometer where it is separated into selected wavelengths and sensed by separate photomultipler tubes for each element of interest. The luminous energy thus measured is converted to an output signal which can be related to the concentration of each element of interest in the sample. Technical questions concerning the method should be directed to Silver Valley Laboratories, Inc., P.O. Box 929, Kellogg, Idaho 83837.

As a designated equivalent method, this method is acceptable for use by states and other control agencies under requirements of 40 CFR Part 58, Ambient Air Quality Surveillance. For such purposes the method must be used in strict accordance with the procedures and specifications provided in the method description. States or other agencies using inductively coupled argon plasma optical emission spectrometric methods that employ procedures and specifications significantly different from those in this method must seek approval for their particular method under the provisions of section 2.8 of Appendix C to 40 CFR Part 58 (Modification of Methods by Users) or may seek designation of such methods as equivalent methods under the provisions of 40 CFR Part 53.

Additional information concerning this action may be obtained by writing to Director, Quality Assurance Division (MD-77), Atmospheric Research and Exposure Assessment Laboratory, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

For Further Information Contact: Frank McElroy at (919) 541-2622.

John H. Skinner,

Acting Assistant Administrator for Research and Development.

[OPTS-00096; FRL-34867]

Biotechnology Science Advisory Committee; Subcommittee on the Proposed Biotechnology Rule Under TSCA; Open Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of open meeting.

SUMMARY: There will be a 1-day meeting of the Biotechnology Science Advisory Committee; Subcommittee on Proposed Biotechnology Rule under TSCA. The meeting will be open to the public. The Subcommittee will review a set of scientific issues being considered by the Agency in connection with a proposed rule under the Toxic Substances Control Act (TSCA) for testing and use of microorganisms subject to TSCA.

DATE: The meeting will be held on Wednesday, December 21, 1988, starting at 9 a.m. and ending at approximately 5 p.m.

ADDRESS: The meeting will be held at: The Crystal Gateway Marriott Hotel, 1700 Jefferson Davis Highway, Arlington, VA.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. EB-44, 401 M St. SW., Washington, DC 20460, Telephone: (202) 554-1404, TDD: (202) 554-0551.

SUPPLEMENTARY INFORMATION: Attendance by the public will be limited to available space. The TSCA Assistance Office will provide summaries of the meeting at a later date.

Dated: November 29, 1988.

Victor J. Kimm,

Assistant Administrator, for Pesticides and Toxic Substances.

BILLING CODE 6560-50-M

[OPTS-59264A; FRL-34864]

Certain Chemicals; Approval of a Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for test marketing exemption (TME) under section 5(h)(1) of the Toxic Substances Control Act (TSCA) and 40 CFR 720.38. EPA has designated this application as TME-89-1. The test marketing conditions are described below.

EFFECTIVE DATE: November 23, 1988.

FOR FURTHER INFORMATION CONTACT: Darlene Jones, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–608, 401 M St. SW., Washington, DC 20460, (202) 382–2279.

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby approves TME–89–1. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME–89–1. A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME. In addition, the applicant shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. Records of the quantity of the TME substance produced and the date of manufacture.

2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.

3. Copies of the bill of lading that accompanies each shipment of the TME substance.

TME–89–1

Date of Receipt: October 11, 1988.
Notice of Receipt: October 21, 1988 (53 FR 41410).
Applicant: AM International, Inc.
Chemical: Polymer of a fat and heterocyclic substituted olefin.
Use: Open non-dispersive use.
Production Volume: (Confidential).
Number of Customers: 6 customers.
Test Marketing Period: 15 months, commencing on first day of manufacture.
Risk Assessment: EPA identified no significant health or environmental concerns for the test market substance. Therefore, the test market substance will not present any unreasonable risk of injury to health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information that comes to its attention which casts significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to health or the environment.

Dated: November 23, 1988.

Wendy Cleland-Hamnett,

Deputy Director, Chemical Control Division, Office of Toxic Substances.

BILLING CODE 6560–50–M

[OPTS–51596B; FRL–3486–5]

Toxic and Hazardous Substances; Certain Chemical Premanufacture Notice; Termination of Review Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Under the authority of section 5(c) of the Toxic Substances Control Act (TSCA), EPA is revoking, effective November 16, 1988, the remaining portion of a 90-day extension of the review period for PMN P86–92.

FOR FURTHER INFORMATION CONTACT: R. James Alwood, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Environmental Protection Agency, Room E–613, 401 M Street SW., Washington, DC 20460, (202) 382–3374.

SUPPLEMENTARY INFORMATION: The original review periods for P88–134 and P88–138 were scheduled to expire on January 20, 1988. EPA published a section 5(c) extension notice for the PMN in the **Federal Register** of January 26, 1988 (53 FR 2888), to provide the Agency with sufficient time to issue an Order under section 5(e). The Order would have prohibited the Company from manufacturing the PMN substance in, or importing it into, the United States, pending the submission and evaluation of test data addressing the potential risk of injury to the environment.

After the section 5(c) extension was published, the Company voluntarily suspended the notice review period and submitted additional toxicity testing. In light of this new information, EPA finds that the PMN substance does not present an unreasonable risk of injury to the environment.

Therefore, EPA is revoking the remaining portion of the extended review, effective immediately.

Dated: November 16, 1988.

John W. Melone,

Director, Chemical Control Division, Office of Toxic Substances.

[FR Doc. 88–27893 Filed 12–2–88; 8:45 am]

BILLING CODE 6560–50–M

[OPTS–51700B; FRL–3486–6]

Toxic and Hazardous Substances; Certain Chemicals Premanufacture Notices; Termination of Review Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Under the authority of section 5(c) of the Toxic Substances Control Act (TSCA), EPA is revoking, effective November 16, 1988, the remaining portion of a 90-day extension of the review periods for PMN P88–134 and P88–138.

FOR FURTHER INFORMATION CONTACT: R. James Alwood, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Environmental Protection Agency, Room E–613, 401 M Street, SW., Washington, DC 20460, (202) 382–3374.

SUPPLEMENTARY INFORMATION: The original review period for P88–92 was scheduled to expire on August 31, 1987. EPA published a section 5(c) extension notice for the PMN in the **Federal Register** of September 16, 1987 (52 FR 34497), to provide the Agency with sufficient time to issue an Order under section 5(e). The order would have prohibited the Company from manufacturing the PMN substance in, or importing it into, the United States, pending the subcommission and evaluation of test data addressing the potential risk of injury to the environment.

After the section 5(c) extension was published, the Company voluntarily suspended the notice review period and submitted additional toxicity testing. In light of this new information, EPA finds that the PMN substance does not present an unreasonable risk of injury to the environment.

Therefore, EPA is revoking the remaining portion of the extended review, effective immediately.

Dated: November 16, 1988.

John W. Melone,

Director, Chemical Control Division Office of Toxic Substances.

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200184.
Title: North Carolina State Ports Authority Terminal Agreement.
Parties: North Carolina State Ports Authority, Boke Trading, Inc. (Boke).
Synopsis: The agreement establishes a one-year contract with an option for two additional terms of one year for Boke's marine terminal operations at Wilmington, North Carolina.

Agreement No.: 224-200183.
Title: Trans Pacific Container Service Corporation Terminal Agreement.
Parties: Trans Pacific Container Service Corporation (TRAPAC), Marine Terminals Corporations (MTC).
Synopsis: The agreement provides for MTC to furnish terminal and stevedoring services to TRAPAC at TRAPAC's facility located at Terminal 30 in Seattle, Washington.

Agreement No.: 224-011042-001.
Title: Galveston Wharves Terminal Agreement.
Parties: Board of Trustees of the Galveston Wharves, Southern Stevedoring Company, Inc. (Southern).
Synopsis: The agreement provides for a reduction in the total annual cargo through-put tonnage and a reduced usage fee in connection with Southern relinquishing a portion of the Upland Terminal.

Agreement No.: 224-200077-001.
Title: Virginia International Terminals Agreement.
Parties: Virginia International Terminals, Inc., Mitsui O.S.K. Lines, Ltd., Nippon Yusen Kaisha, Yamashita-Shinnihon Steamship Co., Ltd.
Synopsis: The agreement substitutes Nippon Liner System, Ltd. for Yamashita-Shinnihon Steamship Co., Ltd. as a party to the basic agreement.

By Order of the Federal Maritime Commission.

Dated: November 30, 1988.

Joseph C. Polking,

Secretary.

Agreeement No.: 217-010738-002.
Title: Barber Blue Sea/Open Bulk Carriers Chartering Agreement.
Parties: Barber Blue Sea (Wilhelmsen Lines A/S), Opean Bulk Carriers Limited.
Synopsis: The proposed modification would reflect the termination of the joint service status of Barber Blue Sea due to the withdrawal of two of the three current parties to the joint service. The resulting owner of Barber Blue Sea will be Wilhelmsen Lines A/S. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.

Dated: November 30, 1988.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Change in Bank Control; Acquisition of Shares of Banks or Bank Holding Companies; C. B. Bancshares, Inc.

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than December 19, 1988.

A. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *C. B. Bancshares, Inc. Employee Stock Ownership Plan and Trust,* Honolulu, Hawaii; to acquire 24.9 percent of the voting shares of C. B. Bancshares, Honolulu, Hawaii, and thereby indirectly acquire City Bank, Honolulu, Hawaii.

Board of Governors of the Federal Reserve System, November 29, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

First Interstate BancSystem of Montana, Inc.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 22, 1988.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *First Interstate BancSystem of Montana, Inc.*, Billings, Montana; to acquire First Interstate Trust Company of Billings/Missoula, Billings, Montana, and thereby engage in trust company activities pursuant to § 225.25(b)(3) of the Board's Regulation Y. These activities will be conducted in the State of Montana.

Board of Governors of the Federal Reserve System, November 29, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

BILLING CODE 6750–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Office of the General Counsel; Statement of Organization, Functions, and Delegation of Authority

Part A, Chapter AG (Office of the General Counsel) of the Statement of Organization, Functions, and Delegation of Authority for the Department of Health and Human Services (38 FR 17033, June 28, 1973, as amended most recently at 51 FR 35286, 10/2/86), is amended to delete from section AG.22 A.1.a. the reference to patents and from section Ag.35 the designation of the Associate General Counsel, Business and Administrative Law Division, as the Department Patent Officer and to designate in his/her place the Associate General Counsel, Public Health Division. No change in the responsibilities for the Department Patent Officer has been made. The changes are as follows:

Delete sections AG 22A.1.a and Ag.35 and replace with the following:

Section AG.22.A.1.a. Legal services on business management activities and administrative operations throughout the Department, including procurement, contracting, copyrights, personnel, budget, appropriations, employment, compensation, travel and claims by and against the Department.

Section AG.35 *Department Patent Officer.* The Associate General Counsel, Public Health Division, is designated Department Patent Officer and is responsible for:

Date: November 23, 1988.

S. Anthony McCann,

Assistant Secretary for Management and Budget.

BILLING CODE 4150–01–M

Food and Drug Administration

[Docket No. 85D–0574]

Revised Drug Stability Guideline; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the revised "Drug Stability Guideline—December 1, 1987," prepared by the Center for Veterinary Medicine (CVM). The guideline is intended for use as an aid in meeting the stability requirements for the manufacture of veterinary finished dosage forms (pharmaceutical and medicated feed products) as submitted in new animal drug applications (NADA's) and manufactured in conformance to the corresponding current good manufacturing practice (CGMP) regulations (21 CFR Parts 211, 225, and 226).

ADDRESSES: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857. Requests for copies of the revised "Drug Stability Guideline—December 1, 1987," to the Division of Chemistry (HFV–142), Center for Veterinary Medicine, Food and Drug Administration, Rm. 8–92, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: John R. Markus, Center for Veterinary Medicine (HFV–142), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3442.

SUPPLEMENTARY INFORMATION: FDA is announcing the availability of the revised "Drug Stability Guideline—December 1, 1987," prepared by CVM. A notice of availability of a draft of this revision was announced in the **Federal Register** of February 19, 1986 (51 FR 6037) (Docket No. 85D–0574).

The guideline is intended as an aid in designing and conducting stability studies to meet the requirements of 21 CFR 514.1(b)(5)(x) and the appropriate CGMP regulations for veterinary products (21 CFR 211.166 and 226.58). Section 514.1 specifies the proper format and the information required for NADA approval under section 512(b) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(b)). The guideline applies to finished dosage form drugs for veterinary purposes and to drugs used in medicated feed products.

The revised guideline includes the following changes:

1. Editorial changes throughout the document.

2. An updated section on containers.

3. An updated section on analytical methods. The update provides a method format sequence for the reporting of analytical methods and a list of references related to stability applications.

4. A new section on the use of injectable multidose containers under "Sterile Preparations."

5. A completely revised medicated premix and finished feed section. This section reflects the revised medicated feed nomenclature (Type A articles, Types B and C feeds (21 CFR 558.3)). In addition, it provides more detail to assist the user in conducting studies of these preparations. Information on interference, homogeneity, and segregation studies is given.

6. A section (from the preceding guidance) on medicated liquid feed supplements. This section was the subject of a notice of availability published in the **Federal Register** of February 19, 1986 (51 FR 6038) (Docket No. 84D–0284), because it was initially issued as a separate guideline.

7. A section (from the preceding guidance) on products containing one or more DNA-derived active ingredients. This section advises the user that the stability of such products will be handled as that of normal drug or feed products. Specific requirements will be determined on a case-by-case basis.

The notice of availability of the draft revised drug stability guideline provided for a 30-day comment period. In response to that notice, an industry association filed two submissions, and two drug sponsors filed one submission each. Those submissions and CVM's responses are on file with the Dockets Management Branch (Docket No. 85D–0574).

Interested persons may, at any time, submit additional written comments on the revised guideline to the Dockets Management Branch. Such comments will be considered in determining if further revisions are required. Respondents should submit two copies (except that individuals may submit single copies) identified with Docket No. 85D–0574. Comments and all related materials may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 28, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 88–27849 Filed 12–2–88; 8:45 am]

BILLING CODE 4160–01–M

[Docket No. 88N-0405]

Drug Export; Abbott Test Pack® HIV-1/HIV-2

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Abbott Laboratories, North Chicago, IL, has filed an application requesting approval for the export of the biological product Abbott Test Pack® HIV-1/HIV-2 to West Germany.

ADDRESS: Relevant information on this application may be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human biological products under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: Boyd Fogle, Jr., Center for Biologics Evaluation and Research (HFB-120), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8191.

SUPPLEMENTARY INFORMATION: The Drug Export Amendments Act of 1986 (Pub. L. 99-660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of drugs that are not currently approved in the United States. The approval process is governed by section 802(b) of the act. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(2)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Abbott Laboratories, North Chicago, IL 60064, has filed an application requesting approval for the export of the biological product Abbott Test Pack® HIV-1/HIV-2, to West Germany. The Abbott Test Pack® HIV-1/HIV-2 is used as an in vitro rapid enzyme immunoassay for the detection of antibodies to two human immunodeficiency viruses (HIV-1 and HIV-2) in human sera, plasma, and whole blood. The application was received and filed in the Center for Biologics Evaluation and Research on November 14, 1988, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by December 15, 1988, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802, Pub. L. 99-660 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated under 21 CFR 5.44.

Dated: November 21, 1988.

Thomas S. Bozzo,

Director, Office of Compliance, Center for Biologics Evaluation and Research.

[FR Doc. 88-27850 Filed 12-2-88; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 88D-0338]

Medical Devices; Draft Guidance for Premarket Notification Submissions for Magnetic Resonance Diagnostic Devices; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a document entitled "Draft Guidance for Content and Review of a Magnetic Resonance Diagnostic Device 510(k) Application," prepared by FDA's Center for Devices and Radiological Health (CDRH). The purpose of the draft document is to provide guidance for the preparation and review of premarket notifications for magnetic resonance diagnostic devices. The premarket notifications would be submitted to FDA under section 510(k) of the Federal Food, Drug, and Cosmetic Act (the act). CDRH's reviewers determine whether or not a device the subject of a 510(k) submission is substantially equivalent to marketed devices of the same generic type.

DATE: Written comments may be submitted at any time. However, comments submitted by February 3, 1989 will be used by FDA to determine whether any changes in the draft guidance are warranted during CDRH's preparation of a final guidance document. Comments should reference the docket number found in the heading of this notice and be sent to the Dockets Management Branch (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857.

ADDRESS: Written requests for copies of the draft guidance document to the Division of Small Manufacturers Assistance, Center for Devices and Radiological Health (HFZ-220), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 800-638-2041, calls from within MD 301-443-6587.

FOR FURTHER INFORMATION CONTACT: Joseph M. Sheehan, Center for Devices and Radiological Health (HFZ-84), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4874.

SUPPLEMENTARY INFORMATION: FDA regulates medical devices under the act (21 U.S.C. 301 *et seq.*) as amended by the Medical Device Amendments of 1976 (Pub. L. 94-295) (the amendments). Section 510(k) of the act (21 U.S.C. 360(k)) requires that each person who is required to register under this section and who proposes to begin the introduction or delivery for introduction into interstate commerce for commercial distribution of a device intended for human use shall, at least 90 days before making such introduction or delivery, notify FDA as prescribed in the regulations. Subpart E of 21 CFR Part 807 governs premarket notification submissions to FDA under section 510(k) of the act. FDA is making available to the public its "Draft Guidance for Content and Review of a Magnetic Resonance Diagnostic Device 510(k) Application" to provide guidance for the preparation and review of a premarket notification for a magnetic resonance diagnostic device.

The "Draft Guidance for Content and Review of a Magnetic Resonance Diagnostic Device 510(k) Application" is available for public examination in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under 21 CFR 10.85.

Dated: November 25, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

National Institutes of Health

National Cancer Institute; Meeting of the Board of Scientific Counselors, Division of Cancer Prevention and Control

Pusuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, Division of Cancer Prevention and Control, National Cancer Institute, January 26-27, 1989, Building 1, Wilson Hall, 3rd Floor, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

The entire meeting will be open to the public on January 26 from 8:30 a.m. to recess and on January 27 from 8:30 a.m. to adjournment to discuss administrative details and for the discussion and review of concepts and programs within the Division. Attendance by the public will be limited to space available.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892-3100 (301/496-5708) will provide a summary of the meeting and a roster of committee members, upon request.

Other information pertaining to this meeting can be obtained from the Acting Executive Secretary, Elise Mackie, National Cancer Institute, Executive Plaza-North, Room 318, National Institutes of Health, Bethesda, Maryland 20892 (301-496-8526), upon request.

Dated: November 29, 1988.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140-01-M

National Heart, Lung, and Blood Institute; Meeting of the Cardiology Advisory Committee

Pursuant to Pub. L. 92-463, notice is hereby given of a meeting of the Cardiology Advisory Committee, National Heart, Lung, and Blood Institute, January 23-24, 1989, Building 31C, Conference Room 8, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

The entire meeting will be open to the public from 9:00 a.m. on January 23 to adjournment on January 24. Attendance by the public will be limited to space available. Topics for discussion will include a review of the research programs relevant to the Cardiology area and consideration of future needs and opportunities.

Terry Bellicha, Chief, Communications and Public Information Branch, National Heart, Lung, and Blood Institute, Room 4A21, Building 31, National Institutes of Health, Bethesda, Maryland 20892, (301) 496-4236, will provide a summary of the meeting and a roster of the committee members.

Eugene R. Passamani, M.D., Director, Division of Heart and Vascular Diseases, National Heart, Lung, and Blood Institute, Room 416, Federal Building, Bethesda, Maryland 20892, (301) 496-2553, will furnish substantive program information upon request.

(Catalog of Federal Domestic Assistance Program No. 13.837, Heart and Vascular Diseases Research, National Institutes of Health)

Dated: November 29, 1988.

Betty J. Beveridge,

Committee Management Officer, NIH.

[FR Doc. 88-27938 Filed 12-2-88; 8:45 am]

BILLING CODE 4140-01-M

National Institute of Environmental Health Sciences Advisory Council on Hazardous Substances Research and Training; Ad Hoc Subcommittee Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of a meeting of an ad hoc subcommittee on research oversight of the Advisory Council on Hazardous Substances Research and Training at the National Institutes of Health, Building 31, C Wing, Conference Room 8, Bethesda, Maryland on December 19 and 20, 1988. The meeting is open to the public and will begin at 8:30 a.m. on December 19 and end at 1:00 p.m. on December 20, 1988.

The goal of the ad hoc subcommittee is to assist the Advisory Council and the National Institute of Environmental Health Sciences (NIEHS) in the implementation of a program of university-based basic research and assist in the coordination of various research programs authorized by the Comprehensive Environmental Response, Compensation Liability Act, as amended. The program consists of grants for basic biomedical research with related engineering, geology and hydrogeology and ecology studies. Funds for the NIEHS program are appropriated from the Superfund Hazardous Substances Trust Fund.

In July 1987, the Advisory Council endorsed a plan for the implementation of the NIEHS Superfund Basic Research and Training Grants Program (52 FR 34721, September 14, 1987). As required by the Superfund Amendments and Reauthorization Act and by National Institutes of Health policy, each research study, including the NIEHS program, was peer reviewed and approved by a panel of scientists prior to being funded. In this meeting, the ad hoc subcommittee will examine research studies funded with fiscal years 1987, 1988, and 1989 appropriations to assure that they are consistent with the Research Plan and responsive to Superfund Program needs for additional scientific data for the effective and permanent management of hazardous substances. The ad hoc subcommittee will also comment on the appropriateness and balance of the NIEHS Superfund basic research grants and will identify any research gaps.

The Environmental Protection Agency (EPA) and the Agency for Toxic Substances and Disease Registry (ATSDR) will be invited to present overviews of their Superfund hazardous substances research efforts at the meeting. The ad hoc subcommittee will comment upon and make recommendations on the coordination of the applied and basic research supported or conducted by these Federal agencies.

The ad hoc subcommittee will provide a report of their findings to the NIEHS Advisory Council.

Attendance is limited only by space available. For further information regarding the meeting, please contact Mr. Daniel C. VanderMeer, Executive Secretary, National Institute of Environmental Health Sciences, P.O. Box 12233, Research Triangle Park, NC 27709 or telephone (919) 541-3484 or FTS 629-3484. The official government representative for this meeting will be Dr. Anne P. Sassaman.

Dated: November 29, 1988.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140-01-M

Public Health Service

National Toxicology Program; Availability of Technical Report on Toxicology and Carcinogenesis Studies of 4-Hexylresorcinol

The HHS' National Toxicology Program today announces the availability of the Technical Report describing the toxicology and carcinogenesis studies of 4-hexylresorcinol, an anthelmintic and antiseptic. It is used for the treatment of whipworm, hookworm, Ascaris, Oxyuris,and dwarf tapeworm infestations. 4-Hexylresorcinol is an active component in antimicrobial soaps, health care personnel handwashes, preoperative skin preparations, skin antiseptic and wound cleaners, mouthwashes, and cold and cough preparations.

Two-year toxicology and carcinogenesis studies were conducted by administering 4-hexylresorcinol at dose levels of 0, 62.5 or 125 mg/kg in corn oil by gavage to groups of 50 F344/N rats and 50 B6C3F$_1$ mice of each sex 5 days per week for 104 weeks.

Under the conditions of these 2-year gavage studies, there was no evidence of carcinogenic activity* of 4-hexylresorcinol for male or female F344/N rats given doses of 62.5 or 125 mg/kg. There was equivocal evidence of carcinogenic activity of 4-hexylresorcinol for male B6C3F$_1$ mice, as shown by marginally increased incidences of pheochromocytomas (and hyperplasia) of the adrenal medulla and of harderian gland neoplasms. There was no evidence of carcinogenic activity for female B6C3F$_1$ mice given doses of 62.5 or 125 mg/kg 4-hexylresorcinol. Decreased incidences of three tumor types were considered related to 4-hexylresorcinol administrations: Mononuclear cell leukemia in male and female rats, hepatocellular neoplasms in male mice, and circulatory system tumors in male and female mice.

The study scientist for this bioassay is Dr. R. S. Chhabra. Questions or comments about the contents of this Technical Report should be directed to Dr. Chhabra at P.O. Box 12233, Research Triangle Park, NC 27709 or telephone (919) 541–3386; FTS: 629–3386.

Copies of *Toxicology and Carcinogenesis Studies of 4-Hexylresorcinol in F344/N Rats and B6C3F$_1$ Mice (Gavage Studies)* (TR 330) are available without charge from the NTP Public Information Office, MD B2-04, P.O. Box 12233, Research Triangle Park, NC 27709. Telephone: (919) 541–3991; FTS: 629–3991.

Dated: November 29, 1988.

David P. Rall,

Director.

BILLING CODE 4140-01-M

National Toxicology Program; Availability of Technical Report on Toxicology and Carcinogenesis Studies of 2-Mercaptobenzothiazole

The HHS' National Toxicology Program today announces the availability of the Technical Report describing the toxicology and carcinogenesis studies of 2-mercapto-benzothiazole, a rubber accelerant and preservative.

Two-year toxicology and carcinogenesis studies of technical grade 2-mercaptobenzothiazole were conducted by administering the chemical in corn oil by gavage to 50 animals of each species and sex 5 days per week for 103 weeks. Doses selected for the 2-year studies were 0, 375 and 750 mg/kg for male rats and for mice of each sex and 0, 188 or 375 mg/kg for female rats.

Under the conditions of these 2-year gavage studies, there was some evidence of carcinogenic activity [1] of 2-mercaptobenzothiazole for male F344/N rats, indicated by increased incidences of mononuclear cell leukemia, pancreatic acinar cell adenomas, adrenal gland pheochromocytomas, and preputial gland adenomas or carcinomas (combined). There was some evidence of carcinogenic activity for female F344/N rats, indicated by increased incidences of adrenal gland pheochromocytomas and pituitary gland adenomas. There was no evidence of carcinogenic activity of 2-mercapto-benzothiazole for male B6C3F$_1$ mice dosed with 375 or 750 mg/kg. There was equivocal evidence of carcinogenic activity for female B6C3F$_1$ mice, indicated by increased incidences of hepatocellular adenomas or carcinomas (combined).

The study scientist for this bioassay is Dr. Michael P. Dieter. Questions or comments about the contents of this Technical Report should be directed to Dr. Dieter at P.O. Box 12233, Research Triangle Park, NC 27709 or telephone (919) 541–3368; FTS: 629–3368.

Copies of *Toxicology and Carcinogenesis Studies of 2-Mercapto-benzothiazole in F344/N Rats and B6C3F$_1$ Mice (Gavage Studies)* (Tr 332) are available without charge from the NTP Public Information Office, MD B2-04, P.O. Box 12233, Research Triangle Park, NC 27709. Telephone: (919) 541–3991; FTS: 629–3991.

Dated: November 29, 1988.

BILLING CODE 4140-01-M

National Toxicology Program; Availability of Technical Report on Toxicology and Carcinogenesis Studies of Nitrofurazone

The HHS' National Toxicology Program today announces the availability of the Technical Report describing the toxicology and carcinogenesis studies of nitrofurazone, a synthetic furan derivative active against a broad spectrum of bacteria. This chemical is used in veterinary and human medicine.

Two-year toxicology and carcinogenesis studies were conducted by feeding diets containing 0, 310, or 620 ppm nitrofurazone to rats and 0, 150, or 310 ppm for mice (50 animals per dose group).

Under the conditions of these 2-year feed studies, there was equivocal evidence of carcinogenic activity [1] of nitrofurazone for male F344/N rats as shown by the occurrences of sebaceous gland adenomas and trichoepithelioma of the skin, mesotheliomas of the tunica vaginalis, and preputial gland tumors. There was clear evidence of carcinogenic activity of nitrofurazone for female F344/N rats as shown by markedly increased incidences of fibradenomas of the mammary gland.

*The NTP uses five categories of evidence of carcinogenic activity to summarize the strength of the evidence observed in each animal study: Two categories of positive results ("clear evidence" and "some evidence"), one category for uncertain findings ("equivocal evidence"); one category for no observable effects ("no evidence"); and one category for experiments that cannot be evaluated because of major flaws ("inadequate study").

[1] The NTP uses five categories of evidence of carcinogenic activity to summarize the strength of the evidence of carcinogenicity observed in each animal study: Two categories for positive results ("clear evidence" and "some evidence"), one category for uncertain findings ("equivocal evidence"); one category for no observable effects ("no evidence"); and one category for experiments that cannot be evaluated because of major flaws ("inadequate study").

[1] The NTP uses five categories of evidence of carcinogenic activity to summarize the strength of the evidence of carcinogenicity observed in each animal study: Two categories for positive results ("clear evidence" and "some evidence"), one category for uncertain findings ("equivocal evidence"), one category for no observable effects ("no evidence"), and one category for experiments that cannot be evaluated because of major flaws ("inadequate study").

There was no evidence of carcinogenic activity for male B6C3F$_1$ mice fed diets containing nitrofurazone at concentrations of 150 or 310 ppm. There was clear evidence of carcinogenic activity of nitrofurazone for female B6C3F$_1$ mice as shown by increased incidences of benign mixed tumors and granulosa cell tumors of the ovary.

Administration of nitrofurazone was associated with decreased incidences of mononuclear cell leukemia in male and female rats, testicular interstitial cell tumors in male rats, and pituitary gland neoplasms in femal mice. Convulsive seizures in mice of each sex, ovarian atrophy in female mice, testicular degeneration in rats, and degeneration of articular cartilage in rats were all associated with the administration of nitrofurazone.

The study scientist for these studies is Dr. Frank Kari. Questions or comments about the contents of this Technical Report should be directed to Dr. Kari at P.O. Box 12233, Research Triangle Park, NC 27709 or telephone (919) 541-2926; FTS: 629-2926.

Copies of *Toxicology and Carcinogenesis Studies of Nitrofurazone in F344/N Rats and B6C3F$_1$* Mice (Feed Studies) (TR 337) are available without charge from the NTP Public Information Office, MD B2-04, P.O. Box 12233, Research Triangle Park, NC 27709. Telephone: (919) 541-3991; FTS: 629-3991.

Dated: November 29, 1988.

[NM-010-GP9-0103]

Availability and Public Hearings for the Molycorp Guadalupe Mountain Tailings Disposal Facility Draft Environmental Impact Statement (EIS)

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability and public hearings.

SUMMARY: The Bureau of Land Management, Albuquerque District, announces the availability of the Molycorp Guadalupe Mountain Tailings Disposal Facility DEIS for public review and comment. This document analyzes whether the proposed tailings facility will result in any unnecessary or undue degradation of the public lands near Questa, New Mexico, in BLM's the Taos Resource Area.

DATE: Written comments on the Draft EIS will be accepted if they are submitted or post-marked no later than February 9, 1989.

ADDRESS: Comments should be sent to Robert Dale, District Manager, Bureau of Land Management, Albuquerque District Office, 435 Montano NE, Albuquerque, New Mexico 87107.

FOR FURTHER INFORMATION CONTACT: Kent Hamilton, Bureau of Land Management, Albuquerque, District Office, 435 Montana NE, Albuquerque, New Mexico 87107, telephone commercial (505) 761-4546, FTS 474-4546.

SUPPLEMENTARY INFORMATION: Molycorp Inc., has applied for a 1230 acre millsite located on Guadalupe Mountain near Questa, New Mexico, pursuant to 30 U.S.C. 42 (1976). In the case of an action authorized under the mining laws, the only required determination is whether the proposal will result in any unnecessary or undue degradation of the public lands; there is no provision for a discussion of alternatives. Consequently, alternatives are not analyzed.

The Draft EIS was prepared by ENSR Consulting and Engineering a third party contractor for the Bureau of Land Management.

A copy of the Draft EIS will be sent to all individuals. Government agencies, and groups who have expressed an interest in the project. In addition, review copies may be examined at: Bureau of Land Management, Taos Resource Area Office, Plaza Montevideo, Cruz Alto Road, Taos, New Mexico 87571-1045 and Bureau of Land Management, New Mexico State Office, South Federal Place, Joseph M. Montoya Federal Building, Santa Fe, New Mexico 87504-1449.

Public Hearings: There will be public meetings/hearings on the DEIS at the following locations:

Date and Time and Meeting Location

January 20, 1989, 7:00 p.m.—St. Anthony Parish Hall, Questa, New Mexico

January 21, 1989, 10:00 a.m.—Ramada Inn Conference Room, Taos, New Mexico

(Oral testimony will be limited to 10 minutes per person.)

Larry L. Woodard,

State Director.

Minerals Management Service

Outer Continental Shelf Advisory Board; Renewal

This notice is published in accordance with section 9(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix). Following consultation with the General Services Administration, notice is hereby given that the Secretary of the Interior is renewing the Outer Continental Shelf (OCS) Advisory Board Charter.

The purpose of the OCS Advisory Board is to provide advice to the Secretary of the Interior and other officers of the Department of the Interior in the performance of discretionary functions of the OCS Lands Act, as amended (43 U.S.C. 1331 et. seq.), including all aspects of leasing, exploration, development, and protection of the resources of the OCS.

Further information regarding the Committee may be obtained from the Associate Director for Offshore Minerals Management, Department of the Interior, 18th and C Streets, NW., Room 4230, Washington, DC 20240.

The certification of renewal is published below.

Certification

I hereby certifiy that the renewal of the Outer Continental Shelf Advisory Board Charter is in the public interest in connection with the performance of duties imposed on the Department of the Interior by 43 U.S.C. 1331 et. seq.

Date: November 23, 1988.

Donald Paul Hodel,

Secretary of the Interior.

[FR Doc. 88-27862 Filed 12-2-88; 8:45 am]

BILLING CODE 4310-MR-M

National Park Service

Revision of Park Boundary; Johnstown Flood National Memorial, PA

AGENCY: National Park Service, Johnstown Flood National Memorial, Pa.

ACTION: Notice of revision of park boundary.

SUMMARY: Pursuant to section 307(a) of the act of November 10, 1978 (92 Stat. 3467), the Park boundary was designated by publication of a Notice in the **Federal Register**, Vol. 45, No. 189, Friday, September 26, 1980 to include the lands depicted on boundary map numbered 427/80,002 dated August 1979.

Public Law 95–42 (91 Stat. 211) dated June 10, 1977 provides that the Secretary may make minor boundary changes to an area whenever he determines that to do so will contribute to, and is necessary for, the proper preservation, protection, interpretation, or management of such an area.

Therefore, pursuant to Pub. L. 95–42, notice is given that the boundary of the Johnstown Flood National Memorial has been revised to exclude a 2.55 acre tract on the periphery of the park which is not necessary for management purposes or to protect the historic scene and which is outside the designated historic zone, and to include a 2300 foot section of railroad right-of-way, comprising approximately 3.20 acres, which presently divides the part into two sections. Inclusion of this right-of-way within the boundary would allow for future acquisition if it were abandoned, and would provide a contiguous land area of the original dam and lakebed. The boundary shall be as depicted on boundary map numbered 427/80,002A dated June 1986 prepared by the Land Resources Division of the Mid-Atlantic Region of the National Park Service.

The map is on file and available for inspection in the administrative office of the Johnstown Flood National Memorial, P. O. Box 247, Cresson, Pennsylvania, 16630; in the office of the Mid-Atlantic Region, Land Resources Division, Custom House, Room 502, Second and Chestnut Streets, Philadelphia, Pennsylvania, 19106; and in the office of the National Park Service, Department of the Interior, 18th and C Streets, Washington, DC, 20240.

Dated: June 30, 1988.

Don H. Castleberry,

Acting Regional Director, Mid-Atlantic Region.

Note.—This document was received by the Office of the Federal Register November 30, 1988.

Martin Luther King, Jr., National Historic Site

AGENCY: National Park Service, Interior.

ACTION: Notice of Advisory Commission meeting.

SUMMARY: Notice is hereby given in accordance with the Federal Advisory Commission Act that a meeting of the Martin Luther King, Jr., National Historic Site Advisory Commission will be held at 10:30 a.m. at the following location and date.

DATE: December 14, 1988.

ADDRESS: The Martin Luther King, Jr., Center for Nonviolent Social Change, Inc., Freedom Hall Complex, Room 261, 449 Auburn Avenue NE., Atlanta, Georgia 30312.

FOR FURTHER INFORMATION CONTACT: Mr. Randolph Scott, Superintendent, Martin Luther King, Jr., National Historic Site, 522 Auburn Avenue, NE., Atlanta, Georgia 30312.

SUPPLEMENTARY INFORMATION: The purpose of the Martin Luther King, Jr., National Historic Site Advisory Commission is to consult with and advise the Secretary of the Interior or his designee on matters of planning and administration of the Martin Luther King, Jr., National Historic Site Advisory Commission. The members of the Advisory Commission are as follows:

Ms. Portia Scott, Chairperson
Mr. William W. Allison
Mr. Arthur J. Clement
Mr. John Cox
Mrs. Christine King Farris
Mrs. Valena Henderson
Mr. C. Randy Humphrey
Dr. Elizabeth A. Lyon
Mr. Daniel H. Nall
Rev. Joseph L. Roberts
Mrs. Coretta Scott King, Ex-Officio Member
Director, National Park Service, Ex-Officio Member

The matters to be discussed at this meeting will include: (1) The status of park development and interpretive activities.

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited. Any member of the public may file with the Commission a written statement concerning the matters to be discussed. Written statements may also be submitted to the Superintendent at the address above. Minutes of the meeting will be available at Park Headquarters for public inspection approximately 4 weeks after the meeting.

Date: November 25, 1988.

Thomas W. Piehl,

Acting Regional Director, Southeast Region.

BILLING CODE 4310-70-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-425 (Preliminary)]

Light Duty Integrated Hydrostatic Transmissions and Subassemblies Thereof With or Without Attached Axles From Japan

AGENCY: United States International Trade Commission.

ACTION: Institution of a preliminary antidumping investigation and scheduling of a conference to be held in connection with the investigation.

SUMMARY: The Commission hereby gives notice of the institution of preliminary antidumping investigation No. 731-TA-425 (Preliminary) under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States if materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Japan of light duty integrated hydrostatic transmissions and subassemblies thereof, with or without attached axles,[1] provided for in items 660.85, 660.97, 666.00, and 666.10 of the Tariff Schedules of the United States (*TSUS*), and classifiable in subheadings 8412.29.80, 8412.90.90, 8413.60.00, 8413.81.00, 8432.90.00, 8433.90.10, 8433.90.50, 8434.90.00, and 8436.99.00 of the Harmonized Tariff Schedule of the United States (HTS), that are alleged to be sold in the United States at less than fair value. As provided in section 733(a), the Commission must complete preliminary antidumping investigations in 45 days, or in this case by January 6, 1989.

For further information concerning the conduct of this investigation and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, Subparts A and B (19 CFR Part 207), and Part 201, Subparts A through E (19 CFR Part 201).

EFFECTIVE DATE: November 22, 1988.

FOR FURTHER INFORMATION CONTACT: Janine Wedel (202-252-1178), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-252-1000.

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted in response to a petition filed on November 22, 1988, by Eaton Corporation, Eden Prairie, Minnesota.

Participation in the Investigation

Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules (19 CFR 201.11) not later than seven (7) days after publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who will determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Service list

Pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)), the Secretary will prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance. In accordance with §§ 201.16(c) and 207.3 of the rules (19 CFR 201.16(c) and 207.3, as amended, 53 FR 33034, 33041 (August 29, 1988), each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service.

[1] The subject articles, which have a maximum input horsepower of twenty or fewer, comprise the following: Parts and subassemblies of non-electric engines and motors not specially provided for (TSUS item 660.85 and HTS subheadings 8412.29.80 and 8412.90.90); pumps for liquids, liquid elevators, and parts thereof, the foregoing not specially provided for (TSUS item 660.97 and HTS subheadings 8413.60.00 and 8413.81.00); other parts, not specially provided for, of machinery for soil preparation and cultivation (TSUS item 666.00 and HTS subheadings 8432.90.00, 8433.90.50, 8434.90.00, and 8436.99.00); and parts of lawn mowers (TSUS item 666.10 and HTS subheading 8433.90.10).

BEST COPY AVAILABLE

Limited Disclosure of Business Proprietary Information Under a Protective Order

Pursuant to § 207.7(a) of the Commission's rules (19 CFR 207.7(a) as amended, 53 FR 33041), the Secretary will make available business proprietary information gathered in this preliminary investigation to authorized applicants under a protective order, provided that the application be made not later than seven (7) days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive business proprietary information under a protective order. The Secretary will not accept any submission by parties containing business proprietary information without a certificate of service indicating that it has been served on all the parties that are authorized to receive such information under a protective order.

Conference

The Director of Operations of the Commission has scheduled as conference in connection with this investigation for 9:30 a.m. on December 14, 1988, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Parties wishing to participate in the conference should contact Janine Wedel (202–252–1178) not later than December 12, 1988, to arrange for their appearance. Parties in support of the imposition of antidumping duties in this investigation and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference.

Written Submissions

Any person may submit to the Commission on or before December 16, 1988, a written brief containing information and arguments pertinent to the subject matter of the investigation, as provided in § 207.15 of the Commission's rules (19 CFR 207.15). A signed original and fourteen (14) copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the rules (19 CFR 201.8). All written submissions except for business proprietary data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any information for which business proprietary treatment is desired must be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Business Proprietary Information." Business proprietary submissions and requests for business proprietary treatment must conform with the requirements of §§ 201.6 and 207.7 of the Commission's rules (19 CFR 201.6 and 207.7 as amended, 53 FR 33041).

Parties which obtain disclosure of business proprietary information pursuant to § 207.7(a) of the Commission's rules (19 CFR 207.7(a)) may comment on such information in their written brief, and may also file additional written comments on such information no later than December 19, 1988. Such additional comments must be limited to comments on business proprietary information received in or after the written briefs.

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.12 of the Commission's rules (19 CFR 207.12).

By order of the Commission.

Issued: November 29, 1988.

Kenneth R. Mason,

Secretary.

BILLING CODE 7035–01–M

[Docket No. AB–52 (Sub–No. 56)]

The Atchison, Topeka and Santa Fe Railway Co.; Authorization To Abandon Railroad Line In Kay County, OK; Findings

The Commission has issued a certificate authorizing The Atchison, Topeka and Sante Fe Railway Company to abandon its 8.1-mile line of railroad, known as the Tonkawa Industrial Spur, extending between milepost X35.35 near Blackwell and milepost X43.45 near Tonkawa, in Kay County, OK. The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this Notice. The following notation shall be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB–OFA." Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.

Noreta R. McGee,

Secretary.

[FR Doc. 88–27898 Filed 12–2–88; 8:45 am]

BILLING CODE 7035–01–M

[Docket No. AB-290 (Sub-No. 28X)]

Southern Railway Co.; Abandonment Exemption for Railroad Line in Gaffney, SC

Applicant has filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to abandon its 0.73-mile line of railroad between milepost SE-9.82 and milepost SE-10.55, at Gaffney, SC.

Applicant has certified that: (1) No local or overhead traffic has moved over the line for at least 2 years; and (2) no formal complaint filed by a user of railroad service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the discontinuance of service shall be protected pursuant to *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective January 5, 1989 (unless stayed pending reconsideration). Petitions to stay that do not involve environmental issues and formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(2)(2)[1] must be filed by December 16, 1988. Requests for stays regarding environmental issues [2] and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by December 27, 1988, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Virginia K. Young, Norfolk Southern Corporation, One Commerical Place, Norfolk, VA 23510-2101.

If the notice of exeemption contains false or misleading information, use of the exemption is void *ab initio*.

Applicant has filed an enviornmental report which addresses environmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environment (SEE) will prepare an enviornmental assessment (EA). SEE will issue the EA by December 11, 1988. Interested persons may obtain a copy of the EA from SEE by writing to it (Room 3115, Interstate Commerce Commission, Washington, DC 20423) or by calling Carl Bausch, Chief, SEE at (202) 275-7316.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: November 30, 1988.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

[1] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.*, 4 I.C.C.2d 164 (1987), and final rules published in the **Federal Register** on December 22, 1987 (52 FR 48440-48446).

[2] A stay will be routinely issued by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. *See Exemption of Out-of-service Rail Lines*, 4 I.C.C.2d 400 (1988).

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 87-80]

John G. Bennett, M.D.; Revocation of Registration

On September 24, 1987, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to John G. Bennett, M.D., Respondent, of Miami, Florida, proposing to revoke his DEA Certificate of Registration BB0420810, and to deny any pending applications for renewal of his registration. The statutory bases for the issuance of the Order to Show Cause were that: (1) Respondent was convicted of felony offenses relating to controlled substances, and (2) his continued registration would be contrary to the public interest based upon previous controlled substance violations and his history of using and abusing controlled substances for other than legitimate medical purposes.

Respondent, pro se, timely filed a request for a hearing on the issues raised in the Order to Show Cause and the matter was placed on the docket of Administrative Law Judge Francis L. Young. Following prehearing procedures, a hearing was held on March 4, 1988, in Miami, Florida. Respondent was represented by counsel at the hearing.

During the administrative hearing, the Government presented testimony from one witness, a DEA Diversion Investigator, and introduced eight exhibits. Respondent testified on his own behalf and presented additional testimony from Roger Goetz, M.D., the Director of the Florida Impaired Physicians Program, and John C. Eustace, M.D., an addictionologist. Respondent also introduced one exhibit. Subsequent to the hearing, Dr. Goetz submitted a letter to the Administrative Law Judge withdrawing his support for Respondent's continued registration with the Drug Enforcement Administration based upon Respondent's failure to progress satisfactorily in the Physicians Recovery Network Program. With the consent of counsel for both parties, this letter was placed in the record and was given full consideration. Respondent's counsel made no responsive filing with respect to the letter, although he was given an opportunity to respond.

On August 18, 1988, Government counsel filed a motion to supplement the hearing record to include a copy of an order of the Florida Department of Professional Regulation, State Board of Medicine, ordering the immediate suspension of Respondent's medical license in that state, effective July 5, 1988. Government counsel further requested that Respondent's current lack of state authorization to handle controlled substances be considered as an additional ground supporting the revocation of his DEA registration. Respondent's counsel filed no response and the Administrative Law Judge granted the Government's requests.

On September 29, 1988, the Administrative Law Judge issued his opinion and recommended ruling, findings of fact, conclusions of law and decision, recommending the revocation of Respondent's registration and the denial of any pending applications for renewal. No exceptions were filed and, on October 28, 1988, the Administrative Law Judge forwarded the record to the Administrator.

After a careful review of the entire record in this proceeding, the Administrator adopts the findings of fact, conclusions of law and recommended ruling of the Administrative Law Judge.

The Administrator finds that Respondent's DEA Certificate of Registration BB0420810, authorizing him to handle controlled substances in the State of Georgia, expired on July 31,

1987. There are no pending applications for renewal of that registration on file with DEA. Although he requested that DEA transfer his registration to Florida in 1987, Respondent has not been issued a DEA registration in Florida, pending the outcome of this proceeding.

In September 1984, Respondent was arrested by the Dade County (Florida) Metropolitan Police for possession of marijuana. In that case, a police officer observed Respondent smoking a marijuana cigarette in a taxi at Miami International Airport. When he realized he was being watched by the officer, Respondent swallowed the marijuana cigarette he was smoking. The police then searched Respondent and discovered another marijuana cigarette. Respondent pleaded *nolo contendere* to the misdemeanor offense of unlawful possession of marijuana and the court withheld adjudication on the charge.

In August 1985, Respondent was arrested in Fulton County, Georgia, and was charged with possession of marijuana. In that case, a police officer observed Respondent speeding in an automobile and driving recklessly. Respondent resisted the officer's attempt to stop him, and a chase ensued. When Respondent finally was stopped, the officer observed that he was unsteady on his feet. Respondent was placed under arrest and charged with driving under the influence and fleeing from an officer. Following the arrest, the officer noticed a marijuana cigarette on the passenger's side of Respondent's automobile and a half-smoked marijuana cigarette in the ashtray. Based upon these findings, Respondent was also charged with unlawful possession of marijuana. Respondent failed to appear in court on those charges and a bench warrant was issued for his arrest.

The Administrator finds that Respondent has never possessed a valid Schedule I DEA Certificate of Registration authorizing him to handle or possess marijuana for any valid medical or scientific reason.

In March 1986, Respondent entered an alcohol and drug treatment program in Rhode Island, where he was then licensed to practice medicine. He was discharged from the program in April 1986. He began drinking again less than two months after completing the program. Based upon his history of abusing alcohol and controlled substances, Respondent's Rhode Island medical license was revoked in 1986.

On November 7, 1986, in the Superior Court for Tift County, Georgia, Respondent was convicted, after entering a plea of guilty, on one count of attempting to obtain possession of a Schedule II controlled substance, to wit: oxycodone, by fraud, deception and subterfuge, and one count of unlawful possession of diazepam, a Schedule IV controlled substance. Both violations are felony offenses relating to controlled substances. Respondent was fined, placed on probation for a period of five years, and was ordered to "undergo complete psychological and/or drug counseling as designated by the medical boards of Georgia and/or Florida."

The felony convictions resulted from an investigation of Respondent's unlawful prescribing practices. On November 4, 1986, Respondent issued a prescription for Percodan in the name of "James Gordon Bennett" for "back pain." He attempted to fill the prescription at a pharmacy in Tift County. Respondent gave conflicting sworn statements regarding his issuance of the prescription. In his first statement, Respondent claimed that he decided to use his brother's name on the prescription because he knew he was not permitted to prescribe controlled substances in his own name. In his second statement, Respondent insisted that the Percodan was actually for his brother. In addition, Respondent informed the investigating officers that he had written prescriptions for himself in the past, including a prescription for Valium filled the day prior to his arrest.

The Administrator finds that Respondent has a long history of abusing controlled substances and alcohol. He has abused alcohol since graduating from high school approximately twenty years ago. In addition, Respondent was fired from three hospitals in Georgia between 1984 and 1986, as a result of his drinking problem.

The Administrator further finds that for three months in 1987, Respondent was employed as an emergency room physician at Mariner's Hospital in Islamorada, Florida. During that time, Respondent handled and prescribed controlled substances such as Tylenol #3 and Lomotil, although he did not possess a valid DEA Certificate of Registration authorizing him to handle controlled substances in the State of Florida.

On August 31, 1987, at the insistence of Roger Goetz, M.D., Respondent admitted himself to the South Miami Hospital for treatment for chemical dependence. On September 28, 1987, he was transferred to a live-in center in Brandon, Mississippi, and was later transferred to another treatment center in Hattiesburg, Mississippi, where he remained until his release in 1988.

At the DEA administrative hearing, Drs. Goetz and Eustace testified that they both felt that Respondent could be entrusted with a DEA registration. Neither physician had treated nor examined Respondent prior to the hearing. Both based their opinions on records of Respondent's treatment by other individuals and brief interviews with Respondent.

Sometime prior to June 24, 1988, Respondent violated the terms of his agreement with the Florida Physician's Recovery Network. As a result, Dr. Goetz withdrew his support from Respondent and recommended to the Administrative Law Judge that Respondent no longer be permitted to handle controlled substances.

Following the March 1988 hearing, Respondent began abusing controlled substances again. He agreed to withdraw from the practice of emergency medicine for ninety days, beginning on April 18, 1988. Respondent then failed to withdraw from practice an, on May 21, 1988, he prescribed 50 dosage units of Valium tablets to a person he knew, or should have know, was addicted to that drug. As a result, the Florida Department of Professional Regulation ordered the immediate suspension of his license to practice medicine in that State, effective July 5, 1988.

The Administrator finds that there are sufficient grounds to support the revocation of Respondent's DEA registration and to deny any pending applications for renewal of that registration. First, since Respondent is not currently authorized to handle controlled substances in the State of Florida, he cannot be granted permission by DEA to handle controlled substances in that State. The Drug Enforcement Administration can only register or maintain the registrations of practitioners who are properly authorized to handle controlled substances in the States in which they maintain or request registration. See *Fazal Ahmad, M.D.*, Docket No. 86–36, 51 FR 41030 (1986).

Also, there is no dispute that Respondent was convicted of felony offenses relating to controlled substances in November 1986. Such convictions alone, can support the revocation of a DEA registration. See 21 U.S.C. 824(a)(2). See also *Raymond A. Carlson, M.D.*, Docket No. 86–50, 53 FR 7425.

The Administrator also finds that Respondent's continued registration would be contrary to the public interest. In determining whether a registration would be inconsistent with the public interest, the Administrator must consider the following factors enumerated in 21 U.S.C. 823(f):

BEST COPY AVAILABLE

(1) The recommendation of the appropriate State licensing board or professional disciplinary authority.

(2) The applicant's [or registrant's] experience in dispensing, or conducting research with respect to controlled substances.

(3) The applicant's [or registrant's] conviction record under Federal or State laws relating to the manufacture, distribution, or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health or safety.

In this case, all factors listed above are applicable in considering whether Respondent's registration is inconsistent with the public interest. First, the State licensing board, the Florida Department of Professional Regulation, State Board of Medicine, has suspended Respondent's medical license for violations relating to controlled substances. With respect to the second through fifth factors, the administrative record in this proceeding is replete with examples of Respondent's violations relating to controlled substances. Respondent was convicted of two felony offenses and one misdemeanor offense relating to controlled substances; he is the subject of an open arrest warrant for failing to appear on additional misdemeanor offenses; Respondent has a history of abusing controlled substances, even after undergoing extensive treatment on two occasions; he issued fraudulent controlled substance prescriptions for his own use; and he handled controlled substances and issued prescriptions at a time when he was not authorized to do so. Such behavior is evidence that Respondent's continued registration would be contrary to the public interest.

The Administrator notes that little positive evidence remains to support Respondent's registration. The testimony of Drs. Coetz and Eustace supporting his registration is countered by Respondent's subsequent violations relating to controlled substances. In addition, the testimony of these two physicians was not based upon personal evaluations of Respondent, thus was accorded little weight in this proceeding. Also, Dr. Goetz's testimony was later nullified by the letter he submitted to the Administrative Law Judge. The Administrator further finds that Respondent's own testimony was largely self-serving and discounted by evidence of his continued abuse of controlled substances and violation of controlled substance laws and regulations.

In viewing all of the evidence, including the testimony presented by Respondent, the Administrator concludes that Respondent has not been rehabilitated and cannot be entrusted with a DEA Certificate of Registration. To allow him to be registered would be inconsistent with the public interest.

Thus, based on Respondent's lack of State authorization to handle controlled substances, his felony convictions relating to controlled substances, and a finding that his continued registration would be inconsistent with the public interest, the Administrator concludes that Respondent's registration must be revoked and any pending applications for renewal must be denied. Accordingly, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), the Administrator of the Drug Enforcement Administration, orders that DEA Certificate of Registration BB0420810, previously issued to John G. Bennett, M.D., be, and it hereby is, revoked. He further orders that any pending applications for renewal of that registration be, and they hereby are, denied.

This order is effective December 5, 1988.

November 29, 1988.

John C. Lawn,

Administrator.

BILLING CODE 4410-09-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-482]

Kansas Gas and Electric Co., et al.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-42 issued to the Kansas Gas and Electric Company, Kansas City Power and Light Co., and Kansas Electric Power Cooperative, Inc. (the licensees), for operation of the Wolf Creek Generating Station located at the licensee's site in Coffey County, Kansas.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would provide a more optimum pressure balance between the emergency ventilation systems of the Control Building and the Auxiliary Building. The proposed amendment would modify Technical Specifications (TS) relating to emergency ventilation system flow rates, deletes unnecessary and redundant surveillance requirements and clarifies the Bases accordingly. The proposed amendment would revise TS 3/4.7.6, Control Room Ventilation System, 3/4.7.7, Emergency Exhaust System (Plant Systems), 3/4.9.13, Emergency Exhaust Systems (Refueling Operation), TS Bases B 3/4.7.7, Emergency Exhaust System (Plant Systems) and B 3/4.9.13, Emergency Exhaust System (Refueling Operation).

The proposed action is in accordance with the licensee's application for amendment dated February 26, 1988, and as supplemented by letter dated October 31, 1988.

The Need for the Proposed Action

The proposed change to the TS is required in order to provide a more optimum pressure balance between the emergency ventilation systems of the Control Building and the Auxiliary Building. Modifications to the ventilation system flow rates establishes a more desirable positive pressure envelope in the Control Building.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revisions to the Technical Specifications. The proposed revisions would: (1) Ensure Control Room Habitability under accident conditions, including chlorine accident, loss-of-coolant accident (LOCA), and Fuel Building irradiated fuel accident. The changes proposed increase the ability of the systems to ensure Control Room habitability during a LOCA or a Fuel Building fuel handling accident by providing a more reliable positive pressure envelope in the Control Building, thus ensuring that only air passing through high-efficiency particulate air (HEPA) and charcoal filters is discharged into the Control Room. The increased air flow will not increase chlorine concentrations in the Control Room during a chlorine accident above acceptable level specified in Regulatory Guide 1.78. (2) Ensure that radioactive materials leaking from emergency core cooling system (ECCS) pumps in the Auxiliary Building during a LOCA are not discharged into the atmosphere without being processed through HEPA and charcoal filters. The changes do not reduce the required negative pressure of greater than ¼-inch Water Gage (W.G.) for the Auxiliary Building during a LOCA. (3) Ensure that radioactive materials released from an irradiated fuel assembly damage during a fuel handling accident in the Fuel

BEST COPY AVAILABLE

Building will be filtered through HEPA and charcoal filters prior to discharge to the atmosphere. The change in flow rates does not reduce the ability of the Emergency Exhaust System to maintain a negative pressure of greater than ¼-inch W.G. in the Fuel Building.

The Commission's review has concluded that with regard to potential radiological impacts to the general public, the accident releases will be adequately controlled as before during the postulated accident conditions in the Auxiliary Building and Fueling Building since the negative pressure level limits and the iodine removal efficiency of the filters are not affected by the change in the emergency exhaust system flow rates. In addition, the control room habitability system operation with the revised ventilation and exhaust air flow rates still meet the requirements specified in General Design Criteria 19 and Standard Review Plan 6.4 for the protection of control room personnel under accident conditions. Therefore, the proposed changes do not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that this proposed action would result in no significant radiological environmental impact.

With regard to potential non-radiological impacts, the proposed change to the TS involves systems within the restricted area as defined in 10 CFR Part 20. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed amendment.

The Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on August 26, 1988 (53 FR 32804). No request for hearing or petition for leave to intervene was filed following this notice.

Alternative to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

Alternative Use of Resources

This action involves no use of resources not previously considered in the Final Environmental Statements (construction permit and operating license) for the Wolf Creek Generating Station.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based upon the environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For details with respect to this action, see the request for amendment dated February 26, 1988, as supplemented October 31, 1988, which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555, and at the William Allen White Library, Emporia State University, Emporia, Kansas, and at the Washburn University School of Law Library, Topeka, Kansas.

Dated at Rockville, Maryland, this 29th day of November, 1988.

For The Nuclear Regulatory Commission.

Jose A. Calvo,

Director, Project Directorate IV, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88-27904 Filed 12-2-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-298]

Nebraska Public Power District; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering issuance of an exemption from the requirements of 10 CFR 50.54(w)(1) to the Nebraska Public Power District (the licensee) for the Cooper Nuclear Station located in Nemaha County, Nebraska.

Environmental Assessment

Identification of Proposed Action

The licensee would be partially exempted from the requirement of 10 CFR 50.54(w)(1) from December 5, 1988 through June 4, 1990. 10 CFR 50.54(w)(1) requires that licensees have property damage insurance in the amount of at least $1.06 billion to provide financial security for stabilizing and decontaminating their licensed reactors in the event of an accident.

The Need for the Proposed Action

The licensee is a political subdivision of the State of Nebraska and, as such, is prohibited by state law from becoming a subscriber to the stock or any portion of interest of any corporation or association. The licensee is therefore prohibited from becoming a member of Nuclear Electric Insurance Limited (NEIL). As a result, the licensee is unable to obtain the entire $1.06 billion of property insurance as required by the rule. The licensee is seeking a declaratory judgement from United States District Court which will enable it to become a NEIL member. Until such time, the maximum amount of property insurance available to the licensee is the $750 million available from the American Nuclear Insurers (ANI) and the Mutual Atomic Energy Reinsurance Pool (MAERP). The requested exemption will grant the licensee additional time to obtain the necessary ruling.

Environmental Impacts of the Proposed Action

The proposed action affects only insurance requirements and will have no effect on nuclear safety or on plant effluents. Therefore, the Commission has determined that there is no environmental impact associated with the proposed action.

Alternative Use of Resources

This action involves no use of resources.

Agencies/Persons Consulted

The NRC staff did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to this action, see the licensee's application dated November 4, 1988, which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC, 20555, and at the Local Public Document Room in the Auburn Public Library, 1118 15th Street, Auburn, Nebraska 68305.

Dated at Rockville, Maryland, this 30th day of November, 1988.

For the Nuclear Regulatory Commission.

Paul W. O'Connor,

Acting Director, Project Directorate IV, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88-27905 Filed 12-2-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-285]

Omaha Public Power District; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering issuance of an exemption from the requirements of 10 CFR 50.54(w)(1) to the Omaha Public Power District (the licensee) for the Fort Calhoun Nuclear Station located in Washington County, Nebraska.

Environmental Assessment

Identification of Proposed Action

The licensee would be partially exempted from the requirement of 10 CFR 50.54(w)(1) from December 5, 1988 through June 4, 1990. 10 CFR 50.54(w)(1) requires that licensees have property damage insurance in the amount of at least $1.06 billion to provide financial security for stabilizing and decontaminating their licensed reactors in the event of an accident.

The Need for the Proposed Action

The licensee is a political subdivision of the State of Nebraska and, as such, is prohibited by state law from becoming a subscriber to the stock or any portion of interest of any corporation or association. The licensee is therefore prohibited from becoming a member of Nuclear Electric Insurance Limited (NEIL). As a result, the licensee is unable to obtain the entire $1.06 billion of property insurance as required by the rule. The licensee is seeking a declaratory judgment from United States District Court which will enable it to become a NEIL member. Unitil such time, the maximum amount of property insurance available to the licensee is the $750 million available from the American Nuclear Insurers (ANI) and the Mutual Atomic Energy Reinsurance Pool (MAERP). The requested exemption will grant the licensee additional time to obtain the necessary ruling.

Environmental Impacts of the Proposed Action

The proposed action affects only insurance requirements and will have no effect on nuclear safety or on plant effluents. Therefore, the Commission has determined that there is no environmental impact associated with the proposed action.

Alternative Use of Resources

This action involves no use of resources.

Agencies/Persons Consulted

The NRC staff did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to this action, see the licensee's application dated November 4, 1988, which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room in the W. Dale Clark Library, 215 S. 15th Street, Omaha, Nebraska 68102.

Dated Rockville, Maryland, this 30th day of November, 1988.

Paul W. O'Connor,

Acting Director Project Directorate IV, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88-27906 Filed 12-2-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-206]

Southern California Edison Co., et al; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 115 to Provisional Operating License No. DPR-13, issued to Southern California Edison Company and San Diego Gas and Electric Company (the licensees), which revised the Technical Specifications for operation of the San Onofre Nuclear Generating Station, Unit 1, located in San Diego County, California. The amendment was effective as of the date of issuance.

The amendment revised the steam generator tube plugging criteria to allow tubes with defects in the rolled region of the tube sheet to remain in service provided that the first inch of rolled tube contains no imperfections, and made permanent the interim approval granted by Amendment No. 101, issued May 6, 1988.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter 1, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on May 16, 1988 (53 FR 17282). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has concluded that an environmental impact statement need not be prepared because operation of the facility in accordance with this amendment will have no significant adverse effect on the quality of the human environment.

For further details with respect to the action see (1) the application for amendment dated March 10, 1988, as supplemented March 22 and 29, 1988, (2) Amendment No. 115 to License No. DPR-13, (3) the Commission's related Safety Evaluation and (4) the Commission's Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555, and at the General Library, University of California, P.O. Box 19557, Irvine, California 92713. A copy of tiems (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects—III, IV, V and Special Projects.

Dated at Rockville, Maryland this 28th day of November, 1988.

For The Nuclear Regulatory Commission.

Charles M. Trammell,

Project Manager, Project Directorate V, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88-27907 Filed 12-2-88; 8:45 am]

BILLING CODE 7590-01-M

VOL 53 ISS 233 DE 5 1988 UMI

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-26325; File No. SR-AMEX-88-27)

Self-Regulatory Organizations; Proposed Rule Change by American Stock Exchange, Inc., Relating to Timely Responses to Requests for Information, and Amex Policy Regarding Cooperation With Domestic and Foreign Self-Regulatory Organizations

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on November 9, 1988, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Amex. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Amex proposes to adopt a new rule concerning the obligation of persons subject to the Amex's jurisdiction to respond in a timely manner to request for information, and the Amex's policy with respect to cooperation with domestic and foreign self-regulatory organizations.

The text of the proposed rule change is available at the Office of the Secretary, Amex, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for the Proposed Rule Change

In its filing with the Commission, the Amex included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Amex has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

(1) Purpose

The purpose of the proposed new rule is to require responses to Exchange requests for information within a reasonable, yet specific, period of time. Although the Exchange Constitution and Rules currently authorize the Exchange to require persons and firms subject to its jurisdiction to provide information and testimony, and also establish a disciplinary mechanism for failure to cooperate with an Exchange investigation, there is no specific requirement that requests for information or testimony be answered within a reasonable period of time. In the past, the Exchange's ability to investigate possible insider trading situations and other matters occasionally has been hampered by slow responses to requests for information on the part of member firms and other persons.

The Exchange therefore proposes to adopt new Rule 31 to enhance the timeliness of its investigations by ensuring that all Exchange requests for information, including requests for surveillance information, are answered promptly. The new rule requires that persons and firms subject to Amex's jurisdiction comply with requests for information within the time specified by the representative or committee of the Exchange making the request.

Additionally, commentary to the proposed new rule sets out Exchange policy concerning cooperation with domestic and foreign self-regulatory organizations ("SROs").

The development of a surveillance system that is appropriate to the realities of today's international and domestic securities markets requires close cooperation between the Exchange and other SRO's and associations. For this reason, the Exchange routinely shares surveillance and investigative information with domestic SROs pursuant to the agreement between the members of the Intermarket Surveillance Group, and has entered into bilateral information-sharing agreements for regulatory purposes with foreign exchanges and associations. The proposed commentary would set forth this policy of cooperation by specifically noting the Exchange's authority to enter into agreements with domestic and foreign SROs for the exchange of information and other regulatory purposes.

(2) Basis

The proposed rule change is consistent with section 6(b) of the Act in general and furthers the objectives of section 6(b)(5) in particular in that it is designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade and foster cooperation and coordination with persons engaged in regulating transactions in securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will impose no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Amex consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Amex. All submissions should refer to the file number in the caption above and should be submitted by December 27, 1988.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: November 29, 1988.

BILLING CODE 8010-01-M

[Release No. 34-26315; File No. SR-Amex-88-17]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Approving Proposed Rule Change Relating to Amendments to Arbitration Procedures

I. Introduction

Pursuant to section 19(b)(1) [1] of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder,[2] the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission") on June 24, 1988 proposed amendments to its rules governing Exchange arbitration procedures. The proposal would amend Exchange Rules 602, 618 and 619 pertaining to the monetary limit governing arbitrations involving public customers, the amount of the filing fee to be retained by the Exchange if an arbitration is withdrawn or settled prior to commencement of the first hearing session, and the monetary limit on simplified arbitrations involving public customers.[3]

Notice of the proposed rule change was provided by the issuance of a Commission release (Securities Exchange Act Release No. 26194; October 18, 1988) and by publication in the **Federal Register** (53 FR 43060; October 25, 1988). The Commission received no comments on the proposed amendments.

The Securities Industry Conference on Arbitration ("SICA") has recently approved amendments to procedures set forth in the Uniform Code of Arbitration pertaining to the number of arbitrators required in matters concerning amounts in controversy of more than $500,000, the retention by a self-regulatory organization of a portion of the filing fee where an arbitration is withdrawn or settled before it has reached the hearing stage, and the types of disputes eligible for resolution through simplified procedures. The rule changes proposed by the Amex are intended to conform applicable Exchange rules to the modifications approved by SICA. Accordingly, the proposal would raise the limit on the size of claims eligible for simplified arbitration procedures from $5,000 to $10,000, establish a filing fee of $200 where the case and controversy is between $5,000 and $10,000, provide for arbitration panels of no less than three nor more than five arbitrators where the matter in controversy exceeds $10,000 and increase the administrative fees retained for cases withdrawn or settled prior to their first hearing session.

In arbitrations involving public customers, Amex Rule 602 currently provides for a panel of at least three but no more than five arbitrators where the matter in controversy does not exceed $500,000. Under the proposal, Amex Rule 602 would provide for a panel of at least three but no more than five arbitrators where the matter in controversy exceeds $10,000, or where the matter in controversy does not involve or disclose a money claim. The amendment to Amex Rule 619 would increase the limit on the size of the claims involving public customers eligible for resolution pursuant to the Exchange's simplified arbitration procedures from $5,000 to $10,000, and would adopt change from a filing fee of $200 for cases where the amount in controversy is more than $5,000 but does not exceed $10,000.[4] Finally, Amex Rule 618, as amended, would increase from $25 to $100 the portion of the administrative filing fee to be retained by the Exchange if a matter submitted for arbitration is withdrawn or settled prior to the commencement of the first hearing session.

The Commission believes that the proposed rule changes are consistent with the Act, and the rules and regulations thereunder applicable to a national securities exchange, and, more specifically, section 6(b)(5) of the Act, in that they are designed to promote just and equitable principles of trade and protect investors and the public interest. In accordance with the guidelines provided by SICA's recent revisions to the Uniform Code of Arbitration, the Commission finds that the proposed amendments will streamline the Exchange's procedural rules governing arbitration, provide for more efficient arbitration proceedings involving smaller claims, and help defray the expenses associated with the Exchange's administration of the arbitration forum.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above mentioned rule change is hereby approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[5]

Dated: November 28, 1988.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34-26314; File No. BSE-88-2]

Self-Regulatory Organizations; Boston Stock Exchange, Inc.; Filing of Proposed Plan for Enforcing and Reporting Minor Disciplinary Rule Violations

Pursuant to section 19(d)(1), 15 U.S.C. 78s(d)(1), of the Securities Exchange Act of 1934 ("Act") and Rule 19d–1(c)(2) thereunder, 17 CFR 240.19d–1(c)(2), notice is hereby given that on October 20, 1988, the Boston Stock Exchange, Inc. ("BSE" or "Exchange") submitted to the Securities and Exchange Commission ("Commission") a proposed rule change to establish a minor rule violation enforcement and reporting plan.[1] For covered minor disciplinary rule violations, the proposed plan would relieve the Exchange from the current reporting requirement otherwise imposed by section 19(d)(1) of the Act for "final" disciplinary actions. The BSE filed with the Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization ("SRO"). The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Change

Pursuant to section 19(d)(1) of the Exchange Act and Commission Rule 19d–1(c)(2) thereunder, the Proposed Rule Change would authorize the Exchange, in lieu of commencing a disciplinary proceeding under Chapter XXX of the Exchange Rules, to impose a

---

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b-4.

[3] On September 27, 1988, the Commission received a letter from the Amex amending the language of Amex Rules 602 and 619 under the proposal, in order to conform more closely with the recently approved amendments to the Uniform Code of Arbitration, as adopted by the Securities Industry Conference on Arbitration. *See* letter from Scott Noah, Associate General Counsel, Amex to Howard Kramer, Assistant Director, SEC, Division of Market Regulation, dated September 26, 1988.

[4] Arbitrations conducted pursuant to the Exchange's simplified procedures require the appointment of just one arbitrator, and may be decided solely on the papers unless the claimant or the arbitrator requests a hearing.

[5] *See* 17 CFR 200.30–3(a)(44).

[1] *See* Securities Exchange Act Release No. 21013 (June 1, 1984), 49 FR 23838 (June 8, 1984). The Commission adopted amendments to paragraph (c) of Rule 19d–1 to allow self-regulatory organizations ("SRO") to submit, for Commission approval, plans for the abbreviated reporting of minor rule violations. Under the amendments, any disciplinary action taken by the SRO for violation of an SRO rule that has been designated a minor rule violation pursuant to the plan shall not be considered "final" for purposes of section 19(d)(1) of the Act if the sanction imposed consists of a fine not exceeding $2500 and the sanctioned person has not sought an adjudication, including a hearing, or otherwise exhausted his or her administrative remedies.

fine, not to exceed $2,500, on any member, member organization, or registered or non-registered employee of a member organization for any violation of an Exchange Rule which the Exchange determines to be minor in nature. Under the Proposed Rule Change, the Exchange will serve a written statement, signed by a Floor Official or Officer of the Exchange, on the person against whom a fine is to be imposed, setting forth: (i) The Exchange Rule(s) alleged to have been violated; (ii) the act or omission constituting the violation; (iii) the fine imposed; and (iv) the date by which the determination becomes final and the fine must be paid, or the date by which the determination must be contested, such date to be not less than 10 days after the date of service of the written statement. If the person against whom the fine is imposed pursuant to the Proposed Rule Change chooses not to contest that matter and pays the fine, he waives both his right to a disciplinary proceeding under Chapter XXX of the Exchange Rules and his right of appeal to the Market Performance Committee or the Board of Governors.

Alternatively, under the Proposed Rule Change, any person may choose to contest the fine by filing not later than the date by which the determination must be contested, a written request with the Market Surveillance and Compliance Department to appear before the Market Performance Committee in order to state the appeal. Following submission of the written request, the matter shall become a formal disciplinary proceeding subject to Chapter XXX of the Exchange Rules. In any such appeal proceeding, if the Market Performance Committee determines that the person charged is guilty of the rule violation(s) charged, the Committee shall: (i) Be free to impose any one or more of the disciplinary sanctions provided in the Proposed Rule, and (ii) determine whether the Exchange Rule violation is minor in nature. The Compliance Department, the person charged, or any member of the Board of Governors of the Exchange may require a review by the Board of any determination by the Market Performance Committee. In addition, paragraph (e) of the Proposed Rule provides that imposition of a fine pursuant to the Rule is not mandatory. Moreover, the Exchange has the option, whenever it determines that any violation is not minor in nature, to commence formal disciplinary proceedings under Chapter XXX of the Exchange Rules.

The Proposed Rule Change would also establish an abbreviated reporting plan and designates certain specified Exchange Rule violations that, if uncontested, would not be subject to the current reporting provisions of Commission Rule 19d–1(c)(1) under the Act requiring that a SRO promptly file notice with the Commission of any "final" disciplinary action directed at any person or organization.[2] Pursuant to paragraph (c)(2) of Commission Rule 19d–1, the BSE thus requests that it be relieved of the current reporting requirement otherwise imposed on Commission Rule 19d–1(c)(1) "final" disciplinary actions, provided the Exchange gives notice of the violations to the Commission on a quarterly basis. Subject to the provisions of Commission Rule 19b–4, the BSE will periodically prepare and announce to its members and member organizations a revised listing of Exchange Rules the violation of which the BSE may impose finds pursuant to the terms of the Proposed Rule Change, as well as the fines that may be imposed for such a violation(s).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the SRO included statements governing the purpose of and basis for the Proposed Rule Change and discussed any comments it received on the proposal. The text of these statements may be examined at the places specified in Item IV below. Set forth in sections (A), (B) and (C) below, the SRO has prepared summaries of the most significant aspects of the statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Currently, when the Exchange discovers a minor rule infraction, a verbal or written caution is issued calling attention to the violation and the need to comply with rules. The Exchange likewise issues a warning against future violations. The purpose of the Proposed Rule Change is to permit the imposition of fines for these minor rule infractions, which will improve the Exchange's ability to efficiently meet its statutory enforcement responsibilities by establishing a program for the imposition of fines for minor violations of Exchange Rules, and by designating certain specified Rule violations as minor Rule violations.

(2) The Proposed Rule Change is consistent with sections 6(b)(1), 6(b)(6), 19(d)(1) and 19(g)(1)(A) of the Act. Section 6(b)(1) of the Act requires Commission-registered national securities exchanges to have the capacity to enforce compliance by its members and associated persons with the provisions of the Act, the Rules thereunder and the rules of the exchange. Section 6(b)(6) of the Act provides that appropriate disciplinary procedures be established to exact such compliance. Section 19(d)(1) of the Act requires SROs to notify the Commission of any "final" disciplinary sanction imposed on any member thereof or participants therein, and Commission Rule 19d–1 thereunder authorizes SROs to adopt minor disciplinary rule violation enforcement and reporting plans. Finally, section 19(g)(1)(A) of the Act requires each SRO to enforce compliance by its members and associated persons with its rules, as well as Commission rules and regulations.

B. Self-Regulatory Organization's Statement on Burden on Competition.

The Exchange believes that the Proposed Rule Change will impose no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others.

The Exchange has neither solicited nor received any comments on the Proposed Rule Change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action.

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the Proposed Rule Change, or

(B) Institute proceedings to determine whether the Proposed Rule Change should be disapproved.

IV. Solicitation of Comments.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions

[2] The actual list of substantive Exchange rules that would be subject to the proposed minor disciplinary rule violation enforcement and reporting plan are available for inspection in the Commission's Public Reference Branch, 450 Fifth Street, NW., Washington, DC.

should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements addressing the Proposed Rule Change that are filed with the Commission, and all written communications relating to the Proposed Rule Change between the Commission and any person, other than those that may be withheld from the public in accordance with 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filings will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by December 26, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: November 28, 1988.

Jonathan G. Katz,

Secretary.

[FR. Doc. 88-27963 Filed 12-2-88; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-26316; File No. SR-MSE-87-11]

Self-Regulatory Organizations; Midwest Stock Exchange, Inc.; Order Approving Deletion of Rule 6.01, Article III of the Midwest Stock Exchange Guide, in Its Entirety

I. Introduction

Pursuant to section 19(b)(1) [1] of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder,[2] the Midwest Stock Exchange, Inc. ("MSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission") on September 3, 1987 a proposed amendment to the Exchange Rule governing the affiliations of bank and bank holding companies with Exchange members.[3] The proposal would delete in its entirety Rule 6.01, Article III of the MSE Stock Exchange Guide, which generally prohibits a bank or bank holding company from acting as a principal stockholder or parent firm of an Exchange member corporation.

Notice of the proposed amendment to the rule governing the affiliations of Exchange members with banks and bank holding companies was provided by the issuance of a Commission release (Securities Exchange Act Release No. 26195; October 18, 1988) and by publication in the **Federal Register** (53 FR 43061; October 25, 1988). The Commission received no comments addressing the proposed rule change.

II. Description of the Proposal

Article III of the Midwest Stock Exchange Guide generally governs corporate responsibilities of Exchange members. Rule 6 under Article III of the Exchange Rules governs officer, director and principal shareholder disclosures, reporting obligations and management responsibilities. Paragraph .01 under Exchange Rule 6.01, Article III states:

> At least until pending legal and legislative questions affecting such relationships are clarified, the Exchange will not approve a bank or bank holding company as a principal stockholder or parent firm of a member corporation.[4]

A "bank" is generally defined under the Bank Holding Company Act of 1956 as an institution that is insured by the Federal Deposit Insurance Corporation, or accepts deposits and makes commercial loans.[5] A "bank holding company" is defined under the Bank Holding Company Act of 1956 as any company that satisfies one of the bank "control" tests set forth in the statute (*e.g.*, a company that has the power to vote 25 percent of a bank's class of voting equity securities).[6] The Exchange is proposing to delete the text of Exchange Rule 6.01 in its entirety; however, despite the proposed deletion of Exchange Rule 6.01, Exchange Rule 1.02 would continue to preclude banks and bank holding companies from direct Exchange membership.

At the time of its original filing with the Commission, the Exchange stated that approximately ten of its then current members had as their principal shareholders banks or bank holding companies, thereby bringing the MSE members within Rule 6.01's coverage. In an October 1988 letter filed with the Commission's Division of Market Regulation, the Exchange cited three Exchange member corporations as examples of such firms covered by Exchange Rule 6.01: Rose and Company, ("Rose") owned by Chase Manhattan Corporation ("Chase"); First Options of Chicago ("first Options"), owned by Continental Illinois"); and Charles Schwab and Co. ("Schwab"), owned at that time by BankAmerica Corporation ("BankAmerica").[7] Schwab, Rose and First Options are all members of the Exchange.

The Exchange has noted that since the adoption of Exchange Rule 6.01, certain clarifications regarding bank ownership of broker-dealers have been made, and there presently exist a significant number of broker-dealers that are at least in part owned by banks or bank holding companies. The Exchange therefore contends that legal and regulatory developments subsequent to the adoption of Exchange Rule 6.01, coupled with the continued prohibition on direct bank or bank holding company exchange membership, support the deletion of Exchange Rule 6.01.

III. Discussion and Conclusion

The Board of Governors of the Federal Reserve System ("Board"), the primary federal bank regulator of Chase and BankAmerica,[8] and the Office of the Comptroller of the Currency ("OCC"), the primary federal bank regulator of Continental Illinois, have both issued orders that address the affiliations of the three MSE member firms cited above. Pursuant to section 4(c)(8) of the Bank Holding Company Act of 1956 ("BHCA"),[9] the Board approved the application of BankAmerica, a bank holding company, to acquire Schwab, a retail discount brokerage firm registered as a broker-dealer with the Commission.[10] The Board also approved the section 4(c)(8) BHCA application of Chase, a bank holding company, to acquire Rose, a retail discount brokerage firm registered as a broker-

[3] On October 21, 1988 the Commission received a letter from the MSE that clarifies the rationale underlying the proposal. *See* letter from Patrick Conroy, Associate Counsel, MSE to George Scargle, Staff Attorney, SEC, Division of Market Regulation, dated October 17, 1988.

[4] Unless the context otherwise requires, under Exchange Rules, the term "principal stockholder" is defined as any person or entity beneficially owning, directly or indirectly, equity securities representing 5% of the voting power in elections of directors, or 5% of the net worth, or a 5% participation in the net profits, of a corporation, while the term "parent firm" is defined as a corporation or partnership which beneficially owns, directly or indirectly, equity securities representing 20% or more of the voting power in the election of directors of a member corporation, or such lesser percentage of such voting power as constitutes in the circumstances effective control of the member corporation. *See* Midwest Stock Exchange Guide, Article III, Rule 2.

[9] *See* 12 U.S.C. 1843(c)(8).

[10] *BankAmerica/Charles Schwab Corp.*, 69 Fed. Res. Bull. 105 (1983), upheld in *Securities Industry Association* v. *Board of Governors of the Federal Reserve System*, 716 F.2d 92 (2d Cir. 1983), *aff'd*, 468 U.S. 207 (1984).

dealer with the Commission.[11] Finally, pursuant to section 24 (Seventh) of the National Bank Act,[12] the OCC approved the establishment by Continental Illinois, a national bank, of a wholly-owned operating subsidiary through the acquisition of First Options, a broker dealer registered with the Commission.[13] Thus, to the extent that the primary federal bank regulators of BankAmerica, Chase and Continental Illinois have approved their affiliations with Commission-registered broker-dealers, their orders (as well as consequent litigation) support the exchange's contention that subsequent to the adoption of Exchange Rule 6.01, bank regulatory standards have become sufficiently clarified to support repeal of the Rule's principal shareholder and parent firm prohibitions.

Section 6(c)(1) of the Securities Exchange Act of 1934 requires national securities exchanges registered under the Act to deny membership to any person, other than a natural person, which is not registered as a broker-dealer with the Commission.[14] This statutory requirement prevents banks or bank holding companies from directly operating Exchange memberships, without registration with the Commission as broker-dealers. In the past banks have not been willing to register as broker-dealers and comply with the broker-dealer regulatory requirements. Similarly, MSE Rule 1.02, Article I, prohibits the Exchange from approving bank or bank holding companies applications for direct MSE membership. Because the combination of these two prohibitions effectively prevent banks or bank holding companies from directly operating an MSE membership without establishing a separate subsidiary subject to commission regulation, the repeal of Rule 6.01 is consistent with the regulatory structure governing broker-dealer registration and exchange membership under the Act.

The Commission believes that the proposed rule change is consistent with the Act, and the rules and regulations thereunder applicable to a national securities exchange, and, more specifically, section 6(b)(5) of the Act. For the limited purpose of repealing the prohibition on bank and bank holding companies from acting as the principal stockholder or parent corporation of Exchange member firms, the Commission believes that repeal of MSE Rule 6.01 is appropriate. Additionally, the Commission finds that the proposed amendment will preserve the Commission's regulatory jurisdiction as it applies to broker-dealers and members of registered national securities exchanges. Finally, the proposed repeal of MSE rule 6.01 has no impact on the effect of MSE Rule 1.02 and its continued prohibition on banks and bank holding companies from directly owning or operating Exchange memberships.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above mentioned rule change is hereby approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[15]

Dated: November 28, 1988.

[Release No. 34-26317; File No. SR-NASD-88-40]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change Relating to the Filing of Advertisements and Sales Literature Concerning Registered Investment Companies

The National Association of Securities Dealers, Inc. ("NASD") submitted a proposed rule change on September 28, 1988 (and an Amendment thereto, dated November 17, 1988, providing the results of membership vote)[1], pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder to amend Article III, section 35(c)(1) of the NASD Rules of Fair Practice to delete certain existing text and add new provisions regarding the filing of advertisements and sales literature concerning registered investment companies.

Notice of the proposed rule change together with the substance of the terms of the proposed rule change was given by the issuance of a Commission release (Securities Exchange Act Release No. 26140, September 28, 1988) and by publication in the **Federal Register** (53 FR 40303, October 14, 1988). No comments were received with respect to the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, with the requirements of Section 15A and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change, SR-NASD-88-40, be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated, 17 CFR 200.30-3(a)(12).

Dated: November 28, 1988.

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Applicant is a Florida corporation and registered under the 1940 Act on December 19, 1986 as an open-end, diversified, management investment company. On March 30, 1987, Applicant filed a registration statement on Form N–1A with respect to an indefinite number of shares of its common stock, $.01 par value. The registration statement never became effective and was withdrawn by Applicant on August 20, 1987. Applicant has never made a public offering of its securities.

2. Applicant filed Articles of Dissolution on September 11, 1987 with the Department of State of Florida to terminate its legal existence.

3. Prior to adoption of a plan of liquidation and dissolution for Applicant, all of Applicant's shareholders, other than Progress Financial Services Incorporated ("PFS""), had elected to redeem their shares. Their shares were redeemed in cash on July 31, 1987, at the net asset value per share of $13.43 for a total of $707,170. Redeeming shareholders also received tax indemnification payments totaling $55,108 pursuant to an indemnification undertaking by PFS to compensate shareholders for the federal income tax consequences of their recognition, at the time of redemption, of unrealized capital gains existing in Applicant's portfolio. On July 31, 1987, a Plan of Liquidation and Dissolution (the "Plan") was adopted by the Board of Directors of Applicant, and the Plan was approved by the sole remaining shareholder, PFS, on August 10, 1987. As of August 19, 1987, all of Applicant's remaining assets, which consisted of $151 in cash and $11,453,761 in securities, were distributed in kind to the sole remaining shareholder, PFS.

4. Applicant has not, within the last 18 months, transferred any of its assets to a separate trust.

5. Applicant states that it does not currently have any shareholders, it does not have any assets, debts or liabilities, it is not a party to any litigation or administrative proceeding, and it does not propose to engage in any business other than that necessary for the winding up of its affairs.

6. It is Applicant's understanding that, pursuant to Rule 30b1–1 under the 1940 Act, Applicant was relieved of its N–SAR reporting obligations for the period from March 30, 1987, the date on which its Registration Statement on Form N–1A was filed, through the date, August 20, 1987, on which this Registration Statement was withdrawn.

7. Applicant made sales of shares of its common stock in a private placement pursuant to Regulation D under the Securities Act of 1933 on the dates and in the amounts indicated in Schedule A of Applicant's application on Form N–8F.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–16862; 811–4956]

Progress Fixed Income Fund, Inc.; Application

November 29, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 ("1940 Act").

Applicant: Progress Fixed Income Fund, Inc. ("Applicant").

Relevant 1940 Act Sections: Deregistration under section 8(f).

Summary of Application: Applicant seeks an order declaring that it has ceased to be an investment company subject to the 1940 Act.

Filing Date: The application on Form N–8F was filed on January 6, 1988 and amended on August 31, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 21, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant(s) with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicant, 260 First Avenue South, St. Petersburg, FL 33701.

FOR FURTHER INFORMATION CONTACT: Cecilia C. Kalish, Staff Attorney (202) 272–3035 of Stephanie M. Monaco, Branch Chief at (202) 272–3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Application is a Florida corporation and registered under the 1940 Act on December 19, 1986 as a open-end, diversified, management investment company. On March 30, 1987, Applicant filed a registration statement on Form N–1A with respect to an indefinite number of shares of its common stock, $.01 per value. The registration statement never became effective and was withdrawn by Applicant on August 20, 1987. Applicant has never made a public offering of its securities.

2. Applicant filed Articles of Dissolution on September 11, 1987 with the Department of State of Florida to terminate its legal existence.

3. Prior to adoption of a plan of liquidation and dissolution for Applicant, all of Applicant's shareholders, other than Progress Financial Services Incorporated ("PFS"), had elected to redeem their shares. Their shares were redeemed in cash on July 31, 1987, at the net assist value per share of $10.58 for a total of $22,887. On July 28, 1987, a Plan of Liquidation and Dissolution (the "Plan") was adopted by the Board of Directors of Applicant, and the Plan was approved by the sole remaining shareholder, PFS, on August 3, 1987. As of August 19, 1987, all of Applicant's remaining assets, which consisted of $1,059,213 in cash were distributed in kind to the sole remaining shareholder, PFS.

4. Applicant has not, within the last 18 months, transferred any of its assets to a separate trust.

5. Applicant states that it does not currently have any shareholders, it does not have any assets, debts or liabilities,

it is not a party to any litigation or administrative proceeding, and it does not propose to engage in any business other than that necessary for the winding up of its affairs.

6. It is Applicant's understanding that, pursuant to Rule 30bl–1 under the 1940 Act, Applicant was relieved of its N-SAR reporting obligations for the period from March 30, 1987, the date on which its Registration Statement on Form N–1A was filed, through the date, August 20, 1987, on which this Registration Statement was withdrawn.

7. Applicant made sales of shares of its common stock in a private placement pursuant to Regulation D under the Securities Act of 1933 on the dates and in the amounts indicated in Schedule A of Applicant's application on Form N–8F.

For the Commission, by the Division of Investment Management, under delegated authority.

South Australian Finance (USA) Ltd., et al.; Notice of Application

November 29, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION. Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: South Australian Finance (USA) Ltd. (the "Issuer"), the South Australian Government Financing Authority ("SAFA"), and the Treasurer of the State of South Australia of the Commonwealth of Australia (the "Treasurer").

Relevant 1940 Act Sections: Exemption requested under section 6(c) from all provisions of the 1940 Act.

Summary of Application: Applicants seek an order exempting them from all provisions of the 1940 Act in connection with the issuance and sale of certain of the Issuer's debt securities in the United States.

Filing Date: The application was filed on September 8, 1988, and an amendment to the application was filed on November 21, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on the application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 21, 1988. Request a hearing in writing, giving the nature of your

interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicants, c/o Howard S. Yaruss, Esq., Baker & McKenzie, 805 Third Avenue, New York, New York 10022.

FOR FURTHER INFORMATION CONTACT: H. R. Hallock, Jr., Special Counsel, at (202) 272–3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicants' Representations

1. The Issuer, incorporated under the laws of the State of Delaware, was established to act as agent for SAFA and the semi-government authorities of the State of South Australia of the Commonwealth of Australia ("South Australia") for the purpose of raising funds in the United States and elsewhere. All of the issued and outstanding shares of the Issuer's capital stock are owned by SAFA.

2. SAFA is a statutory authority of South Australia. A statutory authority is any corporate body established by an act of the Parliament of South Australia. SAFA was established under the laws of South Australia on January 13, 1983, pursuant to the Government Financing Authority Act, 1982 (the "Financing Authority Act"), to act as the central authority for the finances of South Australia.

3. SAFA is responsible for providing almost all the capital funds (including working capital) needed by South Australia's semi-government authorities. SAFA manages the majority of South Australia's public debt, its cash and liquid assets and its foreign currency positions. As of June 30, 1987, the total borrowing of SAFA from public sources, including assumption of obligations originally issued by the Commonwealth of Australia on behalf of South Australia and by semi-government authorities prior to SAFA's establishment, equalled A$6,515 million. (as of September 6, 1988, A$1 was approximately equal to US $0.80.) as of June 30, 1987, SAFA had total assets of A$8,684 million.

4. Pursuant to the Financing Authority Act, the SAFA "Board" may consist of no less than three nor more than six members which are appointed by the Governor of South Australia. The Under Treasurer of South Australia is the ex officio chairman. SAFA's Financial Accounts are audited by the Auditor-General of South Australia, as required by the Financing Authority Act, and an international firm of chartered accountants. SAFA's Annual Report, which includes its audited Financial Accounts, is presented to the Parliament of South Australia.

5. South Australia's semi-government authorities are defined by section 4 of the Financing Authority Act. The purpose of such entities is to engage in activities for the benefit of South Australia and its citizens. Such activities include acting as "corporate" Treasurer for the South Australia public sector, including managing South Australia's financial risks through active debt and financial asset management, and developing and financing public works projects.

6. The Applicants propose that the Issuer issue and sell, on behalf of SAFA and the semi-government authorities, prime quality, short-term negotiable promissory notes of the type generally referred to as commercial paper (the "Commercial Paper Notes"). The Commercial Paper Notes will be denominated in United States dollars and will be sold in minimum denominations of $100,000.

7. The Commercial Paper Notes will not be offered for sale to the general public. They will be sold in private placements exempt from the registration requirements of the Securities Act of 1933, as amended ("1933 Act"). Sales will be made through recognized and reputable dealers in commercial paper, as selected by the Issuer and SAFA (the "Commercial Paper Dealers"), to institution investors and to other entities or investors which ordinarily purchase commercial paper notes in large denominations.

8. The net proceeds of any offering of Commercial Paper Notes will be transferred directly by the Issuer to the principals, *i.e.*, SAFA and the semi-government authorities. Although the Issuer will issue and sell the Commercial Paper Notes only as agent for SAFA and semi-government authorities, the Issuer will be fully liable thereunder. The Treasurer of South Australia will, however, unconditionally guarantee the payment of principal and interest on the Commercial Paper Notes issued by the Issuer (the "Guarantees"). Such Guarantees may be given directly by the Treasurer. In the event the Treasurer does not directly give such Guarantees, SAFA will unconditionally guarantee the payment of principal and interest on the Commercial Paper Notes; such guarantees will automatically cause the Treasurer of South Australia to be a guarantor of the payment of principal and interest on the Commercial Paper Notes since liabilities incurred or assumed by SAFA in carrying out the purposes of the Financing Authority Act are automatically guaranteed by the Treasurer of South Australia by virtue of section 15(1) of the Financing Authority Act. Any liability of the Treasurer under the Guarantees shall be satisfied out of the General Revenue of South Australia which is appropriate by section 15(2) of the Financing Authority Act.

9. The Issuer may, from time to time in the future, issue and sell debt securities other than Commercial Paper Notes on behalf of SAFA or semi-government authorities of South Australia.

Applicants' Conditions

If the requested order is granted, Applicants agree to comply with the following undertakings:

1. No Commercial Paper Notes will be issued prior to receiving an opinion of the United States counsel to the effect that the proposed offering is exempt from the registration requirements of the 1933 Act.

2. No debt securities other than Commercial Paper Notes will be offered or sold in the United States unless they are (a) registered under the 1933 Act or (b) in the opinion of United States Counsel for the Applicants, an exemption from registration under the 1933 Act is available with respect to such offer and sale or (c) the staff of the SEC states that they would not recommend that the SEC take any action under the 1933 Act if such securities were not registered.

3. The Commercial Paper Notes and any other debt securities offered for sale by the Issuer in the future will have received one of the two highest investment grade ratings, or one of the equivalent ratings in any future rating system, from one nationally recognized rating organization. Prior to the issuance of the Commercial Paper Notes or any other debt security, the Issuer's United States counsel shall confirm in writing to the Issuer that the requisite investment rating has been obtained. The Issuer's United States counsel shall maintain a copy of such confirmation.

4. In connection with any issue and sale of the Commercial Paper Notes (as

well as in connection with any future offerings by the Issuer guaranteed by the Treasurer of South Australia), the Issuer, SAFA and the Treasurer of South Australia will maintain an agent in the United States upon which process may be served in any action arising out of or based on the Commercial Paper Note, the Guarantees, or any other debt securities. Such action may be instituted in any state or Federal Court in the Borough of Manhattan, the City of New York, New York, by any holder of a Commercial Paper Notes, and the Issuer, SAFA and the Treasurer of South Australia will consent to the jurisdiction of any such court in respect to any such action. The obligation to maintain an agent to accept service of process and the consent to jurisdiction shall remain in effect until all amounts due and to become due in respect of any Commercial Paper Notes have been paid. SAFA and the Treasurer of South Australia further agree to waive, to the extent permitted by law, any immunity they might have from such actions.

5. The Applicants undertake to take reasonable steps to ensure that the Commercial Paper Dealers provide any person to whom Commercial Paper Notes are offered in the United States disclosure documents which are at least as comprehensive in their description of the Applicants as those which may be used by United States issuers in United States offerings of such securities. Similalry, the Issuer undertakes to provide to any person to whom it offers debt securities in the United States (and undertakes to take reasonable steps to ensure that any underwriter or dealer through whom it makes such offers will provide to each person to whom such offers are made prior to the sale of debt securities to such offeree) disclosure documents which are at least as comprehensive in their description of the Issuer and SAFA as those which would be used by other United States issuers in United States offerings of such securities and which contain the latest available audited financial statements of the Issuer and SAFA.

6. The Issuer will not at any time nor under any circumstances offer any debt securities, including Commercial Paper Notes, which are not guaranteed, directly or indirectly by virtue of SAFA's guarantee, by the Treasurer of South Australia.

7. The Issuer will neither issue nor sell any equity securities to any entity other than SAFA and/or an affiliate of SAFA.

Applicants' Legal Analysis

1. Approval of the application is both necessary and appropriate in the public interest because South Australia, SAFA and the semi-government authorities would effectively be precluded from raising funds in the United States capital markets if the Applicants were required to comply with the provisions of the 1940 Act. The procedes of the issuance of the Commercial Paper Notes will be used to benefit the South Australia public.

2. The requested exemption is consistent with the protection of investors. Because of the complete and unconditional guarantees of the Treasurer of South Australia, the Commercial Paper Notes are expected to have the highest investment grade ratings. Investors in the Commercial Paper Notes would be able to rely upon the credit strength of the Treasurer of South Australia rather than on that of the Issuer.

3. The Applicants believe that they are not persons which were intended to be subject to the 1940 Act. SAFA and each of the semi-government authorities differs fundamentally from the types of investment companies at which the 1940 Act is generally directed and for which its substantive provisions are necessary or suitable. They are political subdivisions of a foreign sovereign, South Australia, established solely to pursue activities for the benefit of South Australia and its citizens.

4. Rule 3a–5 provides an exemption for subsidiaries organized to finance the operations of domestic or foreign companies. The Applicants could not issue Commercial Paper Notes in reliance upon the exemption provided in Rule 3a–5 because Rule 3a–5 is not available to finance subsidiaries of a political subdivision. Additionally, Rules 3a–5's requirement that at least 85% of the funds raised be "invested in or loaned to" the finance subsidiary's parent will not be met. Otherwise, the Applicants comply in all material respects with the requirements specified for an exemption under Rule 3a–5. Furthermore, the structure of the Applicants, the intended use of proceeds of the Commercial Paper Notes and the protection afforded by the Guarantees are consistent with the policy underlying Rule 3a–5.

For the Commission, by the Division of Investment Management, under delegated authority.

Joanathan G. Katz,

Secretary.

DEPARTMENT OF TRANSPORTATION

Applicants for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended November 25, 1988

The following applications for certificates of public convenience and necessity and foreign air carrier permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for answers, conforming application, or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket No.: 45951.

Date Filed: November 21, 1988.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 19, 1988.

Description: Application of Nashville Eagle, Inc. pursuant to section 401(d)(1) of the Act and Subpart Q of the Regulations requests authority to engage in interstate and overseas scheduled air transportation of persons, property and mail.

Docket No.: 45962

Date Filed: November 25, 1988.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 23, 1988.

Description: Application of Trans World Airlines, Inc. pursuant to Section 401 of the Act and Subpart Q of the Regulations applies for amendment of its certificate of public convenience and necessity for Rule 147 authorizing TWA to carry local passengers, property and mail on its London-Frankfurt flights on a year-round basis, commencing May 15, 1989.

Docket No.: 45966.

Date Filed: November 15, 1988.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 23, 1988.

Description: Application of Bahamasair Holdings Ltd. pursuant to section 402 of the Act and Subpart Q of the Regulations requests amendment of its foreign air carrier permit to authorize Bahamasair to engage in the foreign air transportation of passengers, mail, and property between any point or points in the Commonwealth of The Bahamas and the new coterminal point of Washington,

D.C., to be served through Washington Dulles International Airport.

BILLING CODE 4910-62-M

National Highway Traffic Safety Administration

Enactment of Imported Vehicle Safety Compliance Act

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Announcement of enactment of law imposing new requirements regarding importation of motor vehicles that do not comply with all applicable Federal motor vehicle safety standards.

SUMMARY: When it becomes effective, the recently enacted Imported Vehicle Safety Compliance Act of 1988 will require that motor vehicles not manufactured to meet Federal motor vehicle safety standards be imported into the United States through an importer that has registered with the Department of Transportation and that will modify the vehicles to comply with the standards, or imported pursuant to an existing contract with a registered importer to undertake conformance modifications. This procedure is similar to the one adopted by the Environmental Protection Agency last year with respect to Federal emissions standards. The new NHTSA procedure contrasts with its present one allowing importation by any person, upon the furnishing of a bond for the production of a compliance statement within 120 days after entry. The new law provides a number of exemptions from the general requirement for importation by importers. For example, the new procedures retain the current exemptions for foreign military and diplomatic personnel. The new law also gives the Secretary authority to exempt vehicles imported solely for research, training, competitive racing events or similar purposes. Similar exemptions are permitted under the existing import procedures. Other changes are also discussed.

DATES: As provided in section 2(e)(1) of the Imported Vehicle Safety Compliance Act, the amendments made by the Act to the National Traffic and Motor Vehicle Safety Act are effective January 31, 1990, if regulations impementing the Imported Vehicle Safety Act have been proposed not later than April 30, 1989. If implementing regulations have not been proposed by that date, the amendments are effective October 31, 1989. Implementing regulations must be finally adopted by October 31, 1989.

FOR FURTHER INFORMATION CONTACT: Taylor Vinson, Office of Chief Counsel (NCC-10), NHTSA, Room 5219, 400 7th Street, SW., Washington, DC 20590, Telephone: (202) 366-5263.

SUPPLEMENTARY INFORMATION: On October 31, 1988, the President signed into law Pub. L. 100-562, the Imported Vehicle Safety Compliance Act of 1988 ("the 1988 Act"). The 1988 Act amends those provisions of the National Traffic and Motor Vehicle Safety Act of 1966 ("the Vehicle Safety Act") that relate to the importation of motor vehicles subject to the Federal motor vehicle safety stanards (section 108(b), 15 U.S.C. 1397(b)). Section 2(e)(2) of the 1988 Act requires NHTSA, as soon as possible after enactment, to "take reasonable steps designed to encourage notification to the extent feasible" regarding its provisions "to individuals who may be affected by such amendments." The purpose of this notice is to apprise the public at large of the 1988 Act and the changes that it makes in motor vehicle importation procedures that have been in effect, relatively unchanged, since January 1, 1968.

The current importation regulations, which are set forth in 19 CFR 12.80, were jointly issued by the Departments of Transportation and Treasury pursuant to the authority of sections 108(b)(3) and (b)(4) of the Vehicle Safety Act. Administered by NHTSA and the Customs Service, these regulations, with minor amendments, have governed the importation of motor vehicle and motor vehicle equipment subject to the Federal motor vehicle safety standards since the effective date of the first standards in January 1968. Those regulations will continue to govern the importation of nonconforming vehicles and equipment until the effective date of the amendments made by the 1988 Act.

One effect of the amendments made by the 1988 Act is to delete the authority for the existing joint regulations and to vest in NHTSA authority to regulate the importation of motor vehicles subject to the Vehicle Safety Act. The category of importer primarily affected by the amendments is the importer of a motor vehicle that does not conform, at the time of importation, to the Federal motor vehicle safety standards that applied at the time of its original manufacture. Under the current regulation, 19 CFR 12.80(b)(1)(iii), a nonconforming vehicle may be imported if the importer provides a bond for the production of a statement within 120 days of entry that the vehicle has been brought into compliance with the Federal motor vehicle safety standards, and if the importer declares that the vehicle will not be sold, or offered for sale, until the bond has been released.

The 1988 Act imposes restrictions upon both motor vehicles and importers. The principal restriction upon a motor vehicle is that it cannot be imported at all unless NHTSA determines that it is suitable for modification to meet the Federal safety standards. Determinations will be made on NHTSA's own initiative, or upon petition of any registered importer (see discussion below) or any motor vehicle manufactuer, and will be subject to public comment.

A nonconforming vehicle may be imported under either of the following two scenarios. The first scenario will involve the making of two determinations: That the nonconforming vehicle is substantially similar to a motor vehicle of the same model year originally manufactured for importation into and sold in the U.S., and that the vehicle is capable of being readily modified to conform.

The second scenario will arise if the agency does not make a substantial similarity determination regarding a vehicle. In that case, it will still be permissible to import the vehicle if the agency determines that it has safety features that comply with the U.S. standards, or are capable of being modified to comply with those standards, "based on destructive crash data or such other evidence" as NHTSA determines is adequate.

Under either scenario, a positive determination regarding a vehicle will permit *any* registered importer to modify vehicles of the same model and model year.

If the agency makes a negative determination regarding a model's substantial similarity or ability to be modified, the agency will be temporarily prohibited from taking up the issue again. If the decision was made in response to a petition, the 1988 Act prohibits the agency from considering a petition regarding the same model of vehicle until at least 3 months after that decision. If the negative determination was made in a proceeding begun at the agency's own initiative, the agency will not be able to make another determination regarding the same model of motor vehicle until at least 3 months after the negative one.

The primary restriction placed on persons importing nonconforming vehicles is that they will have to be, subject to certain exceptions, registered importers, or those who have conformance contracts with registered

importers. The purpose of this requirement is to increase the likelihood that the nonconforming vehicles will be properly modified and actually brought into compliance with the safety standards.

In order to become and remain registered, a registered importer will have to keep records, allow inspection of its records and facilities, and demonstrate that it will be able technically and financially to carry out notification and remedy responsibilities in the event a noncompliance or safety related defect is determined to exist in any of the vehicles that it imports. To cover the expenses of the registration program and certain other activities, each registered importer will have to pay annual fees. Registration may be revoked or suspended for failure to comply with any requirement or regulation, and is automatically suspended for failure to pay a required fee in a timely manner, or for knowingly filing a false or misleading certification.

Importers will continue to provide a bond for each vehicle imported to ensure that the vehicle is brought into conformity with the safety standards. When a registered importer has finished its modifications of an imported vehicle, it will have to attach a label to the vehicle stating that it complies with the safety standards, and certify to NHTSA that the vehicle conforms to the safety standards. The registered importer will be able to release the vehicle from its custody for licensing or registration 30 days after its submission of the certification to NHTSA. NHTSA, however, may demand an inspection of the vehicle within the 30-day period. In that event, the vehicle may be released only upon the agency's written finding, on completing the inspection, that the vehicle complies. This finding may be made within the 30-day period, but need not be made within that period. If the agency gives a written notice of compliance, the vehicle may be released immediately. The 30-day release provisions also do not apply if, within that period NHTSA has reason to believe a certification is false or contains a material misrepresentation.

The 1988 Act provides a variety of exemptions from the requirements that nonconforming imported vehicles be determined by the agency to be suitable for modification and imported and modified by Registered Importers. The requirements do not apply to:

—Vehicles needing further manufacturing in order to perform their intended functions.
—Any individual who wishes to import a vehicle for his or her own personal use if the person provides a bond to assure proper modification of the vehicle, provides a copy of any agreement with a registered importer committing the importer to modify the vehicle to bring it into conformity with the safety standards and certifies that the vehicle is of the same model and model year as a vehicle which the agency has previously determined to be suitable for modification.
—Any individual, including U.S. military personnel, whose assigned place of employment was outside the United States on October 31, 1988, who wishes to import a vehicle, purchased or ordered before that date, for his or her own personal use, who imports the vehicle not later than October 31, 1992, and who meets the requirements of the current importation procedures.
—Any individual who works for a foreign government on assignment in this country or for the Secretariat of a public international organization and is within the class of person for whom free entry of vehicles has been authorized by the Secretary of State and any individual who is a member of the armed forces of a foreign country and is on assignment in this country.
—Any vehicle that is 25 years or more old.
—Any vehicle imported solely for research, investigations, studies, demonstrations or training, or competitive racing events. (Under existing importation regulations, this exemption covers vehicles imported for show, test, experiment, competition, repair or alteration).

NHTSA emphasizes that this notice is for informational purposes only. Accordingly, no comments are requested on this notice. To implement the 1988 Act, the agency will issue appropriate notices of proposed rulemaking by April 30, 1989. At that time, the agency will invite all interested persons to participate by submitting written comments.

Issued on November 29, 1988.

George Parker,

Associate Administrator for Enforcement.

BILLING CODE 4910-59-M

Office of the Secretary

Commercial Space Transportation Advisory Committee; Open Meeting

Pursuant to section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92-463, 5 U.S.C., App. 1), notice is hereby given of a meeting of the Commercial Space Transportation Advisory Committee. The meeting will take place on Thursday, December 15, 1988, from 9:00 a.m. to 5:00 p.m. in room 10234 of the Department of Transportation's headquarters building at 400 Seventh Street, SW. in Washington, DC. This will be the eighth meeting of the Committee. The meeting will address issues associated with component research study, international competition in the world launch market, insurance requirements for commercial launch activities, security and restrictions at USAF bases, radio frequency allocation, commercial spaceports, launch scheduling report, space debris and government launch service and launch-related procurements.

This meeting is open to the interested public, but may be limited to the space available. Additional information may be obtained by contacting Linda H. Strine at (202) 366-5770.

Carol S. Lane,

Director, Office of Commercial Space Transportation.

Dated: December 1, 1988.

BILLING CODE 4810-40-M

Public Information Collection Requirements Submitted to OMB for Review

Date: November 29, 1988.

The Department of Treasury has made revisions and resubmitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545-0028.

Form Number: IRS Forms 940 and 940PR.

Type of Review: Resubmission.

Title: Employer's Annual Federal Unemployment (FUTA) Tax Return (940); Planilla Para la Declaracion Anual del Patrono—La Contribucion Federal Para el Desempleo (FUTA) (940PR).

Description: Internal Revenue Code Section 3301 imposes a tax on employers based on the first $7,000 of taxable annual wages paid each employee. IRS uses the information, reported on Forms 940 and 940PR (Puerto Rico employers only) to ensure that employers have reported and figured the correct FUTA wages and FUTA tax.

Respondents: Individuals or households, Farms, Businesses or other for-profit, Small businesses or organizations.

Estimated Number of Respondents: 4,899,394.

Estimated Burden Hours Per Response:

Recordkeeping: 14 hours, 7 minutes
Learning about the law or the form: 18 minutes
Preparing the form: 32 minutes
Copying, assembling, and sending the form to IRS: 0 minutes

Frequency of Response: Annually.

Estimated Total Reporting Burden: 73,245,940 hours.

Clearance Officer: Garrick Shear, (202) 535-4297, Internal Revenue Service, Room 5571, 1111 Constitutional Avenue NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf, (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

BILLING CODE 4810-25-M

Public Information Collection Requirements Submitted to OMB for Review

Date: November 29, 1988.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: New.

Form Number: IRS Form 8810.

Type of Review: New collection.

Title: Corporate Passive Activity Loss and Credit Limitations.

Description: Under section 469, losses and credits from passive activities, to the extent they exceed passive income (or in the case of credits, the tax attributable to net passive income), are not allowed. Form 8810 is used by personal service corporations and closely held C corporations to figure the passive activity loss and credits allowed and the amount of loss and credit to be reported on their tax return.

Respondents: Businesses or other for-profit.

Estimated Number of Respondents/ Recordkeepers: 100,000.

Estimated Burden Hours Per Response:

Recordkeeping: 41 hours, 22 minutes
Learning about the law or the form: 4 hours, 40 minutes
Preparing and sending the form to IRS: 5 hours, 33 minutes

Frequency of Response: Annually.

Estimated Total Reporting Burden: 5,158,000 hours.

OMB Number: 1545-1030.

Form Number: None.

Type of Review: Reinstatement.

Title: 1989 Opinion Survey of Taxpayers Contacting Taxpayer Service.

Description: The data collected will be used to determine if the Internal Revenue Service meets the taxpayers' needs in providing assistance on tax related matters, to plan for short and long range assistance programs, and to assess the impact of taxpayers who have requested assistance on voluntary compliance. The sample will be selected from taxpayers who have requested assistance from IRS.

Respondents: Individuals or households, Businesses or other for-profit.

Estimated Number of Respondents: 8,400.

Estimated Burden Hours Per Response: 15 minutes.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 2,100 hours.

Clearance Officer: Garrick Shear, (202) 535-4297, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf, (202) 395-6880, Office of Management and Budget, Room 3001, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

Sunshine Act Meetings

Federal Register
Vol. 53, No. 233
Monday, December 5, 1988

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FARM CREDIT ADMINISTRATION

Regular Meeting

AGENCY: Farm Credit Administration.

SUMMARY: Notice is hereby given, pursuant to the Government in the Sunshine Act (5 U.S.C. 552b(e)(3)), of the forthcoming regular meeting of the Farm Credit Administration Board (Board). The regular meeting of the Board is scheduled for December 6, 1988.

DATE AND TIME: The meeting is scheduled to be held at the offices of the Farm Credit Administration in McLean, Virginia, on December 6, 1988, from 10:00 a.m. until such time as the Board may conclude its business.

FOR FURTHER INFORMATION CONTACT: David A. Hill, Secretary to the Farm Credit Administration Board, 1501 Farm Credit Drive, McLean, Virginia 22102-5090, (703) 883-4003.

ADDRESS: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102-5090.

SUPPLEMENTARY INFORMATION: Parts of this meeting of the Board will be open to the public (limited space available), and parts of this meeting will be closed to the public. The matters to be considered at the meeting are:

Open Session

1. Summary Prior Approvals;
2. Farm Credit System Building Association 1989 Budget;
3. Policy on Transfer of Capital Under Section 433 Reassignments;
4. Final Regulations Regarding Farm Credit System Mergers and Consolidations, 12 CFR Parts 611, 612, 618, and 620;

Closed Session [1]

5. Examination and Enforcement Matters; and
6. Jackson FLB/FLBA, in Receivership.

Dated: November 30, 1988.

David A. Hill,

Secretary, Farm Credit Administration Board.

BILLING CODE 6705-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 3:07 p.m. on Tuesday, November 29, 1988, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider matters relating to the following matters:

Application of New Baton Rouge Bank & Trust Company, Baton Rouge, Louisiana, a proposed new bank in organization, for consent to merge, under its charter and with the title "Baton Rouge Bank & Trust Company," with Baton Rouge Bank & Trust Company, Baton Rouge, Louisiana, and for consent to establish the five branches of Baton Rouge Bank & Trust Company as branches of the resultant bank.

Application of Peninsula Bank, Princess Anne, Maryland, an insured State nonmember bank, for consent to merge, under its charter and title, with Eastern Shore National Bank, Pocomoke City, Maryland, and for consent to establish the five offices of Eastern Shore National Bank as branches of the resultant bank.

The possible closing of certain insured banks.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director Robert L. Clarke (Comptroller of the Currency), concurred in by Chairman L. William Seidman, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interst did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: November 30, 1988.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

[CGD 88-100a]

RIN 2115-AC35

Noxious Liquid Substances Lists

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to amend its Noxious Liquid Substances (NLSs) regulations to include substances recently authorized for carriage by the Coast Guard or added to the International Maritime Organization's Chemical Codes and by making minor editorial changes and corrections. This action would update the current lists of oil-like and non-oil-like NLSs allowed for carriage.

DATE: Comments must be received on or before January 19, 1989.

ADDRESSES: Comments may be mailed to Commandant (G-LRA-2) (CGD 88-100a), U.S. Coast Guard, Washington, DC 20593-0001. Comments received may be inspected or copied at the Regulatory Administrative Branch, Room 2110, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001 between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267-1477.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis G. Payne, Hazardous Materials Branch, (202) 267-1577.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each letter should include the name and address of the person submitting the comments, reference and docket number (CGD 88-100a) and the specific section of the proposal to which each comment applies, and give the reasons for each comment. If acknowledgment of receipt of comments is desired, a stamped, self-addressed postcard or envelope should be enclosed.

All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. The proposal may be changed in view of the comments received. No public hearing is planned, but one may be held at a time and place to be set in a later notice in the **Federal Register** if requested in writing and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The principal persons involved in drafting this document are Mr. Curtis G. Payne, Project Manager, and Mr. Stephen H. Barber, Project Counsel, Office of Chief Counsel.

Discussion of Amendments

The Coast Guard is proposing to revise its lists of Category D Noxious Liquid Substances (NLSs) and Categories C and D Oil-like NLSs by including in these lists new entries proposed to be added to Table 30.25-1 of 46 CFR Part 30 and Table 2 of 46 CFR Part 153 by a separate rulemaking appearing elsewhere in this edition of the **Federal Register** (Coast Guard Docket CGD 88-100).

(a) *Section 151.47.* A number of new chemical cargoes would be added to the list in § 151.47. These include the following Category D Noxious Liquid Substances (NLSs), known as Pollution Category (Pol. Cat.) D cargoes, in Title 46:

(1) Cargoes recently authorized in Coast Guard regulations for Subchapter D, 46 CFR Part 30, and Table 2 of 46 CFR Part 153.

(2) Cargoes currently included in Chapter 18 of the International Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk (the "IBC" Code) and Chapter VII of the Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk (the "BCH" Code) but not yet in Coast Guard regulations.

(3) Cargoes currently included in the report of the IMO Evaluation of Hazards Working Group (BCH), BCH 18/16, July 19, 1988.

Several current commodity names would be modified or corrected to conform with the International Maritime Organization (IMO) name or to correct typographical errors.

Five entries would be deleted. "Calcium chloride solution", "Ethylene glycol butyl ether", "Latex", and "Triisopropanolamine" are NLS Category "III". "Coconut oil, fatty acid methyl ester" is NLS Category C.

New entries to § 151.47 are indicated with an asterisk and changes to existing entries are in bold face.

2. *Section 151.49.* "Decene", an NLS Category B, and "Dodecyl benzene", an NLS Category "III", would be deleted from paragraph (a). One entry, "n-Parafins (C_{10} to C_{20})" (sic), in paragraph (b) would be deleted. This entry has been reevaluated by IMO for its pollution hazard and been reassigned to Appendix III of Annex II to the International Convention for the Prevention of Pollution from Ships 1973 (MARPOL 73/78) as a liquid substance that has been determined to be other than an A, B, C, or D NLS.

Several current commodity names in § 151.49 (a) and (b) would be modified or corrected to conform with the IMO name or to correct typographical errors.

E.O. 12291 and DOT Regulatory Policies and Procedures

These proposed regulations are considered to be non-major under Executive Order 12291 and nonsignificant under the Department of Transportation (DOT) regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal has been found to be so minimal that further evaluation is unnecessary. This rulemaking is administrative in nature and merely would update chemical lists by adding substances recently authorized by the Coast Guard or added to the IMO Chemical Codes and by making non-substantive corrections.

Regulatory Flexibility Act

Because the impact of this final rule is expected to be minimal, the Coast Guard certifies under section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this final rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This rulemaking contains no information collection or record keeping requirements.

Federalism Implications

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the proposed rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment

The Coast Guard has considered the environmental impact of the regulations and concluded that, under section 2.B.2. of Commandant Instruction M16475.1B, the proposed regulations are categorically excluded from further environmental documentation. This rulemaking is an administrative update of lists of chemicals already approved or soon to be approved under Coast Guard regulations or international law. A Categorical Exclusion Determination Statement has been prepared and is included in the Regulatory docket.

List of Subjects in 33 CFR Part 151

Oil pollution, Reporting and recordkeeping requirements.

For the reasons set out in the preamble, 33 CFR Part 151 is proposed to be amended as follows:

PART 151—OIL AND NOXIOUS LIQUID SUBSTANCE REGULATIONS

1. The authority citation for Part 151 is revised to read as follows:

Authority: 33 U.S.C. 1321(j)(1)(C), 1902(c) and 1903(b); E.O.11735; 49 CFR 1.46.

2. In § 151.47, by revising the list to read as follows:

§ 151.47 Category D NLSs other than oil-like Category D NLSs that may be carried under this part.

* * * * *

*Acetophenone
*Acrylonitrile-Styrene copolymer dispersion in Polyether polyol
*Ammonium nitrate solution (45% or less)
*Ammonium nitrate, Urea solution (2% or less NH_3)
*Ammonium phosphate, Urea solution
Ammonium sulfate solution **(20% OR LESS)**
Amyl alcohol **(ISO-,** n-, sec-, primary)
*Brake fluid base mixtures
*Butene oligomer
BUTYL ACETATE (SEC-)
Butylene glycol
ISO-BUTYL FORMATE
*n-Butyl formate
BUTYROLACTONE (GAMMA)
Calcium alkyl salicylate
*Calcium hydroxide slurry
Caprolactam **SOLUTIONS**
*Choline chloride solutions
*Decahydronaphthalene
*Decane
*Decyl benzene (n-)
Diacetone alcohol
*Dialkyl(C10 - C14) benzenes
*Dialkyl(C7 - C13) phthalates
Diethylene glycol butyl ether acetate
*Diethylene glycol dibutyl ether
Diethylene glycol ethyl ether acetate
Diethylene glycol methyl ether acetate
*Diethylene glycol phenyl ether
*Diethylene glycol phthalate
Di-(**2**-ethylhexyl)adipate
Di-(**2**-ethylhexyl)phthalate
*1,4-Dihydro-9,10-dihydroxy anthracene, disodium salt solution
Diisobutyl ketone
Diisodecyl phthalate
*Diisononyl adipate
*Diisononyl phthalate
*Diisopropyl naphthalene
*2,2-Dimethylpropane-1,3-diol
Dinonyl phthalate
*Dipropylene glycol dibenzoate
Dipropylene glycol methyl ether
*Ditridecyl phthalate
Diundecyl phthalate
2-Ethoxyethanol
*Ethoxy triglycol *(crude)*
*Ethyl acetate
Ethyl acetoacetate
*Ethyl butanol
*Ethyl cyclohexane
Ethylenediamine tetraacetic acid, tetrasodium salt solution
Ethylene glycol
Ethylene glycol acetate
Ethylene glycol butyl ether acetate
*Ethylene glycol dibutyl ether
*Ethylene glycol ethyl ether
*Ethylene glycol isopropyl ether
*Ethylene glycol methyl butyl ether
Ethylene glycol methyl ether
Ethylene glycol methyl ether acetate
Ethylene glycol phenyl ether
*Ethylene glycol phenyl ether, Diethylene glycol phenyl ether mixture
2-Ethylhexanoic acid
*Ethyl propionate
*Ferric hydroxyethylethylene diamine triacetic acid, trisodium salt solution
*Fish solubles
Formamide
*Glyoxal solution (40% or less)
*Heptanoic acid
*Hexamethylenediamine adipate
*Hexamethylenetetramine solutions
*Hexanoic acid
1-Hexanol
N-(Hydroxyethyl)ethylenediamine triacetic acid, trisodium salt solution
Isophorone
Lactic acid
3-Methoxybutyl acetate
*Methyl acetoacetate
*Methyl butenol
*Methyl butyl ketone
*Methyl butynol
Methyl isobutyl ketone
Methyl tert-butyl ether
*Naphthalene sulfonic acid-formaldehyde copolymer, sodium salt solution
*Nonane
*Nonanoic acid (all isomers)
*Nonanoic, Tridecanoic acid mixture
*Nonyl methacrylate
*Noxious Liquid Substance, (17) n.o.s.
*Octadecenoamide solution
*Octane
*Octanoic acid
*Octyl acetate
*Oil, edible:
Babassu
Beechnut
Castor
Cocoa butter
Coconut
Cod liver
Corn
Cottonseed
Fish
Groundnut
Hazelnut
Nutmeg butter
Olive
Palm
Palm nut
Peanut
Poppy
Raisin seed
Rapeseed
Rice bran
Safflower
Salad
Sesame
Soya bean
Sunflower
Tucum
Vegetable
Walnut
*Oil, misc:
Animal, n.o.s.
Coconut oil, fatty acid methyl ester
Coconut oil, esterified
Lanolin
Linseed
Neatsfoot
Oiticica
Palm oil, fatty acid methyl ester
Palm oil, methyl ester
Perilla
Pilchard
Sperm
Tung
Whale
Oleic acid
*Palm stearin
*Pentaethylenehexamine
*Pentane (iso-)
*Pentanoic acid
*Polyalkylene glycols, Polyalkylene glycol monoalkyl ethers mixtures
*Polyethylene glycol monoalkyl ether
*Polypropylene glycols
*Potassium oleate
PROPYL ACETATE (N-)
*iso-Propylcyclohexane
*Propylene glycol monoalkyl ether
*Propylene glycol ethyl ether
*Propylene glycol methyl ether
*Sodium acetate solution
*Sodium benzoate solution
*Sodium carbonate solutions
*Sodium silicate solution
*Tallow
*Tallow fatty acid
*Tetrasodium salt of Ethylenediaminetetraacetic acid solution
*Triethylene glycol ethyl ether
*Triethylene glycol methyl ether
*Triethyl phosphate
*Trimethylol propane polyethoxylate
*Tripropylene glycol methyl ether
*Trisodium salt of N-(Hydroxyethyl)-ethylenediamine triacetic acid solution
*Urea, Ammonium mono- and di-hydrogen phosphate, Potassium chloride solution
*Urea, Ammonium nitrate solution (2% or less NH_3)
Urea, Ammonium phosphate solution
*Waxes:
Candelilla
Carnauba

Notes

* denotes newly added products.
Entries in **BOLDFACE** are changes.

§ 151.49 [Amended]

3. In § 151.49, paragraph (a), by removing the word "P-Cymene" and adding, in its place, the word "p-Cymene", by removing the words "Decene" and "Dodecyl benzene", by removing the words "Diethyl Benzene" and adding, in their place, the words "Diethyl benzene", by removing the words "Pentene, all isomers" and adding, in their place, the words "Pentene (all isomers)", by removing the word "Phenylxylylethane" and adding, in its place, the words "1-Phenyl-1-xylyl ethane", and by removing the words

"Tetrahydro naphthalene" and adding, in their place, the word "Tetrahydronaphthalene" and, in paragraph (b), by removing the words "Alkylbenzene (C_9 to C_{17} straight or branched chain)" and adding, in their place, the words "Alkyl(C_9–C_{17}) benzenes", by removing the word "Dodecane" and adding, in its place, the word "n-Dodecane", and by removing "n-Parafins (C_{10} to C_{20})".

Dated: November 4, 1988.

M. J. Schiro,

Captain, U.S. Coast Guard, Acting Chief, Office of Marine Safety, Security and Environmental Protection.

[FR Doc. 88-27694 Filed 1-2-88; 8:45 am]

BILLING CODE 4910-14-M

46 CFR Parts 30, 150, 151, and 153

[CGD 88-100]

RIN 2115-AC35

Bulk Hazardous Materials

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to amend its regulations on carriage of bulk hazardous materials by adding cargoes recently authorized for carriage by the Coast Guard or added to the International Maritime Organization's Chemical Codes and by making minor technical and editorial changes and corrections. This action would update the bulk hazardous materials tables and better inform persons shipping bulk hazardous material of that material's compatibility and special handling requirements.

DATE: Comments must be received on or before January 19, 1989.

ADDRESS: Comments may be mailed to Commandant (G-LRA-2) (CGD 88-100), U.S. Coast Guard, Washington DC 20593-0001. Comments received may be inspected or copied at the Regulatory Administrative Branch, Room 2110, U.S. Coast Guard Headquarters, 2100 Second Street, SW, Washington, DC 20593-0001 between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267-1477.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis G. Payne, Hazardous Materials Branch, (202) 267-1577.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each letter should include the name and address of the person submitting the comments, reference the docket number (CGD 88-100) and the specific section of the proposal to which each comment applies, and give the reasons for each comment. If acknowledgement of receipt of comments is desired, a stamped, self-addressed postcard or envelope should be enclosed.

All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. The proposal may be changed in view of the comments received. No public hearing is planned but one may be held at a time and place to be set in a later notice in the **Federal Register** if requested in writing and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The principal persons involved in drafting this document are Mr. Curtis G. Payne, Project Manager, and Mr. Stephen H. Barber, Project Counsel, Office of Chief Counsel.

Related Rulemaking

Elsewhere in this edition of the **Federal Register**, the Coast Guard is publishing proposed amendments to its noxious liquid substances lists in 33 CFR 151.47 and 151.49 (Coast Guard docket CGD 88-100a). When appropriate, changes made in the present rulemaking are also proposed for §§ 151.47 and 151.49.

Purpose and Objectives

This rulemaking is administrative in nature and is intended to update various Coast Guard hazardous materials tables in 46 CFR Parts 30, 150, 151, and 153 to include new chemicals and requirements authorized or soon to be authorized by Coast Guard regulations or international law. In general, the objectives of this rulemaking are as follows:

(a) Table 30.25-1 in Part 30, Table 151.05 in Part 151, and Tables 1 and 2 in Part 153 would be amended by adding:

(1) Cargoes recently authority for carriage by Coast Guard regulations;

(2) Cargoes included in International Maritime Organization (IMO) Chemical Codes ("International Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk" (IBC Code), Chapter 18, and "Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk" (BCH Code), Chapter VII, but not yet included in Coast Guard regulations; and

(3) Newly upgraded or downgraded pollution categories and special carriage requirements for certain chemicals appearing in the July 19, 1988 report of the IMO Evaluation of Hazards Working Group (BCH 18/16). The BCH 18/16 changes are expected to be approved and made effective by the IMO Maritime Environment Protection Committee during March 1989. The effective date of final regulations under the present rulemaking will be set for a date after the BCH 18/16 changes become effective.

Under BCH 18/16, the following chemicals will be upgraded relative to the current international requirements in "Proposed and Provisional Entries in the IBC and BCH Codes" (MSC)/Circ.481; July 28, 1987):

Alcohol ($C_{12}-C_{16}$) poly (3–11) ethoxylates
Alcohol (C_6-C_{17}) poly (3–6) ethoxylates
Alcohol (C_6-C_{17}) poly (7–12) ethoxylates
Ammonium thiosuflate solution (60% or less)
Butyl benzenes (all isomers)
Coconut oil fatty acid
Diglycidyl ether of Bisphenol F
Dimethyl adipate
Diphenyl
Diphenyl/Diphenyl ether mixtures
Ethyl phenol
Lactonitrile solution (80% or less)
Lauric acid
Octyl nitrates (all isomers)
Palm nut oil fatty acid
Sodium thiocyanate solutions (56% or less)

Under BCH 18/16, the following chemicals will be downgraded relative to current requirements:

Aluminum suflate solution
Aviation alkylates (C_8 paraffins and iso-paraffins BPT 95–120°C)
Cyclopentane
Methyl cyclohexane
Methyl ethyl ketone
Octyl decyl adipate
n-Paraffins ($C_{10}-C_{20}$)
n-Propyl alcohol
Tridecane
Triisopropanolamine

(b) The Compatibility of Cargoes tables in Part 150 would be amended to include chemicals added under this rulemaking to the hazardous materials tables in Parts 30, 151, and 153.

(c) New names for certain chemicals would be added as part of the Coast Guard's program to adopt IMO terminology and align usage throughout Coast Guard regulations (eg. "diphenyl oxide" would be changed to "diphenyl ether" wherever it appears throughout Parts 30, 150, and 153).

(d) Various changes and corrections would be made to align provisions

within Parts 30, 151, and 153 and to consolidate material.

Discussion of Specific Amendments

In addition to the changes discussed in the "Purpose and Objectives" section of this preamble, the following specific amendments are proposed:

(a) *Table 30.25–1.* A number of new chemical cargoes (indicated by an asterisk) would be added to Table 30.25–1. Several current cargo names (printed in boldface) would be changed to conform with the IMO terminology or to correct typographical errors. The "Alcohols (mixed)" entry would be deleted because this cargo is no longer produced or shipped by the manufacturer. The "Coal tar" entry listed under "Oils" would be listed separately. "Dodecane", "Dodecanol", "Dodecene", and "Dodecylbenzene" entries, which were inadvertently omitted in the March 12, 1987 version of Table 30.25–1 (52 FR 7774), would be added. "Aromatic (10% or less Benzene)" under the "Naphtha" heading would be revised to read "Aromatic (less than 10% Benzene)." Aromatic naphthas containing 10% or more benzene would use the "Benzene hydrocarbon mixtures" entry in Table 151.05 or Table 1 of Part 153. The "Petrolatum" entry, previously considered by the Coast Guard to be an "oil" under Annex I of the International Convention for the Prevention of Pollution from Ships 1973 (MARPOL 73/78), has been evaluated by the IMO and assigned to Appendix III of Annex II to MARPOL 73/78. This assignment to Appendix III would be reflected in Table 30.25–1.

(b) *Part 150, Tables I and II and Appendix I.* New cargoes added by this rulemaking to Table 30.25–1, Table 151.05, and Tables 1 and 2 of Part 153, along with their CHRIS Codes, would be added to Part 150. The CHRIS Code of several entries would be adjusted to reflect a new or changed CHRIS Code, several current cargo names modified or corrected, and obsolete entries deleted. "Ferric chloride solution", originally assigned to Group 43 (Miscellaneous Water Solutions), would be reassigned to Group 1 (Non-oxidizing Mineral Acids). This proposal results from discussions with the manufacturer during which it was concluded the Group 1 was the more appropriate Compatibility Group, considering the possible hazardous reaction with caustic materials.

New entries and changes to Table I and Appendix I are in boldface type; changes to Table II are indicated by bullets (●).

(c) *Table 151.01–10(b).* Table 151.01–10(b) (Cargoes Regulated by Subchapter O) would be removed and references in Part 151 to this table replaced with references to Table 151.05. This change would eliminate the administrative problems of ensuring that both tables are identical. This change would not affect the requirements applying to these cargoes.

(d) *Table 151.05.* New entries to Table 151.05 are indicated by an asterisk and changes to previous entries are in boldface. The special requirements for several cargoes recently authorized for carriage by the Coast Guard would be revised to bring the requirements for tank barges in Part 151 in line with the safety requirements for tankships in Part 153. In addition, several current cargo names would be modified or corrected and the table correctly alphabetized.

Several new entries in the "Special requirements" column would be added, two entries modified, and two obsolete entries deleted, as follows:

(1) A new § 151.50–73, "Chemical protective clothing", would be added to consolidate the numerous protective clothing sections listed throughout Part 151 for specific cargoes appearing in Table 151.05. In each case, the "Special requirements" column of the table would be changed to reference § 151.50–73.

Several cargoes which do not reference a protective clothing section would reference § 151.50–73 in the "Special requirements" column. This change would be made to align the clothing requirements in Part 151 with those in Part 153.

(2) Several cargoes which do not reference § 151.50–81, "Special operating requirements for heat sensitive cargoes", would reference that section in the "Special requirements" column of Table 151.05. This change would align Part 151 with Part 153.

(3) A new § 151.50–70, entitled "Cargoes requiring inhibition or stabilization", would be added to allow the word "inhibited" to be deleted from the "Cargo identification/Name" column of Table 151.05 and replaced by a reference to § 151.50–70 in the "Special requirements" column. This change would not affect the actual requirement, only the way it would be referenced in the table.

Several entries not referencing "inhibited" or "stabilized" would be subject to § 151.50–70 to align Part 151 with Part 153.

(4) New §§ 151.58–1, "Prohibited materials", and 151.58–1, "Required materials", would be added for reference in the "Special requirements" column of Table 151.05. These two "materials of construction" sections would be added to reflect the simpler designation method currently used by the tankship regulations in Part 153. This would allow simpler comparisons and translations of requirements between Parts 151 and 153. All presently listed cargoes would retain their same materials of construction requirements. The new materials of construction requirements would not affect the presently listed cargoes. However, an equivalency requirement would be listed following each of the current materials of construction requirements in § 151.55–1, thus allowing comparisons between old and new sections. New entries to Table 151.05 would reference only the new requirements, where assigned.

(5) In the special requirements section for vinyl chloride (§ 151.50–34), references to obsolete "29 CFR 1910.93q(g)" would be corrected to read "29 CFR 1910.1017".

Corrections of references to incorrect or obsolete requirements of Subchapter J—Electrical Engineering would be made to the Table 151.05, § 151.05–1(p), and § 151.50–42(e).

In the "Special requirements" column, the designation "151" would be deleted because all references are to Part 151. Section 151.05–1(o) would be revised by adding a statement explaining this deletion.

Seven cargoes would be deleted from Table 151.05. Three are no longer produced by the original manufacturers ("Chemical wastes (Mixture of chlorinated hydrocarbons and caustic materials"); "Industrial wastes, containing dimethyldisulfide, methyl mercaptan, and methomyl"; and "Polyvinylbenzyltrimethyl ammonium chloride solution"). Triisopropanolamine would be moved to Table 30.25–1 by this rulemaking. The remaining three entries ("Hydrofluoric acid", "Hydrogen chloride", and "Hydrogen fluoride") are not authorized cargoes and, therefore, do not belong in Table 151.05.

The "Cargo transfer/Piping class" column for the "Ethylene diamine" entry would be corrected to read "II" instead of "I". This would correct an error in the table and would be a reduction in requirements.

The word "inhibited" would be deleted from the "Ethylidene norbornene" entry because inhibition is required for product quality control, not for the safe transportation of this cargo.

The "Environmental control/Cargo handling space" column for the "Vinylacetate" entry would be corrected to read "Vent F" instead of "Vent", as now shown.

The items listed under "Footnotes" at the end of Table 151.05 would be deleted. Footnote number 1 is listed as "reserved". Footnote number 2 pertains to Ethylene oxide and was applied in the "Temperature control install." column until all reference to Footnote 2 were removed from that column in 1982. Footnote number 3 applied to "Hydrofluoric acid", "Hydrogen chloride", and "Hydrogen fluoride"—three entries already discussed as proposed for deletion by this rulemaking. Footnote number 4 would be replaced by a "Special requirement" entry referencing new § 151.25–1(e), concerning dry gas or vapor containment in cargo tanks.

The list of Pollution Category D NLS cargoes in § 151.12–5 would be revised by the addition of a number of new entries and the deletion of two incorrect entries.

(e) *Part 153, Table 1.* A number of new cargoes which are included in the IMO Chemical Codes but not in the Coast Guard regulations would be added. New entries to Table 1 are indicated with an asterisk and changes to previous entries are in boldface.

(f) *Part 153, Table 2.* A number of new cargoes would be added to Table 2, the "unregulated" cargo list. These include cargoes recently authorized by the Coast Guard, cargoes currently included in the IMO Chemical Codes but not included in Coast Guard regulations, and cargoes to be included in the IMO Chemical Codes.

New entries to Table 2 are indicated with an asterisk and changes to existing entries are in bold face.

E.O. 12291 and DOT Regulatory Policies and Procedures

These proposed regulations are considered to be non-major under Executive Order 12291 and nonsignificant under the Department of Transportation (DOT) regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal has been found to be so minimal that further evaluation is unnecessary. This rulemaking is administrative in nature and would merely update chemical tables by adding cargoes recently authorized by the Coast Guard or added to the IMO Chemical Codes and by making other non-substantive editorial changes and corrections.

Regulatory Flexibility Act

Because the impact of this proposal is expected to be minimal, the Coast Guard certifies under section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this proposal will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This proposed rulemaking contains no information collection or recordkeeping requirements.

Federalism Implications

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the proposed rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment

The Coast Guard has considered the environmental impact of the proposed regulations and concluded that, under section 2.B.2 of Commandant Instruction M16475.1B, the proposed regulations are categorically excluded from further environmental documentation. This rulemaking is an administrative update of tables listing chemicals already approved or soon to be approved under Coast Guard regulation or international law. A Categorical Exclusion Determination Statement has been prepared and is included in the regulatory docket.

List of Subjects

46 CFR Part 30

Administrative practice and procedures, Barges, Foreign relations, Hazardous materials transportation, Penalties, Tank vessels.

46 CFR Part 150

Hazardous materials transportation, Marine safety.

46 CFR Part 151

Barges, Flammable materials, Hazardous materials transportation, Marine safety, Tank vessels.

46 CFR Part 153

Barges, Hazardous materials transportation, Marine safety, Tank vessels.

For the reasons set out in the preamble, 46 CFR Parts 30, 150, 151, and 153 are proposed to be amended as follows:

PART 30—GENERAL PROVISIONS

1. The authority citation for Part 30 is revised to read as follows:

Authority: 46 U.S.C. 3507, 3703; 49 U.S.C. 1804; 49 CFR 1.46.

§ 30.10–35 [Amended]

2. In § 30.10–35, by removing "20591" and adding, in its place, "20593–0001".

3. In § 30.25–1, by revising Table 30.25–1 to read as follows:

§ 30.25–1 Cargoes carried in vessels certified under the rules of this subchapter.

Ethoxy triglycol (*crude*)	D
Ethyl acetate	D
*Ethyl acetoacetate	D
Ethyl alcohol	III
Ethyl amyl ketone	C
Ethyl benzene	C
Ethyl butanol	@D
*Ethyl butyrate	C
Ethyl cyclohexane	D
Ethylene	LFG
Ethylene carbonate	III
Ethylene glycol	D
*Ethylene glycol acetate	D
Ethylene glycol butyl ether	III
Ethylene glycol butyl ether acetate	D
*Ethylene glycol tert-butyl ether	III
Ethylene glycol diacetate	C
*Ethylene glycol dibutyl ether	[D]
Ethylene glycol ethyl ether, *see* **2-Ethoxyethanol**	D
Ethylene glycol ethyl ether acetate, *see* **2-Ethoxyethyl acetate**	C
Ethylene glycol isopropyl ether	D
Ethylene glycol methyl butyl ether	D
Ethylene glycol methyl ether	D
Ethylene glycol methyl ether acetate	D
Ethylene glycol phenyl ether	D
*Ethylene glycol phenyl ether, Diethylene glycol phenyl ether mixture	D
Ethylene-Propylene copolymer (*in liquid mixtures*)	[III]
*Ethyl-3-ethoxypropionate	[B]
Ethylhexaldehyde *see* Octyl aldehydes	@B
2-Ethylhexanoic acid	D
2-Ethylhexanol *see* **Octanol (all isomers)**	@C
Ethylhexoic acid *see* **2-Ethylhexanoic acid**	D
Ethyl hexyl phthalate	C
Ethyl hexyl tallate	#
*Ethyl propionate	D
Ethyl toluene	B
*Fatty acid (saturated, C13 and above)	III
Fatty acid amides	#
Formamide	D

TABLE 30.25-1—LIST OF FLAMMABLE AND COMBUSTIBLE BULK LIQUID CARGOES—Continued

Cargoes	Pollution Category
Furfuryl alcohol	C
Gas oil, cracked	I
Gasoline blending stocks:	
Alkylates	I
Reformates	I
Gasolines:	
Automotive (*containing not over 4.23 grams lead per gallon*)	I
Aviation (*containing not over 4.86 grams lead per gallon*)	I
Casinghead (*natural*)	I
Polymer	I
Straight run	I
Glycerine	III
Glycerol *see* **Glycerine**	III
*Glycerol polyalkoxylate	III
Glyceryl triacetate	III
Glycidyl ester of tertiary carboxylic acid *see* **Glycidyl ester of tridecyl acetic acid**	@B
*Glycidyl ester of tridecyl acetic acid	B
Glycidyl ester of versatic acid *see* **Glycidyl ester of tridecyl acetic acid**	@B
Glycol diacetate *see* **Ethylene glycol diacetate**	C
Glycols, Resins, & Solvents mixture	#
Glycol triacetate, *see* **Glyceryl triacetate**	III
Glyoxal **solution** (40% **or less**)	D
Grease	#
Heptadecane	@III
*Heptane (iso-)	C
Heptane **(n-)**	C
Heptanoic acid	D
Heptanol	C
Heptene	C
Herbicide (C15 -H22 -NO2 -Cl) *see* **Metolachlor**	@B
Hexaethylene glycol	@III
Hexamethylene glycol	III
*Hexamethylenetetramine solutions	D
*Hexane **(all isomers)**	C
*Hexanoic acid	D
1-Hexanol	D
Hexene **(all isomers)**	C
Hexyl acetate	B
Hexylene glycol	III
Hog grease, *see* **Lard**	@III
*2-Hydroxy-4-(methylthio)butanoic acid	[C]
*Hydroxy terminated polybutadiene *see* **Polybutadiene, hydroxyl terminated**	
Isophorone	D
Jet fuels:	
JP-1 (*kerosene*)	I
JP-3	I
JP-4	I
JP-5 (*kerosene, heavy*)	I
*JP-8	@I
Kerosene	I
Lactic acid	D
Lard	III
Latex, liquid synthetic *including:*	III
*Styrene-butadiene rubber latex	III
*Carboxylated styrene-butadiene copolymer	III
Magnesium nonyl phenol sulfide	#
Magnesium sulfonate	#
Maleic anhydride copolymer	#
2-Mercaptobenzothiazol (*in liquid mixtures*)	#
Methane	LFG

TABLE 30.25-1--LIST OF FLAMMABLE AND COMBUSTIBLE BULK LIQUID CARGOES—Continued

Cargoes	Pollution Category
*3-Methoxy-1-butanol	III
*3-Methoxybutyl acetate	D
*1-Methoxy-2-propyl acetate	#
Methoxy triglycol *see* **Triethylene glycol methyl ether**	@D
Methyl acetate	III
Methyl acetoacetate	D
Methyl alcohol	III
Methyl amyl acetate	C
Methyl amyl alcohol	C
Methyl amyl ketone	C
Methyl butanol *see the* **Amyl alcohols**	**D**
*Methyl butenol	D
*Methyl butyl ketone	D
*Methyl butynol	D
*Methyl butyrate	C
Methyl ethyl ketone	**III**
Methyl formal (*dimethyl formal*)	#
Methyl heptyl ketone	B
Methyl isobutyl carbinol *see* **Methyl amyl alcohol**	**C**
Methyl isobutyl ketone	D
*3-Methyl-3-methoxybutanol	III
*3-Methyl-3-methoxybutyl acetate	III
Methyl naphthalene	A
Methyl pentene	C
N-Methyl pyrrolidone	**B**
Methyl tert-butyl ether	D
*Metolachlor	@B
Mineral spirits	I
*Myrcene	[B]
Naphtha:	
*Aromatic (*having less than 10% Benzene*)	@I
Cracking fraction	@I
Heavy	@I
Paraffinic	@I
Petroleum	I
Solvent *see* **Coal tar naphtha solvent**	**B**
Stoddard Solvent	@I
Varnish makers' and painters' (75%)	@I
*Naphthalene sulfonic acid-formaldehyde copolymer, sodium salt solution	D
Naphthenic acid	A
Nonane **(all isomers)**	**C**
Nonanoic acid **(all isomers)**	D
Nonanoic, Tridecanoic acid mixture	@D
Nonene	B
Nonyl alcohol **(all isomers)**	[C]
*Nonyl methacrylate	[D]
Nonyl phenol	A
*Nonyl phenol **poly(4-12)**ethoxylates	B
Nonyl phenol sulfide (90% or less)	#
*Noxious liquid, n.o.s. (17) ("trade name," contains "principal components"), Category D (*if flammable or combustible*)	D
*Non-noxious liquid, n.o.s. (18) ("trade name," contains "principal components"), Appendix III (*if flammable or combustible*)	III
Octadecene, *see the Olefin or alpha-Olefin entries*	@III
Octadecenoamide solution (*Oleamide*)	[D]
Octane **(all isomers)**	**C**
*Octanoic acid	D
*Octanol (all isomers)	C
Octene	B
Octyl acetate	D
Octyl alcohol (iso-, n-) *see* **Octanol (all isomers)**	C

TABLE 30.25-1--LIST OF FLAMMABLE AND COMBUSTIBLE BULK LIQUID CARGOES—Continued

Cargoes	Pollution Category
*Octyl aldehydes	B
*Octyl decyl adipate	III
Octyl epoxytallate	#
Octyl phthalate *see* **Di-(2-ethylhexyl)phthalate**	@D
Oil, edible:	
Babassu	D
Beechnut	D
Castor	D
Cocoa butter	D
Coconut	D
Cod liver	D
Corn	D
Cottonseed	D
Fish	D
Grapeseed	#
Groundnut	D
Hazelnut	D
Lard	@III
Maize *see* **Corn oil**	**D**
Mustard seed	#
Nutmeg butter	D
Olive	D
Palm	D
*Palm nut	D
Peanut	D
Poppy	D
Raisin seed	D
Rapeseed	D
Rice bran	D
Safflower	D
Salad	D
Sesame	D

Cargoes	Pollution Category
Propyl acetate (n-)	D
Propyl alcohol (iso-)	III
Propyl alcohol (n-)	III
Propyl benzene (iso-) *see* Cumene	B
Propyl benzene (n-)	C
*Iso-Propylcyclohexane	D
Propylene	LFG
Propylene-butylene **copolymer**	III
*Propylene dimer	C
Propylene glycol	III
*Propylene glycol monoalkyl ether	D
Propylene glycol ethyl ether	D
Propylene glycol methyl ether	D
Propylene polymer (*in liquid mixtures*)	#
Propylene tetramer	**B**
Propylene trimer	B
Pseudocumene *see* **Trimethylbenzenes**	B
Rum, *see* **Alcoholic beverages, n.o.s.**	@III
Sodium acetate, Glycol, Water solutions	#
*Sodium acetate solution	[D]
*Sodium benzoate solution	[D]
Sodium sulfonate	#
Stearic acid	@III
Stearyl alcohol (*Octadecanol*)	III
Sulfolane	III
Tallow	D
Tallow alcohol, *see* **Alcohols (C13 and above)**	@III
Tallow fatty acid	D
Tallow nitrile	#
Tetradecanol	III
Tetradecene, *see the Olefin or alpha-Olefin entries*	III
Tetradecyl benzene	C
Tetraethylene glycol	III
Tetrahydronaphthalene	C
Tetrapropyl benzene *see* **Alkyl(C9-C17) benzenes**	@D
Toluene	C
Triarylphosphate	A
Tributyl phosphate	B
*Tricresyl phosphate (less than 1% ortho isomer)	A
Tridecane	III

TABLE 30.25-1--LIST OF FLAMMABLE AND COMBUSTIBLE BULK LIQUID CARGOES—Continued

Cargoes	Pollution Category
Tridecanoic acid	III
Tridecanol, *see* **Alcohols (C13 and above)**	III
Tridecene	III
Tridecyl benzene, *see* **Alkyl(C9-C17) benzenes**	D
Triethyl benzene	A
Triethylene glycol	III
*Triethylene glycol butyl ether	III
Triethylene glycol butyl ether mixture	#
Triethylene glycol di-(2-ethylbutyrate)	C
Triethylene glycol ether mixture	#
*Triethylene glycol ethyl ether	D
Triethylene glycol methyl ether	D
Triethyl phosphate	D
Triisooctyl trimellitate	#
*Triisopropanolamine	III
Trimethylbenzenes **(all isomers)**	B
*Trimethylol propane polyethoxylate	D
2,2,4-Trimethylpentanediol-1,3-diisobutyrate	#
2,2,4-Trimethyl-3-pentanol-1-isobutyrate	#
Tripropylene *see* **Propylene trimer**	@B
Tripropylene glycol	D
Tripropylene glycol methyl ether	D
Trixylenyl phosphate	A
Turpentine	B
Turpentine substitute (White spirit) *see* **White spirit (low (15-20%) aromatic)**	@B
Undecanol	B
Undecene	B
Undecylbenzene	C
Vinyl acetate-fumarate copolymer	#
Waxes:	[D]
Candelilla	@D
Carnauba	@D
Paraffin	III
Petroleum	#
White spirit *see* **White spirit (low (15-20%) aromatic)**	@B
*White spirit **(low (15-20%) aromatic)**	B
Wine	III
Wool grease	#
Xylenes (*ortho-, meta-, para-*)	C

TABLE 30.25-1--LIST OF FLAMMABLE AND COMBUSTIBLE BULK LIQUID CARGOES—Continued

Cargoes	Pollution Category
Zinc dialkyldithiophosphate	#

* denotes newly added products.
Entries in **boldface** are changes.

Explanation of Symbols: As used in this table the following stands for:

A, B, C, D – NLS Category of Annex II of MARPOL 73/78.

I – Considered an "oil" under Annex I of MARPOL 73/78.

III – Appendix III of Annex II (non-NLS cargoes) of MARPOL 73/78.

LFG – Liquefied flammable gas.

– No determination of NLS status. For shipping on an oceangoing vessel, see 46 CFR 153.900(c).

[ ] – A NLS category in brackets indicates that the product is provisionally categorized and that further data are necessary to complete the evaluation of its pollution hazards. Until the hazard evaluation is completed, the pollution category assigned is used.

@ – The NLS category has been assigned by the U.S. Coast Guard, in absence of one assigned by the IMO, based upon a GESAMP Hazard Profile or by analogy to a closely related product having one assigned.

Words in italics are not part of the the cargo name but may be used in addition to the cargo name.

When one entry references another entry by use of the word "*see*", and both names are in roman type, either name may be used as the cargo name (e.g., Diethyl ether *see* Ethyl ether). However, the referenced entry is preferred.

PART 150—COMPATIBILITY OF CARGOES

4. The authority citation for Part 150 continues to read as follows:

Authority: 46 U.S.C. 3703; 49 CFR 1.46, except § 150.160 which is issued under 46 U.S.C. 3306; 49 CFR 1.46.

5. In Part 150, by revising Table I, Table II, and Appendix I to read as follows:

TABLE I - ALPHABETICAL LIST OF CARGOES

[Entries in **boldface** are new additions or changes]

Chemical name	Group No.	CHRIS code	Related CHRIS codes
Acetaldehyde	19	AAD	
Acetic acid	[2] 4	AAC	
Acetic anhydride	11	ACA	
Acetone	[2] 18	ACT	
Acetone cyanohydrin	[1,2] 0	ACY	
Acetonitrile	37	ATN	
Acetophenone	18	ACP	
Acetyl tributyl citrate	34		
Acrolein	[2] 19	ARL	
Acrylamide solution	10	AAM	
Acrylic acid	[2] 4	ACR	
Acrylonitrile	[2] 15	ACN	
Acrylonitrile-Styrene copolymer dispersion in Polyether polyol	**20**	**ALE**	
Adiponitrile	37	ADN	
Alcohols (C13 and above)	**20**		**TDN/TTN/PDC**
Alcoholic beverages	**20**		
Alcohol polyethoxylates	**20**		**APK/APL**
Alcohol polyethoxylates, secondary	**20**		**AEA/AEB**

1,1,2-Trichloroethane	36	TCM	
Trichloroethylene	[2]36	TCL	
1,2,3-Trichloropropane	36	TCN	
1,1,2-Trichloro-1,2,2-trifluoroethane	36	TTF	
Tricresyl phosphate	34		TCO/TCP
Tridecane	34	**TRD**	**PFN**
Tridecanol	20	TDN	
Tridecene	30	TDC	
Tridecylbenzene	32	**TRB**	**AKB**
Triethanolamine	[2]8	TEA	
Triethylamine	7	TEN	
Triethyl benzene	32	TEB	
Triethylene glycol	40	TEG	
Triethylene glycol butyl ether	**40**		
Triethylene glycol butyl ether mixture	40		
Triethylene glycol di-(2-ethylbutyrate)	**34**	**TGD**	
Triethylene glycol ether mixture	40		
Triethylene glycol ethyl ether	**40**	**TGE**	
Triethylenetetramine	[2]7	TET	
Triethyl phosphate	34	**TPS**	
Triethyl phosphite	[2]34	TPI	
Triisobutylene	30	TIB	
Triisooctyl trimellitate	34		
Triisopropanolamine	8	TIP	
Triisopropanolamine salt of 2,4-Dichlorophenoxyacetic acid solution	43	**DTI**	
Trimethylacetic acid	4	TAA	
Trimethyl benzene	32	TME	TMB/TMD
Trimethylhexamethylene diamine (2,2,4- and 2,4,4-)	7	THA	

TABLE I - ALPHABETICAL LIST OF CARGOES—Continued

[Entries in **boldface** are new additions or changes]

Chemical name	Group No.	CHRIS code	Related CHRIS codes
Trimethylhexamethylene diisocyanate (2,2,4- and 2,4,4-)	12	THI	
Trimethylol propane polyethoxylate	**20**	**TRP**	
2,2,4-Trimethyl pentanediol-1,3-diisobutyrate	34		
2,2,4-Trimethyl-1,3-pentanediol-1-isobutyrate	34	TMP	
2,2,4-Trimethyl-3-pentanol-1-isobutyrate	34		
Trimethyl phosphite	[2] 34	TPP	
Tripropylene	30		
Tripropylene glycol	40	TGC	
Tripropylene glycol methyl ether	40	**TGM**	
Trisodium nitrilotriacetate	34		
Trixylenyl phosphate	34	TRP	
Turpentine	30	TPT	
Undecanoic acid	**4**	**UDA**	
Undecanol	20	UND	
Undecene	30	UDC	
Undecyl alcohol	20	UND	
Undecylbenzene	32	UDB	**AKB**
Urea, Ammonium mono- and di-hydrogen phosphate, Potassium chloride solution	**0**	**UPX**	
Urea, Ammonium nitrate solution (containing Ammonia)	6	UAS	
Urea, Ammonium nitrate solution (not containing Ammonia)	43	ANU	
Urea, Ammonium phosphate solution	**43**	**UAP**	
Valeraldehyde	19		IVA/VAL/VAK
Vanillin black liquor	5	VBL	
Vegetable protein solution	**43**		
Vinyl acetate	13	VAM	
Vinyl acetate-Fumarate copolymer	34		
Vinyl chloride	35	VCM	
Vinyl ethyl ether	13	VEE	
Vinylidene chloride	35	VCI	
Vinyl neodecanate	13	VND	
Vinyl toluene	13	VNT	
Waxes:			
Carnauba	34	WCA	
Paraffin	31	WPF	
White spirit (low (15-20%) aromatic)	33	WSL	WSP
Xylene	32	XLX	XLM/XLO/XLP
Xylenols	21	XYL	
Zinc bromide, Calcium bromide solution *see* Drilling brine (containing Zinc salts)	43	**DZB**	

[1] Because of very high reactivity or unusual conditions of carriage or potential compatibility problems, this product is not assigned to a specific group in the Compatibility Chart. For additional compatibility information, contact Commandant (G-MTH), U.S. Coast Guard, 2100 Second Street, SW., Washington, D.C. 20593-0001. Telephone (202) 267-1577.

[2] See Appendix I - Exceptions to the Chart.

Table II - Grouping of Cargoes

([•] New addition to 46 CFR Part 150)

0. Unassigned Cargoes

Acetone cyanohydrin [1,2]
Alkyl benzene sulfonic acid [1,2]
•Aluminium chloride, Hydrochloric acid solution [1]
•Ammonium hydrogen phosphate solution [1]
Ammonium nitrate solution [1]
•Ammonium thiocyanate, Ammonium thiosulfate solution [1]
Benzenesulfonyl chloride [1,2]
gamma-Butyrolactone [1,2]
Chlorine [1]
Chlorosulfonic acid [1]
2,4-Dichlorophenoxyacetic acid, Dimethylamine salt solution [1,2]
Dimethylamine salt of 2,4-Dichlorophenoxyacetic acid solution [1,2]
Diphenylol propane-Epichlorohydrin resins [1]
•Dodecylbenzenesulfonic acid [1,2]
•Ethyl chlorothioformate [1,2]
Ethylene oxide [1]
2-Hydroxyethyl acrylate [1,2]
Magnesium chloride solution [1,2]
•Molasses residue [1]
Motor fuel antiknock compounds containing Lead alkyls [1]
•Naphthalene sulfonic acid-formaldehyde copolymer, sodium salt solution [1]
Nitrating acid [1]
Nitric acid (greater than 70%) [1]
o-Nitrophenol [1,2]
•Noxious Liquid Substance, n.o.s. (NLS's) [1]
Oleum [1,2]
Phosphorus [1]
Sodium chlorate solution [1,2]
Sodium dichromate solution [1,2]
•Sodium hydrogen sulfide, Sodium carbonate solution [1,2]
Sodium sulfide, Hydrosulfide solution [1,2]
Sodium thiocyanate solution [1,2]
Sulfur [1]
•Urea, Ammonium mono- and di-hydrogen phosphate, Potassium chloride solution

1. Non-Oxidizing Mineral Acids

Di-(2-ethylhexyl)phosphoric acid
•Ferric chloride solution
Hydrochloric acid
Hydrochloric acid, spent
Hydrofluoric acid
Hydrofluorosilicic acid
Phosphoric acid

2. Sulfuric Acids

Sulfuric acid [2]
Sulfuric acid, spent
Titanium tetrachloride

3. Nitric Acid

•Ferric nitrate, Nitric acid solution
Nitric acid (70% or less)

4. Organic Acids

Acetic acid [2]
Acrylic acid [1]
Butyric acid
Cashew nut shell oil (untreated)
Chloroacetic acid solution
Chloropropionic acid

Cyclohexane oxidation product acid water
•Decanoic acid
2,2-Dichloropropionic acid
2,2-Dimethyloctanoic acid
2-Ethylhexanoic acid
•Fatty acids (saturated, C13 and above)
Formic acid [3]
n-Heptanoic acid
•Hexanoic acid
•2-Hydroxy-4-(methylthio)butanoic acid
•Lauric acid
Methacrylic acid
Naphthenic acid
Neodecanoic acid
Nonanoic acid
•Nonanoic acid
•Octanoic acid
Oils:
Oil, misc:
•Palm, fatty acid
Oleic acid
•Palm nut oil, fatty acid
Propionic acid
Stearic acid
Trimethylacetic acid
•Undecanoic acid

5. Caustics

Ammonium sulfide solution
Calcium hypochlorite solution
•Calcium hypochlorite solutions
Caustic potash solution [3]
Caustic soda solution [3]
Cresylate spent caustic
•Cresylic acid, sodium salt solution
Kraft black liquor
•Kraft pulping liquors
Mercaptobenzothiazol, sodium salt solution
Potassium hydroxide solution [3]
•Sodium aluminate solution
Sodium borohydride, Sodium hydroxide solution
Sodium carbonate solutions
Sodium cyanide solution
Sodium hydrosulfide solution [3]
Sodium hydrosulfide, Ammonium sulfide solution [3]
Sodium hydroxide solution [3]
Sodium hypochlorite solution
Sodium 2-mercaptobenzothiazol solution
•Sodium nitrite solution
Vanillin black liquor

6. Ammonia

Ammonia, anhydrous
Ammonium hydroxide (28% or less Ammonia)
Ammonium nitrate, Urea solution (containing Ammonia)
Urea, Ammonium nitrate solution (containing Ammonia)

7. Aliphatic Amines

N-Aminoethylpiperazine
Butylamine
Cyclohexylamine
Dibutylamine
Diethylamine [3]
Diethylenetriamine
Diisobutylamine
Diisopropylamine
Dimethylamine
Dimethylamine solution
N,N-Dimethylcyclohexylamine
Di-n-propylamine
Dodecylamine, Tetradecylamine mixture [3]
Ethylamine [3]
Ethylamine solution
N-Ethyl-n-butylamine
N-Ethyl cyclohexylamine
Ethylenediamine [3]
2-Ethyl hexylamine
Hexamethylenediamine solution
Hexamethylenetetramine
•Hexamethylenetetramine solutions
Hexamethylenimine
Isophorone diamine
•Metam sodium solution
Methylamine
Methylamine solutions
Morpholine [3]
Pentaethylenehexamine, Tetraethylenepentamine mixture
Polyethylene polyamines [3]
Propylamine
Tetraethylenepentamine
Triethylamine
Triethylenetetramine [3]
Trimethylhexamethylene diamine (2,2,4- and 2,4,4-)

8. Alkanolamines

2-(2-Aminoethoxy)ethanol
•Aminoethyldiethanolamine, Aminoethylethanolamine solution
Aminoethylethanolamine
2-Amino-2-methyl-1-propanol
Diethanolamine
Diethylaminoethanol
Diethylethanolamine
Diisopropanolamine
Dimethylethanolamine
Ethanolamine
Propanolamine
Triethanolamine [3]
Triisopropanolamine

9. Aromatic Amines

Aniline
4-Chloro-2-methylphenoxyacetic acid, Dimethylamine salt solution
•2,6-Diethylaniline
Dimethylamine salt of 4-Chloro-2-methylphenoxyacetic acid solution
•2,6-Dimethylaniline
2-Ethyl-6-methyl-N-(1'-methyl-2-methoxyethyl)aniline
4,4'-Methylene dianiline (43% or less), Polymethylene polyphenylamine, o-Dichlorobenzene mixtures
2-Methyl-6-ethyl aniline
2-Methyl-5-ethyl pyridine
Methyl pyridine
•3-Methylpyridine
N-Methyl pyrrolidone
Pyridine
Pyridine bases
Toluenediamine
p-Toluidine

10. Amides

Acrylamide solution
N,N-Dimethylacetamide
•N,N-Dimethylacetamide solution
Dimethylformamide
Formamide
Octadecenoamide

11. Organic Anhydrides

Acetic anhydride
Maleic anhydride
Phthalic anhydride
Propionic anhydride

12. Isocyanates

Diphenylmethane diisocyanate
Isophorone diisocyanate
Polymethylene polyphenyl isocyanate
Toluene diisocyanate
Trimethylhexamethylene diisocyanate (2,2,4- and 2,4,4-)

13. Vinyl Acetate

Vinyl acetate
Vinyl ethyl ether
Vinyl neodecanate
Vinyl toluene

14. Acrylates

Butyl acrylate
Butyl methacrylate
Butyl methacrylate, Decyl methacrylate, Cetyl-Eicosyl methacrylate mixture
Cetyl-Eicosyl methacrylate
Decyl acrylate
Dodecyl methacrylate
Dodecyl-Pentadecyl methacrylate
Ethyl acrylate
2-Ethylhexyl acrylate
Ethyl methacrylate
Methyl acrylate
Methyl methacrylate
•Nonyl methacrylate
•Polyalkyl(C18 - C22) acrylate in Xylene

15. Substituted Allyls

Acrylonitrile [3]
Allyl alcohol [3]
Allyl chloride
1,3-Dichloropropene
Dichloropropene, Dichloropropane mixtures
Methacrylonitrile

16. Alkylene Oxides

Butylene oxide
Ethylene oxide, Propylene oxide mixtures
Propylene oxide

17. Epichlorohydrin

Chlorohydrins
Epichlorohydrin

18. Ketones

Acetone [3]
Acetophenone
Amyl methyl ketone
Butyl heptyl ketone
Camphor oil
Cyclohexanone
Cyclohexanone, Cyclohexanol mixtures [2]
Diisobutyl ketone
•Ethyl amyl ketone
Epoxy resin
Ketone residue
Isophorone [3]
Mesityl oxide [3]
Methyl amyl ketone
Methyl butyl ketone
•Methyl butyl ketone
Methyl diethanolamine
Methyl ethyl ketone [3]
Methyl heptyl ketone
Methyl isoamyl ketone
Methyl isobutyl ketone [3]

19. Aldehydes

Acetaldehyde
Acrolein [3]
Butyraldehyde

Crotonaldehyde [2]
Decaldehyde
Ethylhexaldehyde
2-Ethyl-3-propylacrolein [2]
Formaldehyde, Methanol mixtures [2]
Formaldehyde solution [2]
Furfural
Glutaraldehyde solution
Glyoxal solutions
3-Methyl butyraldehyde
Methylolureas
Octyl aldehyde
Paraldehyde
Pentyl aldehyde
Propionaldehyde
Salicylaldehyde
Valeraldehyde

20. Alcohols, Glycols

•Acrylonitrile-Styrene copolymer dispersion in Polyether polyol
•Alcoholic beverages
•Alcohol polyethoxylates
•Alcohol polyethoxylates, secondary
•Alcohols (C13 and above)
Amyl alcohol
Behenyl alcohol
•Brake fluid base mixtures
Butyl alcohol [2]
Butylene glycol [2]
Choline chloride solutions
Cyclohexanol
Decyl alcohol [2]
Diacetone alcohol [2]
Diisobutyl carbinol
2,2-Dimethylpropane-1,3-diol
Dodecanol
Dodecyl alcohol
Ethoxylated alcohols, C11-C15
•2-Ethoxyethanol
Ethyl alcohol [2]
Ethyl butanol
Ethylene chlorohydrin
Ethylene cyanohydrin
Ethylene glycol [2]
2-Ethylhexanol
Fatty alcohols
Furfuryl alcohol [2]
Glycerine [2]
Heptanol
Hexanol
Hexylene glycol
•3-Methoxy-1-butanol
Methyl alcohol [2]
Methyl amyl alcohol
•Methyl butenol
•Methylbutynol
2-Methyl-2-hydroxy-3-butyne
Methyl isobutyl carbinol
•3-Methyl-3-methoxybutanol
Molasses
Nonyl alcohol [2]
Octyl alcohol [2]
Pentadecanol
•Polyalkylene oxide polyol
Polybutadiene, hydroxyl terminated
•Polyglycerol
Propyl alcohol [2]
Propylene glycol [2]
Rum
Sorbitol solutions
Tallow fatty alcohol
Tetradecanol
Tridecanol
•Trimethylol propane polyethoxylate
Undecanol
Undecyl alcohol

21. Phenols, Cresols

Benzyl alcohol
Carbolic oil
Creosote [2]
Cresols
Cresylic acid
2,4-Dichlorophenol
Dodecyl phenol
o-Ethylphenol
Nonyl phenol
Octyl phenol
Phenol
Xylenols

22. Caprolactam Solutions

Caprolactam solution

23-29. Unassigned

30. Olefins

Amylene
Butadiene
Butadiene, Butylene mixtures (cont. Acetylenes)
Butene
•Butene oligomer
Butylene
•1,5,9-Cyclododecatriene
•1,3-Cyclopentadiene dimer
Cyclopentadiene polymers
Cyclopentadiene, Styrene, Benzene mixture
•Cyclopentene
Decene
Dicyclopentadiene
Diisobutylene
Dipentene
Dodecene
Ethylene
Ethylidene norbornene [2]
1-Heptene
Hexene
Isoprene
Methyl acetylene, Propadiene mixture
•Methylcyclopentadiene dimer
2-Methyl-1-pentene
•4-Methyl-1-pentene
alpha-Methyl styrene
•Myrcene
Nonene
1-Octadecene
Octene
•Olefin mixtures
•alpha-Olefins (C13 and above)
1,3-Pentadiene
Pentene
Pentene, Miscellaneous hydrocarbon mixture [3]
Pinene
Polybutene
Polypropylene
Propylene
Propylene butylene copolymer
Propylene dimer
Propylene tetramer
Propylene trimer
Styrene
Tetradecene
Tridecene
Triisobutylene
Tripropylene
Turpentine
Undecene

31. Paraffins

Butane
Cycloaliphatic resins
•Cycloheptane
Cyclohexane
•Cyclopentane
Decane
Dodecane
Ethane
Heptane
Hexane [3]
Methane
•Methylcyclohexane
•2-Methyl pentane
Nonane
Octane
•n-Paraffins (C10 - C20)
Pentane
Propane
•iso-Propylcyclohexane
Waxes:
Paraffin

32. Aromatic Hydrocarbons

Alkyl acrylate-Vinyl pyridine copolymer in Toluene
•Alkyl(C9 - C17) benzenes
Benzene
Benzene hydrocarbon mixtures (having 10% Benzene or more)
Benzene, Toluene, Xylene mixtures
Butyl benzene
•Butyl phenol, Formaldehyde resin in Xylene
•Butyl toluene
Cumene
Cymene
Decyl benzene
•Dialkyl(C10 - C14) benzenes
Diethylbenzene
Diisopropyl benzene
Diisopropyl naphthalene
Diphenyl
Dodecylbenzene
Ethyl benzene
Ethyl toluene
Isopropylbenzene
Methyl naphthalene
Naphthalene
1-Phenyl-1-xylyl ethane
•Propylbenzene
Pseudocumene
Tetradecylbenzene
Tetrahydronaphthalene
•1,2,3,5-Tetramethylbenzene
Toluene
Tridecylbenzene
Triethyl benzene
Trimethyl benzene
Undecylbenzene
Xylene

33. Miscellaneous Hydrocarbon Mixtures

•Alkyl benzene sulfonic acid, sodium salt solutions
Asphalt blending stocks, roofers flux
Asphalt blending stocks, straight run residue
•Aviation alkylates
Calcuim sulfonate, Calcium carbonate, Hydrocarbon solvent mixture
Carbon black base
Coal tar
Coal tar pitch
•Decahydronaphthalene
Diphenyl, Diphenyl ether
Distillates, flashed feed stocks
Distillates, straight run

•Drilling mud (low toxicity) *(if flammable or combustible)*
Fatty acid amides
Gas oil, cracked
Gasoline blending stock, alkylates
Gasoline blending stock, reformates
Gasolines:
Automotive *(not over 4.23 grams lead per gal.)*
Aviation *(not over 4.86 grams lead per gal.)*
Casinghead *(natural)*
Polymer
Straight run
Glycols, Resins, and Solvents mixture
Herbicide (C15-H22-NO2-Cl)
Jet Fuels:
JP-1
JP-3
JP-4
JP-5
•JP-8
Kerosene
Magnesium nonyl phenol sulfide
Maleic anhydride copolymer
Mineral spirits
Naphtha:
Coal tar solvent
Cracking fraction [3]
Petroleum
Solvent
Stoddard solvent
Varnish Makers' and Painters'
Nonyl phenolsulfide solution
Oil, fuel:
No. 1
No. 1-D
No. 2
No. 2-D
No. 4
No. 5
No. 6
Oil, misc:
Absorption
Aliphatic
Aromatic
Clarified
Coal
Crude
Diesel
Heartcut distillate
Linseed
Lubricating
Mineral
Mineral seal
Motor
Neatsfoot
Penetrating
Pine
Range
Resin
Resinous petroleum
Rosin
Sperm
Spindle
Spray
Tanner's
Turbine
White (mineral)
Residual
Road
Transformer
Oxyalkylated alkyl phenol formaldehyde
Petrolatum
Pine oil
Polyalkenyl succinic anhydride amine
White spirit (low (15-20%) aromatic)

34. Esters

Acetyl tributyl citrate
Alkyl phthalates
Amyl acetate
Amyl tallate
•Benzene tricarboxylic acid trioctyl ester
•Benzyl acetate
Butyl acetate
Butyl benzyl phthalate
•n-Butyl butyrate
Butyl formate
iso-Butyl isobutyrate
Calcium naphthenate in Mineral oil
•Calcium nitrate, Magnesium nitrate, Potassium chloride solution
•Coconut oil, fatty acid
•Cottonseed oil, fatty acid
•Cyclohexyl acetate
•Dialkyl(C7 - C13) phthalates
Dibutyl phthalate
•Diethylene glycol ethyl ether acetate
•Diethylene glycol methyl ether acetate
Diethylene glycol butyl ether acetate
•Diethylene glycol phthalate
•Di-(2-ethylhexyl)adipate
Di-(2-ethylhexyl)phthalate
Diethyl phthalate
Diethyl sulfate
Diheptyl phthalate
Di-n-hexyl adipate
Diisobutyl phthalate
Diisodecyl phthalate
Diisononyl adipate
Diisononyl phthalate
Diisooctyl phthalate
Dimethyl adipate
Dimethylcyclicsiloxane hydrolyzate
Dimethyl glutarate
Dimethyl hydrogen phosphite [3]
•Dimethyl naphthalene sulfonic acid, sodium salt solution [3]
Dimethyl phthalate
Dimethyl polysiloxane
Dimethyl succinate
Dinonyl phthalate
Dioctyl phthalate
Dipropylene glycol dibenzoate
•Ditridecyl phthalate
•2-Dodecenylsuccinic acid, dipotassium salt solution
Diundecyl phthalate
2-Ethoxyethyl acetate
Ethyl acetate
Ethyl acetoacetate
Ethyl butyrate
•Ethylene glycol acetate
Ethylene glycol diacetate
•Ethylene glycol methyl ether acetate
Ethylene glycol butyl ether acetate
Ethylene glycol ethyl ether acetate
Ethyl-3-ethoxypropionate
Ethyl hexyl phthalate
Ethyl hexyl tallate
Ethyl propionate
•Ethyl propionate
•Glycerol polyalkoxylate
Glyceryl triacetate
•Gylcidyl ester of tridecylacetic acid
Glycidyl ester of Versatic acid
Glycol diacetate
Heptyl acetate
Hexyl acetate
Magnesium sulfonate
•3-Methoxybutyl acetate
•1-Methoxy-2-propyl acetate
Methyl acetate
Methyl acetoacetate
Methyl amyl acetate
Methyl butyrate
Methyl formate
•3-Methyl-3-methoxybutyl acetate
Methyl salicylate
•Metolachlor
•Naphthalene sulfonic acid, sodium salt solution (40% or less)
•Octyl decyl adipate
Octyl epoxytallate
Octyl nitrate [3]
Oil, edible:
Babassu
Castor
Coconut [3]
Corn
Cotton seed
Fish [3]
Lard
Olive
Palm [3]
•Palm nut
Peanut
Rapeseed
Rice bran
Safflower
Soya bean
•Sunflower
Sunflower seed
Tucum
Vegetable
Oil, misc:
Coconut, methyl ester
•Coconut oil, fatty acid methyl ester
Cotton seed, fatty acid
Cotton seed, fatty acid
•Palm oil, fatty acid methyl ester
•Palm oil, methyl ester
Soapstock
Tall
Tall, fatty acid [3]
Tung
•Palm nut oil, fatty acid methyl ester
•Palm stearin
Polydimethylsiloxane
•Polyferric sulfate solution
Polymethylsiloxane
•Poly(20)oxyethylene sorbitan monooleate
•Polysiloxane
•Potassium oleate
Propyl acetate
•Sodium acetate solution
•Sodium benzoate solution
Sodium dimethyl naphthalene sulfonate solution [3]
Sodium naphthalene sulfonate solution
Tall oil
Tallow [3]
Tallow fatty acid [3]
Triarylphosphate
Tributyl phosphate
Tricresyl phosphate
Tridecane
•Triethylene glycol di-(2-ethylbutyrate)
Triethyl phosphate
Triethyl phosphite [3]
Triisooctyl trimellitate [3]
2,2,4-Trimethyl pentanediol-1,3-diisobutyrate
2,2,4-Trimethyl-1,3-pentanediol-1-isobutyrate
2,2,4-Trimethyl-3-pentanol-1-isobutyrate

Trimethyl phosphite [2]
Trisodium nitrilotriacetate
Trixylenyl phosphate
Vinyl acetate-Fumarate copolymer
Waxes:
Carnauba

35. Vinyl Halides

Vinyl chloride
Vinylidene chloride

36. Halogenated Hydrocarbons

Benzyl chloride
Carbon tetrachloride
•Chlorinated paraffins (C10 - C13)
•Chlorinated paraffins (C14 - C17)
Chlorobenzene
Chlorodifluoromethane
Chloroform
Chlorotoluene
Dichlorobenzene
Dichlorodifluoromethane
1,1-Dichloroethane
2,2'-Dichloroisopropyl ether
Dichloromethane
Dichloropropane
Ethyl chloride
Ethylene dibromide
Ethylene dichloride [2]
Methyl bromide
Methly chloride
Monochlorodifluoromethane
Pentachloroethane
Perchloroethylene
1,1,2,2-Tetrachloroethane
1,2,4-Trichlorobenzene
1,1,1-Trichloroethane [2]
1,1,2-Trichloroethane
Trichloroethylene [2]
1,2,3-Trichloropropane
1,1,2-Trichloro-1,2,2-trifluoroethane

37. Nitriles

Acetonitrile
Adiponitrile
Lactonitrile solution
3-Pentenenitrile
Propionitrile
Tallow nitrile

38. Carbon Disulfide

Carbon disulfide

39. Sulfolane

Sulfolane

40. Glycol Ethers

Diethylene glycol
•Diethylene glycol dibutyl ether
Diethylene glycol butly ether
Diethylene glycol ethyl ether
Diethylene glycol methly ether
Diethylene glycol phenyl ether
Dipropylene glycol
•Dipropylene glycol methyl ether
Ethoxy triglycol
•Ethylene glycol tert-butyl ether
•Ethylene glycol dibutyl ether
Ethylene glycol butyl ether
Ethylene glycol ethyl ether
Ethylene glycol isopropyl ether
Ethylene glycol methly ether
Ethylene glycol phenyl ether
•Ethylene glycol phenyl ether, Diethylene glycol phenyl ether mixture
•Ethylene glycol propyl ether
Methoxy triglycol
Nonyl phenol (ethoxylated)
•Nonyl phenol poly(4-12)ethoxylates
Oil, misc:
Soybean (epoxidized)
•Polyalkylene glycols, Polyalkylene glycol monoalkyl ethers mixtures
Polyethylene glycols
•Polyethylene glycol dimethyl ether
•Polyethylene glycol monoalkyl ether
Polypropylene glycol methyl ether
Polypropylene glycols
•n-Propoxypropanol
•Propylene glycol monoalkyl ether
•Propylene glycol ethyl ether
•Propylene glycol methyl ether
Tetraethylene glycol
Triethylene glycol
•Triethylene glycol butyl ether
Triethylene glycol butyl ether mixture
Triethylene glycol ether mixture
•Triethylene glycol ethyl ether
Tripropylene glycol
Tripropylene glycol methyl ether

41. Ethers

Butyl ether
2,2'-Dichlorodiethyl ether
Digylcidyl ether of Bisphenol A
•Diglycidyl ether of Bisphenol F
Dimethyl furan
1,4-Dioxane
Diphenyl ether
Diphenyl ether, Diphenyl phenyl ether mixture
Ethyl ether
Methyl-tert-butyl ether [2]
Methyl formal
Propyl ether
Tetrahydrofuran

42. Nitrocompounds

Dinitrotoluene
Nitrobenzene
o-Nitrochlorobenzene
Nitroethane
Nitropropane
Nitropropane, Nitroethane mixture
Nitrotoluene

43. Miscellaneous Water Solutions

Aluminum sulfate solution [2]
2-Amino-2-hydroxymethyl-1,3-propanediol solution
Ammonium bisulfite solution [2]
Ammonium nitrate, Urea solution (not containing Ammonia)
Ammonium polyphosphate solution
Ammonium sulfate solution
Ammonium thiosulfate solution
Calcium bromide solution
Calcium chloride solution
Corn syrup
Dextrose solution
Diammonium salt of Zinc EDTA solution
2,4-Dichlorophenoxy acetic acid, Diethanolamine salt solution
2,4-Dichlorophenoxyacetic acid, Triisopropanolamine salt solution [2]
•Didecyl dimethyl ammonium chloride, Ethanol mixture solution
Diethanolamine salt of 2,4-Dichlorophenoxy acetic acid solution
Dodecyl diphenyl ether disulfonate solution
•Drilling brine (containing Calcium or Sodium salts)
•Drilling brine (containing Zinc salts)
•Drilling mud (low toxicity) *(if non-flammable or non-combustible)*
•Ethylene diamine tetracetic acid, tetrasodium salt solution
Ethylene-Vinyl acetate copolymer emulsion
•Ferric hydroxyethylethylenediamine triacetic acid, trisodium salt solution [2]
•Fish solubles *(water based fish meal extracts)*
•Fructose solution
Fumaric adduct of Rosin, water dispersion
•N-(Hydroxyethyl)ethylene diamine triacetic acid, trisodium salt solution
Kaolin clay slurry
Latex, liquid synthetic
Lignin liquor
•Naphthenic acid, sodium salt solution
Rosin soap (disproportionated) solution
Sewage sludge
Sodium alkyl sulfonate solution
Sodium hydrogen sulfite solution
Sodium polyacrylate solution [2]
Sodium salt of Ferric hydroxyethylethylenediamine triacetic acid solution
Sodium silicate solution [2]
Tall oil soap (disproportionated) solution
Tetrasodium salt of EDTA solution
Triisopropanolamine salt of 2,4-Dichlorophenoxyacetic acid solution
Urea, Ammonium nitrate solution (not containing Ammonia)
•Urea, Ammonium phosphate solution
•Vegetable protein solution (hydrolysed)

Footnotes to Table II

[1] Because of very high reactivity or unusual conditions of carriage or potential compatibility problems, this product is not assigned to a specific group in the Compatibility Chart. For additional compatibility information, contact Commandant (G-MTH), U.S. Coast Guard, 2100 Second Street, SW., Washington, D.C. 20593-0001. Telephone (202) 267-1577.

[2] See Appendix I - Exceptions to the Chart.

Appendix I - Exceptions to the Chart

Entries in **boldface** are newly authorized exceptions to 46 CFR Part 150

(a). The binary combinations listed below have been tested as prescribed in Appendix III and found not to be dangerously reactive. These combinations are exceptions to the Compatibility Chart (Figure 1) and may be stowed in adjacent tanks.

Member of reactive group	Compatible with
Acetone (18)	Diethylenetriamine (7)
Acetone cyanohydrin (0).	Acetic acid (4)
Acrylonitrile (15)	Triethanolamine (8)
1,3-Butylene glycol (20).	Morpholine (7)
1,4-Butylene glycol (20).	Ethylamine (7) Triethanolamine (8)
Caustic potash, 50% or less (5).	Ethyl alcohol (20)
	Ethylene glycol (20)

Member of reactive group	Compatible with
	Isopropyl alcohol (20)
	Methyl alcohol (20)
	iso-Octyl alcohol (20)
Caustic soda, 50% or less (5).	Butyl alcohol (20)
	tert-Butyl alcohol, Methanol mixtures
	Decyl alcohol (20)
	Diacetone alcohol (20)
	Diethylene glycol (40)
	Ethyl alcohol (20)
	Ethyl alcohol (40%, whiskey) (20)
	Ethylene glycol (20)
	Ethylene glycol, Diethylene glycol mixture (20)
	Ethyl hexanol (Octyl alcohol) (20)
	Methyl alcohol (20)
	Nonyl alcohol (20)
	Propyl alcohol (20)
	Propylene glycol (20)
	Sodium chlorate (0)
	iso-Tridecanol (20)
Dodecyl and Tetradecylamine mixture (7).	Tall oil, fatty acid (34)
Ethylenediamine (7)	Butyl alcohol (20)
	tert-Butyl alcohol (20)
	Butylene glycol (20)
	Creosote (21)
	Diethylene glycol (40)
	Ethyl alcohol (20)
	Ethylene glycol (20)
	Ethyl hexanol (20)
	Glycerine (20)
	Isononyl alcohol (20)
	Isophorone (18)
	Methyl butyl ketone (18)
	Methyl iso-butyl ketone (18)
	Methyl ethyl ketone (18)
	Propyl alcohol (20)
	Propylene glycol (20)
Oleum (0).....	Hexane (31)
	Dichloromethane (Methylene chloride) (36)
	Perchloroethylene (36)
1,2-Propylene glycol (20).	Diethylenetriamine (7)
	Polyethylene polyamines (7)
	Triethylenetetramine (7)
Sulfuric acid (2).....	Coconut oil (34)
	Coconut oil acid (34)
	Palm oil (34)
	Tallow (34)
Sulfuric acid, 98% or less (2).	Choice white grease tallow (34)

(b). The binary combinations listed below have been determined to be dangerously reactive, based on either data obtained in the literature or on laboratory testing which has been carried out in accordance with procedures prescribed in Appendix III. These combinations are exceptions to the Compatibility Chart (Figure 1) and may not be stowed in adjacent tanks.

Acetone cyanohydrin (0) is not compatible with Groups 1-12, 16, 17 and 22.

Acrolein (19) is not compatible with Group 1, Non-Oxidizing Mineral Acids.

Acrylic acid (4) is not compatible with Group 9, Aromatic Amines.

Alkyl benzene sulfonic acid (0) is not compatible with Groups 1-3, 5-9, 15, 16, 18, 19, 30, 34, 37, and strong oxidizers.

Allyl alcohol (15) is not compatible with Group 12, Isocyanates.

Aluminum sulfate solution (43) is not compatible with Groups 5-11.

Ammonium bisulfite solution (43) is not compatible with Groups 1, 3, 4, and 5.

Benzenesulfonyl chloride (0) is not compatible with Groups 5-7, and 43.

gamma-Butyrolactone (0) is not compatible with Groups 1-9.

Crotonaldehyde (19) is not compatible with Group 1, Non-Oxidizing Mineral Acids.

Cyclohexanone, Cyclohexanol mixture (18) is not compatible with Group 12, Isocyanates.

2,4-Dichlorophenoxyacetic acid, Triisopropanolamine salt solution (43) is not compatible with Group 3, Nitric Acid.

Dimethylamine salt of 2,4-Dichlorophenoxyacetic acid solution (0) is not compatible with Groups 1-5, 11, 12, and 16.

Dimethyl hydrogen phosphite (34) is not compatible with Groups 1 and 4.

Dimethyl naphthalene sulfonic acid, sodium salt solution (34) is not compatible with Group 12, Formaldehyde, and strong oxidizing agents.

Dodecylbenzenesulfonic acid (0) is not compatible with oxidizing agents and Groups 1, 2, 3, 5, 6, 7, 8, 9, 15, 16, 18, 19, 30, 34, and 37.

Ethyl chlorothioformate (0) is not compatible with Groups 5, 6, 7, 8, and 9.

Ethylenediamine (7) is not compatible with Ethylene dichloride (36).

Ethylene dichloride (36) is not compatible with Ethylenediamine (7).

Ethylidene norbornene (30) is not compatible with Groups 1-3 and 5-8.

2-Ethyl-3-propylacrolein (19) is not compatible with Group 1, Non-Oxidizing Mineral Acids.

Fish oil (34) is not compatible with Sulfuric acid (2).

Formaldehyde (over 50%) in Methyl alcohol (over 30%) (19) is not compatible with Group 12, Isocyanates.

Formic acid (4) is not compatible with Furfural alcohol (20).

Furfuryl alcohol (20) is not compatible with Group 1, Non-Oxidizing Mineral Acids and Formic acid (4).

2-Hydroxyethyl acrylate is not compatible with Groups 2, 3, 5-8 and 12.

Isophorone (18) is not compatible with Group 8, Alkanolamines.

Magnesium chloride solution (0) is not compatible with Groups 2, 3, 5, 6 and 12.

Mesityl oxide (18) is not compatible with Group 8, Alkanolamines.

Methyl tert-butyl ether (41) is not compatible with Group 1, Non-oxidizing Mineral Acids.

Naphtha, cracking fraction (33) is not compatible with strong acids, caustics or oxidizing agents.

o-Nitrophenol (0) is not compatible with Groups 2, 3, and 5-10.

Octyl nitrates (all isomers) (34) is not compatible with Group 1, Non-oxidizing Mineral Acids.

Oleum (0) is not compatible with Sulfuric acid (2) and 1,1,1-Trichloroethane (36).

Pentene, Miscellaneous hydrocarbon mixtures (30) are not compatible with strong acids or oxidizing agents.

Sodium chlorate solution (50% or less) (0) is not compatible with Groups 1-3, 5, 7, 8, 10, 12, 13, 17 and 20.

Sodium dichromate solution (70% or less) (0) is not compatible with Groups 1-3, 5, 7, 8, 10, 12, 13, 17 and 20.

Sodium dimethyl naphthalene sulfonate solution (34) is not compatible with Group 12, Formaldehyde and strong oxidizing agents.

Sodium hydrogen sulfide, Sodium carbonate solution (0) is not compatible with Groups 6 (Ammonia) and 7 (Aliphatic amines).

Sodium hydrosulfide (5) is not compatible with Groups 6 (Ammonia) and 7 (Aliphatic amines).

Sodium hydrosulfide, Ammonium sulfide solution (5) is not compatible with Groups 6 (Ammonia) and 7 (Aliphatic amines).

Sodium polyacrylate solution (43) is not compatible with Group 3, Nitric Acid.

Sodium salt of Ferric hydroxyethylethylenediamine triacetic acid solution (43) **is not compatible with Group 3, Nitric acid.**

Sodium silicate solution (43) is not compatible with Group 3, Nitric Acid.

Sodium sulfide, hydrosulfide solution (0) is not compatible with Groups 6 (Ammonia) and 7 (Aliphatic amines).

Sodium thiocyanate (56% or less) (0) is not compatible with Groups 1-4.

Sulfuric acid (2) is not compatible with Fish oil (34), or Oleum (0).

Tallow fatty acid (34) is not compatible with Group 5, Caustics.

1,1,1-Trichloroethane (36) is not compatible with Oleum (0).

Trichloroethylene (36) is not compatible with Group 5, Caustics.

Triethyl phosphite (34) is not compatible with Groups 1, and 4.

Trimethyl phosphite (34) is not compatible with Groups 1 and 4.

PART 151—BARGES CARRYING BULK LIQUID HAZARDOUS MATERIAL CARGOES

6. The authority citation for Part 151 is revised to read as follows:

Authority: 33 U.S.C. 1903(b), 46 U.S.C. 3703; 49 CFR 1.46.

7. In Part 151, by removing the words "gage", "gages", and "gaging" wherever they may appear and adding, in their place, the words "gauge", "gauges", or "gauging", respectively.

§ 151.01–10 [Amended]

8. In § 151.01–10, by removing Table 151.01–10(b) following paragraph (b) and by removing from paragraphs (b), (c), (c–1), (d), and (e) the words "Table 151.01–10(b)" and adding, in their place, the words "Table 151.05".

§§ 151.01–15, 151.01–20, 151.04–1, and 151.04–5 [Amended]

9. In §§ 151.01–15 (a) and (b), 151.01–20 (a) and (b), 151.04–1(c), and 151.04–5(h), by removing the words "Table 151.01–10(b)" and adding, in their place, the words "Table 151.05".

10. In § 151.05–1, by revising paragraphs (a), (o), and (p) to read as follows:

§ 151.05–1 Explanation of column headings in Table 151.05.

(a) *Cargo identification/name.* This column identifies cargoes by name. Words in italics are not part of the cargo name but may be used in addition to the cargo name. When one entry references another entry by use of the word "see" and both names are in roman type, either name may be used as the cargo name (e.g., "Diethyl ether *see* Ethyl ether"). However, the referenced entry is preferred.

* * * * *

(o) *Special requirements.* This column refers to requirements in Subparts 151.50, 151.55, 151.56, and 151.58 of this part which apply to specific cargoes. The section numbers listed omit the preceding part designation, "151".

* * * * *

(p) *Electrical hazard class—group.* This column refers to the hazardous material class and group ratings.

* * * * *

11. By revising Table 151.05 to read as follows:

TABLE 151.05—SUMMARY OF MINIMUM REQUIREMENTS

Cargo identification			Hull type	Cargo segregation Tank	Tanks			Cargo transfer		Environmental control		Fire protection required	Special requirements (Section)	Electrical hazard class-group	Temp. control install.	Tank internal inspect. period—years

* denotes newly added products.
Entries in **boldface** are changes.

Terms and symbols:

Segregation—Tank—
Line 1—Segregation of cargo from surrounding waters:
i = Skin of vessel (single skin) only required. Cargo tank wall can be vessel's hull.
ii = Double skin required. Cargo tank wall cannot be vessel's hull.
Line 2—Segregation of cargo space from machinery spaces and other spaces which have or could have a source of ignition:
i = Single bulkhead only required. Tank wall can be sole separating medium.
ii = Double bulkhead required. Cofferdam, empty tank, pumproom, tank with Grade E Liquid (if compatible with cargo) is satisfactory.
Internal tank inspection—
G—Indicates cargo is subject to general provisions of § 151.04-5(b).
Specific numbers in this column are changes from the general provisions.

Abbreviations used:
Tank type: Ind = Independent.
Vent:
PV = Pressure vacuum valve.
SR = Safety relief.
Gauging device: Restr. = Restricted.
General usage:
NR = No requirement.
NA = Not applicable.

§ 151.12-5 [Amended]

12. In § 151.12-5, by removing from the list "n-Butyl acrylate" and "2-Ethylhexyl acrylate" and by adding in alphabetical order "Acetic acid", "Ammonium bisulfite solution", "Coal tar pitch", "2,2-Dichloropropionic acid", "N,N-Dimethylacetamide", "Dichloromethane", "Polyethylene polyamine", and "Pyridine".

13. In § 151.25-1, by adding a new paragraph (e) to read as follows:

§ 151.25-1 Cargo tank.

* * * * *

(e) *Dry.* All vapor space within the cargo tank is filled and maintained with a gas or vapor containing no more than 100 ppm water.

Subpart 151.50—[Amended]

14. By revising the heading to Subpart 151.50 to read as follows:

Subpart 151.50—Special Requirements

15. In § 151.50-5, by adding introductory text and by removing and reserving paragraph (a) as follows:

§ 151.50-5 Cargoes having toxic properties.

When Table 151.05 refers to this section, the following apply:

(a) [Reserved]

* * * * *

16. In § 151.50-20, by revising paragraph (k) to read as follows:

§ 151.50-20 Inorganic acids.

* * * * *

(k) The special requirements for hydrochloric acid in § 151.50-22, for hydroflurosilicic acid in § 151.50-77, for phosphoric acid in § 151.50-23, and for sulfuric acid in § 151.50-21 also apply to the carriage of those acids.

§ 151.50-22 [Amended]

17. In § 151.50-22(d), by removing the words "Commandant (MHM)" and adding, in their place, the words "Commandant (G-MTH)".

§ 151.50-24 [Removed]

18. By removing § 151.50-24, Hydrofluoric acid.

19. In § 151.50-30, by removing from paragraph (e) "§ 515.45-6(b)" and adding, in its place, "§ 151.45-6(b)", by removing from the table in paragraph (e) the line entry for "Hydrogen chloride", and by revising paragraph (g), to read as follows:

§ 151.50-30 Compressed gases.

* * * * *

(g) The special requirements for ammonia (anhydrous) in § 151.50-32, for argon in § 151.50-36, for chlorine in § 151.50-31, for nitrogen in § 151.50-36, and for vinyl chloride in § 151.50-34 also apply to the carriage of those gases.

§ 151.50-32 [Amended]

20. By revising the section heading for § 151.50-32 to read "Ammonia, anhydrous".

§ 151.50-33 [Removed]

21. By removing § 151.50-33, Anhydrous hydrogen chloride.

§ 151.50-34 [Amended]

22. In § 151.50-34(g)(3) and (k), by removing "29 CFR 1910.93q(g)" and adding, in its place, "29 CFR 1910.1017".

23. By adding a new § 151.50-36 to read as follows:

§ 151.50-36 Argon or nitrogen.

(a) A cargo tank that contains argon or nitrogen and that has a maximum allowable working pressure of 172 kPa (25 psig) or greater must have one of the following arrangements:

(1) A refrigeration system that keeps the tank pressure below the safety relief valve operating pressure when ambient temperatures are 46° C (115° F) air and 32° C (90° F) water.

(2) A relief valve or pressure control valve that maintains the tank pressure below the setting of the tank's required safety relief valve in ambient temperatures of 46° C (115° F) air and 32° C (90° F) water.

(b) A cargo tank with a maximum allowable working pressure of less than 172 kPa (25 psig) is approved by the Commandant (G-MTH) on a case by case basis.

(c) Section 151.50-30 also applies to the carriage of argon or nitrogen.

§§ 151.50-40 and 151.50-41 [Amended]

24. In §§ 151.50-40 and 151.50-41, by removing the words "carbon bisulfide" and adding, in their place, the words "carbon disulfide (*carbon bisulfide*)".

§ 151.50-42 [Amended]

25. In § 151.50-42(e), by removing "Class 1" and adding, in its place, "Class I" and by removing "§ 111.70-10(c)(4)" and adding, in its place, "Part 111, Subpart 111.105".

§ 151.50-55 [Amended]

26. By revising the section heading for § 151.50-55 to read "Sulfur (molten)".

§ 151.50-65 [Removed]

27. By removing § 151.50-65, Hydrogen fluoride.

28. By adding a new § 151.50-70 to read as follows:

§ 151.50-70 Cargoes requiring inhibition or stabilization.

When Table 151.05 refers to this section, that cargo must be—

(a) Inhibited; or

(b) Stabilized.

§§ 151.50-71 and 151-72 [Removed]

29. By removing § 151.50-71, Benzene-hydrocarbon mixtures (containing acetylenes), and § 151.50-72, Butadiene, butene mixture (inhibited).

30. By revising § 151.50-73 to read as follows:

§ 151.50-73 Chemical protective clothing.

When Table 151.05 refers to this section, the following apply:

(a) The person in charge of cargo handling operations shall ensure that the following chemical protective clothing constructed of materials resistant to permeation by the cargo being handled is worn by all personnel engaged in an operation listed in paragraph (b) of this section:

(1) Splash protective eyewear.

(2) Long-sleeved gloves.

(3) Boots or shoe covers.

(4) Coveralls or lab aprons.

Note to paragraph (a).—"Guidelines for the Selection of Chemical Protective Clothing", Third Edition, 1987, available from the American Conference of Governmental Industrial Hygienists, 6500 Glenway Ave., Cincinnati, OH 45211-4438, provides information on the proper clothing for the cargo being handled.

(b) The section applies during the following operations:

(1) Sampling cargo.

(2) Transferring cargo.

(3) Making or breaking cargo hose connections.

(4) Gauging a cargo tank.

(5) Opening cargo tanks.

(c) Coveralls or lab aprons may be replaced by splash suits or aprons constructed of light weight materials if, in the judgment of the person in charge of cargo handling operations:

(1) Contact with the cargo is likely to occur only infrequently and accidentally; and

(2) The splash suit or apron is disposed of immediately after contamination.

(d) Splash protective eyewear must be tight-fitting chemical-splash goggles, face shields, or similar items intended specifically for eye protection from chemical splashing or spraying.

(e) The person in charge of cargo handling operations shall ensure that each person in the vicinity of an operation listed in paragraph (b) of this section or in the vicinity of tanks, piping, or pumps being used to transfer the

cargo wears splash protective eyewear under paragraph (d) of this section.

§ 151.50–74 [Amended]

31. By revising the section heading of § 151.50–74 to read "Ethylidene norbornene."

§ 151.50–75 [Amended]

32. In § 151.50–75, by removing paragraph (b).

§ 151.50–78 [Removed]

33. By removing § 151.50–78, Industrial wastes (containing dimethyldisulfide, methyl mercaptan, and methomyl).

§ 151.50–80 [Amended]

34. In § 151.50–80(a), by adding at the end of the paragraph the words "See § 151.15–3(f)(2)."

35. In § 151.50–81, by revising the section heading and adding introductory text to read as follows:

§ 151.50–81 Special operating requirements for heat sensitive cargoes.

When Table 151.05 refers to this section, the following apply to the cargo:

* * * * *

§§ 151.50–82 and 151.50–83 [Removed]

36. By removing §§ 151.50–82, Polyvinylbenzyltrimethyl ammonium chloride solution, and 151.50–83, Sodium sulfide, hydrosulfide solutions.

§ 151.50–85 [Removed]

37. By removing § 151.50–85, 1,2,3-Trichloropropane.

38. By adding a new § 151.50–86 to read as follows:

§ 151.50–86 Octyl nitrates.

(a) The carriage temperature of octyl nitrates must be maintained below 100° C (212° F) in order to prevent the occurrence of a self-sustaining exothermic decomposition reaction.

(b) Octyl nitrates may not be carried in a deck tank unless the tank has a combination of insulation and a water deluge system sufficient to maintain the tank's cargo temperature below 100° C (212° F) and the cargo temperature rise at or below 1.5° C (2.7° F)/hour, for a fire of 650° C (1200° F).

39. In § 151.55–1, by adding words at the end of paragraphs (b), (c), (d), (e), (f), (g), and (j) to read as follows:

§ 151.55–1 General.

* * * * *

(b) * * *. (Equivalent to § 151.56–1 (a), (b), and (c).)

(c) * * *. (Equivalent to § 151.56–1 (b), (c), and (g).)

(d) * * *. (Equivalent to § 151.56–1 (a), (c), and (d).)

(e) * * *. (Equivalent to § 151.56–1 (b).)

(f) * * *. (Equivalent to § 151.56–1 (a) and (b).)

(g) * * *. (Equivalent to § 151.56–1 (a).)

* * * * *

(j) * * *. (Equivalent to § 151.56–1 (a) and (c).)

40. By adding a new Subpart 151.56 and § 151.56–1 to read as follows:

Subpart 151.56—Prohibited Materials of Construction

§ 151.56–1 Prohibited materials.

When one of the following paragraphs of this section is referenced in Table 151.05, the materials listed in that paragraph may not be used in components that contact the cargo or its vapor:

(a) Aluminium or aluminum alloys.

(b) Copper or copper alloys.

(c) Zinc, galvanized steel, or alloys having more than 10 percent zinc by weight.

(d) Magnesium.

(e) Lead.

(f) Silver or silver alloys.

(g) Mercury.

41. By adding a new Subpart 151.58 and § 151.58–1 to read as follows:

Subpart 151.58—Required Materials of Construction.

§ 151.58–1 Required materials.

When one of the following paragraphs of this section is referenced in Table 151.05, only those materials listed in that paragraph may be used in components that contact the cargo or its vapor.

(a) Aluminium, stainless steel, or steel covered with a protective lining or coating. (See § 151.15–3(f)(2).)

(b) [Reserved]

(c) [Reserved]

(d) Solid austenitic stainless steel.

(e) Stainless steel or steel covered with a suitable protective lining or coating. (See § 151.15–3(f)(2).)

PART 153—SHIPS CARRYING BULK LIQUID, LIQUEFIED GAS, OR COMPRESSED GAS HAZARDOUS MATERIALS

42. The authority citation for Part 153 is revised to read as follows:

Authority: 46 U.S.C. 3703; 49 CFR 1.46. Section 153.40 issued under 49 U.S.C. 1804. Sections 153.470 through 153.491, 153.1100 through 153.1132, and 153.1600 through 153.1608 also issued under 33 U.S.C. 1903(b).

43. In § 153.238, by adding new paragraphs (d) and (e) to read as follows:

§ 153.238 Required materials.

* * * * * *

(d) Solid austenitic stainless steel.

(e) Stainless steel or steel covered with a suitable protective lining or coating. (See § 153.266.)

44. In § 153.558, by adding a note at the end of the section to read as follows:

§ 153.558 Special requirements for phosphoric acid.

* * * * *

Note to § 153.558.—"Phosphoric acid", as defined in § 153.2, includes phosphoric acid, superphosphoric acid, and aqueous solutions of phosphoric acid.

45. By adding a new § 153.560 to read as follows:

§ 153.560 Special requirements for octyl nitrates.

(a) The carriage temperature of octyl nitrates must be maintained below 100° C (212° F) in order to prevent the occurrence of a self-sustaining exothermic decomposition reaction.

(b) Octyl nitrates may not be carried in a deck tank unless the tank has a combination of insulation and a water deluge system sufficient to maintain the tank's cargo temperature below 100° C (212° F) and the cargo temperature rise at or below 1.5° C (2.7° F)/hour, for a fire of 650° C (1200° F).

§ 153.907 [Amended]

46. In § 153.907(b)(2), by removing "§ 153.5(b)" and adding, in its place, "§ 153.900(d)".

47. By revising § 153.933 to read as follows:

§ 153.933 Chemical protective clothing.

When Table 1 refers to this section, the following apply:

(a) The master shall ensure that the following chemical protective clothing constructed of materials resistant to permeation by the cargo being handled is worn by all personnel engaged in an operation listed in paragraph (b) of this section:

(1) Splash protective eyewear.

(2) Long-sleeved gloves.

(3) Boots or shoe covers.

(4) Coveralls or lab aprons.

Note to paragraph (a).—"Guidelines for The Selection of Chemical Protective Clothing", Third Edition, 1987, available from the American Conference of Governmental Industrial Hygienists, 6500 Glenway Ave., Cincinnati, OH 45211–4438, provides information on the proper clothing for the cargo being handled.

(b) This section applies during the following operations:

(1) Sampling cargo.

(2) Transferring cargo.

(3) Making or breaking cargo hose connections.

(4) Gauging a cargo tank.

(5) Opening cargo tanks.

(c) Coveralls or lab aprons may be replaced by splash suits or aprons constructed of light weight materials if, in the judgment of the master:

(1) Contact with the cargo being handled is likely to occur only infrequently and accidentally; and

(2) The splash suit or apron is disposed of immediately after contamination.

(d) Splash protective eyewear must be tight-fitting chemical-splash goggles, face shields, or similar items intended specifically for eye protection from chemical splashing or spraying.

(e) The master shall ensure that each person in the vicinity of an operation listed in paragraph (b) of this section or in the vicinity of tanks, piping, or pumps being used to transfer the cargo wears splash protective eyewear under paragraph (d) of this section.

§ 153.1025 [Amended]

48. In § 153.1025(c), by removing "426–1217" and adding, in its place, "267–1217".

49. By revising § 153.1035 to read as follows:

§ 153.1035 Acetone cyanohydrin or lactonitrile solutions.

No person may operate a tankship carrying a cargo of acetone cyanohydrin or lactonitrile solutions, unless that cargo is stabilized with an inorganic acid.

50. By revising Table 1 and Table 2 to Part 153 to read as follows:

TABLE 1—SUMMARY OF MINIMUM REQUIREMENTS

Cargo name [1]	IMO Annex II pollution category [2]	Cargo containment system [3]	Vent height [4]	Vent [5]	Gauge [6]	Fire protection system [7]	Special requirements [8]	Electrical hazard class and group [9]

* denotes newly added products.
Entries in **boldface** are changes.

COLUMN HEADING FOOTNOTES:

[1] The cargo name must be as it appears in this column **(see §§ 153.900, 153.907).** Words in italics are not part of the cargo name but may be used in addition to the cargo name. When one entry references another entry by use of the word "*see*", and both names are in roman type, either name may be used as the cargo name (e.g., Diethyl ether *see* Ethyl ether). However, the referenced entry is preferred.

[2] This column lists the IMO Annex II Pollution Category.
A, B, C, D – NLS Category of Annex II of MARPOL 73/78.
III – Appendix III of Annex II (non-NLS cargoes) of MARPOL 73/78.
– No determination of NLS status. For shipping on an oceangoing vessel, see 46 CFR 153.900(c).
[] – A NLS category in brackets indicates that the product is provisionally categorized and that further data are necessary to complete the evaluation of its pollution hazards. Until the hazard evaluation is completed, the pollution category assigned is used.
@ – The NLS category has been assigned by the U.S. Coast Guard, in absence of one assigned by the IMO, based upon a GESAMP Hazard Profile or by analogy to a closely related product having one assigned.

[3] This column lists the type of containment system the cargo must have (see §§ 153.230 through 153.232).

[4] This column lists the height of any vent riser required (see §§ 153.350 and 153.351).

[5] This column lists any vent control valve required (see § 153.355).

[6] This column lists the type of gauging system required (see §§ 153.400 through 153.406).

[7] This column lists the type of fire protection system required. Where more than one system is li sted, any listed system may be used. A dry chemical system may not be substituted for either type of foam system unless the dry chemical system is listed as an alternative or the substitution is approved by Commandant (G-MTH) (§ 153.460). The types are as follows:
A is a foam system for water soluble cargoes (polar solvent foam).
B is a foam system for water insoluble cargoes (non-polar solvent foam).
C is a water spray system.
D is a dry chemical system.
NSR means there is no special requirement applying to fire protection systems.

[8] This column lists sections that apply to the cargo in addition to the general requirements of this part. The 153 Part number is omitted.

[9] This column lists the electrical hazard class and group used for the cargo when determining requirements for electrical equipment under Subchapter J (Electricial engineering) of this chapter.

Abbreviations used:
NR – No requirement.
NA – Not applicable.
FOOTNOTES OF SPECIFIC CARGOES:

BEST COPY AVAILABLE

[10] Dry chemical extinguishers should not be used on fires involving this cargo since some dry chemicals may react with the cargo and cause an explosion.
[11] The I-B electrical hazard for acids does not apply to weather deck locations. See 46 CFR Part 111.
[12] Water is effective in extinguishing open air fires but will generate hazardous quantities of gas if put on the cargo in enclosed spaces.
[13] Aluminum is a questionable material of construction with this cargo since pitting and corrosion have been reported. The IMO Chemical Code prohibits aluminum as a material of construction for this cargo.
[14] Some tank pitting has been reported when this cargo is contaminated with water, including moisture in the air. The IMO Chemical Code requires that the vapor space over this cargo be kept dry.
[15] Electrical Hazard Class and Group based upon that which appears in "Classification of Gases, Liquids and Volatile Solids Relative to Explosion-Proof Electrical Equipment", Publication NMAB 353-5, National Academy Press, 1982, but not appearing in NFPA 497M, "Manual for Classification of Gases, Liquids and Dusts for Electrical Equipment in Hazardous Classified Locations." See also Subchapter J (Electrical Engineering) of this chapter.
[16] Special requirement .908(b) only applies to the para isomer, and mixtures containing the para isomer having a melting point of 0 deg C (32 deg F) or more.
[17] Special applicability:

§§ 153.440 and .908(a) apply to the chemical, and mixtures containing the chemical, with a viscosity of 25 mPa.s at 20 deg C (68 deg F).
§§ 153.440 and .908(b) apply to the chemical, and mixtures containing the chemical, with a melting point of 0 deg C (32 deg F) and above.
§§ 153.440 and .908(c) apply to the chemical, and mixtures containing the chemical, with a melting point of 15 deg C (59 deg F) and above.
§§ 153.448 applies to the chemical, and mixtures containing the chemical, with a melting point of 15 deg C (59 deg F) and above.

ABBREVIATIONS FOR NOXIOUS LIQUID CARGOES:

N.F. -- non-flammable.
F. -- flammable.
n.o.s. -- not otherwise specified.
ST -- Ship type.
Cat -- Pollution category.

Explanation of Symbols: As used in this table, the following stand for:

A, B, C, D – NLS Category of Annex II of MARPOL 73/78.

I – Considered an "oil" under Annex I of MARPOL 73/78.

III – Appendix III of Annex II (non-NLS cargoes) of MARPOL 73/78.

LFG – Liquefied flammable gas.

– No determination of NLS status. For shipping on an oceangoing vessel, see 46 CFR 153.900(c).

[] – A NLS category in brackets indicates that the product is provisionally categorized and that further data are necessary to complete the evaluation of its pollution hazards. Until the hazard evaluation is completed, the pollution category assigned is used.

M.J. Schiro,

Captain, U.S. Coast Guard, Acting Chief, Office of Marine Safety, Security and Environmental Protection.

Dated: November 4, 1988.

[Docket No. 25627]

Regulatory Review of Pilot and Flight Instructor, Pilot School, and Ground Instructor Certification Rules

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Reopening for public comment.

SUMMARY: This notice announces the reopening of the above docket to provide for continued receipt of comments, recommendations, and ideas from the public on the Regulatory Review of Pilot and Flight Instructor, Pilot School, and Ground Instructor Certification Rules. Comments received in the docket after it closed on September 9, 1988, and before this reopening will be included in the docket. The docket is being reopened to facilitate the orderly flow of collecting comments, recommendations, and ideas from the public throughout this regulatory review.

DATE: Docket No. 25627 will remain open until the FAA gives notice in the **Federal Register** that the docket is closed.

ADDRESS: Comments may be sent in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, ATTN: Rules Docket (AGC–204), Docket No. 25627, 800 Independence Ave. SW., Washington, DC 20591; or delivered in duplicate to: FAA Rules Docket, Room 916, 800 Independence Avenue SW., Washington, DC 20591. Comments received may be examined in the Rules Docket on all weekdays, except Federal holidays, between the hours of 8:30 a.m. to 5 p.m.

FOR FURTHER INFORMATION CONTACT: Edna H. French, Manager, AFS–850 Project Development Branch or John Lynch, General Aviation and Commercial Division, 800 Independence Ave. SW., Washington, DC 20591; Telephone: (202) 267–8150.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA requests the participation of all interested persons, and the identification of data, literature, statistics, research papers, or other documents, available in the public sector, that may be relevant to the issues involved in pilot, flight instructor, pilot school, and ground instructor requirements and training.

Interested persons are invited to express views and to make recommendations for regulatory changes. Participants also should address any economic consequences (e.g., implementation costs, potential savings) of the views or changes that they recommend. The FAA encourages those persons submitting comments to include any source of supporting data that may be applicable to the views or recommendations.

Comments should identify Docket No. 25627, and be submitted in duplicate to the address noted previously in the "Address" section of this document. All comments submitted will be available for examination in the Rules Docket in Room 916 of the FAA Building, both before and after the closing date.

Commenters wishing to have the FAA acknowledge receipt of their comments submitted in response to this notice must submit with their comments a self-addressed, stamped postcard of which the following statement is made: "Comments to Docket Number 25627." The postcard will be dated, time stamped, and returned to the commenter by the FAA.

Availability of the Notice

Any person may obtain copies of this notice and the other notices that have been issued on this regulatory review project, by submitting a request to the FAA, Office of Public Affairs, ATTN: APA–230, 800 Independence Avenue SW., Washington, DC 20591, or by calling the Office of Public Affairs at (202) 267–3484. Communications must identify Docket No. 25627. Persons interested in being placed on a mailing list for future notices should request a copy of Advisory Circular 11–2, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Background

A Notice of Public Hearing was published in the **Federal Register** on June 27, 1988 (53 FR 24178) requesting participation from the public on this regulatory review. In that Notice of Public Hearing document, the FAA announced the hearing schedule and several topics of discussion for public comment. The topics for discussion were identified on the basis of regulatory amendments previously adopted by the FAA, petitions for exemption, letters, petitions for rulemaking, National Transportation Safety Board (NTSB) safety recommendations, and FAA evaluations of training and certification rules. The topics included the following: Several NTSB safety recommendations; reporting completion of biennial flight reviews to the FAA; adding or deleting certain certificates and/or ratings; changes to the aircraft type rating certification procedures; changes to the pilot and instructor certification eligibility requirements; changes to the pilot and instructor privileges and limitations; changes to the FAA certification of military and foreign pilots; changes to the flight and ground instructor endorsements and recordkeeping practices; various changes to the certification and operational rules of Part 141; and various changes in clarifying certain terms and definitions in Parts 61, 141, and 143. In addition, the FAA announced the availability of a management action plan for conducting a job task analysis in conjunction with this regulatory review. The public hearings were held on July 26 and 27, 1988 at the FAA Building in Washington, DC, and on August 3 and 4, 1988 at the FAA Building in Oshkosh, Wisconsin.

The FAA issued a second notice on this regulatory review on August 5, 1988 (53 FR 29582). This notice extended the period for receipt of written comments to Docket No. 25627 until September 9, 1988, for the topics of discussion items and solicited comments on the methodology of the management action plan announced in the Notice of Public Hearing (53 FR 24178; June 27, 1988).

Currently, the FAA is developing a Notice of Proposed Rulemaking (NPRM). The first NPRM will address NTSB safety recommendations and FAA immediate action items discussed at the public hearings. The FAA will consider comments on these issues made at the public hearings or received by September 9, 1988, in the docket. Comments received after that date will be considered to the extent practicable.

The FAA intends to publish additional NPRM's addressing other issues raised in the regulatory review. Many of these issues will involve extensive research and additional public hearings. The management action plan, contained in Docket No. 25627, describes a valid and reliable methodology to collect information from subject matter experts (i.e., experienced and current pilots, instructors, and examiners from the aviation community). The information collected from these experts will be used to identify the required knowledge, skills, and abilities needed by pilots and instructors for flying in each category and class of aircraft in the various operating environments of today's National Airspace System.

In addition, the FAA intends to conduct a futuristic review of the training and certification needs for air

carrier pilots from the year 2000 and beyond.

The FAA continues to receive numerous inquiries, suggestions, ideas, and comments from the public concerning recommended changes to Parts 61, 141, and 143. As a result, the FAA is reopening Docket No. 25627, in order to provide an organized means of receiving comments from the public throughout this regulatory review. Docket No. 25627 will remain open until the FAA gives notice that the docket is closed. All comments addressed to Docket No. 25627, including those received after September 9, 1988, and before issuance of this notice, are included in the docket. The FAA will use the data, ideas, information, and recommendations in Docket No. 25627 as a resource in developing specific regulatory proposals.

D.C. Beaudette,

Acting Director, Flight Standards Service.

Issued in Washington, DC on November 29, 1988.

Department of Labor

Employment and Training Administration

20 CFR Part 639

Worker Adjustment and Retraining Notification; Proposed Rule

VOL 53 ISS 233 DEC 5 1988 UMI

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 639

Worker Adjustment and Retraining Notification

AGENCY: Employment and Training Administration, Labor.

ACTION: Proposed rule.

SUMMARY: The Employment and Training Administration of the Department of Labor is publishing a proposed rule interpreting the provisions of the Worker Adjustment and Retraining Notification Act (WARN). WARN provides that, with certain exceptions, employers of 100 or more workers must give at least 60 days' advance notice of a plant closing or mass layoff to affected workers or their representatives, to the State dislocated worker unit, and to the appropriate local government.

DATES: This proposed rule is being used to solicit comments on a subsequent final rule which the Department intends to issue before the expiration of the April 1, 1989, expiration of the interim interpretative rule published separately.

Comments on this proposed rule must be received by February 3, 1989.

ADDRESSES: *Proposed rule*: Comments on the proposed rule shall be mailed to the Assistant Secretary of Labor, Employment and Training Administration, Department of Labor, Room N–4459, 200 Constitution Avenue NW., Washington, DC 20210; Attention: Administrator, Office of Job Training Programs.

Information collection requirements: Comments on the information collection requirements should be sent to the Office of Management and Budget, New Executive Office Building, Room 3001, Washington, DC 20503, Attention: Desk Officer for Employment and Training Administration.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Colombo; Telephone: (202) 535–0577.

SUPPLEMENTARY INFORMATION:

Introduction

The Worker Adjustment and Retraining Notification Act (WARN, the statute, or the Act), Pub. L. 100–379, 102 Stat. 890, was enacted on August 4, 1988. 29 U.S.C. 2101 et seq. Section 11 of the Act provides that WARN goes into effect on February 4, 1989. WARN provides that, with certain exceptions, employers of 100 or more workers must give at least 60 days' advance notice of a plant closing or mass layoff to affected workers or their representatives, to the State dislocated worker unit (see 29 U.S.C. 1661(b)(2)), and to the appropriate local government. 29 U.S.C. 2902 and 2903. Section 8(a) of the Act requires that the Secretary of Labor "prescribe such regulations as may be necessary to carry out this Act. Such regulations shall, at a minimum, include interpretative regulations describing the method by which employers may provide for appropriate service of notice as required by this Act." 29 U.S.C. 2107(a). Under section 11 of the Act, the authority to issue regulations for WARN became effective on August 4, 1988.

The Employment and Training Administration (ETA) of the Department of Labor (DOL or Department), since the enactment of WARN, has published in the **Federal Register** for comment various notices and discussion papers on WARN. 53 FR 43731 (October 28, 1988); 53 FR 39403 (October 6, 1988); 53 FR 38026 (September 29, 1988); 53 FR 36056 (September 16, 1988); and 53 FR 34844 (September 8, 1988). In developing this proposed rule, ETA has considered the comments received in response to those notices and discussion papers.

Prior Actions

The Department of Labor (DOL) is conducting the WARN implementation process in an open and public manner. On September 16, 1988, the Department published a notice in the **Federal Register** inviting comments from interested parties regarding: "(1) [T]he extent to which the Department should issue interpretive regulations; and (2) [T]o to extent that regulations are needed, the specific views of commenters on how particular sections of the law should be implemented through regulations."

A total of 63 letters was received, of which 43 were sufficiently timely for full consideration. The comments break out by source as follows: employer associations 18, companies 17, law firms 8, unions 7, employee associations 1, Members of Congress 4, State officials 7, and private citizens 1.

The Department's analysis of these comments revealed the following points:

(1) Both companies and unions strongly encouraged DOL to publish interpretive regulations that explain how WARN will be implemented and clarify WARN provisions they find ambiguous.

(2) The commenters also requested that DOL address or define a number of specific items including:

(a) The earliest date notice would be required to be given;

(b) Who is affected by an employment loss (e.g., part-time workers and incumbents with seniority who displace other workers);

(c) The exemption of temporary workers and temporary facilities;

(d) The terms "single site of employment," "facility" and "operating unit," which are important terms used in determining coverage of plant closings and mass layoffs;

(e) The allowable bases for reduced advance notice under the Act for companies encountering unforeseeable businesses circumstances.

A question has arisen regarding the meaning of the February 4, 1989, effective date of WARN. Section 3(a) of WARN states "an employer shall not order a plant closing or mass layoff until the end of a 60-day period after the employer serves written notice * * *."

Some commenters have interpreted this language to require that employers must provide full 60-day notice in advance of planned plant closings or mass layoffs occurring on or after the effective date, i.e., any actions planned to occur on or after February 4, 1989 would be subject to the full 60-day notice requirement, requiring notice as early as December 6, 1988.

Another interpretation that has been offered is that the effective date provision requires notice to be given only for actions which will occur 60 days after Fedruary 4, 1989, i.e., notice would be required only for actions occurring on or after April 5, 1989.

Still a third possible interpretation is that an employer must give such advance notice as is possible for all covered employment actions that occur on or after February 4, 1989, e.g., for a layoff occurring on March 6, 1989, the employer would be required to provide 30 days' notice.

DOL has received comments supporting each of these interpretations. DOL agrees with commenters that a strong case can be made to support the second and third interpretations, but DOL also has determined that there are substantial arguments to support the first interpretation. DOL has been informed in a comment submitted by four of the Congressional sponsors of WARN that they intended WARN to require 60 days' notice for all plant closings that occur on or after the effective date.

DOL views the effective date provision to mean that covered employment actions which occur on or after February 4, 1989 are subject to the notice requirements of WARN. That may mean that notice is required to be given as early as December 6, 1988. DOL

believes that it would not be responsible to advise employers not to give notice during a period (December 6, 1988—April 4, 1989) when notice may later be determined to have been required. Employers are, therefore, best advised to proceed conservatively and to provide notice in view of this possible liability.

DOL is therefore issuing separately in the **Federal Register** an interim interpretative rule so that potentially affected employers will know in advance of December 6, 1988, how to comply with the law.

DOL agrees with commenters who have pointed out that the publication of this regulation only a few days before the notice requirement may become effective may not provide sufficient advance notice to enable some employers to fully comply with all the regulatory provisions. DOL has alerted employers to the possibility that notice may be required to be given as of December 6, 1988 in both the September 16 and October 28 **Federal Register** Notices. Nonetheless, DOL recognizes that the details of these regulations have not been generally known. DOL therefore believes that in the early days of WARN implementation substantial compliance with regulatory requirements should be sufficient to comply with WARN.

It should be noted that the requirements of WARN do not apply to employment actions that are completed prior to February 4, 1989.

Issues Under the Act

On October 28, 1988, the Department published the WARN Discussion Paper in the **Federal Register** and solicited comments. This paper reviewed sections 2, 3, 4 and 11 of the statute, discussing questions raised in comments on the September 16, 1988 Notice and issues addressed in the legislative history.

DOL has received comments in response to the October 28 Notice from employer associations, employers, labor unions, law firms and a State governmental agency. A letter of comment was submitted by four members of Congress who were legislative sponsors. DOL has reviewed and considered the comments in drafting its regulations. Because of the short time frames for developing these regulations, DOL will continue to consider these comments and others that may be received in response to the October 28 Notice, as well as those received in response to this document, in the preparation of the final WARN regulations.

Following is a section-by-section analysis of the regulations and the comments.

(1) Organization of Regulations

The Department has written and presented the WARN regulations so they will be understandable, and offer guidance to readers in the business and labor communities. Issues are discussed in their logical sequence, in an effort to easily convey the intent of the Act and employers' responsibilities.

(2) Scope and Purpose

The scope of these regulations is basic: Section 2 of the Act provides necessary definitions and exclusions; Section 3 describes the content and service of notice, sets forth the legal bases for providing reduced notice or extending a 6-month layoff period, and reviews employment losses over a 90-day period to determine whether some employers are covered by WARN requirements; and Section 4 outlines two possible exemptions to coverage of plant closings and mass layoffs.

The Department decided not to regulate in any way regarding enforcement and civil penalties (i.e., section 5 of the statute) since the courts alone have the authority to enforce WARN, and are therefore best situated to interpret these important provisions of WARN.

The regulations note that WARN does not supersede or supplant collective bargaining agreements which provide additional rights. DOL is interested in receiving comments on: (1) whether and to what extent the final regulations might provide that collective bargaining agreements which provide for the terms different from terms incorporated into the WARN regulations may be used to legitimate alternative methods of compliance with WARN; and (2) whether such a provision should apply only to collective bargaining agreements that are entered into after the effective date of WARN or whether agreements that predate WARN also should be included. Obviously, the length of the notice period cannot be reduced by agreement, but DOL is interested in receiving comments on other definitions or requirements which might properly be varied in collective bargaining agreements: for example, the definitions of single site of employment, facility or operating unit or the content of notice.

(3) Definitions

The definition of employer presented in the Act makes it clear that all business enterprises of the stated size are covered. Because of the use of the term "business enterprise", DOL concludes that regular Federal, State, and local government public services are outside the purview of WARN. Commenters have sought clarification regarding the treatment of private nonprofit entities; quasi-public corporations, authorities, institutions of higher learning, hospitals, and public utilities. The Congressional commenters stated that the intent of WARN was to include private nonprofit organizations and "public and quasi-public entities operating in a 'commercial' context." To the extent such entities engage in "business" (i.e., take part in a commercial or industrial enterprise; supply a service or good on a mercantile basis; or provide independent management of public assets, raising revenue and making desired investments), such entities appear to meet the definition of "business enterprise" in the absence of specific legislative history on this point.

Generally, DOL has developed its definition of the term "employer" in accordance with the comments; it has included nonprofit organizations. In the final rule, DOL is considering including some public agencies within the definition. DOL does not, however, intend to define covered public enterprises in terms of the traditional/non-traditional governmental functions distinction that was rejected by the Supreme Court as unworkable in *Garcia v. San Antonio Metropolitan Transit Authority*, 469 U.S. 528 (1984). Instead, DOL is considering defining which public entities are covered in terms of an organizational test, i.e., whether the entity is managed by a separately organized governing board with independent authority to manage its personnel and assets. DOL believes this test will cover the entities intended to be covered and will have the virtue of relative ease of application. DOL specifically invites comments on whether such entities should be covered and whether this test is an appropriate basis for defining coverage.

DOL agrees with commenters that, as a general rule, separately incorporated or organized entities should be treated as separate employers. It must be recognized, however, that there are cases where related entities are not effectively separate and must be treated as one entity for WARN purposes. DOL has adopted standard tests recognized by the courts in the context of a variety of laws for determining whether a subsidiary or an independent contractor is sufficiently independent from its parent to be treated separately.

In the application of the tests, the courts look to the totality of the

circumstances and each determination is highly fact-specific. Given the complex nature of the determination, § 639.3(a), which defines "employer", sets out a brief description of a few of the more important factors used in determining subsidiary or independent contractor status.

The regulations set down definitions for "plant closing", "mass layoff" and "representative" as presented in WARN.

Commenters asked the Department to clarify the meaning of "affected employees" in the Act. Since the statute includes in the term those employees who can reasonably be expected to experience an employment loss, it is clear the impact on the employee roster of bumping, seniority, and persons with multiple job skills requires consideration.

A number of commenters discussed the difficulty of determining 60 days in advance which employees will be bumped in some of the complex bumping procedures that exist in various industries. Most of these commenters referred to collectively bargained bumping procedures in which case notice goes to union(s), not to individual workers (section 3(a)(1) of WARN). One commenter took the opposite view and suggested that employers are well aware of who will be affected by bumping systems and should be required to notify all potentially affected employees. DOL believes that, in those cases of non-bargained, employer-developed seniority or bumping systems to which notice to individual workers applies, there are real complexities which militate against imposing an absolute requirement that notice be given to all potentially affected employees regardless of the complexity of the bumping system. DOL is persuaded that there are factors, including the possible non-exercise of bumping rights by an intermediate bumpee and the difficulty of predicting a bumping path where employees have several options among positions or lines of progression into which they can bump, which make it difficult to predict who will finally be affected as a result of a plant closing or mass layoff. Additionally, DOL believes that in some cases adoption of an absolute notice rule would contravene the intent of WARN to provide notice to those workers who will be affected by dislocation events and might lead to unnecessarily broad mass termination or blanket notices which Congress clearly intended should not be utilized. DOL has, therefore, adopted a reasonable foreseeability test in defining affected employees.

The purpose of WARN to provide notice to workers so alternative employment or necessary training can be obtained on a timely basis applies equally to white-collar and managerial employees as well as to employees in the skilled trades and other blue-collar occupations. Therefore, the Department includes managerial and supervisory workers as "affected employees". The definition also addresses questions raised regarding consultants and contract employees, excluding them since they are not legally employees of the businesses to which they are assigned.

The definition of "employment loss" and exclusions from employment loss in the regulations closely follow the language of the statute. Commenters questioned whether an employment loss occurs when there is job loss but no loss of income. Some commenters gave examples of programs under which an employee retains full pay, benefits and other rights although separated from a particular job and suggested that the definition of employment loss should take account of such programs. DOL agrees and has developed the definition of employment loss to take account of these employer initiatives. On the other hand, DOL does not agree that total or partial income replacement programs where an employee does not retain full employment status, such as supplemental unemployment benefits and severance pay, should affect the definition of employment loss, and has developed the definition accordingly.

On a related matter, commenters have asked that DOL discuss in its regulations arrangements where employers have reassigned workers after providing the notice required by WARN, prior to the date of employment loss. Reassignment could be to training, paid leave status, on job-seeking activities. DOL agrees that such reassignments may be possible where not prohibited by contract, but does not wish to endorse practices which could undermine the objectives of WARN that both workers and their communities be provided notice in advance of a plant closing. Accordingly, DOL is specifically requesting comments on this issue for consideration prior to issuing a final rule.

"Unit of local government" is defined in the regulations as in the Act. Commenters asked what taxes should be considered in determining which unit of local government should receive notice. The logical solution is for a firm to aggregate all taxes paid to a single unit of local government.

The definition of "part-time employee" in the regulations follows the statutory language. Some commenters were unsure whether regular full-time employees with employment during less than 6 of the last 12 months would be considered part-time or full-time employees. The statute specifically states that such employees are part-time and makes no specific exemption for employees newly hired for full-time, permanent employment.

Other commenters were unsure as to the status of employees who are traditionally understood to be "seasonal" and short-term, yet are hired on a recurring basis. According to the Act, if these employees work for less than 6 of the past 12 months, they are part-time employees. Such employees would, in most cases, also fall under the "temporary facility/limited employment" exemption in section 4(a). Further, "seasonal" employees who work longer than 6 months may also fall under the "limited employment" exemption.

In response to commenters' requests for guidelines in determining the period used in calculating whether a worker has worked "an average of fewer than 20 hours per week," DOL has established that the shorter of the time the worker has been employed or the most recent 90 days should be used.

Several commenters requested clarification of the term "single site of employment." The regulations provide a definition which is drawn from the April 1988 Conference Report on H.R. 3.

As a general rule, a geographic connection or proximity is required to define "single site of employment." Even where several distinct operations are performed at a geographically connected site, that plant will be counted as a single site of employment. The facilities or units that house the separate functions may also be "facilities or operating units" within the plant which are also used to measure the occurrence of a covered employment loss.

DOL also recognizes that in some limited cases geographically separate sites may still be considered a single site of employment because of an inextricable operational connection. DOL intends this exception to be a narrow one to cover those cases where separate buildings are used for the same purpose and share the same staff and equipment, or other unusual organizational situations exist.

DOL has adopted common sense definitions of the terms "facility" and "operating unit" within a single site of employment. These terms are important for determining whether a plant closing

has occurred. DOL has defined these terms in a manner which attempts to define physically and operationally distinct entities for purposes of determining whether a plant closing, the shutdown of a distinct entity, has occurred. Generally, commenters do not appear to disagree with the definitions adopted. After receiving and reviewing specific comments regarding the "plant closing" definition, DOL notes, that the closing of a facility or operating unit at which fewer than 50 workers are employed does not, under the statute, become a plant closing if additional employees in an unrelated unit are also laid off. An example would be a plant of 300 workers, where an operating unit of 35 workers is closed. As a result of that closing, 15 other workers in other parts of the plant lose their jobs. Advance notice is not required under these circumstances. DOL solicits comment on this example, and related issues.

The definition of operating unit can be applied through the following example. A 24-hour store eliminating its night shift would not carry out a closing of an operating unit, but the elimination of all warehouse and stock workers on all three shifts would constitute the closing of an operating unit if 50 or more workers were affected.

DOL also has provided definitions of the terms "State dislocated worker unit" and "State."

(4) Who Must Give Notice

In response to DOL's discussion paper, several commenters pointed out that WARN creates an absolute division of responsibility for giving notice between a buyer and seller of a business; the seller is liable to give notice up to and including the date (time) of sale and the buyer is responsible thereafter. DOL agrees and has developed its regulations to reflect that view. Thus, at all times one of the parties to the transaction is responsible for giving notice. The Department's regulations offer guidance to employers anticipating a sale or purchase transaction to avoid confusion regarding service of notice and liability under WARN, by suggesting that each party's responsibility with respect to these items be covered in the contract of sale.

A number of commenters objected to DOL's use of the word "tenure" in the discussion paper when reviewing the meaning of the last sentence of section 2(b)(1) which provides that employees of the seller as of the effective date of the sale become employees of the buyer immediately thereafter. The commenters stated that this provision should be interpreted solely to relate to the responsibility to provide notice. DOL generally agrees and has not used the term "tenure" in the regulations. DOL agrees that Congress did not intend to affect other questions relating to employment status that are unrelated to the notice requirements of WARN. DOL notes, however, that for WARN purposes this provision does prevent a full-time employee of the seller from being classified as a part-time employee of the buyer because the employee has not worked for the buyer for 6 months.

(5) When Must Notice Be Given

To aid employers in complying with the Act and issuing notice when it is due, DOL suggests that the employers look ahead and behind, not only 30 days, but 90 days (section 3(d)) in determining whether planned employment actions will trigger notice requirements. By doing this, an employer can look at its planned employment actions, in the broader framework of the Act, and reduce potential liability for failure to give notice when thresholds have been met. DOL reminds employers that, in the case of the section 3(d) 90-day aggregate, notice is not required if the employer can demonstrate that the reductions were the result of "separate and distinct actions and causes and are not an attempt to evade" the Act.

In response to inquiries from commenters, DOL has pointed out a practical and reasonable method for measuring the number of employees in a business enterprise for the purpose of determining whether an employer is covered by WARN, i.e., has sufficient numbers of workers or hours so that WARN applies, and, if so, whether a particular employment action is a plant closing or mass layoff. The obvious point in time at which an enterprise's employment level should be measured is the date the first notice is required to be given. Because this point of measurement is closest to the time of the employement action, a "snapshot" on this date is usually most reflective of the firm's employment status, and thus of its coverage under WARN. There are, however, instances in which this method of employment measurement is not most indicative of a firm's true employment level and thus not appropriate for determining WARN coverage. The use of the number of employees on a more representative alternative date, or the use of an average employment level calculated over a recent period of time, may be appropriate where employment levels have surged up or down for temporary, and thus unrepresentative, reasons. An example would be the detailing of a large group of employees to a particular employment site for a short period of time.

For the purpose of exclusion from the definition of employment loss under section 2(b)(2), DOL has defined the term "transfer." Consistent with direction on transfers found in the June 2, 1987, Senate Committee Report, the new job being offered must be substantially equivalent in terms of pay and working conditions. By applying this definition, the term transfer, as used in the statute, will indeed refer to a transfer, and not a demotion. Some commenters suggested that the definition of reasonable commuting distance or comparable employment be made sufficiently flexible to accommodate the different provisions of collective bargaining agreements. DOL agrees and points out that under section 6 of the Act and under § 639.1(f) of the regulations provision is made for assuring that WARN does not supersede collective bargaining agreements which provide different but not inferior rights in areas such as these.

Section 639.5(c) of the regulations clarifies that work may fall under the temporary employment exemption in section 4(1) of the Act, if the workers understood the temporary nature of the employment at the time of hire. Since such an understanding could arise in a variety of ways, the regulations specify reference to employment contracts or local or industry employment practices, but leave the burden of proof to employers. A distinction is made between temporary work and long-term or continuous employment in construction and agriculture.

A number of commenters argued that the regulations should provide a blanket exemption to certain industries where the majority of workers may be hired for particular projects or seasonal, recurring work. DOL does not agree that a blanket exemption for any industry is appropriate since DOL cannot find that *all* the employees of any industry are necessarily hired only for particular projects. DOL believes, however, that the regulations define temporary facility and particular project in a manner which will not subject industries in which employees are generally hired for a particular project to any unforeseen liability as long as there are clear understandings about the nature of their employment.

Section 639.5(d) of the regulations addresses the strikes and lockouts exemption in section 4(2) of the Act. In the discussion paper DOL suggested that the exemption effectively does not apply to strikes since it is difficult to understand how a strike by employees constitutes a plant closing or mass layoff, an action solely within the power

of the employer. A number of commenters disagreed with this suggestion, although none clarified how a strike can constitute a plant closing or mass layoff. DOL agrees that a strike can cause a plant closing or mass layoff and has, therefore, included strikes within the regulatory provision.

The legislative history reveals the clear intent of Congress to restrict the exemption to actions which occur in the normal course of collective bargaining. The regulations reflect this intent and emphasize that the exemption does not apply where there is an attempt to evade the Act. Commenters also questioned whether employment loss suffered by non-striking employees as a direct or indirect result of a strike entitles them to notice, especially when their loss of employment cannot be predicted 60 days in advance. This situation is specifically addressed in the legislative history. The intent to provide advance notice whenever workers are involuntarily unemployed due to a plant closing or mass layoff may extend to these workers. DOL is considering, in the final regulations, therefore, requiring notice to non-striking employees at the employment site that is directly affected by the strike or lockout, but clarifying that reduced notice under the unforeseeable business circumstances provision may apply to plant closings or mass layoffs that indirectly result from strikes or lockouts.

DOL recognizes that the entire area of strikes and lockouts as they relate to the provisions of WARN is a complex one involving a variety of issues that arise under the National Labor Relations Act. While DOL does not intend to promulgate regulations which intrude into these matters, DOL does recognize that additional clarity may be possible in the final regulations and, therefore, invites additional comments on these issues.

(6) Who Must Receive Notice

Notice must be given to affected employees' representatives, directly to unrepresented affected employees, to the State dislocated worker unit, and to the chief elected official of the unit of local government. Section 639.6 of the regulations clarifies who is to receive notice in each case. It may be advisable to provide notice to the level of the union organization which is closest to the workers and which has the ability to act to notify individual workers. Thus, while the regulations specify that the notice is to be served upon the chief elected officer of the exclusive representative or bargaining agent, it is recommended that a copy also be given to the local union official.

Affected employees entitled to notice include part-time as well as full-time employees, since the law does not specify otherwise. In addition, where bumping rights apply, employees who may reasonably be expected to experience an employment loss due to application of bumping rights are entitled to notice as well as incumbents of positions to be directly affected. This is borne out by the legislative history. It is clear, however, that such factors as voluntary separations, early retirement and transfers which occur after notice is given will change which employees actually experience employment loss. In recognition of such non-predictable factors, the regulations state that notice is to be given to the extent that the affected workers can be identified.

States are required, under the Economic Dislocation and Worker Adjustment Assistance Act (EDWAA), to have operating dislocated worker units as of July 1, 1989. To meet the requirement for notice to these units prior to their creation or designation by State governors and to permit States to set in motion existing worker adjustment assistance programs, the regulations specify that notice served upon the State govenor constitutes service upon the State dislocated worker unit.

Questions were raised about the identity of the chief elected official of a unit of local government, given the variety of local government structures. In particular, clarification was sought in the situation where local government is run by an elected board. The regulations clarify this situation by providing that the chairperson of the elected board is to receive notice. The regulations also provide that all local taxes should be aggregated for purposes of determining which unit of local government to notify when a plant is located within two or more such units.

(7) Content of Notice

A number of commenters argued that the discussion paper imposed too many requirements on employers and went beyond the requirements of the Act. While the Act does not enumerate specific elements which should be included in the advance written notice of an order for a plant closing or a mass layoff, the purpose of providing notice to the parties mentioned above is to allow each of them to take appropriate action to facilitate training, employment or other adjustments for affected employees. The content of notice to each party, specified in § 639.7 of the regulations, is designed to provide information necessary for each of them to take responsible action.

Commenters pointed out that specific requirements for identifying the date on which a layoff or termination is to occur could interfere with their collectively bargained procedures for notice to employees or their unions. DOL agrees that it is not the intent of WARN to interfere with such processes and has attempted to draft the notice content requirements to provide for some flexibility where notice is provided well in advance of WARN's 60-day notice period. DOL also agrees with one commenter that in plant closing situations where such long-term notice is given that otherwise complies with these regulations but where notice of a definite termination date is not possible, the giving of a second notice specifying a termination date 60 days in advance of that date constitutes full compliance with WARN.

It is clear from comments that there are circumstances in which a closing or layoff will be triggered if a specific event occurs, but it is not known at the time 60-day notice would be required whether that specific event will take place. It would be consistent with the intent of the Act to provide notice in such a situation. However, since the eventual outcome is not definite, the regulations stipulate that the notice must clearly identify its conditional nature and the circumstances on which it is based.

(8) How Is Notice To Be Served

Commenters asked whether the parties listed in the Act must have written notice in hand 60 days before the separation occurs or whether the employer could mail the notice, insert the notice in affected workers' pay envelopes, etc., 60 days prior to the employment action. According to the legislative history, the first option is the correction interpretation. Any method of transmittal that is designed to ensure this end, i.e., to have the notice in hand 60 days in advance, would satisfy the intent of the Act. Additionally, the floor debates indicated that a ticketed notice fails to meet the requirements of WARN.

(9) When May Notice Be Given Less Than 60 Days In Advance

The three conditions allowing for a reduction of the 60-day period mentioned in the regulations are set forth in the statute. While commenters pointed to several floor comments which indicated a less restrictive approach to applying reduced notice provisions, the totality of the legislative history indicates the narrow nature of these bases as well as the requirement that the employer must satisfactorily prove

the necessity of a reduced notice period, if challenged. To ensure that the employees or their representative(s), the State dislocated worker unit, and the chief elected official of the unit of local government receive the information needed to help the workers find a new job or receive appropriate training, a brief statement of the basis for reducing the notification period should accompany the other elements required in the notice under the regulations. As expressed in the statute, the employer must give as much notice as is practicable.

The language of the "faltering company," "unforeseeable business circumstances," and "natural disaster" bases outlined in the regulations to a great extent reiterates relevant portions of the April 1988 Conference Report's text.

Commenters asked for clarification of when business circumstances are not reasonably foreseeable. In an effort to provide guidance and address their concerns, the regulations state that the employer must exercise such commercially reasonable business judgment as would a similarly situated employer in predicting the demands of a particular market. The employer is not, however, required to predict general economic conditions that may impact the demand for his goods or services.

Commenters also suggested that DOL list examples of reasonably unforeseeable business circumstances in the regulations. While DOL agrees with the commenters that such factors as strikes or lockouts elsewhere, loss of contracts, unexpected major market downturns, fires and closures ordered by government agencies all may constitute unforeseeable business circumstances, at this time DOL does not see the utility of including such a list in the regulations. DOL is willing to consider including in the final regulations examples which illustrate principles applicable to employers generally. DOL therefore invites additional comments on examples that should be included in regulations and the circumstances in which they might apply.

In the case of the "natural disaster" exception, the floor debates demonstrate congressional intent that an employment action that was a direct result would fall under this exception, while one that was caused as an indirect result of a natural disaster would not be covered. The Department, however, understands that "indirect" plant closings or mass layoffs may not be known 60 days in advance and, thus, the "unforeseeable business circumstance" provision may prove applicable.

(10) When May Notice Be Extended

Section 639.10 covers the length of time after the date specified in the notice for which the notice is valid. To ensure that the parties who are due notice have the most current and helpful data available and, thus, can make appropriate plans, additional notice is due if the original date is not met. If the postponement is for less than 60 days, the notice need only contain a reference to the earlier notice, the date to which the planned action is postponed, and the reasons for the postponement. This type of notice will provide the parties with needed information and be less burdensome to the employer. If the postponement extends for 60 days or more, the additional notice should be treated as new notice and meet the specified requirements.

Several commenters disagreed with this interpretation, arguing that there is no specific statutory requirement to support it, that a 180-day period is more in keeping with the rolling 90-day aggregation period for determining employment loss under section 3(d) and that if any "secondary" notice is required posting general notice on a bulletin board should be sufficient. DOL believes that the approach it has adopted is most consistent with congressional intent in two important respects. First, it furthers the congressional purpose that notice to workers provide the workers and governmental authorities with specific information in order to react to a dislocation event and to obtain new employment or training to minimize the effects of that event. If workers are not informed of changes in planned termination dates their planning will be disrupted and either they will run the risk of losing other opportunities or the employer will lose employees who it may need to carry on its operations. Secondly, DOL's approach is in accord with Congress' express intent to prohibit rolling notice.

In the legislative history, the floor debates stipulate that rolling notice is *not* acceptable, and, accordingly, routine periodic notice of a possible plant closing or mass layoff is not permitted under the regulations.

Interim Interpretative Rule

The Department also is requesting comments on the interim interpretative rule (published separately in the **Federal Register**) for 60 days after its publication, and plans to respond to those comments and publish a final rule at a later date. The extended comment period is provided so that the many parties interested in the final rule will have a full opportunity to comment before final regulations are published.

As noted in the separately published interim interpretative rule, it expires on April 1, 1989. By that time, DOL expects to have published and effective a final rule.

Regulatory Impact

Insofar as is possible, DOL intends to perform an analysis of the impact of the Act and the final rule, to aid the General Accounting Office in its function of reporting to Congress on the Act.

Paperwork Reduction Act

Information collection requirements in this proposed rule will be submitted to the Office of Management and Budget for review pursuant to the Paperwork Reduction Act.

Comments on the information collection requirements should be sent to the Office of Management and Budget, New Executive Office Building, Room 3001, Washington, DC 20503, Attention: Desk Officer for Employment and Training Administration.

List of Subjects in 20 CFR Part 639

Employment, Labor, Labor management relations, Labor unions, Penalties.

Proposed Rule

Accordingly, it is proposed that Part 639 of Chapter V of Title 20, Code of Federal Regulations, be revised to read as follows:

PART 639—WORKER ADJUSTMENT AND RETRAINING NOTIFICATION

Sec.

639.1 Purpose and scope.
639.2 What does WARN require?
639.3 Definitions.
639.4 Who must give notice?
639.5 When must notice be given?
639.6 Who must receive notice?
639.7 What must the notice contain?
639.8 How is the notice served?
639.9 When may notice be given less than 60 days in advance?
639.10 When may notice be extended?

Authority: 29 U.S.C. 2107(a).

§ 639.1 Purpose and scope.

(a) *Purpose of WARN.* The Worker Adjustment and Retraining Notification Act (WARN or the Act) provides protection to workers, their families and communities by requiring employers to provide notification 60 calendar days in advance of plant closings and mass layoffs. Advance notice provides workers and their families some transition time to adjust to the

prospective loss of employment, to seek and obtain alternative jobs and, if necessary, to enter skill training or retraining that will allow these workers to successfully compete in the job market. WARN also provides for notice to State dislocated worker units so that dislocated worker assistance can be promptly provided.

(b) *Scope of these regulations.* These regulations establish basic definitions and rules for giving notice, implementing the provisions of WARN. The Department's objective is to establish clear principles and broad guidelines which can be applied in specific circumstances. However, the Department recognizes that Federal rulemaking cannot address the multitude of industry and company-specific situations in which advance notice will be given.

(c) *Notice encouraged where not required.* Section 7 of the Act states: "It is the sense of Congress that an employer who is not required to comply with the notice requirements of section 3 should, to the extent possible, provide notice to its employees about a proposal to close a plant or permanently reduce its workforce."

(d) *WARN enforcement.* Enforcement of WARN will be through the courts, as provided in section 5 of the statute. Employees, their representatives and units of local government may initiate civil actions against employers believed to be in violation of section 3 of the Act. The Department of Labor has no legal standing in any enforcement action and, resultantly, will not be in a position to issue advisory opinions affecting specific cases. These regulations are interpretive, and are not binding upon the courts. The Department will provide assistance in understanding these regulations and may revise them from time to time as may be necessary.

(e) *Notice in ambiguous situations.* It is civically desirable, it would appear to be good business practice for an employer to provide advance notice to its workers or unions, local government and the State when terminating a significant number of employees. In practical terms, there are some questions and ambiguities of interpretation inherent in the application of WARN to business practices in the market economy that cannot be addressed in these regulations. It is therefore prudent for employers to weigh the desirability of advance notice against the possibility of expensive and time-consuming litigation to resolve disputes where notice has not been given.

(f) *Coordination with job placement and retraining programs.* The Department, through these regulations and through the Trade Adjustment Assistance Program (TAA) and Economic Dislocation and Worker Adjustment Assistance Act (EDWAA) regulations, encourages maximum coordination of the actions and activities of these programs to assure that the negative impact of dislocation on workers is lessened to the extent possible. By providing for notice to the State dislocated worker unit, WARN notice begins the process of assisting workers who will be dislocated.

(g) *WARN not to supersede other laws and contracts.* The provisions of WARN do not supersede any State laws or collective bargaining agreements that provide for additional notice or rights and remedies. If such law or agreement provides for a longer notice period, WARN notice shall run concurrently with that additional notice period.

§ 639.2 What does WARN require?

WARN requires employers who are planning a plant closing or a mass layoff to give affected employees at least 60 days' notice of such an employment action. While the 60-day period is the minimum for advance notice, this provision is not intended to discourage employers from voluntarily providing longer periods of advance notice. Not all plant closings and layoffs are subject to the Act, and certain employment thresholds must be reached before the Act applies. The Act sets out specific exemptions, and provides for a reduced period of notification in particular circumstances. Damages and civil penalties can be assessed against employers who violate the Act.

§ 639.3 Definitions.

(a) *Employer.* (1) The term "employer" means any business enterprise that employs (i) 100 or more employees, excluding part-time employees; or (ii) 100 or more employees, including part-time employees, who in the aggregate work at least 4,000 hours per week, exclusive of hours of overtime. Workers on temporary layoff who have a reasonable expectation of recall should be counted as employees. The term "employer" includes non-profit organizations of the requisite size. Regular Federal, State, and local government public services are not covered.

(2) Independent contractors and subsidiaries which are wholly or partially owned by a parent company will be treated as separate employers or as a part of the parent or contracting company depending upon the degree of their independence from the parent. Some of the factors to be considered in making this determination are (i) common ownership, (ii) common directors and/or officers, (iii) de facto exercise of control, (iv) unity of personnel policies emanating from a common source, and (v) the dependency of operations.

(3) An employer may have one or more sites of employment under common ownership or control. An example would be a major auto maker which has dozens of automobile plants throughout the country. Each plant would be considered a site of employment, but there is only one "employer", the auto maker.

(b) *Plant closing.* The term "plant closing" means the permanent or temporary shutdown of a "single site of employment", or one or more "facilities or operating units" within a single site of employment, if the shutdown results in an "employment loss" during *any 30-day period* at the single site of employment for *50 or more* employees, excluding any part-time employees. An employment action that results in the effective cessation of production or the work performed by a unit, even if a few employees remain, is a shutdown. A "temporary shutdown" triggers the notice requirement only if there are a sufficient number of terminations, layoffs exceeding 6 months, or reductions in hours of work as specified under the definition of "employment loss."

(c) *Mass layoff.* The term "mass layoff" means a reduction in force which first, is not the result of a plant closing, and second, results in an employment loss at the single site of employment during *any 30-day period* for:

(1) *At least 33 percent* of the employees, excluding part-time employees, and

(2) *At least 50 employees,* excluding part-time employees.

Where 500 or more employees are affected, the 33% requirement does not apply, and notice is required if the other criteria are met. Plant closings, which can be triggered by the termination of a smaller number of workers than a mass layoff, involve the shutdown of one or more distinct units within a single site. A mass layoff involves employment loss, regardless of whether one or more units are shut down at the site.

(d) *Representative.* The term "representative" means an exclusive representative of employees within the meaning of section 9(a) or 8(f) of the National Labor Relations Act or section 2 of the Railway Labor Act.

(e) *Affected employees.* The term "affected employees" means employees who may reasonably be expected to

experience an employment loss as a consequence of a proposed plant closing or mass layoff by their employer. This includes employee who will likely lose their jobs because of bumping rights or other factors, to the extent that such workers can be identified at the time notice is required to be given. The term "affected employees" includes managerial and supervisory employees, but does not include business partners. Consultant or contract employees who have a separate employment relationship with another employer and are paid by that other employer, or who are self-employed are not "affected employees" of the business to which they are assigned. In addition, for purposes of determining whether coverage thresholds are met, only incumbent workers in jobs being eliminated are counted.

(f) *Employment loss.* (1) The term "employment loss" means (i) an employment termination, other than a discharge for cause, voluntary departure, or retirement, (ii) a layoff exceeding 6 months, or (iii) a reduction in hours of work of individual employees of more than 50% during each month of any 6-month period.

(2) Where a termination or a layoff (see paragraphs (f)(1) (i) and (ii) of this section) is involved, an employment loss occurs upon the loss of full employment status. "Full employment status" means full pay, benefits, and other employment entitlements. Payment of normal termination or separation benefits otherwise due, such as severance pay and supplemental unemployment benefits, does not serve to continue full employment status.

(3) Employees who are transferred to employer-sponsored programs in which they retain full pay, benefits and other employment entitlements do not suffer an employment loss.

(4) An employee is not considered to have experienced an employment loss if the closing or layoff is the result of the relocation or consolidation of part or all of the employer's business and, prior to the closing or layoff—

(i) The employer offers to transfer the employee to a different site of employment within a reasonable commuting distance with no more than a 6-month break in employment, or

(ii) The employer offers to transfer the employee to any other site of employment regardless of distance with no more than a 6-month break in employment, and the employee accepts within 30 days of the offer or of the closing or layoff, whichever is later.

(g) *Unit of local government.* The term "unit of local government" means any general purpose political subdivisions of a State, which has the power to levy taxes and spend funds as well as general corporate and police powers. When a covered employment site is located in more than one unit of local government, the employer must give notice to the unit to which it determines it paid the highest taxes for the year preceding the year for which the determination is made. All local taxes paid should be aggregated for this purpose.

(h) *Part-time employee.* The term "part-time" employee means an employee who is employed for an average of fewer than 20 hours per week or who has been employed for fewer than 6 of the 12 months preceding the date on which notice is required, including workers who work full-time. This term includes workers who would traditionally be understood as short-term, "seasonal" employees. The period to be used for calculating whether a worker has worked "an average of fewer than 20 hours per week" is the shorter of the actual time the worker has been employed or the most recent 90 days.

(i) *Single site of employment.* (1) A single site of employment can refer to either a single location or a group of contiguous locations. Groups of structures which form a campus or industrial park, or separate facilities across the street from one another, may be considered a single site of employment.

(2) Separate buildings or areas which are not directly connected or in immediate proximity may be considered a single site of employment if they are in reasonable geographic proximity, used for the same purpose, and share the same staff and equipment. An example is an employer who manages a number of warehouses in an area but who regularly shifts or rotates the same employees from one building to another.

(3) Non-contiguous sites in the same geographic area which do not share the same staff or operational purpose should not be considered a single site. For example, assembly plants which are located on opposite sides of a town and which are managed by a single employer may be considered separate sites if they employ different workers.

(4) The term "single site of employment" may also apply to unusual organizational situations where the above criteria do not reasonably apply.

(j) *Facility or operating unit.* The term "facility" refers to a building or buildings, and the term "operating unit" refers to a product, task or specific work function within or across facilities at the single site. For workers whose primary duties require travel from point to point (e.g., railroad workers, bus drivers, salespersons), the facility or operating unit to which they are assigned as their home base will define the unit in which they are covered for WARN purposes.

(k) *State dislocated worker unit.* The term "State dislocated worker unit" means a unit to be designated or created in each State by the Governor under Title III of the Job Training Partnership Act, as amended by the Economic Dislocation and Worker Adjustment Assistance Act.

(l) *State.* For the purpose of WARN, the term "State" includes the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, and the U.S. Virgin Islands.

§ 639.4 Who must give notice?

Section 3(a) of WARN states that "an employer shall not order a plant closing or mass layoff until the end of a 60-day period after the employer serves written notice of such an order * * *." Therefore, an employer who is anticipating carrying out a plant closing or mass layoff is required to give notice to affected employees or their representative(s), the State dislocated worker unit and the chief elected official of a unit of local government. (See definitions in § 639.3 of this part.)

(a) It is the responsibility of the employer to decide the most appropriate person within the employer's organization to prepare and deliver the notice to affected employees or their representative(s), the State dislocated worker unit and the chief elected official of a unit of local government. In most instances, this may be the local site plant manager, the local personnel director or a labor relations officer.

(b) Consistent with section 3(c) of WARN, an employer who has previously carried out a short-term layoff (less than 6 months) which is being extended beyond 6 months is required to give notice when it becomes reasonably foreseeable that the extension is required. Section 3(c) requires that the layoff, at its outset, was announced to be for less than 6 months.

(c) In the case of the sale of part or all of a business, section 2(b)(1) of WARN defines who the "employer" is. The full responsibility to notify any workers whose employment will be terminated as a result of a sale remains with the seller up to and including the effective date (time) of the sale and is then assumed by the buyer. According to the language of the Act, employees are always entitled to notice, i.e., at all times the employer is responsible for providing notice. For purposes of

coverage under WARN, an employee of the seller becomes an employee of the buyer at the time of the sale.

(1) If the seller is made aware of any definite plans on the part of the buyer to carry out a plant closing or mass layoff within 60 days of purchase, the seller may give notice to affected employees as an agent of the buyer, if so empowered. If the seller does not give notice, the buyer is responsible to give notice.

(2) If the buyer has been silent about any plans to reduce the workforce, the buyer is responsible for giving notice to affected employees after the time of sale.

(3) It may be prudent for the buyer and seller to determine the impacts of the sale on workers, and to arrange between them for advance notice to be given to affected employees or their representative(s), if a mass layoff or plant closing is planned. In addition, it may be advisable, considering potential liabilities, for the contract of sale to contain an explicit discussion of these arrangements.

§ 639.5 When must notice be given?

(a) *General rule.* With certain exceptions discussed in paragraphs (b), (c) and (d) of this section and in § 639.9 of this part, notice must be given at least 60 days prior to any planned plant closing or mass layoff, as defined in these regulations. When all employees are not terminated on the same date, the date of the first individual termination within the statutory 30-day period triggers the 60-day notice requirement. The first and each subsequent group of terminees are entitled to a full 60 days' notice. In order for an employer to decide whether issuing notice is required, the employer should:

(1) Look ahead 30 days and behind 30 days to determine whether employment actions both taken and planned will, in the aggregate for any 30-day period, reach the minimum numbers for a plant closing or a mass layoff and thus trigger the notice requirement; and

(2) Consistent with section 3(d) of WARN, look ahead 90 days and behind 90 days to determine whether employment actions both taken and planned which separately may not be of sufficient size to trigger WARN coverage will, in the aggregate for any 90-day period, reach the minimum numbers for a plant closing or a mass layoff and thus trigger the notice requirement. An employer is not, however, required under section 3(d) to give notice if the employer demonstrates that the separate employment losses are the result of separate and distinct actions and causes, and are not an attempt to evade the requirements of WARN.

(3) The point in time at which the number of employees is to be measured for the purpose of determining coverage is the date the first notice is required to be given. If this "snapshot" of the number of employees employed on that date is clearly unrepresentative of the ordinary or average employment level, then a more representative number can be used to determine coverage. Examples of unrepresentative employment levels include cases when the level is near the peak or trough of an employment cycle or when large upward or downward shifts in the number of employees occur around the time notice is to be given. A more representative number may be an average number of employees over a recent period of time or the number of employees on an alternative date which is more representative of normal employment levels.

(b) *Transfers.* (1) Notice is not required in certain cases involving transfers, as described under the definition of "employment loss" at § 639.3(f) of this part.

(2) The term "transfer" means that the new job is substantially equivalent in terms of pay and working conditions. The term "reasonable commuting distance" has the same meaning given to it by the Internal Revenue Service in 26 CFR 1.1119–1(d)(4), i.e., consideration should be given to the following factors: geographic accessibility of the place of work, the quality of the roads, customarily available transportation, and the usual travel time.

(3) In cases where the transfer is beyond reasonable commuting distance, the employer may become liable for failure to give notice if an offer to transfer is not accerpted within 30 days of the offer or of the closing or layoff (whichever is later). Depending upon when the offer of transfer was made by the employer, the normal 60-day notice period may have expired and the plant closing or mass layoff may have occurred. An employer is, therefore, well advised to provide 60-day advance notice as part of the transfer offer.

(c) *Temporary employment.* (1) No notice is required if the closing is of a temporary facility, or if the closing or layoff is the result of the completion of a particular project or undertaking, and the affected employees were hired with the understanding that their employment was limited to the duration of the facility or the project or undertaking.

(2) The employees must clearly understand at the time of hire that their employment is temporary. When such understandings exist will be determined by reference to employment contracts or employment practices of an industry or a locality, but the burden of proof will lie with the employer should questions arise regarding the temporary employment understandings.

(3) Employers in agriculture and construction frequently hire workers for harvesting, processing, or for work on a particular building. Such work may be seasonal but recurring. Such work falls under this exemption if the workers understood at the time they were hired that their work was temporary. In uncertain situations, it may be prudent for employers to clarify temporary work understandings in writing when workers are hired. The same employers may also have permanent employees who work on a variety of jobs and tasks continuously through most of the calendar year. Such employees are not included under this exemption. Giving written notice will not convert permanent employment into tempoary work, making jobs exempt from WARN.

(4) Certain long-term jobs may be related to a specific contract or order. Whether such jobs are tempoary depends on the duration of the job, whether the employee was specifically hired to work only on the job and whether the employer expects that the contract or order is part of a long-term relationship. For example, an aircraft manufacturer hires workers to produce a standard airplane for the U.S. fleet with the expectation that its contract will continue to be renewed during the foreseeable future. The employees of this manufacturer would not be considered temporary.

(d) *Strikes or lockouts.* The statute provides an exemption for strikes and lockouts which occur in the normal course of collective bargaining, and which are not intended to evade the requirements of the Act. A lockout not related to collective bargaining which is intended as subterfuge to evade the Act does not qualify for this exemption. An employer need not give notice when permanently replacing a person who is deemed to be an economic striker under the National Labor Relations Act.

§ 639.6 Who must receive notice?

Section 3(a) of WARN provides for notice to each representative of the affected employees as of the time notice is required to be given or, if there is no such representative at that time, to each affected employee. Notice also must be served on the State dislocated worker unit and the chief elected official of the unit of local government within which such closing or layoff is to occur. Section 2(b)(1) of the Act states that "any person

VOL 53 ISS 233 DE 5 1988 UMI

who is an employee of the seller (other than a part-time employee) as of the effective date of the sale shall be considered an employee of the purchaser immediately after the effective date of the sale." This provision preserves the notice rights of the employees of a business that has been sold.

(a) *Representative(s) of affected employees.* Written notice is to be served upon the chief elected officer of the exclusive representative or bargaining agent of affected employees at the time of the notice. If this person is not the same as the officer of each local union representing affected employees, it is recommended that a copy also be given to the local union official(s).

(b) *Affected Employees.* Notice is to be given not only to incumbents in positions that are to be eliminated, but also to employees who will likely lose their jobs because of bumping rights or other factors, to the extent that such workers can be identified. While part-time employees are not counted in determining whether plant closing or mass layoff thresholds are reached, such workers are due notice.

(c) *State dislocated worker unit.* The Act provides that notice is to be served upon the State disclocated worker unit. Since the States are restructuring to implement training under EDWAA, service of notice upon the State Governor constitutes service upon the State dislocated worker unit until such time as the Governor makes public State procedures for serving notice to this unit.

(d) *Chief elected official of the unit of local government.* The identity of the chief elect official will vary according to the local government structure. In the case of elected boards, the notice is to be served upon the board's chairperson.

§ 639.7 What must the notice contain?

(a) *Notice must be specific.* All notice must be specific. If notice is given conditioned upon the occurrence of an event, i.e., the termination of a contract when negotiations for its renewal are in progress, the notice must clearly identify the fact that the notice is conditional and the circumstances upon which the notice is based.

(b) Notice to each representative of affected employees is to contain:

(1) The name and address of the employment site where the plant closing or mass layoff will occur;

(2) The nature of the planned action, i.e., whether it is a plant closing or a mass layoff, and whether it is expected to be permanent or temporary;

(3) The expected date of the first separation and the anticipated schedule for making separations;

(4) The job titles of positions to be affected, the number of employees in each job classification, and the names of the workers currently holding those jobs;

(5) A statement as to the existence of any applicable bumping rights;

(6) Identification of other representatives, if any, of other affected employees at the same site; and

(7) The name, address, and telephone number of a company official to contact for further information.

In addition, it is recommended that the notice include information on available dislocated worker assistance, and, if the planned action is expected to be temporary, the estimated duration, if known.

(c) Notice to each affected employee who does not have a representative is to be written in language understandable to the employee and is to contain:

(1) The name and address of the employment site where the plant closing or mass layoff will occur;

(2) The nature of the planned action, i.e., whether it is a plant closing or a mass layoff, and whether it is expected to be permanent or temporary;

(3) The expected date when the plant closing or mass layoff will commence and the expected date when the individual employee will be separated;

(4) A statement as to the existence of applicable bumping rights, if any.

In addition, it is recommended that the notice include information on available dislocated worker assistance, and, if the planned action is expected to be temporary, the estimated duration, if known.

(d) Notice to the State dislocated worker unit is to contain:

(1) The name and address of the employment site where the plant closing or mass layoff will occur;

(2) The nature of the planned action, i.e., whether it is a plant closing or a mass layoff;

(3) The expected date of the first separation, and the anticipated schedule for making separations;

(4) The job titles of positions to be affected, and the number of affected employees in each job classification;

(5) A statement as to the existence of any applicable bumping rights;

(6) The name of each union representing affected employees, and the name and address of the chief elected officer of each union; and

(7) The name, address, and telephone number of a company official to contact for further information.

In addition, it is recommended that the notice include a statement of whether the planned action is expected to be permanent or temporary, and, if temporary, its expected duration.

(e) Notice to the chief elected official of the unit of local government, is to contain:

(1) The name and address of the employment site where the plant closing or mass layoff is to occur;

(2) The nature of the planned action, i.e., whether it is a plant closing or a mass layoff;

(3) The expected date of the first separation and the anticipated schedule for making separations;

(4) The job titles of positions to be affected, and the number of effected employees in each job classification;

(5) A statement as to the existence of any applicable bumping rights;

(6) The name of each union representing affected employees, and the name and address of the chief elected officer of each union; and

(7) The name, address, and telephone number of a company official to contact for further information.

In addition, it is recommended that the notice include a statement of whether the planned action is expected to be permanent or temporary, and, if temporary, its expected duration.

§ 639.8 How is notice served?

Any reasonable method of delivery to the parties listed under § 639.6 of this part which is designed to ensure receipt of notice at least 60 days before separation is acceptable (e.g., first class mail, personal delivery with optional signed receipt). In the case of notification directly to affected employees, insertion of notice into pay envelopes is another viable option. A ticketed notice, i.e. preprinted notice regularly included in each employee's pay check or pay envelope, does not meet the requirements of WARN.

§ 639.9 When may notice be given less than 60 days in advance?

Section 3(b) of WARN sets forth three conditions under which the notification period may be reduced to less than 60 days. These three exceptions are to be narrowly construed and the employer bears the burden of proof that conditions for the exceptions have been met. If one of the exceptions is applicable, the employer must give as much notice as is practicable, and must, at the time notice actually is given, provide a brief statement of the reason for reducing the notice period, in addition to the other elements set out in

VOL
53
ISS
233
DE
5
1988
UMI

§ 639.7 at the time notice is actually given.

(a) The exception under section 3(b)(1) of WARN termed "faltering company" applies to plant closings but not to mass layoffs. To qualify for reduced notice under this exception:

(1) An employer must have been actively seeking capital or business at the time that 60-day notice would have been required. That is, the employer must have been seeking financing or refinancing through the arrangement of loans, the issuance of stocks, bonds, or other methods of internally generated financing; or the employer must have been seeking additional money, credit, or business through any other commercially reasonable method. The employer must be able to identify specific actions taken to obtain capital or business.

(2) There must have been a realistic opportunity to obtain the financing or business sought.

(3) The financing or business sought would have been sufficient, if obtained, to have enabled the employer to avoid or postpone the shutdown. The employer must be able to objectively demonstrate that the amount of capital or the volume of new business sought would have enabled the employer to keep the facility, operating unit, or site open for a reasonable period of time.

(4) The employer must have reasonably and in good faith believed that giving the required notice would have precluded the employer from obtaining the needed capital or business. The employer must be able to objectively demonstrate that it reasonably thought that a potential customer or source of financing would have been unwilling to provide the new business or capital if notice were given, that is, if the employees, customers or the public were aware that the facility, operating unit, or site might have to close. This condition may be satisfied if the employer can show that the financing or business source would not choose to do business with a troubled company or with a company whose workforce would be looking for other jobs.

The actions of an employer relying on the "faltering company" exception will be viewed in a company-wide context. Thus, a company with access to capital markets or with cash reserves may not avail itself of this exception by looking solely at the financial condition of the facility, operating unit, or site to be closed.

(b)(1) The "unforeseeable business circumstances" exception under section 3(b)(2)(A) of WARN applies to plant closings and mass layoffs caused by business circumstances that were not reasonably foreseeable at the time that 60-day notice would have been required.

(2) The primary objective indicator of a business circumstance that is not reasonably foreseeable is that the circumstance is caused by some sudden and unexpected action or condition outside the employer's control. A principal client's sudden and unexpected termination of a major contract with the employer, a strike at a major supplier of the employer, and an unanticipated and dramatic major economic downturn might each be considered a business circumstance that is not reasonably foreseeable. The test for determining when business circumstances are not reasonably foreseeable focuses on an employer's business judgment. The employer must exercise such commerically reasonable business judgment as would a similarly situated employer in predicting the demands of its particular market. The employer is not required, however, to accurately predict general economic conditions that also may affect demand for its products or services.

(c) The "natural disaster" exception in section 3(b)(2)(B) of WARN applies to plant closings and mass layoffs due to any form of a natural disaster. Floods, earthquakes, droughts, storms, tidal waves or tsunamis and similar effects of nature are natural disasters under this provision. To qualify for this exception, an employer must be able to demonstrate that its plant closing or mass layoff is a direct result of a natural disaster. While a disaster may preclude full or any advance notice, notice still must be given, whether in advance or after the fact of an employment loss caused by a natural disaster. Where a plant closing or mass layoff occurs as an indirect result of a natural disaster, this exception does not apply but the "unforeseeable business circumstance" exception described in paragraph (b) of this section may be applicable.

§ 639.10 When may notice be extended?

Additional notice is required when the dates of a planned plant closing or mass layoff are extended beyond the date announced in the original notice.

(a) If the postponement is for less than 60 days from the originally scheduled date, the additional notice should be given as soon as possible to the parties identified in § 639.6 and should include reference to the earlier notice, the date to which the planned action is postponed, and the reasons for the postponement.

(b) If the postponement is for 60 days or more from the originally scheduled date, the additional notice should be treated as a new notice subject to the provisions of §§ 639.5, 639.6, and 639.7 of this part. Rolling notice, in the sense of routine periodic notice, given whether or not a plant closing or mass layoffs is impending, and with the intent to evade the purpose of the Act rather than give specific notice as required by WARN, is not acceptable.

Signed at Washington, DC this 30th day of November 1988.

Ann McLaughlin,

Secretary of Labor.

Department of Education

National Diffusion Network Program; Notice Inviting Applications for New State Facilitator Awards for the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands and Palau for Fiscal Year 1989

BEST COPY AVAILABLE

VOL 53 ISS 233 DEC 5 1988 UMI

DEPARTMENT OF EDUCATION

[CFDA No. 84.073C]

National Diffusion Network Program; Notice Inviting Applications for New State Facilitator Awards for the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands and Palau for Fiscal Year 1989

Note to Applicants: This notice is a complete application package. The notice contains information, application forms, and instructions needed to apply for a grant under this competition.

Purpose of Program: Provides grants for the dissemination of exemplary education programs within the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, and Palau.

Note: A competition for new State Facilitator awards was held in February 1988, and grants were made in all fifty States, the District of Columbia, and Puerto Rico. Therefore, this competition is limited to geographic entities that did not receive an award during the last competition.

Deadline for Transmittal of Applications: February 3, 1989.

Deadline for Intergovernmental Review: April 4, 1989.

Available Funds: $300,000.

Estimated Range of Awards: $50,000 to $75,000 per year.

Estimated Average Size of Awards: $60,000.

Estimated Number of Awards: Five; one award each in the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, and Palau.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 48 months.

Applicable Regulations

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations), Part 75 (Direct Grant Programs), Part 77 (Definitions that Apply to Department Regulations), Part 79 (Intergovernmental Review of Department of Education Programs and Activities), Part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments); and (b) The regulations for this program in 34 CFR Parts 785 and 788. (Final regulations for this program were published in the **Federal Register** on August 14, 1987 (52 FR 30612).

Selection Criteria

(a) The Secretary uses the following ten selection criteria to evaluate applications for new grants under this competition.

(b) The maximum score for all of these criteria is 100 points.

(c) The maximum score for each criterion is indicated in parentheses.

Selection criterion—plan of operation. (15 points). The Secretary reviews each application to determine the quality of the plan of operation for the project, including—

(a) The quality of the design of the project (See 34 CFR 788.10 for a description of the activities that a State Facilitator must propose);

(b) The extent to which the plan of management is effective and ensures proper and efficient administration of the project;

(c) How well the objectives of the project relate to the purpose of the program;

(d) The quality of the applicant's plans to use its resources and personnel to achieve each objective; and

(e) If the applicant is an LEA or SEA, the quality of the applicant's plans to provide an opportunity for participation of private schools in accordance with 34 CFR 788.40.

Selection criterion—quality of key personnel. (20 points)

(a) The Secretary reviews each application to determine the quality of key personnel the applicant plans to use on the project, including—

(1) The qualifications of the project director;

(2) The qualifications of each of the other key personnel to be used in the project;

(3) The time that each person referred to in paragraph (a)(1) and (2) will commit to the project; and

(4) The extent to which the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age or handicapping condition.

(b) To determine the qualifications of personnel referred to in paragraph (a)(1) and (2), the Secretary considers—

(1) Experience and training in fields related to the objectives of the project; and

(2) Any other qualifications that pertain to the quality of the project.

Selection criterion—budget and cost effectiveness. (5 points)

The Secretary reviews each application to determine the extent to which—

(a) The budget is adequate to support the project; and

(b) Costs are reasonable in relation to the objectives of the project.

Selection criterion—evaluation plan. (10 points)

The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the extent to which the applicant's methods of evaluation—

(a) Are appropriate to the project; and

(b) To the extent possible, are objective and produce data that are quantifiable.

Cross-reference. See 34 CFR 75.590 Evaluation by the grantee.

Selection criterion—adequacy of resources. (5 points)

The Secretary reviews each application to determine the adequacy of the resources that the applicant plans to devote to the project, including facilities, equipment and supplies.

Selection criterion—monitoring plan. (15 points)

The Secretary reviews each application to determine the extent to which the applicant clearly details plans to monitor and assist sites that adopt the programs, and provide follow-up services after training.

Selection criterion—consultation during application. (5 points)

The Secretary reviews each application to determine the extent to which the applicant, in developing its application, has consulted with the SEA, LEAs, Institutions of Higher Education, private schools and other educational service providers in the State to be served.

Selection criterion—consultation and participation during project. (5 points)

The Secretary reviews each application to determine the extent to which the applicant, in carrying out the project activities, provides for consultation with, and participation of the SEA, LEAs, Institutions of Higher Education, private schools and other education providers in the State.

Selection criterion—innovative dissemination strategies. (10 points)

The Secretary reviews each application to determine the extent to which the applicant proposes innovative dissemination strategies.

Selection criterion—provision of information about other programs. (10 points)

The Secretary reviews each application to determine the extent to which the applicant has the capacity to provide information about ERIC, Research and Development Centers and Regional Educational Laboratories, and educational excellence recognition efforts (such as federally and privately funded programs that identify outstanding educators, students, and

schools) to educational personnel throughout the State.

Intergovernmental Review of Federal Programs

This program is subject to the requirements of Executive Order 12372 (Intergovernmental Review of Federal Programs) and the regulations in 34 CFR Part 79.

The objective of the Executive order is to foster an intergovernmental partnership and to strengthen federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

Applicants must contact the appropriate State Single Point of Contact to find out about, and to comply with, the State's process under Executive Order 12372. Applicants proposing to perform activities in more than one State should contact, immediately upon receipt of this notice, the Single Point of Contact for each State and follow the procedure established in those States under the Executive order. If you want to know the name and address of any State Single Point of Contact, see the list published in the **Federal Register** on November 18, pages 44338–44340.

In States that have not established a process or chosen a program for review, State, areawide, regional, and local entities may submit comments directly to the Department.

Any State Process Recommendation and other comments submitted by a State Single Point of Contact and any comments from State, areawide, regional, and local entities must be mailed or hand-delivered by the date indicated in this notice to the following address: The Secretary, E.O. 12372—CFDA #84.073C, U.S. Department of Education, MS 6403, 400 Maryland Avenue SW., Washington, DC 20202–0125. Proof of mailing will be determined on the same basis as applications.

Instructions for Transmittal of Applications

(a) If an applicant wants to apply for a grant, the applicant shall—

(1) Mail the original and two copies of the application on or before the deadline date to: U.S. Department of Education, Application Control Center, Attention: (CFDA #84073C), Washington, DC 20202–4725; or

(2) Hand deliver the original and two copies of the application by 4:30 p.m. (Washington, DC time) on the deadline date to: U.S. Department of Education, Application Control Center, Attention: (CFDA #84.073C), Room #3633, Regional Office Building #3, 7th and D Streets, SW, Washington, DC.

(b) An applicant must show one of the following as proof of mailing:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial center.

(4) Any other proof of mailing acceptable to the Secretary.

(c) If an application is mailed through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

(1) a private metered postmark.

(2) A mail receipt that is not dated by the U.S. Postal Service.

Notes: (1) The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

(2) An applicant wishing to know that its application has been received by the Department must include with the application a stamped, self-addressed postcard containing the CFDA number and title of this program.

(3) The applicant *must* indicate on the envelope and—if not provided by the Department—in Item 10 of the Application for Federal Assistance (Standard Form 424) the CFDA number—and letter, if any—of the competition under which the application is being submitted.

Application Instructions and Forms

The appendix to this application is divided into three parts. These parts are organized in the same manner that the submitted application should be organized. These parts are as follows:

Part I: Application for Federal Assistance (Standard Form 424 (Rev. 4–88)) and instructions.

Part II: Budget Information—Non-Construction Programs (Standard Form 424A) and instructions.

Part III: Application Narrative.

Assurances—Non-Construction Programs (Standard Form 424B).

Certification regarding Debarment, Suspension, and Other Responsibility Matters: Primary Covered Transactions (ED Form GCS–008) and instructions.

Certification regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion: Lower Tier Covered Transactions (ED Form GCS–009) and instructions. (**Note:** ED Form GCS–009 is intended for the use of primary participants and should not be transmitted to the Department.)

An applicant may submit information on a photostatic copy of the application and budget form, the assurances, and the certification. However, the application form, the assurances, and the certification must each have an *original signature*. No grant may be awarded unless a completed application form has been received.

FOR FURTHER INFORMATION CONTACT: Ms. Lois N. Weinberg, U.S. Department of Education, 555 New Jersey Avenue NW., Room 510, Washington, DC 20208–5645. Telephone: (202) 357–6147.

Program Authority:
20 U.S.C. 2962.

Dated: November 30, 1988.

Patricia M. Hines,

Acting Assistant Secretary for Educational Research and Improvement.

INSTRUCTIONS FOR THE SF 424

This is a standard form used by applicants as a required facesheet for preapplications and applications submitted for Federal assistance. It will be used by Federal agencies to obtain applicant certification that States which have established a review and comment procedure in response to Executive Order 12372 and have selected the program to be included in their process, have been given an opportunity to review the applicant's submission.

Item: Entry:

1. Self-explanatory.
2. Date application submitted to Federal agency (or State if applicable) & applicant's control number (if applicable).
3. State use only (if applicable).
4. If this application is to continue or revise an existing award, enter present Federal identifier number. If for a new project, leave blank.
5. Legal name of applicant, name of primary organizational unit which will undertake the assistance activity, complete address of the applicant, and name and telephone number of the person to contact on matters related to this application.
6. Enter Employer Identification Number (EIN) as assigned by the Internal Revenue Service.
7. Enter the appropriate letter in the space provided.
8. Check appropriate box and enter appropriate letter(s) in the space(s) provided:
   - "New" means a new assistance award.
   - "Continuation" means an extension for an additional funding/budget period for a project with a projected completion date.
   - "Revision" means any change in the Federal Government's financial obligation or contingent liability from an existing obligation.
9. Name of Federal agency from which assistance is being requested with this application.
10. Use the Catalog of Federal Domestic Assistance number and title of the program under which assistance is requested.
11. Enter a brief descriptive title of the project. If more than one program is involved, you should append an explanation on a separate sheet. If appropriate (e.g., construction or real property projects), attach a map showing project location. For preapplications, use a separate sheet to provide a summary description of this project.

Item: Entry:

12. List only the largest political entities affected (e.g., State, counties, cities).
13. Self-explanatory.
14. List the applicant's Congressional District and any District(s) affected by the program or project.
15. Amount requested or to be contributed during the first funding/budget period by each contributor. Value of in-kind contributions should be included on appropriate lines as applicable. If the action will result in a dollar change to an existing award, indicate *only* the amount of the change. For decreases, enclose the amounts in parentheses. If both basic and supplemental amounts are included, show breakdown on an attached sheet. For multiple program funding, use totals and show breakdown using same categories as item 15.
16. Applicants should contact the State Single Point of Contact (SPOC) for Federal Executive Order 12372 to determine whether the application is subject to the State intergovernmental review process.
17. This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include delinquent audit disallowances, loans and taxes.
18. To be signed by the authorized representative of the applicant. A copy of the governing body's authorization for you to sign this application as official representative must be on file in the applicant's office. (Certain Federal agencies may require that this authorization be submitted as part of the application.)

INSTRUCTIONS FOR THE SF-424A

General Instructions

This form is designed so that application can be made for funds from one or more grant programs. In preparing the budget, adhere to any existing Federal grantor agency guidelines which prescribe how and whether budgeted amounts should be separately shown for different functions or activities within the program. For some programs, grantor agencies may require budgets to be separately shown by function or activity. For other programs, grantor agencies may require a breakdown by function or activity. Sections A,B,C, and D should include budget estimates for the whole project except when applying for assistance which requires Federal authorization in annual or other funding period increments. In the latter case, Sections A,B, C, and D should provide the budget for the first budget period (usually a year) and Section E should present the need for Federal assistance in the subsequent budget periods. All applications should contain a breakdown by the object class categories shown in Lines a-k of Section B.

Section A. Budget Summary
Lines 1-4, Columns (a) and (b)

For applications pertaining to a *single* Federal grant program (Federal Domestic Assistance Catalog number) and *not requiring* a functional or activity breakdown, enter on Line 1 under Column (a) the catalog program title and the catalog number in Column (b).

For applications pertaining to a *single* program *requiring* budget amounts by multiple functions or activities, enter the name of each activity or function on each line in Column (a), and enter the catalog number in Column (b). For applications pertaining to multiple programs where none of the programs require a breakdown by function or activity, enter the catalog program title on each line in *Column* (a) and the respective catalog number on each line in Column (b).

For applications pertaining to *multiple* programs where one or more programs *require* a breakdown by function or activity, prepare a separate sheet for each program requiring the breakdown. Additional sheets should be used when one form does not provide adequate space for all breakdown of data required. However, when more than one sheet is used, the first page should provide the summary totals by programs.

Lines 1-4, Columns (c) through (g.)

For new applications, leave Columns (c) and (d) blank. For each line entry in Columns (a) and (b), enter in Columns (e), (f), and (g) the appropriate amounts of funds needed to support the project for the first funding period (usually a year).

Lines 1-4, Columns (c) through (g.) (continued)

For continuing grant program applications, submit these forms before the end of each funding period as required by the grantor agency. Enter in Columns (c) and (d) the estimated amounts of funds which will remain unobligated at the end of the grant funding period only if the Federal grantor agency instructions provide for this. Otherwise, leave these columns blank. Enter in columns (e) and (f) the amounts of funds needed for the upcoming period. The amount(s) in Column (g) should be the sum of amounts in Columns (e) and (f).

For supplemental grants and changes to existing grants, do not use Columns (c) and (d). Enter in Column (e) the amount of the increase or decrease of Federal funds and enter in Column (f) the amount of the increase or decrease of non-Federal funds. In Column (g) enter the new total budgeted amount (Federal and non-Federal) which includes the total previous authorized budgeted amounts plus or minus, as appropriate, the amounts shown in Columns (e) and (f). The amount(s) in Column (g) should not equal the sum of amounts in Columns (e) and (f).

Line 5 — Show the totals for all columns used.

Section B Budget Categories

In the column headings (1) through (4), enter the titles of the same programs, functions, and activities shown on Lines 1-4, Column (a), Section A. When additional sheets are prepared for Section A, provide similar column headings on each sheet. For each program, function or activity, fill in the total requirements for funds (both Federal and non-Federal) by object class categories.

Lines 6a-i — Show the totals of Lines 6a to 6h in each column.

Line 6j – Show the amount of indirect cost.

Line 6k – Enter the total of amounts on Lines 6i and 6j. For all applications for new grants and continuation grants the total amount in column (5), Line 6k, should be the same as the total amount shown in Section A, Column (g), Line 5. For supplemental grants and changes to grants, the total amount of the increase or decrease as shown in Columns (1)-(4), Line 6k should be the same as the sum of the amounts in Section A, Columns (e) and (f) on Line 5.

VOL 53 ISS 233 DE 5 1988 UMI

INSTRUCTIONS FOR THE SF-424A *(continued)*

Line 7 – Enter the estimated amount of income, if any, expected to be generated from this project. Do not add or subtract this amount from the total project amount. Show under the program narrative statement the nature and source of income. The estimated amount of program income may be considered by the federal grantor agency in determining the total amount of the grant.

Section C. Non-Federal-Resources

Lines 8-11 – Enter amounts of non-Federal resources that will be used on the grant. If in-kind contributions are included, provide a brief explanation on a separate sheet.

Column (a) – Enter the program titles identical to Column (a), Section A. A breakdown by function or activity is not necessary.

Column (b) – Enter the contribution to be made by the applicant.

Column (c) – Enter the amount of the State's cash and in-kind contribution if the applicant is not a State or State agency. Applicants which are a State or State agencies should leave this column blank.

Column (d) – Enter the amount of cash and in-kind contributions to be made from all other sources.

Column (e) – Enter totals of Columns (b), (c), and (d).

Line 12 — Enter the total for each of Columns (b)-(e). The amount in Column (e) should be equal to the amount on Line 5, Column (f), Section A.

Section D. Forecasted Cash Needs

Line 13 – Enter the amount of cash needed by quarter from the grantor agency during the first year.

Line 14 – Enter the amount of cash from all other sources needed by quarter during the first year.

Line 15 – Enter the totals of amounts on Lines 13 and 14.

Section E. Budget Estimates of Federal Funds Needed for Balance of the Project

Lines 16 - 19 – Enter in Column (a) the same grant program titles shown in Column (a), Section A. A breakdown by function or activity is not necessary. For new applications and continuation grant applications, enter in the proper columns amounts of Federal funds which will be needed to complete the program or project over the succeeding funding periods (usually in years). This section need not be completed for revisions (amendments, changes, or supplements) to funds for the current year of existing grants.

If more than four lines are needed to list the program titles, submit additional schedules as necessary.

Line 20 – Enter the total for each of the Columns (b)-(e). When additional schedules are prepared for this Section, annotate accordingly and show the overall totals on this line.

Section F. Other Budget Information

Line 21 – Use this space to explain amounts for individual direct object-class cost categories that may appear to be out of the ordinary or to explain the details as required by the Federal grantor agency.

Line 22 – Enter the type of indirect rate (provisional, predetermined, final or fixed) that will be in effect during the funding period, the estimated amount of the base to which the rate is applied, and the total indirect expense.

Line 23 – Provide any other explanations or comments deemed necessary.

VOL 53 ISS 233 DE 5 1988 UMI

OMB Approval No. 0348-0040

ASSURANCES — NON-CONSTRUCTION PROGRAMS

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.

2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.

3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.

4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.

5 Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§ 4728-4763) relating to prescribed standards for merit systems for programs funded under one of the nineteen statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).

6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C.§§ 6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.

7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.

8. Will comply with the provisions of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§ 276a to 276a-7), the Copeland Act (40 U.S.C. § 276c and 18 U.S.C. §§ 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 327-333), regarding labor standards for federally assisted construction subagreements.

Standard Form 424B (4-88)
Prescribed by OMB Circular A-102

Authorized for Local Reproduction

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program andto purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.

11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§ 1451 et seq.); (f) conformity of Federal actions to State (Clear Air) Implementation Plans under Section 176(c) of the Clear Air Act of 1955, as amended (42 U.S.C. § 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (P.L. 93-523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (P.L. 93-205).

12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.

13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a-1 et seq.).

14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.

15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. 2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.

16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§ 4801 et seq.) which prohibits the use of lead based paint in construction or rehabilitation of residence structures.

17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984.

18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations and policies governing this program.

Instructions for Part III—Application Narrative

Before preparing the Application Narrative an applicant should read carefully the description of the program activities in paragraph (2) below and the selection criteria the Secretary uses to evaluate applications.

The narrative should encompass each function or activity for which funds are being requested and should—

1. Begin with an Abstract; that is, a summary of the proposed project;

2. Describe the proposed project in light of each of the selection criteria in the order in which the criteria are listed in this application package, including in the *Plan of Operation* a clear description of how each of the following activities will be carried out:

(a) Inform public and private education service providers about the availability of all exemplary education programs in the National Diffusion Network;

(b) Assist education service providers to select exemplary education programs to meet their needs;

(c) Negotiate adoption agreements with Developer Demonstrators and Dissemination Process grantees and education service providers;

(d) Arrange for Developer Demonstrator and Dissemination Process grantees to provide training and follow-up services when requested by education service providers;

(e) Arrange for the selection and training of Local Facilitators;

(f) Assist in the identification and preparation of Certified Trainers and Demonstration Sites;

(g) Maintain records during the grant period concerning the exemplary education programs adopted in the State, including demographic data and program retention rates;

(h) Monitor and evaluate the activities of the State Facilitator project;

(i) Participate with other NDN grantees in workshops and meetings arranged by the Secretary;

(j) Cooperate with Developer Demonstrator grantees, Dissemination Process grantees and the Private School Facilitator grantee to carry out these activities; and

(k) Disseminate information about ERIC, Research and Development Centers and Regional Educational Laboratories, and educational excellence recognition efforts, (such as federally and privately funded programs that identify outstanding educators, students, and schools); and

3. Include any other pertinent information that might assist the Secretary in reviewing the application.

Public reporting burden for this collection of information is estimated to average 24 hours per response, including the time for reviewing instructions, searching existing data source, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, Director of Information Management and Compliance Division, Washington, DC 20202–5645; and to the Office of Management and Budget, Washington, DC 20503.

This information collection is not subject to the Office of Management and Budget Review under the Paperwork Reduction Act because it involves nine or fewer respondents.

VOL 53 ISS 233 DE 5 1988 UMI

Certification Regarding
Debarment, Suspension, Ineligibility and Voluntary Exclusion
Lower Tier Covered Transactions

This certification is required by the regulations implementing Executive Order 12549, Debarment and Suspension, 34 CFR Part 85, Section 85.510, Participants' responsibilities. The regulations were published as Part VII of the May 26, 1988 Federal Register (pages 19160-19211). Copies of the regulations may be obtained by contacting the person to which this proposal is submitted.

(BEFORE COMPLETING CERTIFICATION, READ INSTRUCTIONS ON REVERSE)

(1) The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

(2) Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

Name And Title Of Authorized Representative

Instructions for Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.

2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

4. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.

5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.

6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion--Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.

8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntary excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

Certification Regarding
Debarment, Suspension, and Other Responsibility Matters
Primary Covered Transactions

This certification is required by the regulations implementing Executive Order 12549, Debarment and Suspension, 34 CFR Part 85, Section 85.510, Participants' responsibilities. The regulations were published as Part VII of the May 26, 1988 Federal Register (pages 19160-19211). Copies of the regulations may be obtained by contacting the U.S. Department of Education, Grants and Contracts Service, 400 Maryland Avenue, S.W. (Room 3633 GSA Regional Office Building No. 3), Washington, D.C. 20202, telephone (202) 732-2505.

(BEFORE COMPLETING CERTIFICATION, READ INSTRUCTIONS ON REVERSE)

(1) The prospective primary participant certifies to the best of its knowledge and belief, that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph(1)(b) of this certification; and

(d) Have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.

(2) Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

Name And Title Of Authorized Representative

Signature Date

ED Form GCS-008, 6/88

Instructions for Certification

1. By signing and submitting this proposal, the prospective primary participant is providing the certification set out below.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. The prospective participant shall submit an explanation of why it cannot provide the certification set out below. The certification or explanation will be considered in connection with the department or agency's determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

3. The certification in this clause is a material representation of fact upon which reliance was placed when the department or agency determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency may terminate this transaction for cause or default.

4. The prospective primary participant shall provide immediate written notice to the department or agency to whom this proposal is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549. You may contact the department or agency to which this proposal is being submitted for assistance in obtaining a copy of those regulations.

6. The prospective primary participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency entering into this transaction.

7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion--Lower Tier Covered Transactions," provided by the department or agency entering into this covered transaction, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntary excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency may terminate this transaction for cause or default.

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 942

Programs for the Conduct of Surface Mining Operations Within Each State; Tennessee; Final Rule

VOL 53 ISS 233 DE 5 1988 UMI

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 942

Programs for the Conduct of Surface Mining Operations Within Each State; Tennessee

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final Rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSMRE) of the United States Department of the Interior (DOI) is amending its regulations governing the Federal surface mining regulatory program in Tennessee. The amendment is in response to a petition for rulemaking. The effect of this action is to codify criteria for determining whether a proposed revision to an existing coal mining permit is significant. A significant revision to a permit involves public notice and hearing requirements.

EFFECTIVE DATE: January 4, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. J. Hammond Eve, Division of Tennessee Permitting, Office of Surface Mining Reclamation and Enforcement, 530 Gay Street, SW., Knoxville, TN 37902; Telephone (615) 673–4349 or Ms. Nancy Prolman, Branch of Federal and Indian Programs, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue, NW., Washington, DC 20240; Telephone (202) 343–1864 (Commercial or FTS).

SUPPLEMENTARY INFORMATION:

I. Background
II. Response to Comments and Discussion of Adopted Rule
III. Procedural Matters

I. Background

The Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.* (SMCRA) sets forth the general statutory requirements governing surface coal mining operations and the surface impacts of underground coal mining. The Office of Surface Mining Reclamation and Enforcement (OSMRE) has implemented by regulations, the general requirements of SMCRA, and the requirements specific to the States with approved regulatory programs. In the case of Tennessee, there is no approved State regulatory programs. OSMRE directly regulates the surface coal mining operations in Tennessee through regulations contained in 30 CFR Part 942. This part was promulgated on October 1, 1984 (49 FR 38892); subsequent revisions can be found in Part 942.

OSMRE, through the Division of Tennessee Permitting, had been developing guidelines for use in Tennessee under section 511(a)(2) of SMCRA and 30 CFR 774.13. These sections require the regulatory authority to establish guidelines for determining when a proposed revision to a permit is significant and therefore subject to the public notice and hearing requirements. In direct response to the draft guidelines developed by the Division of Tennessee Permitting, Ms. Carol S. Nickle and Mr. Mark Squillace, representing four organizations (Environmental Policy Institute, Legal Environmental Assistance Foundation, Illinois South Project and Save Our Cumberland Mountains), filed a petition for rulemaking on February 19, 1986. Pursuant to section 201(g) of SMCRA, any person may petition the Director, OSMRE, "to initiate a proceeding for the issuance, amendment, or repeal of a rule." The principal concerns of the petitioners were that the Division of Tennessee Permitting failed to incorporate all of the petitioner's comments on earlier draft guidelines and that the guidelines were rules and could only be implemented by following the requirements of the Administrative Procedure Act (5 U.S.C. 551 *et seq.*).

OSMRE published a notice on March 5, 1987, granting the petition for the Federal program for Tennessee and accepting the petitioners' proposed criteria in principle (52 FR 6827). In granting the petition for the Federal program in Tennessee, OSMRE decided to provide criteria for review of permit revision applications in that State by rule.

As the regulatory authority in Tennessee, OSMRE is promulgating regulations for use in that State. OSMRE would not develop regulations or guidelines for States with approved regulatory programs, because under 30 CFR 774.13(b)(2), the regulatory authorities in primacy States develop such guidelines to reflect their own unique circumstances and interests.

OSMRE has gained considerable experience with significant revisions in the review of revision applications received during the conduct of the Federal Program for Tennessee. This experience together with the comment letters received pursuant to the June 13, 1986 **Federal Register** notice soliciting comments on the petition, and the concerns expressed in the petition itself, aided in identifying those revisions that would constitute significant revisions.

The proposed rule was published in the July 13, 1988 **Federal Register** (53 FR 26566), with a public comment period ending September 12, 1988. A public hearing was scheduled for September 6, 1988, in Knoxville, but was not held since there were no requests to testify at the hearing.

II. Response to Comments and Discussion of Adopted Rule

Under the provisions of 30 CFR 774.13, OSMRE, as the regulatory authority for surface coal mining and reclamation activities in Tennessee, is adopting criteria to determine when a proposed permit revision is significant. These criteria for significant revisions to permits, and the public notice and hearing requirements to which they are subject, are detailed in amendments to 30 CFR 942.774. The rule language adopted contains two minor changes from the proposal in 30 CFR 942.744 (c)(3) and (c)(7).

Under the final rule, OSMRE will review each administratively complete application for a permit revision to determine if any of the proposed revisions included in the application match the criteria adopted herein for significant revisions. Should any one of the proposed revisions be found to be significant, the permit application information requirements and procedures of Subchapter G, including public notice, public participation, and notice of decision requirements of §§ 773.13, 773.19(b) (1) and (3), and 778.21, would be followed for the evaluation of the proposed revisions in that application.

Only one commenter responded to OSMRE's request for comments on the proposed rule. That commenter raised two areas of concern. The first was a concern that the rule contained vague phrases, such as "likely to cause adverse impacts beyond those previously considered" and "have the potential for causing additional impacts." The commenter suggested that the determinations specified in the proposed rule be made by a central staff person, rather than individual permit reviewers or coordinators, to ensure fair and uniform administration of the rules. OSMRE believes that some flexibility in language is necessary to allow for contingencies or applications of the rule that are not possible to foresee. Depending on the subsection under which a permit revision will be evaluated to determine whether it is a significant revision, different staff reviewers will be involved. The staff reviewers' determinations will be reviewed by supervisory and management personnel, as appropriate,

to assure consistency in application of the rules.

The second concern questioned what was meant by "legitimate water supply" in proposed § 942.774(c)(3). The commenter suggested "that 'legitimate water supply' be interpreted or defined to be a primary, principal, or regular source of water upon which people or livestock depend for a significant portion of their water needs." Section 942.774(c)(3) refers to 30 CFR 816.41(h) which implements section 717(b) of SMCRA. Section 717(b) of SMCRA requires that a person who conducts surface coal mining activities "shall replace the water supply of an owner of interest in real property who obtains all or part of his supply of water for domestic, agricultural, industrial, or other legitimate use from an underground or surface source where such supply has been affected by contamination, diminution, or interruption proximately resulting from such surface coal mine operation." To remove confusion caused by the use of the term legitimate water supply in the proposed rule, the word "legitimate" has been deleted from § 942.774(c)(3), so that the rule now refers to a water supply to which the requirements of § 816.41(h) apply.

Discussion of Adopted Rule

Amendments to 30 CFR 942.774 are adopted as proposed with minor changes as discussed below. Section 942.774 codifies criteria for determinations of significant revisions at 30 CFR 942.774 paragraph (c). Previous paragraph (c) is redesignated as paragraph (d). Previous paragraph (b) contained material on both revisions in general and significant revisions. The material on significant revisions is removed from paragraph (b) and added to paragraph (c) which consolidates requirements for significant revisions.

The rule at 30 CFR 942.774(b) contains general requirements for permit revisions. It provides that any revision to the approved mining or reclamation plan will be subject to review and approval by OSMRE through the Division of Tennessee Permitting.

The rule at 30 CFR 942.774(c) states that a significant revision to the mining or reclamation plan will be subject to the permit application information requirements and procedures of Subchapter G, including notice, public participation, and notice of decision requirements of §§ 773.13, 773.19(b) (1) and (3), and 778.21, prior to approval and implementation. Where the rule refers to impacts beyond or different from those previously considered, it is referring to impacts that were not considered in the original permit or any subsequent significant revisions, such that the public has not had the opportunity to review and comment thereon.

Any proposed revision will be considered significant if it meets any of the specific requirements contained in §§ 942.774 (c)(1) through (c)(8) summarized below.

The rule at 30 CFR 942.774(c)(1) provides that a proposed revision resulting in adverse impacts beyond those previously considered, that would affect cultural resources listed on or eligible to be listed on the National Register of Historic Places, will constitute a significant revision.

The rule at 30 CFR 942.774(c)(2) provides that a proposed revision to an approved blasting plan which will be likely to cause adverse impacts beyond those previously considered, to persons or property outside of the permit area, will constitute a significant revision. A proposal for a change in the blasting plan that expedites the reasonable course of mining and which is proposed only for that purpose, may in and of itself be considered a non-significant revision if there is no potential for injury to persons or damage to property outside the permit area.

The rule at 30 CFR 942.774(c)(3) provides that a proposed revision that will result in adverse impacts beyond those previously considered, affecting a water supply to which the requirements of 30 CFR 816.41(h) apply, will constitute a significant revision. This rule differs slightly from the proposal in that the word "legitimate" which modified "water supply" in the proposed rule is deleted to reflect the language in § 816.41(h). A proposed revision that is not reasonably expected to affect a water supply for domestic, agricultural, industrial or other legitimate use may be considered non-significant.

The rule at 30 CFR 942.774(c)(4) provides that a proposed revision which will require a new or updated probable hydrologic consequences determination or cumulative hydrologic impact analysis as required under 30 CFR 780.21(f)(4) or 780.21(g)(2) will be considered a significant revision.

The rule at 30 CFR 942.774(c)(5) provides that a proposed revision that requires a change in procedures for identification, disturbance, or handling of toxic- or acid-forming materials different from those previously considered, where the changes have the potential for causing additional impacts not previously considered (such as long-term environmental, public health, or safety effects beyond the permit boundary), will be considered a significant revision. A proposed revision to incorporate an equivalent or better demonstrated and proven methodology for the identification, disturbance, or handling of toxic- or acid-forming materials from those previously considered may be considered non-significant.

The rule at 30 CFR 942.774(c)(6) provides that a proposed revision which will result in adverse impacts on fish, wildlife, and related environmental values beyond those previously considered, will be considered a significant revision.

The rule at 30 CFR 942.774(c)(7) provides that a proposed revision which includes the addition of a coal processing facility or any permanent support facility, where the addition of the facility will cause impacts not previously considered, will be considered a significant revision, except that the addition of a temporary coal processing facility used exclusively for crushing and screening need not be considered a signifcant revision. This rule differs slightly from the proposal in that "shall not" has been changed to "need not" in the phrase "need not be considered a significant revision." Although the addition of such facilities will not ordinarily be considered a significant revision, OSMRE has determined that it needs some flexibility in making a case-by-case determination of significance. The addition of coal processing facilities, such as a wash plant, which have the potential effect of concentrating toxic materials from the coal in the form of coarse refuse which must be disposed of by proper means will be considered a significant revision. The addition of a temporary crusher, screener, or similar non-permanent facility which does not conentrate coal wastes and that expedites the reasonable course of mining may be considered a non-significant revision. The use of such facilities within the permit area for a mine would not ordinarily result in any substantial additional environmental consequences and thus may be considered non-significant.

The rule at 30 CFR 942.774(c)(8) provides that a proposed revision will be considered significant if it involves a change in the postmining land use to a residential, industrial/commercial, recreation or developed water resources land use, as defined in 30 CFR 701.5; except that a change to a developed water resource not meeting the size criteria of the Mine Safety and Health Administration standards at 30 CFR 77.216(a) need not be considered a significant revision.

Consideration of a proposed revision to an existing permit is not to be confused with incidental boundary revisions. Under 30 CFR 774.13(d), the only extensions allowed in the size of a permit area without requiring a new permit are incidental boundary revisions. Any other extensions to the area covered by a permit are not considered revisions, and must be made by application for a new permit.

III. Procedural Matters

Federal Paperwork Reduction Act

This rule does not contain collections of information which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

Executive Order 12291 and Regulatory Flexibility Act

The DOI has determined that this document is not a major rule under the criteria of Executive Order 12291 (February 17, 1981) and certifies that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* The rule affects a relatively small number of surface coal mining operations. The rule does not distinguish between small and large entities. The economic effects of the rule are estimated to be minor and no incremental economic effects are anticipated as a result of the rule.

National Environmental Policy Act

Section 702(d) of the Surface Mining Control and Reclamation Act provides that promulgation of Federal program shall not constitute a major Federal action under the National Environmental Policy Act, 42 U.S.C. 4332. Thus, no environmental assessment is required for this rulemaking.

Author

The principal authors of this rule are Mr. J. Hammond Eve, Division of Tennessee Permitting, Office of Surface Mining Reclamation and Enforcement, 530 Gay Street SW., Knoxville, TN 37902; Telephone (615) 673–4349, and Ms. Nancy Prolman, Branch of Federal and Indian Programs, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue NW., Washington, DC 20240; Telephone: (202) 343–1864.

List of Subjects in 30 CFR Part 942

Intergovernmental relations, Reporting and recordkeeping requirements, Surface mining, Underground mining.

Accordingly, 30 CFR Part 942 is amended to read as follows:

Dated: November 21, 1988.

James E. Cason,

Deputy Assistant Secretary—Land and Minerals Management.

PART 942—TENNESSEE

1. The authority citation for Part 942 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*, as amended; and Pub. L. 100–34.

2. Section 942.774 is amended by revising paragraph (b), redesignating paragraph (c) as paragraph (d), and adding new paragraph (c) to read as follows:

§ 942.774 Revision; renewal; and transfer, assignment or sale of permit rights.

* * * * *

(b) Any revision to the approved mining or reclamation plan will be subject to review and approval by the Office.

(c) A significant revision to the mining or reclamation plan will be subject to the permit application information requirements and procedures of Subchapter G, including notice, public participation, and notice of decision requirements of § 773.13, 773.19(b)(1) and (3), and 778.21, prior to approval and implementation. The Office will consider any proposed revision to be significant if it:

(1) Will result in adverse impacts beyond those previously considered, affecting cultural resources listed on, or eligible to be listed on, the National Register of Historic Places;

(2) Involves changes to the blasting plan that will be likely to cause adverse impacts beyond those previously considered, to persons or property outside of the permit area;

(3) Will result in adverse impacts beyond those previously considered, affecting a water supply to which the requirements of 30 CFR 816.41(h) apply;

(4) Will cause a new or updated probable hydrologic consequences determination or cumulative hydrologic impact analysis to be required under 30 CFR 780.21(f)(4) or 780.21(g)(2) as a result of an increase in impacts;

(5) Requires a change in the identification, disturbance, or handling of toxic- or acid-forming materials different from those previously considered, where the changes have the potential for causing additional impacts not previously considered;

(6) Will result in adverse impacts on fish, wildlife and related environmental values beyond those previously considered;

(7) Includes the proposed addition of a coal processing facility, or any permanent support facility, where the addition of the facility will cause impacts not previously considered, except that the addition of a temporary coal processing facility used exclusively for crushing and screening need not be considered a significant revision; or

(8) Involves a change in the postmining land use to a residential, industrial/commercial, recreation or developed water resources land use, as defined in 30 CFR 701.5; except that a change to a developed water resource not meeting the size criteria of § 77.216(a) of this title need not be considered a significant revision.

OFFICE OF MANAGEMENT AND BUDGET

Policy Guidance on the Buy American Act of 1988; Public Hearing

AGENCY: Office of Federal Procurement Policy.

ACTION: Public Hearing on Policy Guidance on the Buy American Act of 1988.

SUMMARY: The Office of Federal Procurement Policy (OFPP) is requesting comments and suggestions on proposed policy guidance on how to determine whether a contractor or subcontractor offering to provide a service, other than a construction service, to a Federal agency is a citizen or national of a foreign country or is owned or controlled directly or indirectly by citizens or nationals of a foreign country for purposes of implementing the Buy American Act of 1988 (Sections 7001–7005 of Pub. L. 100–418). Any comments on the policy guidance, including issues or options that should be addressed, should be directed in writing to Donna Fossum, Deputy Associate Administrator, Office of Federal Procurement Policy, 725 17th Street, NW. (N.E.O.B.), Room 9025, Washington, DC., 20503. Please note that OFPP is not soliciting or accepting comments on the "rule of origin" for products at this hearing. This matter will be the subject of other hearings yet to be called by the Administrator for Federal Procurement.

PUBLIC HEARING: A public hearing will be held in Room 2010, New Executive Office Building, 725 17th Street, NW., Washington, DC, at 10:00 a.m., December 15, 1988. Persons and organizations wishing to present views, ideas, and suggestions on the proposed policy guidance are encouraged to attend the hearing. Written statements of those wishing to speak at this public hearing must be received by the Office of Federal Procurement Policy by the close of business on December 13, 1988. Oral statements presented at the public hearing will be limited to 10 minutes each. Persons and organizations with similar views are encouraged to select a common spokesman for the presentation of their views. Persons wishing to attend and/or present statements at the public hearing must contact Ms. Brenda Harper, telephone number (202) 395–3300, prior to 3:30 p.m., December 14, 1988, to arrange for admittance to the New Executive Office Building.

BACKGROUND: The Buy American Act (the Act) was enacted in 1933 to ensure that Federal agencies gave domestic products priority in purchasing decisions. Over the years the determination of what constitutes a domestic unmanufactured product has been based simply on the geographic origin of the product. Determining what constitutes a domestic manufactured product has been more difficult, however, and has ultimately come to be based on where the final manufacturing occurred and where the cost of mining, producing, or manufacturing the components of such a product was incurred. Depending on the method of acquisition and the agency involved, domestic products are given 6, 12, or 50 percent price evaluation preferences over foreign products in the award of Federal procurement contracts. Such price evaluation preferences are waived under certain conditions for signatory countries of the GATT Agreement on Government Procurement (the Agreement) and they do not apply to procurements conducted in accordance with Defense Department Memoranda of Understanding.

In 1988, the Act was amended by several sections of Title VII of Pub. L. 100–418 to include provisions prohibiting Federal agencies from purchasing products and services from individuals or organizations of (1) countries that signed but have not abided by the Agreement; (2) countries that signed and have abided by the Agreement, but which discriminate against U.S. products and services not covered by the Agreement in their government procurements; and (3) countries that have not signed the Agreement and which discriminate against U.S. products and services in their government procurements. To fall into these latter two categories, the country's services and products must be acquired in significant amounts by the U.S. Government and it must maintain, in its government procurements, a significant and presistent pattern or practice of discrimination against U.S. products which results in identifiable harm to U.S. businesses. Identification of countries within the above categories is to be made annually on April 30 by the President beginning in 1990, pursuant to guidelines to be issued by the U.S. Trade Representative. Enactment of these provisions marks the first time that the Act proscribes as well as prescribes Federal agency behavior and pertains to services as well as products.

In bringing services in the above described circumstances within the purview of the Act, the 1988 amendments also provided a rule for determining what constitutes foreign construction services. They did not, however, define "construction services." The determination of what constitutes a foreign service, other than a construction service, was delegated to the Administrator for Federal Procurement Policy for the development of policy guidance by February 19, 1989 (i.e., 180 days after enactment of Pub L. 100–418). In developing this policy guidance, the Administrator is expected to limit such guidance to "services" as opposed to "products" and is required to receive the comments of public parties at one or more public hearings.

The Administrator is therefore calling the public hearing described in this notice. In addition, to focus the discussion at this hearing the following policy guidance, as mandated by the provisions of Pub. L. 100–418, is proposed. Please note that the policy guidance proposed herein may change following consideration of the comments received in response to this announcement and at the public hearing.

Proposed Policy Guidance

1. *Question*—Do the amendments made to the Buy American Act of 1933 (the Act) by Section 7002 of Pub. L. 100–418 require Federal agencies to give preferences to domestic services in procurements?

Answer—No, the amendments made to the Act by Section 7002 of Pub. L. 100–418 do not extend the preferential purchase requirements of the Act to services. Instead, the amendments prohibit Federal agencies from procuring services as well as products from individuals or organizations of (1) countries that signed but have not abided by the Gatt Agreement on Government Procurement (the Agreement); (2) countries that signed and have abided by the Agreement, but which discriminate against U.S. products and services not covered by the Agreement in their government procurements; and (3) countries that have not signed the Agreement and which discriminate against U.S. products and services in their government procurements; and that have been so identified by the President pursuant to specific criteria. To fall into categories 2 and 3 above, the country's services and products must be acquired in significant amounts by the U.S. Government and it must maintain, in its government procurements, a significant and presistent pattern or practice of discrimination against U.S. products which results in identifiable harm to U.S. businesses. Identification of countries within all three categories above is to be made annually on April 30 by the President beginning in 1990, pursuant to guidelines to be issued by the U.S. Trade Representative. In summary, the Act as amended prohibits

Federal agencies under certain conditions from procuring either services or products from individuals or organizations of countries that the President has identified as discriminating against U.S. products and services in making their government procurements.

2. *Question*—Are there exceptions to the prohibitions on the procurement of services set forth in Section 7002 of Pub. L. 100–418?

Answer—Yes, the prohibitions do not apply to: (1) services procured and used outside the United States and its territories; and (2) services of least developed countries. Also, the President or the head of a Federal agency may exempt procurements from these prohibitions upon a determination that such action is necessary in the public interest, or to ensure adequate competition.

3. *Question*—When do the prohibitions on procurement by Federal agencies of services from individuals or organizations of specified countries go into effect?

Answer—The prohibitions on the procurement of services by Federal agencies from individuals or organizations of specified countries can start only after the President submits the first report mandated by Section 7003 of Pub. L. 100–418 to Congress on April 30, 1990. This annually produced report will list the countries that discriminate against U.S. products and services in making their government procurements. Further, depending on which of the three categories of countries a particular nation falls into (see Question 1), the provisions of Section 7003 specify that no action can be taken before the passage of 60 days following the issuance of the President's report. Consequently, the earliest date that the prohibitions on the procurement of services from individuals or organizations of specified countries could go into effect is June 29, 1990.

4. *Question*—Do the prohibitions on the procurement of services from individuals or organizations of specified countries apply to grants? Do the prohibitions apply to contracts awarded by grantees using grant funds?

Answer—No, the prohibitions pertain only to services provided by contractors and subcontractors under procurement contracts. They do not pertain to services provided by grantees, contractors, or subcontractors using grant funds.

5. *Question*—What constitute "construction services" for purposes of implementing the Act as amended by Section 7002 of Pub. L. 100–418?

Answer—"Construction services" means construction, alteration, or repair as defined in Subpart 22.4 of the Federal Acquisition Regulation (FAR), 48 CFR 1, 22.41. "Construction services" do not include services provided incidental to the supply of a product, provided that the value of the incidental services does not exceed the value of the product being delivered.

6. *Question*—What constitute "foreign" construction services under the provisions of the Act as amended by Section 7002 of Pub. L. 100–418?

Answer—"Foreign" construction services are those services described in the answer to Question 5 above that are provided by an individual acting as a contractor or subcontractor who is a citizen or national of a country listed in the President's report, or an organization acting as a contractor or subcontractor where—

(A) 50 percent or more of the voting stock is owned by one or more citizens or nationals of a country listed in the President's report;

(B) The title to 50 percent or more of the stock is held subject to trust or fiduciary obligations in favor of one or more citizens or nationals of a country listed in the President's report;

(C) 50 percent or more of the voting stock is vested in or exercisable on behalf of one or more citizens or nationals of a country listed in the President's report;

(D) In the case of a corporation——

(i) The number of its directors necessary to constitute a quorum are citizens or nationals of a country listed in the President's report; or

(ii) The corporation is organized under the laws of a country or any subdivision, territory, or possession thereof listed in the President's report; or

(E) In the case of an individual or organization who is a participant in a joint venture or a member of a partnership, any participant of the joint venture or partner meets any of the criteria in subparagraphs (A) through (D) of this paragraph.

7. *Question*—What constitute "services other than construction services" for purposes of implementing the Act as amended by Section 7002 of Pub. L. 100–418?

Answer—"Services other than construction services" include all services other than those described in the answer to Question 5 above where work is performed by manual, clerical, technical, or professional labor whose primary purpose is to perform an identifiable task rather than to furnish an end item of supply. This includes, but is not limited to, the following:

1. Research and development (R & D) as defined in the Federal Procurement Data System Product and Service Codes, Section I, Part A;
2. Special studies and analyses—Not R & D;
3. Architect and Engineering Services;
4. Automatic data processing and telecommunication services;
5. Purchase of structures and facilities;
6. Natural resources and conservation services;
7. Environmental system protection;
8. Social services;
9. Quality control, testing, and inspection services;
10. Maintenance, repair, and rebuilding of equipment;
11. Modification of equipment;
12. Technical representative services;
13. Operation of government-owned facilities;
14. Installation of equipment;
15. Salvage service;
16. Medical service;
17. Professional, administrative, and management services;
18. Utilities and housekeeping services;
19. Photographic, mapping, printing, and publication services;
20. Education and training services;
21. Transportation, travel, and relocation services;
22. Lease or rental of equipment; and
23. Lease or rental of facilities.

"Services other than construction services" also include:

24. Services covered by the Service Contract Act as determined by the U.S. Department of Labor (see 29 CFR 4.130);
25. Advisory and assistance services as defined in OMB Circular A–120; and
26. Federal information processing services and federal information processing support services as defined in the notice of proposed rulemaking that would amend Part 201–2 of the Federal Information Resources Management Regulation (see 53 FR 32085, August 23, 1988).

"Services other than construction services" do not include services provided incidental to the supply of a product, provided that the value of the incidental services does not exceed the value of the product being delivered.

8. *Question*—What consitutes "foreign" services other than construction services for purposes of implementing the Act as amended by Section 7002 of Pub. L. 100–418?

Answer—"Foreign" services other than construction services are those services described in the answer to Question 7 above that are provided by an individual acting as a contractor or subcontractor who is a citizen or

national of a country listed in the President's report, or an organization acting as a contractor or subcontractor where—

(A) 50 percent or more of the voting stock is owned by one or more citizens or nationals of a country listed in the President's report;

(B) The title to 50 percent or more of the stock is held subject to trust or fiduciary obligations in favor of one or more citizens or nationals of a country listed in the President's report;

(C) 50 percent or more of the voting stock is vested in or exercisable on behalf of one or more citizens or nationals of a country listed in the President's report;

(D) In the case of a corporation—

(i) The number of its directors necessary to constitute a quorum are citizens or nationals of a country listed in the President's report; or

(ii) The corporation is organized under the laws of a country or any subdivision, territory, or possession thereof listed in the President's report; or

(E) In the case of an individual or organization who is a participant in a joint venture or a member of a partnership, any participant of the joint venture or partner meets any of the criteria in subparagraphs (A) through (D) of this paragraph.

9. *Question*—Are Federal agencies prohibited from procuring services from all foreign countries?

Answer—No, Federal agencies are only prohibited from procuring services and products from individuals or organizations of "foreign" countries that have been specifically found by the President to discriminate against U.S. services or products and are so listed in the President's annual report (See answer to Question 1).

10. *Question*—How long are the provisions of Title VII of Pub. L. 100–418 in effect?

Answer—The provisions of Title VII of Pub. L. 100–418 are in effect until April 30, 1996.

DATES: Comments and suggestions in response to this **Federal Register** notice must be received in OFPP by close of business, December 22, 1988. Two copies of any statements to be presented at the public meeting must be received by the close of business December 13, 1988.

ADDRESS: Comments and statements should be submitted to Donna Fossum, Deputy Associate Administrator, Office of Federal Procurement Policy, 725 17th Street, NW., (NEOB), Room 9025, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Donna Fossum, Deputy Associate Administrator, (202) 395–3300.

Allan V. Burman,

Deputy Administrator and Acting Administrator.

LIST OF PUBLIC LAWS

Note: The list of public laws enacted during the second session of the 100th Congress has been completed.

Last List November 30, 1988

The list will be resumed when bills are enacted into public law during the first session of the 101st Congress, which convenes on January 3, 1989. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.115New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1987. The CFR volume issued January 1, 1987, should be retained.

[3] No amendments to this volume were promulgated during the period Apr. 1, 1980 to March 31, 1988. The CFR volume issued as of Apr. 1, 1980, should be retained.

[4] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[5] No amendments to this volume were promulgated during the period July 1, 1986 to June 30, 1988. The CFR volume issued as of July 1, 1986, should be retained.

[6] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing these chapters.

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1986
SUPPLEMENT: Revised January 1, 1988

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Order from Superintendent of Documents,
U.S. Government Printing Office,
Washington, D.C. 20402-9325.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

Rules and Regulations

Federal Register
Vol. 53, No. 234
Tuesday, December 6, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 947

[FV-88-114]

Irish Potatoes Grown in Modoc and Siskiyou Counties, CA, and all Counties in Oregon, Except Malheur County; Amendment To Relax Requirements for High Quality Red-Skinned Varieties of Potatoes

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department is adopting as a final rule the provisions of an interim final rule (with minor changes) which eliminated the minimum size requirement for high quality red-skinned potatoes (also known as round red potatoes), and relieved such potatoes from special purpose shipment requirements. Before the interim final rule became effective on August 19, 1988, high quality red-skinned potatoes at least 1½ inches in diameter could be shipped under a special purpose provision. Handlers of such potatoes were required to obtain a Certificate of Privilege from the committee, meet a 50-pound minimum pack requirement, and report the shipment, grade, and usage of such potatoes to the committee. Eliminating the minimum size and other requirements was designed to meet consumer demand for smaller, high quality round red potatoes, meet the industry's need for a smaller container, and relieve handlers from safeguard requirements that are no longer necessary.

EFFECTIVE DATE: January 5, 1989.

FOR FURTHER INFORMATION CONTACT: Todd A. Delello, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456, telephone (202) 475-5610.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order No. 947 (7 CFR Part 947), as amended, regulating the handling of potatoes grown in Modoc and Siskiyou Counties, California, and in all counties in Oregon, except Malheur County. This order is authorized by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 45 handlers of Oregon-California potatoes subject to regulation under the marketing order, and approximately 470 producers in the production area. The Small Business Administration (13 CFR 121.2) has defined small agricultural producers as those having annual gross revenue for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of Oregon-California potatoes may be classified as small entities.

Red-skinned potatoes represent less than one percent of the total potato crop in the production area. This estimate is based on red-skinned potato acreage and the national average potato yield. Red-skinned potatoes are utilized mainly in the fresh market.

While in the past consumer demand has been stronger for larger sized potatoes, there currently exists a market for small red-skinned potatoes. Potatoes produced in other areas are competing for this market. These potatoes are being merchandised as a gourmet or specialty item.

An interim final rule was issued on August 16, 1988, and was published in the **Federal Register** on August 19, 1988 (53 FR 31651). That rule amended the handling regulation for Irish potatoes grown in Modoc and Siskiyou Counties, California, and all counties in Oregon, except Malheur County set forth in § 947.340 (53 FR 2996, February 3, 1988). That rule also provided that interested persons could file written comments through September 19, 1988. One comment was received from William N. Wise, Manager of the Oregon-California Potato Committee.

Prior to the effective date of the interim final rule, red-skinned potatoes were required to be at least U.S. No. 2 grade and, if shipped within the continental United States, have a minimum diameter of 2 inches or weigh at least 4 ounces. Red-skinned potatoes for export and those shipped domestically under special purpose provisions had to have a minimum diameter of 1½ inches. For red-skinned potatoes to be shipped under the special purpose provision, they had to grade at least U.S. No. 1, except for size, and be packed in containers of at least 50 pounds. The interim final rule eliminated the minimum size requirement and deleted the special purpose shipment requirements for U.S. No. 1 round red potatoes. These changes were recommended by the Oregon-California Potato Committee on a nine to one vote.

The elimination of the size requirement afforded producers and handlers the opportunity to meet current market demand for small, high quality red-skinned potatoes. This change benefitted consumers by providing them with a product they desire, and producers and handlers by increasing sales. This relaxation has not adversely affected the market for larger potatoes.

To research markets for expansion possibilities, the committee initiated a special purpose shipment provision during the 1986-87 season. This provision allowed the shipment of high quality red-skinned potatoes that measured at least 1½ inches in diameter and that were packed in quantities of 50 pounds or more. Also, handlers of such potatoes were required to obtain a

Certificate of Privilege from the committee prior to each season and report the shipment, grading and usage of the potatoes to the committee. The certification and reporting requirements aided the committee in discerning the market for such potatoes.

The interim final rule deleted the special purpose requirements for red-skinned potatoes to allow shippers to meet the industry's need for a smaller container (e.g. one-pound bag). Furthermore, the certification and reporting requirements had served their purpose and were no longer necessary.

While small red-skinned potatoes are currently in high demand, this apparently does not extend to other varieties of potatoes. For this reason, the committee recommended retaining the special purpose shipment requirements for non-red-skinned potatoes. These requirements could be eliminated at some point in the future if experience indicates that there is a viable market for these small potatoes.

The interim final rule also made an editorial change that changed the term "special purpose certificate" to "Certificate of Privilege" in paragraph (b)(3) of § 947.340. The revised term is used elsewhere in the regulation, and this change was made in the interest of consistency.

During the comment period provided by the interim final rule, one comment was submitted by William N. Wise, the manager of the Oregon-California Potato Committee, on behalf of the committee. It recommended that the handling regulation be clarified by naming the form that is used to report certain special purpose shipments. This recommendation is being adopted, and the name of the form, Special Purpose Shipment Report, is being added to subparagraphs (b)(3), (h)(1) and (h)(2) of § 947.340.

Mr. Wise also recommended that the handling regulation be revised to require handlers of potatoes for processing to obtain a Certificate of Privilege from the committee and report each shipment of such potatoes to the committee. Sufficient information to enable a full assessment of the impact of such a change in the regulation has not been provided. Further, opportunity has not been provided for interested persons including those who would be affected by these new reporting requirements to participate in the rulemaking process. This proposed rule change is therefore not being adopted at this time, but may be addressed in a future rulemaking action.

Section 8e of the Agricultural Marketing Agreement Act of 1937 requires that when certain domestically produced commodities, including Irish potatoes, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, or maturity requirements. Section 8e also provides that whenever two or more marketing orders regulating a commodity produced in different areas of the United States are concurrently in effect, the Secretary shall determine which of the areas produces the commodity in most direct competition with the imported commodity. Imports then must meet the quality standards set for that particular area. Because the import requirements for red-skinned potatoes are based on the marketing orders covering Washington potatoes (M.O. 946) and Colorado Area No. 2 potatoes (M.O. 948), the changes made in the handling requirements for Oregon-California potatoes will have no effect on the potato import regulation.

The information collection requirements contained in the handling regulation have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. chapter 35 and have been assigned OMB No. 0581–0112. The previously approved information collection burden has been reduced by the elimination of the reporting requirements applicable to shipments of small, high quality red-skinned potatoes.

Based on the above, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, including the information and recommendations submitted by the committee and other available information, it is found that the rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

List of Subjects in 7 CFR Part 947

Marketing agreements and orders, Potatoes, Oregon, California.

For the reasons set forth in the preamble, the interim final rule amending 7 CFR Part 947 which was published at 53 FR 31650–31651 on August 19, 1988, is adopted with modification as a final rule to read as follows:

PART 947—POTATOES GROWN IN MODOC AND SISKIYOU COUNTIES, CALIFORNIA, AND ALL COUNTIES IN OREGON, EXCEPT MALHEUR COUNTY

1. The authority citation for 7 CFR Part 947 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 947.340 is amended by revising paragraphs (b), (h)(1) and (h)(2) to read as follows:

Note: This section will appear in the Code of Federal Regulations.

§ 947.340 Handling regulation.

* * * * *

(b) *Size requirements.* (1) Such potatoes shipped to points within the continental United States shall be at least 2 inches in diameter or weigh at least 4 ounces, and such potatoes shipped to export destinations shall be at least 1½ inches in diameter.

(2) Red-skinned varieties of potatoes may be shipped without regard to any minimum size requirement, if they otherwise grade at least U.S. No. 1.

(3) All non-red-skinned varieties of potatoes that measure less than 1½ inches in diameter may be shipped if such potatoes otherwise grade at least U.S. No. 1 and are packed in quantities of 50 pounds or more per container: *Provided,* That any person who desires to handle such potatoes shall each season prior to shipment apply for and obtain a Certificate of Privilege from the committee authorizing shipment of the potatoes for market expansion purposes: *Provided further,* That any person who so handles potatoes for market expansion purposes shall promptly report the shipment, grading, and usage of the potatoes to the committee on Special Purpose Shipment Report forms.

* * * * *

(h) * * *

(1) Each handler making shipments of certified seed outside the district where grown pursuant to paragraph (g) of this section shall obtain from the committee a Certificate of Privilege, and shall furnish a report of shipments to the committee on Special Purpose Shipment Report forms.

(2) Each handler making shipments of potatoes pursuant to paragraphs (g)(2), (4)(i), and (5) of this section shall obtain a Certificate of Privilege from the committee, and shall report shipments on Special Purpose Shipment Report forms at such intervals as the committee may prescribe in its administrative rules.

BILLING CODE 3410–02–M

FEDERAL RESERVE SYSTEM

12 CFR Part 204

[Regulation D; Docket No. R-0653]

Reserve Requirements of Depository Institutions; Reserve Requirement Ratios

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is amending 12 CFR Part 204 (Regulation D—Reserve Requirements of Depository Institutions): (1) To increase the amount of transaction accounts subject to a reserve requirement ratio of three percent, as required by section 19(b)(2)(C) of the Federal Reserve Act (12 U.S.C. 461(b)(2)(C)), from $40.5 million to $41.5 million of net transaction accounts (known as the low reserve tranche adjustment); (2) to increase the amount of reservable liabilities of each depository institution that is subject to a reserve requirement of zero percent, as required by section 19(b)(11)(B) of the Federal Reserve Act (12 U.S.C. 461(b)(11)(B)), from $3.2 million to $3.4 million of reservable liabilities (known as the reservable liabilities exemption adjustment); and (3) to increase the deposit cutoff level which is used in conjunction with the reservable liabilities exemption amount to determine the frequency of deposit reporting from $40.0 million to $42.1 million.

EFFECTIVE DATE: December 6, 1988. For depository institutions that report weekly, the low reserve tranche adjustment and the reservable liabilities exemption adjustment will be effective starting with the reserve computation period beginning on Tuesday, December 27, 1988, and with the corresponding reserve maintenance periods beginning Thursday, December 29, 1988, for net transaction accounts, and on Thursday, January 26, 1989, for other reservable liabilities. For institutions that report quarterly, the low reserve tranche adjustment and the reservable liabilities exemption adjustment will be effective with the computation period beginning on Tuesday, December 20, 1988, and with the reserve maintenance period beginning Thursday, January 19, 1989. For all depository institutions, the increase in the deposit cutoff level will be used to screen institutions in the second quarter of 1989 to determine reporting frequency beginning September 1989.

FOR FURTHER INFORMATION CONTACT: John Harry Jorgenson, Senior Attorney (202/452-3778), Legal Division, or Patrick Mahoney, Economist (202/452-3827), Division of Monetary Affairs; for users of the Telecommunications Device for the Deaf (TDD), Earnestine Hill or Dorothea Thompson (202/452-3544); Board of Governors of the Federal Reserve System, Washington, DC 20551.

SUPPLEMENTARY INFORMATION: Section 19(b)(2) of the Federal Reserve Act requires each depository institution to maintain with the Federal Reserve System reserves against its transaction accounts and nonpersonal time deposits, as prescribed by Board regulations. The initial reserve requirements imposed under section 19(b)(2) were set at three percent for each depository institution's total transaction accounts of $25 million or less and at 12 percent on total transaction accounts above $25 million. Section 19(b)(2) further provides that, before December 31 of each year, the Board shall issue a regulation adjusting for the next calendar year the total dollar amount of the transaction account tranche against which reserves must be maintained at a ratio of three percent. The adjustment in the tranche is to be 80 percent of the percentage change in total transaction accounts for all depository institutions determined as of June 30 of each year.

Currently, the amount of the low reserve tranche on transaction accounts is $40.5 million. The growth in the total net transaction accounts of all depository institutions from June 30, 1987, to June 30, 1988, was 3.0 percent (from $586.6 billion to $604.1 billion). In accordance with section 19(b)(2), the Board is amending Regulation D to increase the amount of the low reserve tranche for transaction accounts for 1986 by $1.0 million to $41.5 million.

Section 19(b)(11)(A) of the Federal Reserve Act provides that $2 million of reservable liabilities [1] of each depository institution shall be subject to a zero percent reserve requirement. Section 19(b)(11)(A) permits each depository institution, in accordance with the rules and regulations of the Board, to designate the reservable liabilities to which this reserve requirement exemption is to apply. However, if transaction accounts are designated, only those that would otherwise be subject to a three percent reserve requirement (*i.e.*, transaction accounts within the low reserve requirement tranche) may be so designated.

[1] Reservable liabilities include transaction accounts, nonpersonal time deposits, and Eurocurrency liabilities as defined in section 19(b)(5) of the Federal Reserve Act.

Section 19(b)(11)(B) of the Federal Reserve Act provides that, before December 31 of each year, the Board shall issue a regulation adjusting for the next calendar year the dollar amount of reservable liabilities exempt from reserve requirements. The change in the amount is to be made only if the total reservable liabilities held at all depository institutions increases from one year to the next. The percentage increase in the exemption is to be 80 percent of the percentage increase in total reservable liabilities of all depository institutions determined as of June 30 each year. The growth in total reservable liabilities of all depository institutions from June 30, 1987, to June 30, 1988, was 6.5 percent (from $1,184.6 billion to $1,261.7 billion). In accordance with section 19(b)(11), the Board is amending Regulation D to increase the amount of the reserve requirement exemption from 1989 by $0.2 million to $3.4 million.

As a result, the effect of these amendments is to raise the low reserve tranche to $41.5 million and to apply a zero percent reserve requirement on the first $3.4 million of transaction accounts and a three percent reserve requirement on the remainder of the low reserve tranche. Any amount of this zero percent reserve requirement tranche remaining after applying it to transaction accounts will then be applied to nonpersonal time deposits with maturities of less than 1½ years or to Eurocurrency liabilities, both of which are subject to a reserve requirement ratio of three percent.

The tranche adjustment and the reservable liabilities exemption adjustment for weekly reporting institutions will be effective starting with the reserve computation period beginning on Tuesday, December 27, 1988, and with the corresponding reserve maintenance periods beginning Thursday, December 29, 1988, for net transaction accounts, and on Thursday, January 26, 1989, for other reservable liabilities. For institutions that report quarterly, the tranche adjustment and the exemption will be effective with the computation period beginning on Tuesday, December 20, 1988, and with the reserve maintenance period beginning Thursday, January 19, 1989. In addition, all entities currently submitting Form FR 2900 will continue to submit reports to the Federal Reserve under current reporting procedures.

In order to reduce the reporting burden for small institutions, the Board in 1981 established a deposit reporting cutoff level of $25 million to determine deposit reporting frequency. Institutions

are screened during the second quarter of each year to determine reporting frequency beginning the following September. In March of 1985, the Board decided to index this reporting cutoff level equal to 80 percent of the annual rate of increase of total deposits.[2] In July of 1988, in conjunction with approval of the extension of the deposit reporting system, the Board increased the cutoff to $40 million, effective in September 1988, from the $30 million cutoff that would have become effective in September 1988.

From June 30, 1987, to June 30, 1988, total deposits grew 6.5 percent, from $3,296.9 billion to $3,511.4 billion. This results in an increase of $2.1 million in the deposit cutoff level which determines frequency of reporting from the current $40.0 million to $42.1 million. Based on the indexation of the reserve requirement exemption, the cutoff level for total deposits above which reports of deposits must be filed rises $0.2 million to $3.4 million. Institutions with total deposits below $3.4 million are excused from reporting if their deposits can be estimated from other sources. The $42.1 million cutoff level for weekly versus quarterly FR 2900 reporting and for quarterly FR 2910q versus annual FR 2910a reporting, and the $3.4 million level threshold for reporting will be used in the second quarter 1989 deposits report screening process, and the adjustments will be made when the new deposit reporting panels are implemented in September 1989.

All U.S. branches and agencies of foreign banks and all Edge and Agreement Corporations, regardless of size, and all other institutions with reservable liabilities in excess of the exemption level amount prescribed by section 19(b)(11) of the Federal Reserve Act (known as "nonexempt institutions") and with total deposits at least equal to the deposit cutoff level are required to file weekly the Report of Transaction Accounts, Other Deposits and Vault Cash (FR 2900). Depository institutions with reservable liabilities in excess of the exemption level amount but with total deposits less than the deposit cutoff level may file the FR 2900 quarterly effective each September. Institutions that obtain funds from non-U.S. sources or that have foreign branches or international banking facilities are required to file the Report of Certain Eurocurrency Transactions (FR 2950/2951) on the same frequency as they file the FR 2900. The deposit cutoff is also used to determine whether an institution with reservable liabilities at or below the exemption level amount (known as an "exempt institution") must file one of two reduced deposits reports—the Quarterly Report of Selected Deposits, Vault Cash, and Reservable Liabilities (FR 2910q) or the Annual Report of Total Deposits and Reservable Liabilities (FR 2910a). Exempt institutions (that is, institutions with total deposits less than the exemption amount) are not required to file a deposits report if their deposits can be estimated from other sources.

Finally, the Board may require a depository institution to report on a weekly basis, regardless of the cutoff level, if the institution manipulates its total deposits and other reservable liabilities in order to qualify for quarterly reporting. Similarly, any depository institution that reports quarterly may be required to report weekly and to maintain appropriate reserve balances with its Reserve Bank if, during its computation period, it understates its usual reservable liabilities or it overstates the deductions allowed in computing required reserve balances.

[2] In November of 1985, the Board amended the definition of "total deposits" as used in determining the cutoff level to include not only gross transaction deposits, savings accounts, and time deposits but also reservable obligations of affiliates, ineligible acceptance liabilities, and net Eurocurrency liabilities.

Notice and Public Participation

The provisions of 5 U.S.C. 553(b) relating to notice and public participation have not been followed in connection with the adoption of these amendments because the amendments involve adjustments prescribed by statute and an interpretative statement reaffirming the Board's policy concerning reporting practices. The amendments also reduce regulatory burdens on depository institutions. Accordingly, the Board believes that notice and public participation is unnecessary and contrary to the public interest.

Regulatory Flexibility Act Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act (Pub. L. No. 96–354, 5 U.S.C. 601 *et seq.*), the Board certifies that the proposed amendments will not have a significant economic impact on a substantial number of small entities. The proposed amendments reduce certain regulatory burdens for all depository institutions, reduce certain burdens for small depository institutions, and have no particular effect on other small entities.

List of Subjects in 12 CFR Part 204

Banks, banking, Currency, Federal Reserve System, Penalties and reporting requirements.

Pursuant to the Board's authority under section 19 of the Federal Reserve Act, 12 U.S.C. 461 *et seq.*, the Board is amending 12 CFR Part 204 as follows:

PART 204—RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS

1. The authority citation for 12 CFR Part 204 continues to read as follows:

Authority: Secs. 11(a), 11(c), 19, 25, 25(a) of the Federal Reserve Act (12 U.S.C. 248(a), 248(c), 371a, 371b, 461, 601, 611); sec. 7 of the International Banking Act of 1978 (12 U.S.C. 3105); and sec. 411 of the Garn-St Germain Depository Institutions Act of 1982 (12 U.S.C. 461).

2. In § 204.9, paragraph (a) is revised to read as follows:

§ 204.9 Reserve requirement ratios.

(a)(1) *Reserve percentages.* The following reserve ratios are prescribed for all depository institutions, Edge and Agreement Corporations, and United States branches and agencies of foreign banks:

Category	Reserve requirement
Net transaction accounts: [1]	
$0 to $41.5 million	3 percent of amount.
Over $41.5 million	$1,245,000 plus 12% of amount over $41.5 million.
Nonpersonal time deposits: By original maturity (or notice period):	
Less than 1½ years	3 percent.
1½ years or more	0 percent.
Eurocurrency liabilities	3 percent.

[1] Dollar amounts do not reflect the adjustment to be made by the next paragraph.

(2) *Exemption from reserve requirements.* Each depository institution, Edge or Agreement Corporation, and U.S. branch or agency of a foreign bank is subject to a zero percent reserve requirement on an amount of its transaction accounts subject to the low reserve tranche in paragraph (a)(1) of this section, nonpersonal time deposits, or Eurocurrency liabilities or any combination thereof not in excess of $3.4 million determined in accordance with § 204.3(a)(3) of this part.

* * * * *

By order of the Board of Governors of the Federal Reserve System, November 29, 1988.

William W. Wiles,

Secretary of the Board.

[FR Doc. 88–27846 Filed 12–5–88; 8:45 am]

BILLING CODE 6210–01–M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 177

[T.D. 88-78]

Tariff Classification of Wire Rope With Becket Attachments

AGENCY: Customs Service, Treasury.

ACTION: Final interpretative rule.

SUMMARY: This document gives notice of a change in the tariff classification of wire rope with becket attachments or becket loops. This merchandise has previously been classified under the provision for wire ropes, cable or cordage fitted with hooks, swivels, clamps, clips, thimbles, sockets or other fittings in item 642.20, Tariff Schedules of the United States (TSUS). Merchandise classifiable under that item is dutiable at the column 1 rate of 5.7 percent ad valorem, but is not subject to any import restrictions under voluntary restraint arrangements (VRA's). The heavy-duty type of rope generally involved in this matter will now be classified under the provision for steel rope not fitted with fittings in item 642.16, TSUS, which requires a column 1 rate of duty of 4 percent ad valorem. If of stainless steel, the rope will now be dutiable at the rate of 4.4 percent ad valorem under item 642.14, TSUS. Merchandise classifiable under either item 642.14 or item 642.16 may not be imported without visas as required under VRA's. The applicable VRA's are agreements between the United States and such entities as the European Economic Community, Japan and the Republic of Korea under which exports of certain steel products to the United States are voluntarily limited. Customs published a previous notice of proposed change in this matter requesting comments on the proposed reclassification and an appropriate effective date for any change.

EFFECTIVE DATE: This decision will be effective as to merchandise entered, or withdrawn from warehouse, for consumption, on or after 30 days from the date of publication of this decision in the Customs Bulletin.

FOR FURTHER INFORMATION CONTACT: James A. Seal, General Classification Branch, Office of Regulations and Rulings (202) 566-8181.

SUPPLEMENTARY INFORMATION:

Background

Customs received on behalf of an organization representing domestic steel wire rope producers a request that the Customs position concerning the tariff classification of wire rope with becket attachments or becket loops be reconsidered. It was claimed that this classification was not consistent with later Customs classification positions affecting steel cordage products, and that an analysis of import statistics suggested that the Customs classification in question was being abused as a mean for avoiding limitations under applicable voluntary restraint arrangements (VRA's). The applicable VRA's are agreements between the United States and certain steel producing countries, such as the Republic of South Korea, Japan and the European Economic Community, to voluntarily limit exports to the United States of certain basic steel products identified by Tariff Schedules of the United States (TSUS) item numbers. In order to show compliance with the applicable restrictions, imports of the steel products are not entitled to admission into the United States unless accompanied by the necessary visa. Accordingly, Customs published a notice in the **Federal Register** on October 1, 1987 (52 FR 36789), that the classification in question was under review. The notice also requested public comment regarding the substantive considerations involving classification as well as comments concerning an appropriate effective date for any change in position.

The merchandise affected by this document mainly consists of heavy-duty steel wire rope typically used as hoist, drag or similar lines in earthmoving or mining equipment or in other heavy-duty applications. Rope of this type generally must be attached to the equipment with which it is used by mechanical connections, rather than by preattached fittings (which are not a practical means for transferring full loads to and from the rope when placed in service). However, the rope is supplied with becket attachments or becket loops which provide a means for handling the rope. For example, a more flexible rope of smaller diameter and load capacity may be attached to the larger rope using beckets to guide it for the purpose of threading the larger rope through pulleys or otherwise positioning it before full load connections are made.

In a letter dated November 1, 1974 (036046), Customs Headquarters ruled that wire rope with a pad eye welded to one end with a becket loop attached for use in a power shovel was classifiable under the provision for wire ropes, cables or cordage fitted with hooks, swivels, clamps, clips, thimbles, sockets or other fittings in item 642.20, TSUS. In apparent reliance on this precedent, New York Customs Region ruling letters dated March 23, 1986 (808452), and May 28, 1986 (818700), held wire rope with becket loops to be similarly classifiable. None of these rulings, however, examined the scope of the involved provision.

In the decision claimed to be inconsistent with that position, protest review decision dated April 23, 1984 (072959), Headquarters reviewed the tariff status of 7-wire prestressed concrete strand in continuous lengths of approximately 4,000 feet on reels. A cylinder with tapered center hole (chuck) was attached to each end of the strand. The chuck's stated purpose was to prevent fraying of the ends and to facilitate unreeling and handing of the strand during further processing. Customs rejected the protestant's claim that the merchandise was properly classifiable under item 642.20 as wire rope fitted with fittings. In confirming that the provision for steel strand not fitted with fittings in item 642.11, TSUS, represented the proper classification, Customs found that the chucks did not make the strand suitable for the use intended, and that they did not dedicate the strand to any particular use. Customs stated that the "fittings" within the meaning of the involved provisions were functional attachments for articles which have an identifiable use. Headquarters amplified that position in a letter dated August 16, 1984 (072959), by stating that in the context of the involved provisions a "fitting" must make the strand fit or suitable for, or adapt it to the purpose intended, and that attachments which do not make the strand ready for final use do not "fit" the strand in a tariff sense.

While merchandise classifiable under the provision for steel ropes fitted with fittings in item 642.20 is not subject to any VRA restrictions, the merchandise is subject to a column 1 rate of duty of 5.7 percent ad valorem. While changing the classification of merchandise to the provision for steel ropes not fitted with fittings in item 642.16 TSUS, will make it subject to visa requirements under applicable VRA's, the change also results in a reduction in the rate of duty to 4 percent ad valorem. For stainless steel wire cordage without fittings classifiable under item 642.14, TSUS, the rate of duty would be reduced to 4.4 percent ad valorem.

In response to the Customs **Federal Register** notice requesting comments on the change, a further submission was received on behalf of the same domestic producers initially requesting this review. In addition to further advocating the change, the comments also stated

that the change should be made without further delay. Submissions were received from seven other commenters, all of which were opposed to the change, and which included comments on behalf of importers and from foreign industry representatives.

Analysis of Comments

The main objection to the change was that the classification of the type of wire rope at issue with beckets as rope with fittings constituted a premise on which the applicable VRA's were negotiated, and that the change in classification will change the intended scope of VRA's and represent a unilateral violation of negotiated quotas. Customs recognizes that the change may impact the quantitative levels under the respective VRA's. However, Customs is equally cognizant of its obligations to properly classify and assess duty on merchandise in accordance with its condition as imported.

A second objection was that various Customs rulings have classified beckets as fittings, that they are so classified internationally, and that judicial precedent requires that beckets be classified as fittings. Customs has legal authority to modify or revoke rulings found to be in error, and, in fact, has a responsibility to do so. Moreover, *Oxford International Corp.* v. *United States*, 88 Cust. Ct. 12, C.D. 4326 (1972), cited by a commenter in connection with this objection, held that plastic covered lengths of wire cable fitted at either end with barrel and ferrule connectors, and used to transmit force in bicycle caliper brake systems, were fittings for item 642.20 purposes because they served a connective and fastening purpose. We do not agree that this is authority for the similar classification of wire rope with beckets that do not assist the rope in performing its ultimate function.

It was further commented that beckets are "fittings" both by common meaning and commercial usage, and that they are functional attachments which adapt or "fit" a rope for use as a drag line or hoist line on a particular piece of mining equipment, and that the temporary use of beckets does not negate their functional characteristics. However, the claim that beckets are within the common meaning of the term "fittings" is not supported by any lexicographic references. Moreover, they do not "fit" wire rope for tariff purposes because they do not adapt the rope to the purpose for which it is intended. Their only purpose is to pull a wire rope into place on a particular piece of equipment or in a particular application. With respect to mining equipment, such as an excavator, the rope is fastened for full load transfer to the drum and bucket respectively, by a series of clamps and wedge sockets, to function as a hoist line, boom pendant, etc. Becket end preparations or attachments are facilitating in nature, and do not enable the rope to transmit motion or perform some other specific function.

Another commenter stated beckets are custom-made attachments which dedicate heavy-duty ropes cut to lengths of over 500 feet for a specific end use, and that the ropes could not be used without them. It was further noted that ropes with beckets are ready to be installed upon importation and require no post-importation processing. However, we do not agree that beckets dedicate wire rope to its specific end use. The fact that ropes may be custom-made and require no post-importation processing is not dispositive.

A further claim was that beckets are *ejusdem generis* with the named exemplars, "hooks, swivels, clamps, clips, thimbles, sockets," preceding the general term "other fittings" in the superior heading to item 642.20. However, under the doctrine of *ejusdem generis*, we believe that beckets would be excluded from the general term "other fittings." The enumerated exemplars are end terminations, each with its own individual characteristic which will fit the needs of a given installation better than the others. Unlike beckets, these end terminations fit rope or cable for a particular ultimate purpose, which is their common feature not shared by beckets.

With respect to the comment that a change in classification and consequent application of import restrictions should be made effectively immediately, the Customs Service in the past has delayed the effective date of changes in positions which result in the imposition of a restriction which was not applicable under the previous position. The delays allow time for affected importers to readjust their business arrangements and avoid reliance on the previous position to their detriment. However, changes which result in reductions in rates of duty are generally made effective as to all entries which are open as of the date of the change and for which there has not been a final liquidation. In the instant matter, where the change has both an advantageous and disadvantageous result, these requirements are in conflict. Since both duty rate and VRA consequences are linked to the tariff classification of the merchandise, the single effective data chosen for any change must be one of which best takes into account both the benefit and detriment of the change.

Decision

After careful analysis of the comments submitted and further review of this matter, the previously proposed change in classification is adopted, and steel wire rope otherwise classifiable under the provisions of item 642.14 or item 642.16, TSUS, covering ropes without fittings, will not be excluded from those provisions and classified under the provision for steel wire rope with fittings in item 642.20, TSUS, on the basis of the presence of beckets or becket loops. This change in classification and resulting reduction in rates of duty is effective as to merchandise entered, or withdrawn from warehouse, for consumption, on or after 30 days from the date of publication of this decision in the Customs Bulletin. Customs previous decisions of November 1, 1974 (036046), March 23, 1986 (808452) and May 28, 1986 (818700) are revoked and will no longer be followed.

Drafting Information

The principal author of this document was James C. Hill, Regulations and Disclosure Law Branch, U.S. Customs Service. However, personnel from other offices participated in its development.

William von Raab,
Commissioner of Customs.

INTERNATIONAL TRADE COMMISSION

19 CFR Part 210

Interim Rules Governing the Posting and Possible Forfeiture of Temporary Relief Bonds by Complainants in Investigations of Unfair Practices in Import Trade

AGENCY: International Trade Commission.

ACTION: Interim rules and request for comments.

SUMMARY: The Commission has revised certain rules in 19 CFR Part 210 (53 FR 33043, Aug. 29, 1988) on an interim basis to implement the following: (1) A new statutory provision authorizing the Commission to require complainants who are seeking a temporary exclusion order under subsection (e) of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337(e)) to post a bond as a prerequisite

to the issuance of such relief; and (2) Congressional authorization in the legislative history of the statutory bonding provision for the Commission to order forfeiture of the bond to the U.S. Treasury if, after issuing a temporary exclusion order conditioned on a bond, the Commission determines that the respondents have not violated section 337.

DATES: The effective date of the interim rules is November 21, 1988. Comments on the interim rules will be considered by the Commission in promulgating final rules if received no later than February 6, 1989.

ADDRESS: A signed original and fourteen (14) copies of each set of comments, along with a cover letter addressed to Kenneth R. Mason, Secretary, should be sent to the U.S. International Trade Commission, Office of the Secretary, 500 E. Street SW., Room 112, Washington, DC 20436.

FOR FURTHER INFORMATION CONTACT: P.N. Smithey, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–252–1061. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810.

SUPPLEMENTARY INFORMATION:

The Omnibus Trade and Competitiveness Act of 1988 and Its Legislative History

The temporary relief provisions of section 337 of the Tariff Act of 1930 ("the Tariff Act") (19 U.S.C. 1337 (e) and (f)) were amended in several important respects by the recently enacted Omnibus Trade and Competitiveness Act of 1988 ("the Omnibus Trade Act"), Pub. L. No. 100–418, 102 Stat. 1107 (1988).[1] Among other things, complainants can be required to post a bond as a prerequisite to the issuance of a temporary exclusion order. *See* 19 U.S.C. 1337(e)(2), created by section 1342(a)(3)(B) of the Omnibus Trade Act. The purposes of requiring a bond are to deter frivolous requests for temporary relief and to deter use of temporary relief for harassment of respondents and other improper purposes. *See* 134 Cong. Rec. H1863 and H2044 (April 20, 1988); H.R. Rep. No. 576, 100th Cong., 2d Sess. 635–636 (1988); 133 Cong. Rec. S10364–S10365 (July 21, 1987 (Statement of Sen. Lautenberg). The Commission's authority to require a bond also is intended by Congress to be a means of overcoming Commission hesitation to grant temporary exclusion orders. *See* 133 Cong. Rec. S10365; 134 Cong. Rec. H2044; H.R. Rep. No. 576 at 635.

The legislative history of the statutory bonding provision indicates that if the Commission issues a temporary exclusion order conditioned on a bond and subsequently determines that the respondents have not violated section 337, the bond may be forfeited to the U.S. Treasury in accordance with rules prescribed by the Commission. *See* H.R. Rep. No. 576 at 635; 133 Cong. Rec. S10365; H.R. Rep. No. 40, 100th Cong., 1st Sess. 158–159 (1987). The forfeiture authorization is intended to provide a further disincentive to abuse of requests for temporary exclusion orders by complianants. *See* H.R. Rep. No. 576 at 635; 134 Cong. Rec. H2044.

The effective date of the statutory bonding provision is November 21, 1988. *See* section 1342(d)(1)(B) of the Omnibus Trade Act; H.R. Rep. No. 576 at 635; 134 Cong. Rec. H2044. The interim rules set forth in this notice governing the posting and possible forfeiture of bonds by complainants apply only with respect to motions for temporary exclusion orders filed on or after November 21, 1988.

The Procedure for Adopting Interim Rules

The Legislative History of the statutory bonding provision admonished the Commission to issue implementing interim rules as expeditiously as possible. *See* H.R. Rep. No. 576 at 635; 134 Cong. Rec. H2044. Ordinarily, Commission rules to implement new legislation are promulgated in accordance with the rulemaking provision of the Administrative Procedure Act ("the APA"), which encompasses the following steps: (1) Publication of a notice of proposed rulemaking; (2) solicitation of public comment on the proposed rules; (3) Commission review of such comments prior to developing final rules; and (4) publication of the final rules 30 days prior to their effective date. *See* 5 U.S.C. 553(b) through (d). Because of the amount of time needed to develop interim bonding and forfeiture rules and the Congressional admonition to issue such rules as expeditiously as possible, the customary procedure could not be used. A notice soliciting public comments on proposed interim bonding and forfeiture rules was published in the **Federal Register** of November 3, 1988, 53 FR 44463. However, the time allotted for interested persons to file such comments was shorter than usual because of the limited time remaining before the effective date of the statutory bonding provision. *See* 53 FR 44463 and 44464 at footnote 2.[2] Time constraints imposed by the statutory effective date of the bonding provision also made it impossible for the Commission to publish the final interim rules set forth in this notice 30 days prior to their effective date.[3]

The interim bonding and forfeiture regulations that the Commission has adopted are intended to respond only to the exigencies created by the statutory bonding provision and the legislative history authorizing the Commission to order forfeiture of bonds. Final rules governing the posting and possible forfeiture of temporary relief bonds by complainants will be promulgated in accordance with the complete APA notice, public comment, and advance publication procedure.

Determinations Pursuant to Executive Order 12291 of February 17, 1981, and the Regulatory Flexibility Act

The Commission has determined, for the following reasons, that the interim rules contained in this notice are not subject to the provisions of Executive Order 12291 of February 17, 1981 (46 FR 13193, Feb. 19, 1981) governing federal regulation: Some of the interim rules pertain to administrative actions governed by the provisions of sections 556 or 557 of the APA (5 U.S.C. 556 and 557) (*e.g.*, evidentiary hearing and the issuance of an initial determination by a Commission administrative law judge and discretionary review by the Commission) and thus are not "regulations" or "rules" within the meaning of section 1(a) of Executive Order 12291. The interim rules also do not qualify as "major rules" under section 1(b) of Executive Order 12291 because they do not result in the following:

(1) An annual effect on the economy of $100 million or more;

[1] *See* FR 33043 (Aug. 29, 1988) for a summary of all the Omnibus Trade Act's amendments to section 337 and the text of interim Commission rules implementing the amendments that became effective on August 23, 1988.

[2] The public comments the Commission received concerning the proposed interim bonding and forfeiture rules are discussed elsewhere in this notice.

[3] Under section 553 of the APA, an agency may dispense with the publication of a notice of "final" interim rules 30 days prior to their effective date if (1) the rules are interpretive rules or statements of policy, or (2) the agency finds that "good cause" exists for not meeting the advance publication requirement, and (3) that finding is published along with the rule. *See* 5 U.S.C. 553(d)(3). In this instance, the Commission has determined that the amount of time needed to develop interim bonding rules, the short period allotted for pomulgating such rules, and the Congressional admonition to do so as expeditiously as possible constitute "good cause" for not complying with the 30-day advance publication requirement.

(2) A major increase in costs (apart from the litigation costs of obtaining a temporary exclusion order in an investigation under section 337 of the Tariff Act of 1930) or prices for consumers, individual industries, Federal, state, or local government agencies, geographic regions, or individual industries; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete in domestic or export markets.

In accordance with the Regulatory Flexibility Act ("RFA") (5 U.S.C. 601 note), the Commission hereby certifies pursuant to 5 U.S.C. 605(b) that the interim rules set forth in this notice are not likely to have a significant economic impact on a substantial number of small business entities. The Commission feels justified in making this certification, for the following reasons:

(1) The interim bonding and forfeiture rules set forth in this notice apply only to companies that are seeking a temporary exclusion order under section 337 of the Tariff Act of 1930. Historically, motions for temporary exclusion orders have been filed by only a very small percentage of the total number of section 337 complainants.[4] Although the Commission does not maintain statistics on the size of companies that appear before it as section 337 complainants, it safely can be said that not all complainants that seek temporary exclusion orders are small businesses as defined in 5 U.S.C. 601 and 15 U.S.C. 632.

(2) The Commission notes also that the interim rules which it has adopted are flexible enough not to unduly inhibit the ability of complainants that are small businesses to comply with the prescribed bonding and foreiture procedure or to compete in the marketplace (consequences that the RFA is designed to prevent). For example, with respect to bonding, the interim rules provide that even though there is a policy favoring the imposition of a bond in every case, the Commission may, in an appropriate case, waive the bond or require only a nominal bond after considering factors such as hardship to the complainant.

The interim rule governing the bond-related documentation that must be filed with motions for temporary relief also has a certain amount of flexibility designed to accommodate small businesses. The rule requires the complainant to submit certain audited financial statements or "the equivalent thereof." The rule was drafted in this fashion in recognition of the fact that some complainants may be very small businesses and may not have audited statements prepared. The Commission thus determined to accept reasonably equivalent substitutes to accommodate such complainants.

Summary of Public Comments on the Proposed Interim Rules, Overview of the Bonding and Forfeiture Processes, and Explanation of the Specific Interim Revisions to 19 CFR Part 210 (53 FR 33043 Aug. 29, 1988)

Apparently because of the short time allotted for filing, the Commission did not receive a large number of comments on the proposed interim bonding and forfeiture rules. The ITC Trial Lawyers Association ("ITCLA") filed a letter stating that it had not been able to prepare comments on the proposed rules within the time provided, but would file comments on the "final" interim rules for consideration by the Commission in drafting final rules. *See* letter to Kenneth R. Mason from Sandra A. Sellers of the ITCLA (dated Nov. 9, 1988). The only comments the Commission received were from the International Electronics Manufacturers and Consumers of America, Inc. ("IEMCA"), an association whose members include potential section 337 respondents and some potential complainants. *See* Letter to Kenneth R. Mason from the law firm of Powell, Goldstein, Frazer & Murphy (dated Nov. 9, 1988) and the accompanying comments of the IEMCA. The IEMCA's comments and the Commission's responses thereto are integrated into the discussion which follows.

1. Determining Whether the Complainant Should Be Required To Post a Bond and, if so, the Amount of the Bond

The procedures governing the disposition of motions for temporary relief are found primarily in interim rules 210.24(e), 210.41, 210.53, 210.58, and 210.59. *See* 53 FR 33043, 33060–33063, 33068, 33070, and 33072 (Aug. 29, 1988). The new interim rules governing the posting of bonds by complainants as a prerequisite to the issuance of a temporary exclusion order have been incorporated into those rules. Where appropriate, the interim bonding rules are based on or contain citations to Treasury Department and U.S. Customs Service regulations and statutes. For the most part, the preamble and interim rules set forth below are the same as the preamble and proposed interim rules published on November 3, 1988 (53 FR 44463).

Commission decisions on whether to require a complainant to post a bond and, if so, the amount of the bond, will be made by the initial determination/discretionary Commision review procedure that is currently used to determine whether to grant or deny motions for temporary relief. The factors administrative law judge and the Commission will consider in determining whether to require a bond include those specified in the legislative history of the bonding provision, as well as consideration of the public interest, which is to be paramount in the administration of section 337. *See* 133 Cong. Rec. S10365; H.R. Rep. No. 576 at 635; 134 Cong. Rec. H2044; S. Rep. No. 1298, 93 Cong., 2d Sess. 193 (1974). Complainants who seek a temporary exclusion order will be required to address the issues of bonding and the amount of the bond in the motion for temporary relief and to provide coroborating documentation with the motion. Each respondent's response to the motion must respond to bonding arguments in the motion for temporary relief to the extent possible.[5] In light of the stringent statutory deadlines for determining whether to grant temporary relief and the intent of Congress that the Commission issue temporary relief orders more quickly than it issued them under the previous enactment of section 337 (*see* H.R. Rep No. 40 at 159; S. Rep. No. 71, 100th Cong., 1st Sess. 131 (1987), the Commission believes that having as much relevant bonding data as possible before the administrative law judge at the outset of the temporary relief proceeding will foster the development of a more complete record (since the respondents and the Commission investigative attorney can conduct discovery and challenge the complainant's bonding data and assertions). It also will facilitate resolution of the question of bonding within the period allotted by law for determining whether to grant motions for temporary exclusion orders, as well as the expeditious issuance of a temporary exclusion order if the motion is granted and a bond is required.

The interim rules enunciate a policy favoring the requirement of a bond in every case in which the complainant will receive a temporary exclusion order. In a case where the complainant seeks to be excused from posting a bond, the complainant will have the

[4] For example, of the 17 investigations instituted in 2 involved a motion for a temporary exclusion order. Of the 23 investigations instituted in 1986, none involved a motion for a temporary exclusion order.

[5] *See infra* n.12.

burden of persuading the Commission that exemption from the bond requirement is warranted. The Commission believes that such a policy is consistent with the stated purpose of the bonding provision, which is to deter complainants from filing frivolous motions for temporary relief or using temporary relief as a means of harassing the respondent. *See* H.R. Rep. No. 576 at 635–636; 133 Cong. Rec. S10364–S10365; 134 Cong. Rec. H2044. The Commission also believes that a Commission policy favoring the imposition of a bond is consistent with the Congressional intent that the bond serve as a means of overcoming Commission hesitation to grant temporary relief (*e.g.*, in cases where the motion for temporary relief does not appear to be frivolous but the strength of the complainant's case is not overwhelming). 133 Cong. Rec. S10365; H.R. Rep. No. 576 at 635; 134 Cong. Rec. H2044.

The Commission believes that any perceived unfairness to complainants stemming from a Commission policy favoring the posting of bonds by complainants to secure temporary exclusion orders is mitigated somewhat by the fact that the Commission has considerable discretion in determining the amount of the bond and thus would be free to require only a nominal bond in appropriate cases. (The Commission notes also that the IEMCA, whose membership includes potential complainants as well as potential respondents expressed no objection to the aforesaid Commission policy favoring the imposition of a bond.)

As stated previously, the legislative history of the statutory bonding provision indicates that the purposes of requiring a bond are to deter frivolous requests for temporary exclusion orders and to deter the use of such relief by complainants to harass respondents or for other improper purposes. *See* H.R. Rep. No. 576 at 635–636; 134 Cong. Rec. H2044; 133 Cong. Rec. S10364–S10365. The Commission's goal in computing the amount of the bond is therefore is select an amount that is sufficient to deter the complainant in question from misusing the temporary exclusion order process and/or the temporary exclusion order if such relief is granted.[6]

In light of (1) the stringent new statutory deadlines for granting temporary relief (90 days in an ordinary investigation and up to 150 days in a "more complicated" investigation),[7] (2) the wide range of issues parties conceivably could raise in their arguments concerning the posting of a temporary relief bond by the complainant, and (3) the Commission's lack of prior experience with complainants' temporary relief bonds, the Commission found it appropriate to adopt an interim rule containing a specific formula for calculating the amount of the bond. A prescribed formula will not only make the computation relatively easy, it also will ensure, to a certain extent, that the bonding provision is applied in a reasonably consistent fashion and that a complainant considering seeking temporary relief will have some idea of the amount at issue (at least in certain types of cases).

For those reasons, the interim rules provide that in cases where a domestic industry exists and domestic sales have commenced and have not been de minimis, the Commission generally will require a bond in an amount ranging from 10 to 100 percent of sales revenues and licensing royalties from the domestic product at issue, as reported in the complainant's annual financial statements for the most recently completed fiscal year. The advantages of this formula are the following:

(1) In most cases, the Commission will not have to rely on allocations. Financial statement sales revenue figures generally are audited numbers and hence specific product revenues should be readily available.

(2) Since a sales revenue figure generally is an audited number, it has some validity. Hence, the only verification documents that the complainant must file along with the motion for temporary relief are (a) the audited financial statements (or the equivalent thereof) for the most recently completed fiscal year, (b) the back-up income statements, work sheets, or other documents showing product revenues tied to the aggregate revenue listed on the financial statements, and (c) a certification under oath by the complainant's chief financial officer indicating that the detail provided in the work sheets or other documents tied to the audited financial statements is correct.

(3) A bond computation formula keyed to a percentage of sales revenues and licensing royalties is appropriate because a bond amount can be tailored to provide a meaningful deterrent to complainant's abuse of temporary relief by taking into account the extent of the complainant's involvement with articles of the type under investigation and the complainant's relative financial strength.[8]

If the facts and circumstances so warrant, the presiding administrative law judge can recommend in the initial determination on temporary relief and bonding by the complainant (if a temporary exclusion order is requested) that the Commission order waiver of the rule requiring application of the range prescribed in the formula, and that it require instead a bond in an amount equal to less than 10 percent or more than 100 percent of the relevant product sales revenues and licensing royalties.[9]

---

[6] In the preamble to the proposed interim rules, the Commission's objective in computing the amount of the bond was described as selecting a bond amount "that is sufficient to deter the complainant in question from abusing the use of a temporary exclusion order if such relief is granted." 53 FR 44465. The IEMCA commented that such a statement mischaracterized the abuses that are most likely to occur, *i.e.*, a complainant's misuse of the temporary relief *process* rather than misuse of a temporary relief *order* and that a complainant's conduct prior to the issuance of the order must be taken into account in computing the amount of the bond.

The Commission notes, in response, that the disputed language corresponded to the language of the Conference Committee Report accompanying the statutory bonding provision, which states that "the purpose of the bonding provision is to prevent the use of *TEOs* [temporary exclusion orders] as a form of harassment of respondents or for other frivolous or unjustified purposes." H.R. Rep. No. 576, 100th Cong., 2d Sess. 635–636 (1988) (emphasis added). The Commission also notes, however, that other statements in the legislative history provide support for the proposition that the real problem which Congress sought to address is potential misuse of the temporary exclusion order process and not just misuse of the order itself. A Senate colloquy incorporated by reference into the Conference Committee Report indicates, for example, that Congress gave the Commission authorization to require a bond as "a tool to weed out unjustified *requests* for temporary exclusion orders." 133 CONG. REC. S10365 (Statement of Sen. Lautenberg) (July 21, 1988) (emphasis added); H.R. Rep. No. 576 at 635; 134 CONG. REC. H1863 and H2044 (April 20, 1988). The aforesaid colloquy also indicates that the Commission may consider "all legal and equitable considerations" in determining whether to require a bond, *id.*, and such considerations clearly would include evidence or facts supporting the inference that a complainant has initiated a temporary relief proceeding to harass the respondents or for some other improper purpose. *See* H.R. Rep. No. 576 at 635; 134 CONG. REC. H2044. To be consistent with all relevant statements in the legislative history, the discussion in the preamble of this notice and the text of interim rule 210.24(e)(1)(iii) were drafted with a view toward deterring potential abuse by complainants of the temporary exclusion order process and/or the temporary exclusion order itself.

[7] 19 U.S.C. 1337(e)(2) as amended by section 1342(a)(3)(B) of the Omnibus Trade Act.

[8] Hardship to the complainant is one of the factors which the Commission is expected to consider in determining whether to require a bond (*see* 133 CONG. REC. S10365; H.R. Rep. No. 576 at 635; 134 CONG. REC. H2044), and thus may also be considered by the Commission in determining the amount of the bond, if a bond is required.

[9] Commission rule 201.4(b) provides that Commission rules may be amended, waived, suspended, or revoked by the mission when, in the judgment of the Commission, there is good and sufficient cause therefor and the rule is not a matter of procedure required by law. *See* 19 CFR 201.4(b).

The Commission expects, however, that exceptions to the range set forth in the rule would be rare. Moreover, even though an occasional exception may arise, the Commission believes that it still is desirable to have a range for the possible amount of the bond set forth in the interim rules in order to lessen the possibility that a complainant with limited litigation resources would, in good faith, pursue a temporary exclusion order and then decide after the Commission determines to grant such relief that it cannot afford to post the required bond.

The Commission recognizes that in certain types of cases, the percentage-of-product-sales-revenue-and-licensing-royalties formula may not be suitable. Such cases may include (but would not be limited to) those in which the complaint alleges prevention of the establishment of an industry, or cases in which the complainant's domestic operations are newly established and commercial sales of the domestic product have not yet commenced or have been de minimis, or cases in which the complainant is a large multinational conglomerate with substantial litigation resources and the domestic product at issue accounts for only a small portion of the complainant's total revenues from sales and licensing royalties. In such cases, the administrative law judge's initial determination on temporary relief can recommend and the Commission can agree to waive application of the rule requiring computation of the bond by the percentage-of-product-sales-revenues-and-licensing-royalties formula. The administrative law judge and the Commission can then use whatever criteria are appropriate to determine the bond in that case. The interim rules thus provide that in cases where the prescribed formula would not be appropriate—*e.g.* including but not limited to cases where the domestic industry is embryonic and domestic sales have been de minimis, or cases involving the alleged prevention of the establishment of a domestic industry or the alleged restraint of trade or commerce in the United States—the amount of the bond will be determined on the basis of the facts on the record, the complainant financial strength, the parties' arguments, and any other factors which the presiding administrative law judge or the Commission deems relevant. If a case is a type for which the prescribed formula is or may not be suitable, the interim rule requires the motion for temporary relief to explain why the prescribed formula would not be appropriate, to state the theory the complainant believes would be appropriate for computing the amount of the bond (if the Commission determines to require a bond), and to provide supporting financial and economic data along with a certification under oath executed by the complainant's chief financial officer attesting to the veracity of the data. Finally, the interim rules state that all complainants who are seeking a temporary exclusion order (including complainants who have provided audited financial statements and back-up data), must be prepared to provide upon short notice any additional financial or economic data requested by the presiding administrative law judge in connection with the issue of bonding and certification under oath by the complainant's chief financial officer that the information submitted is accurate.

The bond computation formula and procedure discussed above were outlined in the preamble and proposed interim rules published November 3, 1988. *See* 53 FR 44465, 44466, and 44472. The IEMCA's comments criticized the proposed formula and the implementing rules on the following grounds: (1) They provide too little guidance and give too much discretion to the administrative law judge—which results in uncertainty for the parties; and (2) the formula relies on criteria that are not related to the concept of deterring misuse of the temporary relief process, since the formula is based on a complainant's *past* sales rather then future sales while the temporary exclusion order is in effect. The IEMCA suggested that, in keeping with the deterrent purpose of the bond, the amount of the bond should be commensurate with the actual or constructive commercial benefit the complainant would derive from the temporary exclusion order (an amount which, if forfeited to the U.S. Treasury, would return the complainant to the status quo prior to issuance of the temporary exclusion order). Specifically, the IEMCA recommended that the interim rules be drafted to provide that the amount of the bond would be based on the following: (1) The amount of the commercial benefit derived by the complainant as a result of the temporary exclusion order (based on the allegations of injury that are the basis for the motion for temporary relief), (2) the estimated amount of the benefit to the complainant based on economic projections of expected sales, or (3) the amount of harm to the respondent as a result of the temporary exclusion order, as a proxy for the complainant's benefit.

The Commission is aware that a percentage-of-post-sales-revenues-and-licensing-royalties bond computation formula has certain shortcomings, and that the approach advocated by the IEMCA is logical (since it focuses on commercial benefits to the complainant during the pendency of the temporary exclusion order). The Commission is concerned, however, that in most instances, the formulae advocated by the IEMCA would be too speculative and too difficult to apply within the very limited time available for discovery, an evidentiary hearing, the issuance of an initial determination by the presiding administrative law judge, and the Commission's determination on whether to grant a temporary exclusion order. The Commission has therefore determined that the IEMCA's proposed alternative formulae should not be incorporated into the interim rules as the standard for computing the amount of the bond.

However, the presiding administrative law judge and the Commission would not be precluded from applying one of the IEMCA's proposed formula in an appropriate case, where the complainant or other parties can demonstrate that the percentage-of-product-sales-revenues-and-licensing-royalties formula is inappropriate, that the rule requiring its application should be waived, and that another formula should be applied instead. What constitutes "an appropriate case" will depend on the facts (as well as on the reliability of financial or economic data that are available to support the request for waiver of the prescribed formula in favor of an alternative approach).

Although it is possible that the bond computation methodology in the initial bonding cases may be ad hoc to a certain extent, that result cannot be entirely avoided, for the following reasons:

(1) No single formula will be appropriate for all types of cases (as the IEMCA's comments and proposed alternative formulae tacitly acknowledge).

(2) The Commission has no previous experience in computing the amount of temporary relief bonds, and bonds posted to secure temporary exclusion orders under section 337 are not directly analogous to injunction bonds posted in civil actions pursuant to Rule 65(c) of the Federal Rules of Civil Procedure (which generally are computed on the basis of the amount of harm to the respondent and may be forfeited to the respondent if it turns out that the injunction should not have been issued).

(3) Congress did not provide any specific guidelines for computing the amount of the bond.

VOL 53 ISS 234 DE 6 1988 UMI

One purpose of having flexible interim rules in effect during the initial bonding cases is to develop experience which can be used in the formulation of final bonding (and forfeiture) rules. Significant computation problems that arise in the initial cases under the interim bonding rules can be remedied by further revision of the rules published in this notice on an interim basis (if necessary) or through the promulgation of final rules.

The statutory provision authorizing the Commission to require that the complainant post a bond to secure a temporary exclusion order and other provisions of federal law (cited in the proposed rules) provide that: (1) The surety need not be a guarantee corporation and the Government cannot require that the person posting the bond use a particular guarantee corporation; and (2) in lieu of the surety bond of a guarantee corporation, the person may post the surety bond of an individual or other types of Government obligations [10], *viz.*, a certified check, a postal money order, cash, United States bonds, or Treasury notes. *See* 31 U.S.C. 9301, 9303, and 9304(b). *See* also 31 CFR Part 225. For those reasons, the proposed rules provide for the posting of individual or corporate surety bonds, as well as other types of government obligations, such as a certified check, a bank draft, a postal money order, cash, United States bonds, or Treasury notes, in lieu of a surety bond in accordance with the applicable Treasury statutes and regulations.

Federal law also requires that the Commission formally approve any bond posted to secure a temporary relief order. The interim rules designate the Commission Secretary as the Commission's bond approval officer. The bond approval process will entail verification of the information provided in and with the bond (with assistance from the Commission's Office of Investigations, where necessary) in accordance with governing Treasury regulations or circular. The interim rules authorize the Secretary to disapprove and reject a bond submitted by a complainant for the following reasons: (1) Noncompliance with the Commission order, notice, determination, or opinion requiring the complainant to post a bond; (2) noncompliance with governing Commission or Treasury regulations (or a restriction imposed by a Treasury regulation or circular); (3) evidence of fraud or misrepresentation on the face of the bond or any supporting documentation (*e.g.*, powers of attorney) or in the instrument governing the posting and disposition of the certified check, the bank draft, postal money order, cash, United States bond, or Treasury note submitted in lieu of a surety bond; or (4) any other reason deemed appropriate by the Secretary. If the complainant believes that the Secretary's rejection of the bond was erroneous as matter of law, the complainant may appeal to the Commission by filing a petition in the form of a letter to the Chairman of the Commission within 10 days after service of the Secretary's rejection letter.

The Commission notes that the bond approval process will be expedited if the complainant chooses to use surety corporation that is licensed to do business in the United States and is on the list of approved corporate sureties mantained by the Clerk of the U.S. District Court for the District of Columbia. From the Commission's standpoint, the administrative advantage of using such a company is that the Commission can seek advice and assistance from the clerk of that court in connection with the verification needed to approve a bond posted by such a company. The advantage to the complainant is that this may expedite the bond approval process and the issuance of the temporary relief order which the bond is intended to secure.

The bond approval process can be expected to take longer if the complainant chooses to use the bond of an individual surety, or a certified check, a bank draft, a post office money order, cash, a United States bond, or a Treasury note in lieu of a surety corporation's bond to secure a temporary exclusion order. This is due to the verification that must be performed before the bond or Government obligation tendered in lieu of a surety corporation's bond can be accepted by the Commission.

For example, when the bond of an individual surety is tendered, the verification entails investigation to ensure the solvency and financial responsibility of the individual. For that reason, the individual must file an affidavit of the type shown in Appendix A to interim rule 210.58 (which corresponds to Customs Form 3579 (19 CFR 113.35). If the bond or Government obligation is in the form of a certified check, a bank draft, a post office money order, cash, a United States bond, or a Treasury note, the bond approval officer must conduct the verification specified in 31 CFR 225.6. That verification entails ascertaining ownership of the Government obligation in question, as well as the sufficiency of the accompanying power of attorney and bond agreement or the equivalent thereof. In cases where a registered bond or note is posted, the bond approval officer must verify the regularity of the assignments and that the deposit is made in conformity with the provisions of 31 CFR Part 225.

Since federal law prohibits the Commission from requiring complainants to use a surety corporation or a particular surety corporation, the interim rules do not *require* that complainants post bonds of corporate sureties registered with the U.S. District Court for the District of Columbia or that the complainant post the bond of a surety corporation rather than the bond of an individual surety or another type of Government obligation in lieu of a surety bond (such as a certified check, a bank draft, a post office money order, cash, a United States bond, or a Treasury note).

The manner in which the Commission has incorporated the procedures discussed above into existing Commission rules is summarized below.

Interim Rule 210.1

Interim rule 210.1 (53 FR 33043 and 33056, Aug. 29, 1988) describes the applicability of the rules in and lists the statutory provisions that authorize the enactment of such rules. As indicated above, the Commission's authority to require a complainant to post a bond as a prerequisite to the issuance of a temporary exclusion order is found in subsection (e)(2) of section 337 of the Tariff Act (created by section 1342(a)(3)(B) of the Omnibus Trade Act). The authority to issue interim bonding rules to implement that provisions is found in section 1342(d)(1)(B) of the Omnibus Trade Act. The Commission's authority to require forfeiture of the bond to the U.S. Treasury is found in the legislative history of the aforesaid bonding provision. *See* H.R. Rep. No. 576 at 636; 133 CONG. REC. S10365; 134 CONG. REC. H2044.

The interim revisions to interim rule 210.1 therefore consist of the following: (1) The addition of the words "expressly or implicitly" before the word "authorized" in the sentence beginning "These rules are authorized by * * *"; and (2) the insertion of citations to the relevant statutory provisions and legislative history at the end of that sentence.[11]

[10] A "Government obligation" is a public debt obligation of the United States Government and an obligation whose principal and interest is unconditionally guaranteed by the Government. 31 U.S.C. 9301.

[11] Section 2 of the Omnibus Trade Act is cited in the revised version of interim rule 210.1 (in addition

Continued

Interim Rule 210.24(e)

Interim rule 210.24(e) published on August 29, 1988 (53 FR 33043 and 33060) sets out the procedure for filing, processing, and the ultimate disposition of motions for temporary relief. Paragraph (1) of rule 210.24(e) (53 FR 33043 and 33060, Aug. 29, 1988) sets forth the mandatory content of motions for temporary relief. The new interim revision consists of requiring the motion to address the following issues when the complainant is seeking a temporary exclusion order: (1) Whether the complainant should be required to post a bond as a prerequisite to the issuance of such an order; and (2) the appropriate amount of the bond, if the Commission determines (despite any arguments to the contrary) that a bond will be required. Paragraph (1) of interim rule 210.24(e) also has been revised to include the following: (1) A recitation of the factors the Commission will consider in determining whether to require a bond; (2) the Commission's policy favoring the posting of temporary relief bonds in every case in which the complainant seeks and the Commission determines to issue a temporary exclusion order; (3) the formula for computing the amount of the bond in cases where the domestic industry is established and sales of the domestic product in question have not been de minimis; and (4) the documentation that must be provided to support the bonding arguments in the motion for temporary relief.

Paragraph (7) of interim rule 210.24(e) (53 FR 33043 and 33061, Aug. 29, 1988) governs the amendment of motions for temporary relief. Prior to the adoption of the new interim bonding and forfeiture rules, paragraph (7) stated, in pertinent part, that if the complainant amends the motion for temporary relief in a manner that expands the scope of the motion, the 35-day period allotted under paragraph (8) of interim rule 210.24(e) (53 FR 33043 and 33061, Aug. 29, 1988) for determining whether to institute an investigation and to initiate temporary relief proceedings shall begin to run anew from the date the amendment is filed with the Commission. Paragraph (7) has been revised by the addition of a provision stating that if the complainant amends the motion for temporary relief in a manner that changes the complainant's original assertions on whether a bond is to be required or the appropriate amount of the bond, the 35-day period allotted for determining whether to institute an investigation and to initiate temporary relief proceedings shall begin to run anew from the date the amendment is filed with the Commission. The Commission found this change to be appropriate because the issue of bonding is likely to be vigorously contested and each respondent's response to the motion for temporary relief must address the complainant's arguments on bonding to the extent possible. (*See* the revision of paragraph (9) of interim rule 210.24(e)). The Commission notes further that this revision of paragraph (7) of interim rule 210.24(e) is consistent with the Commission's intent that the respondents have at least 30 days in which to review the motion in its entirety, to consult an attorney, and to decide prior to the tolling of the period for filing a response to the motion what course of action and arguments would be appropriate if an investigation is instituted.

Paragraph (9) of interim rule 210.24(e) (53 FR 33043 and 33061, Aug. 29, 1988) sets forth the required content of responses to motions for temporary relief. Paragraph (9) has been revised by addition of the following: (1) A statement that if the motion requests that the Commission issue a temporary exclusion order, each response to the motion must address, to the extent possible, the complainant's arguments concerning whether a bond should be required and the appropriate amount of the bond; [12] and (2) a statement that each response to the motion for temporary relief may also contain counter proposals concerning the amount of the bond or the manner in which the bond amount should be calculated.

Prior to the adoption of the interim bonding and forfeiture rules, paragraph (10) of interim rule 210.24(e) (53 FR 33043 and 33061, August 29, 1988) provided that following provisional Commission acceptance of a motion for temporary relief and upon institution of an investigation, the motion for temporary relief must be forwarded to an administrative law judge for an initial determination on whether there is reason to believe there is a violation of section 337 of the Tariff Act and whether temporary relief is appropriate. Since the Commission has determined that the question of bonding will be determined by using the initial determination/discretionary Commission review procedure, the revision of paragraph (10) of interim rule 210.24(e) consists of new language to provide that the initial determination on temporary relief must also address whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order (if such an order is to be issued) and, if so, the amount of the bond.

Paragraph (11) of interim rule 210.24(e) (53 FR 33043 and 33061, Aug. 29, 1988) pertains to designating an investigation "more complicated" for purposes of adjudicating a motion for temporary relief. That paragraph previously provided, in pertinent part, that after a motion for temporary relief is referred to the administrative law judge for an initial determination, the administrative law judge may issue an order, sua sponte or on motion, designating the investigation "more complicated" in order to obtain additional time to adjudicate the motion for temporary relief.

The issues of bonding by the complainant and computing the amount of the bond are likely to be contested in most investigations. Moreover, Commission resolution of those issues may pose procedural and substantive difficulties, at least until the administrative law judges and the Commission gain experience with bonding. For those reasons and because the issue of bonding must be addressed in the initial determination on temporary relief, the interim revision of paragraph (11) of interim rule 210.24(e) consists of clarification that the "more complicated designation" may be applied because of the complexity of the bonding issues and/or the complexity of issues relating to whether there is reason to believe the respondents have violated section 337 (as discussed in interim rule 210.59(a)(1)).

Paragraph (12) of the interim rule 210.24(e) (53 FR 33043 and 33062, Aug. 29 1988) discusses the administrative law judge's discretion to control the time, place, nature, and extent of discovery relating to the motion for temporary relief and the administrative law judge's authority to compel discovery on certain issues. The interim revisions to

to the relevant legislative history) for the following reasons: Although the bill that became the Omnibus Trade Act is H.R. 4848, 100th Cong., 2d Sess. (1988), the reports comprising the relevant legislative history expressly pertain to H.R. 3, 100th Cong., 2d Sess. (1988), a trade bill which the President vetoed. The provisions of H.R. 4848 that amend section 337 of the Tariff Act are identical to provisions of H.R. 3. For that reason, section 2 of the Omnibus Trade Act provides that the legislative history of H.R. 3 also serves as the legislative history of the relevant provisions of H.R. 4848.

[12] The Commission recognizes that a respondent's ability to respond to the complainant's arguments on the issue of whether the complainant should be required to post a bond and the appropriate amount of the bond may be limited by the fact that much of the data upon which the complainant may rely to support its position is likely to be confidential business information, which would not be served on the respondents along with the motion and the complaint.

paragraph (12) include new language expressly authorizing the administrative law judge to compel discovery on matters relating to (1) whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order and (2) if so, the amount of the bond. The interim revisions to paragraph (12) also include changing the previous reference in that paragraph from "bonding" to "bonding by respondents." This change will avoid confusion since complainants may now be required to post a bond as a prerequisite to the issuance of a temporary exclusion order.

Paragraph (13) of interim rule 210.24(e) (53 FR 33043 and 33062, Aug. 29, 1988) relates to evidentiary hearings on motions for temporary relief. Paragraph (13) discusses the administrative law judge's authority to rule on such motions with or without a hearing, his or her discretion to control the form and scope of the hearing, and the matters that are to be addressed at the hearing. The interim revisions to paragraph (13) include a statement that the following issues must be discussed at the hearing (if a hearing is conducted): (1) Whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order (if such an order is to be issued) and (2) if so, the amount of the bond. The interim amendments to paragraph (13) of interim rule 210.24(e) also include changing the previous reference in that paregraph from "bonding" to "bonding by respondents" where appropriate. Paragraph (14) of interim rule 210.24(e) (53 FR 33043 and 33062, Aug. 29, 1988) discusses the administrative law judge's discretion to permit the parties to file proposed findings of fact, conclusions of law, and briefs concerning the grant or denial of temporary relief. The interim revision of paragraph (14) consists of clarification that the administrative law judge has the same discretion with respect to the filing of written submissions on whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order and the amount of the bond.

Paragraph (15) of interim rule 210.24(e) (53 FR 33043 and 33062, August 29, 1988) discusses interlocutory appeals and review by the Commission of the administrative law judge's actions and findings relating to motions for temporary relief. No interim revision has been made in the directive set forth in this rule. But for purposes of internal consistency in the references to the initial determination concerning temporary relief, paragraph (15) of interim rule 210.24(e) has been revised by changing the previous reference in that paragraph from "an initial determination granting or denying a motion for temporary relief" to "an initial determination granting or denying a motion for temporary relief and, if applicable, a ruling on the issue of bonding by the complainant as prerequisite to the issuance of a temporary exclusion order."

The Commission has made the same type of clarification in paragraph (16) of interim rule 210.24(e) (53 FR 33043 and 33062, August 29, 1988), which pertains to certification of the record to the Commission.

Paragraph (17) of interim rule 210.24(e) (53 FR 33043 and 33062, Aug. 29, 1988) discusses the content of the initial determination on temporary relief and Commission action thereon. The interim revision to paragraph (17)(i) of this rule (53 FR 33043 and 33062, August 29, 1988) consists of the same type of clarification the Commission made in paragraphs (15) and (16) of rule 210.24(e). The revisions to paragraph (13) also include changing the previous reference to "bonding" to "bonding by respondents" where appropriate. This change will avoid confusion since, complainants may now be required to post a bond as a prerequisite to the issuance of a temporary exclusion order.

Paragraph (17)(ii) of interim rule 210.24(e) (53 FR 33043 and 33062, August 29, 1988) has not been revised. Although the issue of bonding by the complaintant will be included in the initial determination in cases involving a request for a temporary exclusion order, the scope of review by the Commission continues to be limited to alleged errors of law and matters of policy (including policy considerations related to the public interest and bonding). Neither the ruling on bonding by the complainant nor any other aspect of the initial determination will be reviewed by the Commission solely for alleged errors of fact.

The preamble and proposed interim rule 210.24(e)(17) published on November 3, 1988, indicated that the scope of review would be limited to errors of law and matters of policy articulated by the Commission and that questions of fact would not be reviewed. The IEMCA objected to the proposed rule, arguing that the Commission could not lawfully delegate its factfinding responsibility to an administrative law judge and that limiting Commission review in that manner would effectively preclude any review of bonding and public interest matters (which, in the IEMCA's view, are largely factual matters and the responsibility of the Commission).

The Commission noted that section 557(b) of the APA provides, in pertinent part, that on appeal from or review of an initial decision by an administrative law judge, an agency has all powers that it would have in making the initial decision "except as it may limit the issues on notice or by rule." 5 U.S.C. 557(b). The Commission noted also that while the judicial decisions cited by the IEMCA in its comments supported the IEMCA's assertion that there is a widespread assumption that a system of restricted review can be brought about only through legislation, the cited decisions are inapposite to the circumstances at issue here because each of the cited decisions is an affirmation of an agency's ability to review factual findings, rather than a decision affirmatively precluding the delegation of factfinding responsibility. In each case, the agency in question had a duty to review factual findings because it had not limited the scope of its review by notice or by rule. In none of the cited decisions was the issue whether an agency may restrict the scope of its review.

The Commission noted that there is no definitive legislative history of the APA upon which the Commission could rely to determine whether the proposed rule was unlawful, as the IEMCA had suggested and that interpreters of the statute disagree on its meaning. *See, e.g.*, K. Davis, Administrative Law Treatise, § 17.14 at 324 (2d ed. 1980) at 323, 324 citing Administrative Conference Statement on ABA Proposals to Amend the Administrative Procedure Act, 24 Ad. L. Rev. 419, 442 (1973); *Universal Camera Corp.* v. *Labor Bd.*, 340 U.S. 494 n.27 (1950).

The short time provided by law for determining whether to grant or deny motions for temporary relief necessitates abbreviation of the customary administrative adjudicative process. For that reason, and the fact that section 557(b) expressly permits an agency to limit the scope of its review of an initial determination by rule, the Commission determined not to change the proposed interim rule making Commission review unavailable for purely factual matters addressed in an initial determination on temporary relief and bonding. However, to clarify that bonding and the public interest involve policy matters for which Commission review should and will be available (particularly as the Commission gains experience with bonding issues in the initial cases and in light of the fact that the public interest is paramount in the

BEST COPY AVAILABLE

administration of section 337), the preamble in this notice and interim rule 210.24(e) were drafted to indicate that review of an initial determination on temporary relief and bonding may be granted for errors of law and/or policy matters, including policy considerations relating to bonding and public interest.

Paragraphs (17) (iii) and (v) of interim rule 210.24(e) (53 FR 33043 and 33063, Aug. 29, 1988) discuss, among other things, the page limits for comments and responses thereto which the parties may file concerning the presence or absence of alleged errors of fact or law in the initial determination on temporary relief. The interim revisions to paragraphs (17) (iii) and (v) include the same type of clarification the Commission has made in paragraphs (15) and (16) of interim rule 210.24(e). Additionally, since the initial determination must address the question of bonding by the complainant when the complainant is seeking a temporary exclusion order and that issue is likely to be vigorously contested (at least in the first few investigations), the revisions to paragraphs (17) (iii) and (v) of interim rule 210.24(e) include 5-page increases in the current page limits imposed for the parties' comments on the initial determination and the responses thereto.

Paragraph (17)(vi) of interim rule 210.24(e) (53 FR 33043 and 33063, Aug. 29, 1988) provide that if the Commission determines to modify or vacate the initial determination, a notice and (if appropriate) a Commission opinion will be issued, and if the Commission does not modify or vacate the initial determination, it will automatically become the determination of the Commission and a notice of that fact will not be issued. The operation of the statutory bonding provision necessitates modification of this rule to indicate that if the Commission determines (either by reversing or modifying the administrative law judge's initial determination, or by adopting the initial determination) that a temporary exclusion order should be issued and that the complainant must post a bond as a prerequisite to the issuance of the order, the Commission may issue (on the statutory deadline for determining whether to grant temporary relief or as soon as possible thereafter) a notice setting forth conditions for the bond if any (in addition to those outlined in the initial determination) and the deadline for filing the bond with the Commission.

Paragraph (18) of interim rule 210.24(e) (53 FR 33043 and 33063, Aug. 29, 1988) sets forth the Commission's procedure for determining (1) the appropriate form of temporary relief, (2) whether the statutory public interest factors preclude such relief, and (3) the amount of the bond under which respondents' merchandise will be permitted to enter the United States during the pendency of the investigation and any temporary relief order issued in response to the motion. The interim amendments to paragraph (18) of interim rule 210.24(e) consist of changing all previous references to "bonding" to "bonding by respondents" where appropriate.

Interim Rule 210.41

Interim rule 210.41 (53 FR 33043 and 33068, Aug. 29, 1988) sets forth general provisions governing hearings in section 337 investigations. Paragraph (a)(2) of that rule previously stated that "[e]xcept as provided under § 120.24(e)(13), an opportunity for a hearing shall also be provided to take evidence and hear argument for the purpose of determining whether there is reason to believe there is a violation of section 337 of the Tariff Act." For internal consistency with other interim rules governing the initial adjudication of motions for temporary relief by the administrative law judge, the interim revision to paragraph (a)(2) of interim rule 210.41 consists of clarification that the hearing may also address the issue of whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order (if such an order is being requested) and, if so, the amount of the bond.

Interim Rule 210.53

Interim rule 210.53 (53 FR 33043 and 33068, Aug. 29, 1988) discusses the issuance and disposition of initial determinations for all matters that are to be adjudicated by the initial determination/discretionary review procedure, including motions for temporary relief. Paragraph (b) of that rule previously stated that "[t]he disposition of an initial determination concerning temporary relief is governed by the provisions of § 210.24(e)(17)." For internal consistency with the revisions to interim rule 210.24(e) relating to bonding by the complainant, the Commission has revised paragraph (b) of interim rule 210.53 to state that "[t]he disposition of an initial determination concerning temporary relief (and if appropriate, the posting of a bond by the complainant and the amount of the bond) is governed by the provisions of § 210.24(e)(17)."

Interim Rule 210.56

Interim rule 210.56 (53 FR 33043 and 33071, Aug. 29, 1988) discusses the process of reviewing initial determinations, including the filing of briefs, requests for oral argument, the scope of the review, what action the Commission can take upon completion of the review, and the time limits for concluding a review of an initial determination concerning temporary relief. For consistency with other interim rules pertaining to the grant or denial of temporary relief and to avoid confusion, the Commission has changed the language in paragraph (d) of interim rule 210.56 which previously referred to "an initial determination concerning temporary relief" to "an initial determination concerning temporary relief and, possibly, bonding by the complainant and the respondents."

Interim Rule 210.58

Interim rule 210.58 (53 FR 33043 and 33068, Aug. 29, 1988) governs the Commission's adjudication of the issues of remedy, the public interest, and bonding by respondents in section 337 investigations. Since the Commission is now authorized to require complainants to post a bond as a prerequisite to the issuance of a temporary exclusion order, the bonding issues encompassed in that determination are cited in paragraph (b) of that rule. The definition of the "bond" to be posted by the complainant, the criteria the Commission will use in determining the amount of bond, the standard bond provisions that will be required in every case, the restrictions and requirements relating to individual and corporate sureties, are also discussed in the revised version of paragraph (b).

Interim Rule 210.59

Paragraph (b) of interim rule 210.59 (53 FR 33043 and 33072, Aug. 29, 1988) discusses designating an investigation "more complicated" for purposes of determining whether to grant a motion for temporary relief. The Commission has revised paragraph (b) of this rule by clarifying that the "more complicated" designation can be applied for purposes of determining whether to grant a motion for temporary relief and/or determining (1) whether to require the complainant to post a bond as a prerequisite to the issuance of a temporary exclusion order, and (2) if so, the amount of the bond.

2. Determining Whether the Complainant Should be Required to Forfeit the Bond in Whole or in Part

The legislative history of the statutory provision authorizing the Commission to require a complainant to post a bond as a prerequisite to the issuance of a temporary exclusion order also

authorizes the Commission to require forfeiture of the bond when the Commission determines, after issuing a temporary exclusion order conditioned on a bond, that the respondents have not violated section 337. *See* H.R. Rep. No. 576 at 635; 134 CONG. REC. H2044; 133 CONG. REC. S10365; H.R. Rep. No. 40 at 158–159. Congress intends that the forfeiture provision operate in the same way that respondents' section 337 import bonds "revert" to the U.S. Treasury when the Commission determines that imported articles permitted to enter the United States under a bond violated section 337.[13]

Interim rule 210.58(c) provides that if an investigation is terminated on the basis of a settlement agreement or a consent order with no concurrent determination as to the violation of section 337, the parties will not address and the Commission will not determine the issue of whether the bond posted by the complainant to secure a temporary exclusion order should be forfeited. The proposed rules published on November 3, 1988, did not include such a provision. The IEMCA's comments noted that the proposed rules should discuss how the matter of bond forfeiture would be resolved in the event that an investigation involving a temporary exclusion order is terminated on the basis of a settlement agreement or a consent order with no concurrent finding as to the violation of section 337.

The Commission agreed that this issue should be addressed in the "final" interim rules. The legislative history authorizing the Commission to order forfeiture of the bond only provides for forfeiture after the Commission has determined that there is no violation of section 337. *See* H.R. Rep. No. 576 at 635–636; 134 Cong. Rec. H2044; 133 Cong. Rec. S10365. For that reason, interim rule 210.58(b) provides that if the investigation is terminated on the basis of a settlement agreement or a consent order and without a final determination as to the violation of section 337, forfeiture of the temporary relief bond will not be addressed by the parties and will not be determined by the Commission.[14]

The other interim forfeiture rules which the Commission has adopted are, for the most part, the same as the proposed rules published on November 3, 1988 (*see* 53 FR 44466, 44470–44471, and 44476–44477). Paragraph (c) of interim rule 210.58 provides that if the Commission issues a temporary exclusion order secured by a bond and subsequently determines that one or more of the respondents whose merchandise was covered by the temporary exclusion order has not violated section 337 to the extent alleged in the motion for temporary relief and contemplated by the temporary exclusion order,[15] the Commission will determine whether to order forfeiture of the bond in whole or in part to the U.S. Treasury. Unlike the interim rule governing the posting of temporary relief bonds by complainants, there is no Commission policy favoring forfeiture of the bond. Nor is there a prescribed policy disfavoring forfeiture. The decision concerning forfeiture will be made on a case-by-case basis.

In its comments on the proposed rules, the IEMCA argued that the interim rules should contain a rebuttable presumption that the bond will be forfeited in all cases where the Commission determines that section 337 has not been violated and that such an approach would be consistent with the deterrent purpose of the forfeiture authority and the liquidated damages assessment procedure of the U.S. Customs Service (which is to serve as an analog for the Commission's bonds forfeiture procedure). The IEMCA added that the absence of such a Commission policy would vitiate the deterrent value of the forfeiture authorization.

The Commission believes that adopting a rebuttable presumption of forfeiture would have few practical consequences or benefits to the complainant or to the respondents, for the following reasons:

Although there is no rebuttable presumption of forfeiture in the interim rules, the complainant is still required to present arguments on the issue of forfeiture within a short time after the Commission has determined that section 337 has not been violated, and the forfeiture determination and actual forfeiture (if ordered) will not be postponed pending the outcome of any judicial review of the determination on violation. (*See* the discussion below.)

Moreover, the absence of a presumption favoring forfeiture does not necessarily mean that the Commission will be less likely to order forfeiture than it would be if a rebuttable presumption were incorporated into the rules. There is, after all, no Commission policy disfavoring forfeiture. The Commission will simply consider all parties' arguments, with no predisposition one way or the other, in determining whether forfeiture is warranted.

---

[13] The Customs Service regulations provide that after the date on which the Commission's final determination and remedial order concerning the violation of section 337 become final (*i.e.*, after Presidential review), imported articles that were allowed to enter the United States under a bond must either be exported or destroyed under Customs supervision within 30 days after the date on which Customs district directors notify the importer or consignee that the exclusion order has become final. 19 CFR 12.39(b)(2). If the exporter or consignee fails to take the required action within 30 days, the district director who allowed the articles to enter must assess liquidated damages in the full amount of the bond.

If that happens, a written notice of the claim for liquidated damages and a demand for payment are served on the principal and the surety. The principal and the surety also are advised of their right to petition for relief from the payment of such damages under section 623(c) of the Tariff Act (19 U.S.C. 1623(c)) or any other applicable statute authorizing the cancellation of any bond or any bond charge that may have been made against such bond. The surety and the principal then have 30 days to take the following action: (1) Petition for relief from the payment of liquidated damages; (2) pay the damages; or (3) make arrangements to pay the damages. If the parties who are liable for liquidated damages fail to take the aforesaid action, the district director must refer the claim to the U.S. Attorney (unless otherwise ordered by the Commissioner of Customs or the importer files one or more supplemental petitions for relief). (*See generally* 19 CFR Part 172 for the procedure governing assessment of liquidated damages under the bond and the cancellation of a claim for such damage.)

[14] The IEMCA's comments also expressed concern about cases in which a complainant that obtains a temporary exclusion order (and the competitive benefits resulting from such an order) subsequently declines to proceed with the investigation. Even if there is evidence that the complainant has misused the temporary relief proceeding (the type of conduct the forfeiture authority is designed to punish), the Commission believes that it would be constrained from ordering forfeiture of the bond in the absence of a Commission determination that section 337 has not been violated. In such a case, however, the Commission would have to determine (after considering all relevant legal, equitable, and public interest considerations and the stage to which the investigation has progressed) whether to proceed with the investigation (despite the complainant's wish to discontinue the proceeding) and to issue a final determination on violation based on the evidence of record, the arguments of the parties, and possibly on substantive findings against the complainant based on sanctions imposed pursuant to interim rule 210.36 (or any governing rule in effect at the time).

As an alternative to determining whether to proceed with the investigation despite the complainant's wish to terminate the proceeding, if there is evidence that the complainant has abused the section 337 process, the Commission could determine what other action (if any), would be permissible and appropriate under the authority conferred by subsection (h) of section 337 to order sanctions for abuse of process to the extent authorized by the Federal Rules of Civil Procedure and the Commission rules in effect at the time.

[15] *E.Q.*, because the importation or sale of certain merchandise covered by the order does not violate section 337 owing to the invalidity, unenforceability, or noninfringement of the intellectual property right(s) in question, or the absence of other types of unfair acts and unfair methods of competition alleged in the complaint or motion for temporary relief, or because a domestic industry for the subject domestic merchandise does not exist and is not in the process of being established as required by paragraphs (a) (2) and (3) of section 337 of the Tariff Act.

The legislative history conferring the bond forfeiture authorization does not make forfeiture mandatory; it provides that the Commission *may* order forfeiture of the bond if it determines that the respondents have not violated section 337. *See* H.R. Rep. No. 576 at 635; 134 Cong. Rec. H2044; H.R. Rep. No. 40 at 158–159. The Commission believes that there may be cases in which the purpose of the forfeiture authority would not be served by ordering forfeiture even though the complainant did not prevail on the question of the violation of section 337.

An example would be a case in which the investigation was brought by the complainant in good faith and the Commission's final determination was negative owing to a recent judicial decision which superseded the Commission's previous ruling on a particular issue (and hence invalidated the ruling favorable to the complainant on that issue during the temporary relief phase of the investigation). In a case of that type, the Commission conceivably could conclude (depending on other relevant facts and the arguments of the parties) that the policy of deterring misuse of section 337 temporary relief proceedings had been adequately served by requiring the complainant to undergo the expense and burden of posting a bond, and that ordering forfeiture would not be in the public interest, since forfeiture under such circumstances could deter holders of intellectual property rights with valid section 337 complaints from seeking temporary relief in the future.

For all the foregoing reasons, the Commission determined that at least for purposes of the interim forfeiture rules, it would not adopt a policy favoring or disfavoring forfeiture, but would make forfeiture determinations based on the facts in each case as they relate to the Congressional purpose of the forfeiture authorization.

The procedure for determining whether to order forfeiture of the bond under the interim rules is as follows:

When the Commission determines that one or more of the respondents whose merchandise was covered by the temporary exclusion order has not violated section 337 to the extent alleged in the motion for temporary relief, the complainant must file, within 30 days after the effective date of the aforesaid Commission determination,[16] a written submission discussing whether the Commission should or should not order forfeiture of the bond in whole or in part. The other parties will subsequently be permitted to file responses to the complainant's submission.

The factors the Commission will consider (and which the parties' submission must address) in determining whether forfeiture should be ordered include the following: (1) The extent to which the Commission determined that the respondents have not violated section 337; (2) whether the complainant's assertions with respect to the violation alleged as the basis for obtaining a temporary exclusion order were substantially justified, taking into account the record of the investigation as whole; (3) whether forfeiture would be consistent with the legislative intent of the forfeiture authority (which is to provide a "disincentive" to the abuse of temporary relief by complainant); (4) whether forfeiture (in whole or in part) would be in the public interest; and (5) any other legal, equitable, or policy considerations that are relevant to the issue of forfeiture.

Factors (3), (4), and (5) are derived from the legislative history of the bonding and forfeiture authority and the legislative history of other provisions of section 337. Factor (2) was borrowed from the criteria the Commission uses to implement the Equal Access to Justice Act. *See* 5 U.S.C. 504; 19 CFR Part 212. Under that statute and the Commission regulations, eligible individuals and entities who are parties to certain administrative proceedings (including section 337 investigations) may receive an award of attorneys fees and other costs from the Government if the party prevails over the agency in the proceeding, the agency's position in the proceeding was not substantially justified, and there are no special circumstances that would make such an award unjust.

In its comments on the proposed rules, the IEMCA expressed disapproval of the fact that the Commission proposed to employ criteria related to the Equal Access to Justice Act to determine whether to order forfeiture of a complainant's temporary relief bond under section 337. The IEMCA argued that the purposes and objectives of the Equal Access to Justice Act and the Commission's bond forfeiture authority are in no way analogous.

The Commission is fully cognizant of the differences between the two and assures interested parties that forfeiture determinations will be made in a manner that is consistent with the purpose and intent articulated in the section 337 legislative history authorizing the Commission to order forfeiture.

The analytical factor the interim forfeiture rules is borrowing from the Equal Access to Justice Act regulations—*i.e.*, "whether the complainant's assertions with respect to the violation alleged as a basis for obtaining a temporary exclusion order were substantially justified, taking into account the record of the investigation as a whole"—will help the Commission determine whether the complainant's motion for temporary relief was frivolous and constituted a misuse of the temporary relief process. As such, that factor is fully consistent with the Congressional purpose for authorizing forfeiture of bonds.

The IEMCA also argued that the Commission's adoption of an interim rule providing for Commission assessment of "all other legal, equitable, and public interest considerations relating to forfeiture" would be inappropriate because, in the IEMCA's view, the legislative history authorizing forfeiture of a temporary relief bond by the complainant does not authorize such an open-ended analysis.

As stated above, Congress did not mandate that the bond be forfeited in every case where the final determination is negative, and the Commission believes that there may be instances in which forfeiture would be inconsistent with the Congressional intent of the bond forfeiture authority. Since the Commission has no previous experience in adjudicating bond forfeitures, it cannot fully anticipate all relevant issues that are likely to arise. The Commission, therefore, believes it advisable not to adopt narrowly-drawn interim forfeiture rules that expressly or impliedly would prevent consideration of unanticipated but relevant issues raised in favor of or against forfeiture.

The interim forfeiture rule provides that the decision on whether to order forfeiture of the bond will be made by using the procedures set forth in interim rules 210.53(j) and 210.54 through 210.56(c), which allow for longer filing deadlines, petitions for review and responses thereto with no page limitations, and broader criteria for reviewing, modifying, and reversing an initial determination than the procedures and criteria set forth in paragraphs (17) and (18) of proposed interim rule 210.24(e), which govern the disposition of motions for temporary relief and the posting of bonds by

[16] Interested persons are reminded that a wholly negative final determination on the violation of section 337 and the negative portions of a mixed determination concerning the violation of section 337 are not subject to Presidential review and thus are final on the effective date specified in the Commission rules or when issued (*see* interim rules 210.53(h), 210.56(c), and 210.57(d), 53 FR 33043, 33070, and 33071, Aug. 29, 1988).

complainants. The Commission believes that the procedures set forth in interim rules 210.53(c) and 210.54 through 210.56(c) are appropriate for determining whether to order forfeiture of a complainant's temporary relief bond, since forfeiture decisions are not subject to statutory deadlines.

Although there are no statutory deadlines applicable to forfeiture of bonds, the interim forfeiture rule provides that motions to stay forfeiture proceedings or the effective date of a forfeiture order pending the outcome of judicial review of the violation determination will not be granted, for the following reasons. The legislative history of the forfeiture authority indicates that "[b]onds posted by [complainants], if forfeited, would revert to the Treasury in the same way as bonds now posted by respondents" (133 Cong. Rec. S10365; H.R. Rep. No. 576 at 635; 134 Cong. Rec. H2044). The Customs Service regulations governing the assessment of liquidated damages under a bond posted pursuant to 19 CFR 12.39(b) do not provide for stay on the assessment of liquidated damages under 19 CFR Part 172 pending the outcome of judicial review of the subject Commission determination concerning the violation of section 337. Moreover, preliminary information we have received from the Treasury Department indicates that if the negative violation determination supporting the forfeiture order is reversed on judicial review, the complainant would not have to file suit against the United States in order to recover the money forfeitured pursuant to the Commission order.[17]

In accordance with interim rules 210.53 (a) and (h) (which have been revised in the manner discussed below), an initial determination on forfeiture of the bond will become the determination of the Commission within 45 days after issuance of the presiding administrative law judge's initial determination on forfeiture unless the Commission orders a review or extends the deadline for determining whether to order a review.

Interim rule 210.53 (governing initial determinations) and interim rule 210.56(b) (governing Commission action, the public interest, and bonding by respondents) have been modified to incorporate the foregoing procedures governing the possible forfeiture of bonds.

Interim rule 210.53 (53 FR 33053 and 33070, Aug. 29, 1988) has been revised by creating a new paragraph (j) to provide for the issuance of an initial determination on whether the Commission should order a complainant to forfeit a bond in whole or in part when the Commission determines, after issuing a temporary exclusion order conditioned on the bond, that the respondents have not violated section 337 to the extent alleged in the motion for temporary relief. The revisions to this rule also include a statement that the provisions of interim rules 210.54 through 210.56(c) will govern the disposition of an initial determination issued pursuant to paragraph (j) of interim rule 210.53 and that if the Commission does not order a review, the initial determination on forfeiture will become the determination of the Commission within 45 days after service of the initial determination. Corresponding and appropriate revisions have been made in interim rule 210.54 concerning the filing of petitions for review and responses thereto to indicate that such petitions may be filed within 10 days after service of the initial determination on forfeiture and that responses to the petitions may be filed within 5 days after service of the petition.

All other aspects of the forfeiture procedures discussed above have been incorporated into interim rule 210.58 (53 FR 33053 and 33072, Aug. 29, 1988).

Administrative practice and procedure, Investigations.

Chapter II, Subchapter C, of Part 210 of Title 19 of the Code of Federal Regulations is amended as follows:

PART 210—ADJUDICATIVE PROCEDURES

1. The authority citation for Part 210 is revised to read as follows:

Authority: 19 U.S.C. 1333, 1335, and 1337, and sections 2 and 1342(d)(1)(B) of Pub. L. No. 100–418, 102 Stat. 1107 (1988), 133 Cong. Rec. S10364–S10365 (statement of Sen. Lautenberg) (July 21, 1987), H.R. Rep. No. 576, 100th Cong., 2d. Sess. 635–636 (1988); 134 Cong. Rec. H1863 and H2044 (Apr. 20, 1988).

2. Section 210.1 is revised to read as follows:

§ 210.1 Applicability of part.

The rules in this part govern procedure relating to proceedings under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). These rules are expressly or impliedly authorized by sections 333, 335, and 337 of the Tariff Act of 1930 (19 U.S.C. 1333, 1335, and 1337), sections 2 and 1342(d)(1)(B) of the Omnibus Trade and Competitiveness Act of 1988, Pub. L. No. 100–418, 102 Stat. 1107 (1988), and its legislative history , 133 Cong. Rec. S10364–S10365 (Statement of Sen. Lautenberg) (July 21, 1987), H.R. Rep. No. 576, 100th Cong., 2d Sess. 635–636 (1988), 134 CONG. REC. H1863 and H2044 (April 20, 1988).

3. The introductory text of paragraph (e) and paragraphs (e) (1), (7), and (9) through (18) of § 210.24 are revised to read as follows:

§ 210.24 Motions.

* * * * *

(e) *Motions for temporary relief.* Requests for temporary relief pursuant to subsection (e) or (f) of section 337 of the Tariff Act shall be made through a motion to be filed and adjudicated in accordance with the following provisions.

(1) *Motion accompanying complaint.* (i) A complaint requesting temporary relief pursuant to § 210.20(a)(10) shall be accompanied by a motion that sets forth complainant's request for temporary relief. The motion must contain a detailed statement of specific facts bearing on:

(A) Complainant's probability of success on the merits;

(B) Immediate and substantial harm to the domestic industry in the absence of the requested temporary relief;

(C) Harm, if any, to the proposed respondents if the requested temporary relief is granted; and

(D) The effect, if any, that the issuance of the requested temporary relief would have on the public interest.

(ii) If the motion requests that the Commission issue a temporary exclusion order under subsection (e) of section 337, the motion must also contain a detailed statement of facts bearing on:

(A) Whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order; and

(B) The appropriate amount of the bond, if the Commission determines that a bond will be required.

[17] Our preliminary information is that money forefeited to the U.S. Treasury pursuant to the bond forfeiture authorization in the Omnibus Trade Act will be deposited into a miscellaneous receipts account. If the Commission determines that a refund is needed (following issuance of a judicial determination reversing or vacating the Commission determination of no violation providing the basis for the forfeiture proceedings), the Commission can arrange through its Office of Finance to have a check in the appropriate amount issued to the complainant (after executing certain formalities with Treasury's Financial Management Service). The Commission notes that the Customs Service's liquidated damages assessment regulations provide for the filing of a petition setting forth an appeal of the final Custom's decision requiring the assessment and payment of liquidated damages (*i.e.*, the adverse ruling on the party's original petition for relief from liquidated damages) within 60 days after an administrative or judicial decision which reduces the loss of duties upon which the mitigated penalty amount was based. *See* 19 CFR 172.33(c).

(iii) The factors the Commission will consider in determining whether to require a bond include the following:

(A) The strength of the complainant's case;

(B) Whether posting a bond would impose an undue hardship on the complainant;

(C) Whether the respondent has responded to the motion for temporary relief (in the time and manner specified by paragraph (e)(9) of this section or by order of the Commission or the presiding administrative law judge);

(D) Whether the respondent will be harmed by issuance of the temporary exclusion order sought by the complainant; and

(E) Any other legal, equitable, or public interest consideration that is relevant to whether complainant should be required to post a bond as a condition precedent to obtaining temporary relief (including the question of whether the complainant is using the temporary relief proceedings, or is likely to use a temporary exclusion order, to harass the respondents or for some other improper purpose).

No single factor will be determinative. The Commission's policy is to favor the posting of a bond in every case. Therefore, a complainant who believes that a bond should not be required has the burden of persuading the Commission that a bond should not be required.

(iv) The following documents and information shall be filed along with all motions for temporary relief:

(A) A memorandum of points and authorities in support of the motion;

(B) Affidavits executed by persons with knowledge of the facts specified in the motion; and

(C) All documentary information and other evidence in complainant's possession that complainant intends to submit in support of the motion.

(v) If the motion requests issuance of a temporary exclusion order, the complainant must also provide information and documents that will assist the presiding administrative law judge and the Commission in computing the amount of the bond if a bond is to be required. (A complainant also may file, if it chooses, a draft of the bond it expects to submit if a bond is to be required.) In cases where a domestic industry exists and domestic sales of the product in question have commenced and have not been de minimis, the amount of the bond is likely to be an amount ranging from 10 to 100 percent of the sales revenues and licensing royalties (if any) from the domestic product at issue, as reported in the complainant's audited annual financial statements for the most recent fiscal year. In such cases, the complainant must provide the following documents:

(A) The audited financial statements (or the equivalent thereof, if audited statements do not exist) for the most recently completed fiscal year;

(B) The back-up income statements, work sheets, or other documents showing revenues for the domestic product at issue in the investigation, which are tied to the aggregate revenue listed on the financial statements; and

(C) A certification under oath by the complainant's chief financial officer indicating that the detail provided in the work sheets or other documents tied to the audited financial statements is correct.

In cases where the aforesaid formula would not be appropriate—including but not limited to cases where the domestic industry is embryonic and domestic sales have been de minimis, or cases involving the alleged prevention of the establishment of a domestic industry or the alleged restraint of trade or commerce in the United States—the amount of the bond will be determined on the basis of the facts on the record, the complainant's financial strength, the parties' arguments, and any other factors which the presiding administrative law judge or the Commission deem relevant. In such cases, the motion for temporary relief should state why the prescribed formula is not appropriate (with supporting documentation where appropriate). The motion should also state the theory the complainant believes is appropriate for computing the amount of the bond (if the Commission determines to require a bond) and should provide supporting financial and economic data with certification under oath executed by the complainant's chief financial officer attesting to the veracity of the data provided. All complainants who are seeking a temporary exclusion order (including complainants who have provided the audited financial statements and back up data listed above in paragraph (e)(v)(B) of this section) must be prepared to provide upon short notice any additional financial or economic data requested by the presiding administrative law judge in connection with the issue of bonding and the certification under oath by the complainant's chief financial officer that the information submitted is accurate.

(vi) If the complaint, the motion for temporary relief, and the supporting documentation contain confidential business information as defined in § 201.6(a), of this chapter, the complainant must follow the procedure outlined in §§ 210.6(a), 201.6 (a) and (c), of this chapter and paragraph (e)(5) of this section.

* * * * *

(7) *Amendment of the motion.* A motion for temporary relief may be amended at any time prior to the institution of an investigation. However, all material filed to amend the motion (or the complaint) must be served on all proposed respondents and on the embassies in Washington, DC, of the foreign governments that they represent, in accordance with paragraph (e)(4) of this section. If the amendment expands the scope of the motion or changes the complainant's assertions on the issue of whether a bond is to be required as a prerequisite to the issuance of a temporary exclusion order or the appropriate amount of the bond, the 35-day period allotted under paragraph (e)(8) of this section for determining whether to institute an investigation and to initiate temporary relief proceedings shall begin to run anew from the date the amendment is filed with the Commission. Motions for temporary relief may not be amended after an investigation is instituted.

* * * * *

(9) *Responses to the motion and the complaint.* Any party may file a response to a motion for temporary relief. Responses shall be filed within ten (10) days after service of the motion by the Commission upon institution of an investigation, unless otherwise ordered by the administrative law judge. The response must comply with the requirements of § 201.8 of this chapter and § 210.5, and shall contain the following information:

(i) A statement that sets forth with particularity any objection to the motion for temporary relief;

(ii) A statement that sets forth with specificity facts bearing on:

(A) Complainant's probability of success on the merits;

(B) Immediate and substantial harm, if any, to the domestic industry in the absence of the requested temporary relief;

(C) Harm, if any, to the proposed respondents if the requested temporary relief is granted; and

(D) The effect, if any, that issuance of the requested temporary relief would have on the public interest.

(iii) A memorandum of points and authorities in opposition to the motion:

(iv) Affidavits, where possible, executed by persons with knowledge of the facts specified in the response. If the motion requests that the Commission

issue a temporary exclusion order, each response to the motion must address, to the extent possible, the complainant's assertions regarding whether a bond should be required and the appropriate amount of the bond. Responses to the motion for temporary relief also may contain counter proposals concerning the amount of the bond or the manner in which the bond amount should be calculated. Each response to the motion for temporary relief must also be accompanied by a response to the complaint and notice of investigation. Response to the complaint and notice of investigation must comply with § 201.8 of this chapter and §§ 210.5 and 210.21.

(10) *Referral to an administrative law judge.* Following provisional Commission acceptance of a motion for temporary relief and upon institution of an investigation, the motion for temporary relief shall be forwarded to an administrative law judge for an initial determination on whether there is reason to belief there is a violation of section 337 of the Tariff Act, whether temporary relief is appropriate, whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order (if such an order is to be issued) and, if so, the amount of the bond.

(11) *Designating an investigation "more complicated" for the purpose of adjudicating a motion for temporary relief.* At the time the Commission determines to institute an investigation and provisionally accepts a motion for temporary relief pursuant to paragraph (e)(8) of this section, the Commission may designate the investigation "more complicated" pursuant to § 210.59(b) for the purpose of obtaining additional time to adjudicate the motion for temporary relief. In the alternative, after the motion for temporary relief is referred to the administrative law judge for an initial determination under paragraphs (e)(10) and (17) of this section, the administrative law judge may issue an order, sua sponte or on motion, designating the investigation "more complicated" for the purpose of obtaining additional time to adjudicate the motion for temporary relief. Such order shall constitute a final determination of the Commission, and notice of the order shall be published in the **Federal Register**. The "more complicated" designation may be applied by the Commission or the presiding administrative law judge pursuant to this paragraph on the basis of the complexity of issues relating to whether there is reason to believe that the respondents have violated section 337 and whether temporary relief is appropriate. The "more complicated" designation also may be applied by the Commission or the presiding administrative law judge because of complications in determining whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order and, if so, the amount of the bond.

(12) *Discovery and compulsory process.* The administrative law judge shall place such limits upon the kind or amount of discovery to be had or the period of time during which discovery may be carried out as shall be consistent with the time limitation set forth in paragraph (e)(17)(i) of this section relating to issuance of an initial determination concerning the motion for temporary relief. The administrative law judge's authority to compel discovery includes discovery relating to the following issues:

(i) The effect, if any, that issuance of the temporary relief requested in the motion would have on the public interest;

(ii) The form of temporary relief the Commission should issue if it determines to grant temporary relief;

(iii) Whether the public interest factors enumerated in the statute preclude that form of relief;

(iv) The amount of the bond under which the respondent(s)' merchandise will be permitted to enter the United States during the pendency of any temporary relief order issued by the Commission;

(v) Whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order; and, if so,

(vi) The amount of bond.

As part of the standard analysis for determining whether to grant a motion for temporary relief (see paragraphs (e)(1)(i) and (9) of this section), the administrative law judge should make findings on the issue specified in paragraphs (e)(12) (v) and (vi) of this section. The administrative law judge may, but is not required to, make findings on issues specified in paragraphs (e)(12) (ii), (iii), and (iv) of this section. Evidence and information obtained through discovery on those issues will be used by the parties and considered by the Commission in the context of the parties' written submissions on remedy, the public interest, and bonding by respondents, which are filed with the Commission pursuant to paragraph (e)(18) of this section.

(13) *Evidentiary hearing.* A motion for temporary relief and the matter of bonding by the complainant may be ruled upon without a hearing by the administrative law judge when a motion for summary determination under § 210.50(a) is granted in favor of respondents or other parties opposing the motion for temporary relief, or if the administrative law judge determines that the motion should be dismissed for some other reason (*e.g.*, failure to comply with some portion of paragraph (e)(1) of this section). (Such rulings by the administrative law judge shall be in the form of an initial determination issued under paragraph (e)(17)(i) of this section.) If a hearing is conducted, the precise form and scope of the hearing are left to the discretion of the administrative law judge. At the hearing or as directed by the administrative law judge, the parties shall address the following issues:

(i) Whether there is reason to believe that there is a violation of section 337 of the Tariff Act;

(ii) Whether temporary relief is appropriate;

(iii) Whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order (if such an order is to be issued); and, if so,

(iv) The amount of the bond.

The administrative law judge may, but is not required to take evidence at the hearing concerning remedy, the public interest, and bonding by respondents as specified in paragraphs (e)(12) (ii), (iii), and (iv) of this section. However, as part of the standard analysis for determining whether to grant or deny a motion for temporary relief (*see* paragraphs (e) (1) and (9) of this section), the administrative law judge should take evidence on the question of what effect the form of temporary relief requested in the motion for temporary relief would have on the public interest, and the question of whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order (if applicable) and, if so, the amount of the bond.

(14) *Proposed findings and conclusions and briefs.* The administrative law judge shall determine whether and, if so, to what extent the parties shall be permitted to file proposed findings of fact, proposed conclusions of law, and/or briefs (pursuant to § 210.52) concerning:

(i) The grant or denial of temporary relief;

(ii) Whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order (if such an order is to be issued); and, if so,

(iii) The amount of the bond.

(15) *Interlocutory appeals and review by the Commission.* There will be no interlocutory appeals to the Commission (pursuant to § 210.71) of the administrative law judge's ruling on any matter delegated to him or her for decision under a provision of paragraph (e) of this section. After the administrative law judge has certified the following materials to the Commission (pursuant to paragraphs (e)(16) and (17) of this section) an initial determination granting or denying a motin for temporary relief, a ruling on the issue of bonding by the complainant as a prerequisite to the issuance of a temporary exclusion order, and the administrative record upon which the initial determination is based, the Commission's review of the administrative law judge's actions and rulings relating to the motion for temporary relief and the question of bonding by the complainant will be limited to the issues specified in paragraph (e)(17)(ii) of this section.

(16) *Certification of the record.* At the close of the reception of evidence in any hearing held pursuant to paragraph (e)(13) of this section or as soon as possible thereafter, the administrative law judge shall certify the record to the Commission prior to issuance of an initial determination concerning temporary relief and, if applicable, bonding by the complainant as a prerequisite to the issuance of a temporary exclusion order. However, if such advance certification is not feasible, the record shall be certified to the Commission when the administrative law judge issues the aforesaid initial determination, in accordance with paragraph (e)(17)(i) of this section.

(17) *Initial determination concerning temporary relief and Commission action thereon.* (i) On the 70th day after publication of the notice of investigation in an ordinary investigation, or on the 120th day after such publication in a "more complicated" investigation, the administrative law judge will issue an initial determination concerning whether there is reason to believe that respondents have violated section 337 of the Tariff Act and, if applicable, the issue of bonding by the complainant as a prerequisite to the issuance of a temporary exclusion order. The initial determination may, but is not required to, address appropriate relief, the public interest, and bonding by the respondents as specified in paragraphs (e)(12), (ii), (iii), and (iv) of this section. However, as part of the standard analysis for determining whether to grant or deny a motion for temporary relief (*see* paragraphs (e) (1) and (9) of this section), the initial determination shall address the questions of:

(A) What effect the form of relief requested in the motion would have on the public interest (except when the initial determination is granting a summary determination denying the motion for temporary relief (pursuant to paragraph (e)(13) of this section);

(B) Whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order (if such an order is to be issued); and, if so,

(C) The amount of the bond.

(ii) The initial determination will become the Commission's determination twenty (20) calendar days after issuance thereof in an ordinary case, and thirty (30) calendar days after issuance in a "more complicated" investigation, unless the Commission modifies or vacates the initial determination within that period. Such modification or vacation may be ordered on the basis of errors of law or for policy matters (including policy considerations related to bonding and the public interest). No review will be ordered solely on the basis of alleged errors of fact. In computing the aforesaid 20-day and 30-day deadlines, intermediary Saturdays, Sundays, and federal holidays shall be included. However, if the last day of the period is a Saturday, Sunday, or federal holiday as defined in § 201.14(a) of this chapter, the filing deadline shall be extended to the next business day. Because of the time constraints imposed by the statutory deadlines for determining whether to order temporary relief under section 337 of the Tariff Act, the additional time ordinarily allotted under § 201.16(d) of this chapter cannot be provided.

(iii) In order to assist the Commission to determine whether modification or revocation of the initial determination is warranted, all parties may file written comments concerning the presence (or absence) of errors of law in the initial determination and/or matters of policy (including policy considerations related to bonding and the public interest) that justify such action (or show that would not be justified). Such comments will be limited to thirty-five (35) pages and must be filed no later than seven (7) calendar days after service of the initial determination in an ordinary case and ten (10) calendar days after service of the initial determination in a "more complicated" investigation. In computing the aforesaid 7-day and 10-day deadlines, intermediary Saturdays, Sundays, and federal holidays shall be included. However, if the last day of the period is a Saturday, Sunday, or federal holiday as defined in § 201.14(a) of this chapter, the filing deadline shall be extended to the next business day. Because of the time constraints imposed by the statutory deadlines for determining whether to order temporary relief under section 337 of the Tariff Act, the additional time ordinarily allotted under § 201.16(d) of this chapter cannot be provided.

(iv) Nonconfidential copies of the initial determination also will be served on other agencies, and they will be given ten (10) calendar days in which to file comments on the initial determination.

(v) Each party may file a response to other parties' comments within ten (10) calendar days after issuance of the initial determination in an ordinary case, and within fourteen (14) calendar days after issuance of an initial determination in a "more complicated" investigation. The reply comments will be limited to twenty (20) pages. If the last day of the 10-day or 14-day period is a Saturday, Sunday, or federal holiday as defined in § 201.12(a) of this chapter, the filing deadline shall be extended to the next business day. Because of the constraints imposed by the statutory deadlines, additional time ordinarily allotted under § 201.16(d) of this chapter will not be provided. The parties are expected to facilitate the filing of timely and useful responses to each other's initial comments by serving the initial comments by the fastest means available.

(vi) If the Commission determines to modify or vacate the initial determination within twenty (20) calendar days after issuance thereof in an ordinary case, or thirty (30) calendar days after issuance in a "more complicated" case, a notice and (if appropriate) a Commission opinion will be issued. If the Commission does not modify or vacate the administrative law judge's initial determination within the time provided, the initial determination will automatically become the determination of the Commission and a notice of that fact will not be issued. However, if the Commission determines (either by reversing or modifying the administrative law judge's initial determination, or by adopting the initial determination) that a temporary exclusion order should be issued and that the complainant must post a bond as a prerequisite to the issuance of the order, the Commission may issue (on the statutory deadline for determining whether to grant temporary relief or as soon as possible thereafter) a notice setting forth conditions for the bond if any (in addition to those outlined in the

initial determination) and the deadline for filing the bond with the Commission.

(18) *Remedy, the public interest, and bonding by respondents.* The procedure for arriving at the Commission's determination of the issues of the appropriate form of temporary relief, whether the public interest factors enumerated in the statute preclude such relief, and the amount of the bond under which the respondents' merchandise will be permitted to enter the United States during the pendency of any temporary relief order issued by the Commission, is as follows:

(i) While the motion for temporary relief is before the administrative law judge, he or she may compel discovery on matters relating to remedy, the public interest, and bonding by respondents (as provided in paragraph (e)(12) of this section). The administrative law judge also is authorized to make findings pertaining to the public interest, as provided in paragraph (e)(17)(i) of this section. However, such findings may be superseded by Commission findings on that issue as provided in paragraph (e)(18)(iii) of this section.

(ii) On the 60th day after institution in an ordinary case or on the 105th day after institution in a "more complicated" investigation, all parties may file written submissions with the Commission addressing those issues. The submissions shall refer to information and evidence already on the record, but additional information and evidence germane to the issues of appropriate relief, the statutory public interest factors, and bonding by respondents may be provided along with the parties' submissions.

(iii) On or before the 90-day or 150-day statutory deadline for determining whether to order temporary relief under subsection (b) of section 337 of the Tariff Act, the Commission will determine what relief is appropriate in light of any violation that appears to exist, whether the public interest factors enumerated in the statute preclude the issuance of such relief, and the amount of the bond under which the respondents' merchandise will be permitted to enter the United States during the pendency of any temporary relief order issued by the Commission. In the event that Commission's findings on the public interest pursuant to paragraph (e)(18)(iii) of this section are inconsistent with findings made by the administrative law judge in the initial determination pursuant to paragraph (e)(17)(i) of this section, the Commission's findings are controlling.

4. In § 210.41, the introductory text of paragraph (a) is republished and paragraph (a)(2) is revised to read as follows:

§ 210.41 General provisions for hearings.

(a) *Purpose of hearings.* Unless otherwise ordered by the Commission:

* * * * *

(2) Except as provided under § 210.24(e)(13), an opportunity for a hearing shall also be provided to take evidence and hear argument for the purpose of determining whether there is reason to believe there is a violation of section 337 of the Tariff Act, whether the complainant should be required to post a bond as a prerequisite to the issuance of a temporary exclusion order (if such an order is being requested) and, if so, the amount of the bond.

* * * * *

5. In § 210.53, paragraph (b) is revised and paragraph (j) is added to read as follows:

§ 210.53 Initial determination.

* * * * *

(b) *On issues concerning temporary relief.* The disposition of an initial determination concerning temporary relief (and if appropriate, the posting of a bond by the complainant and the amount of the bond) is governed by the provisions of § 210.24(c)(17).

* * * * *

(j) *Concerning the possible forfeiture of a complainant's temporary relief bond in whole or in part.* The disposition of an initial determination pursuant to § 210.58(c) concerning the possible forfeiture of a complainant's temporary relief bond in whole or in part shall be governed by the provisions of §§ 210.54 through 210.56(c). The initial determination shall beccme the determination of the Commission forty-five (45) days after the date on which it is served on the parties by the Secretary unless the Commission orders a review pursuant to § 210.54(b) or § 210.55 or extends the deadline for determining whether to order a review.

6. Paragraph (a)(1) sentence two and paragraph (b)(1) sentence one of § 210.54 are revised to read as follows:

§ 210.54 Petition for review.

(a) * * *

(1) * * * A petition for review of an initial determination filed pursuant to § 210.53(a) or (j) shall be filed within ten (10) days after the service of the initial determination. * * *

* * * * *

(b) * * *

(1) The Commission shall decide whether to grant, in whole or in part, a petition for review filed pursuant to § 210.53(a) or (j) within forty-five (45) days of the service of the initial determination on the parties, or by such other time as the Commission may order. * * *

* * * * *

7. Paragraph (d) of § 210.56 is revised to read as follows:

§ 210.56 Review by Commission.

* * * * *

(d) *Initial determinations concerning temporary relief and bonding by the complainant and the respondents.* Commission action on an initial determination concerning temporary relief and, possibly, bonding by the complainant and the respondents is governed by the provisions of § 210.24(e)(17) and (18).

8. In § 210.58, paragraph (b) is revised and a new paragraph (c) and Appendix A are added to read as follows:

§ 210.58 Commission action, public interest factor, and bonding.

* * * * *

(b)(1) With respect to addressing the issues of appropriate Commission action, the public interest, and bonding by the respondents for purposes of an initial determination concerning the grant or denial of a motion for temporary relief, see § 210.24(e)(12), (13), and (17). Unless otherwise ordered by the Commission or permitted by this paragraph, and except as provided in § 210.24(e)(12) and (13), the administrative law judge shall not take evidence or other information or hear arguments from the parties and other interested persons with respect to the subject matter of paragraphs (a)(1), (2), (3) and (4) of this section.

(2) Regarding settlements by agreement or consent order under § 210.51 (b) and (c), the parties may file statements regarding the impact of the proposed settlement on the public interest, and the administrative law judge may in his or her discretion hear argument, although no discovery may be compelled with respect to issues relating solely to the public interest. Thereafter, the administrative law judge shall consider and make appropriate findings in the initial determination regarding the effect of the proposed settlement on the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, and U.S. consumers.

(3) Regarding the issuance of an initial determination concerning the granting of a motion for a temporary exclusion order and whether the complainant should be required to post a bond as a prerequisite to the issuance of such an

order, *see* § 210.24(e)(1), (9), (10), (12), (13), and (17). If the Commission determines under § 210.24(e)(17)(ii) that the complainant must post a bond as a prerequisite to the issuance of a temporary exclusion order, the "bond" which the complainant submits may consist of one or more of the following:

(i) The surety bond of a surety or guarantee corporation that is licensed to do business with the United States in accordance with 31 U.S.C. 9304–9306 and 31 CFR Parts 223 and 224;

(ii) The surety bond of an individual, a trust, an estate, or a partnership, pursuant to 31 U.S.C. 9301 and 9303(c), whose solvency and financial responsibility will be investigated and verified by the Commission; or

(iii) A certified check, a bank draft, a post office money order, cash, a United States bond, a Treasury note, or other Government obligation within the meaning of 31 U.S.C. 9301 and 31 CFR Part 225, which are owned by the complainant and tendered in lieu of a surety bond, pursuant to 31 U.S.C. 9303(c) and 31 CFR Part 225.

The same restrictions and requirements relating to individual and corporate sureties on Customs bonds, which are set forth in 19 CFR Part 113, shall apply with respect to bonds posted by complainants pursuant to an order, notice, determination or opinion of the Commission issued pursuant to this paragraph or § 210.24(e)(17). If the survey is an individual, the individual must file an affidavit of the type shown in Appendix A to § 210.58. Unless otherwise ordered by the Commission, while the bond of the individual surety is in effect, an updated affidavit must be filed every four months (computed from the date on which the bond was approved by the Secretary or the Commission).

(4) The "bond" and accompanying documentation must be submitted to the Commission within the time specified in the Commission notice, order, determination, or opinion requiring the posting of a bond, or within such other time as the Commission may order. If the bond is not submitted within the specified period (and an extension of time has not been granted), a temporary exclusion order will not be issued.

(5) The corporate or individual surety on a bond or the person posting a certified check, a bank draft, a post office money order, cash, a United States bond, a Treasury note, or other Government obligation in lieu of a surety bond must provide the following information on the face of the bond or in the instrument authorizing the Government to collect or sell the bond, certified check, bank draft, post office money order, cash, United States bond, Treasury note, or other Government obligation in response to a Commission order requiring forfeiture of the bond pursuant to paragraph (C) of this section:

(i) The investigation caption and docket number;

(ii) The names, addresses, and seals (if appropriate) of the principal, the surety, the obligee, as well as the "attorney in fact" and the registered process agent (if applicable) (*see* Customs Service regulations 19 CFR Part 113 and Treasury Department regulations in 31 CFR Parts 223, 224, and 225);

(iii) The terms and conditions of the bond obligation, including the reason the bond is being posted, the amount of the bond, the effective date and duration of the bond (as prescribed by the Commission order, notice, determination, or opinion requiring the complainant to post a bond); and

(iv) A section at the bottom of the bond or other instrument for the date and authorized signature of the Commission Secretary to reflect Commission approval of the bond.

(6) Complainants who wish to post a certified check, a bank draft, a post office money order, cash, a United States bond, a Treasury note, or other Government obligation in lieu of a surety bond must notify the Commission in writing immediately upon receipt of the Commission document requiring the posting of a bond, and must contact the Secretary to make arrangements for Commission receipt, handling, management, and deposit of the certified check, bank draft, post office money order, or cash in accordance with 31 U.S.C. 9303, 31 CFR Parts 202, 206, 225 and 240, and other governing Treasury regulations and circular(s). If required by the governing Treasury regulations and circular, a certified check, a bank draft, a post office money order, cash, a United States bond, a Treasury note, or other Government obligation tendered in lieu of a surety bond may have to be collateralized. *See, e.g.*, 31 CFR 202.6 and the appropriate Treasury Circular.

(7) In accordance with 31 U.S.C. 9304(b), all bonds posted by complainants must be approved by the Commission before the temporary exclusion order which the bond will secure will be issued. *See* 31 U.S.C. 9303(a) and 9304(b) and 31 CFR 225.1 and 225.20. The Commission's "bond approval officer" within the meaning of 31 CFR 225.1 and 255.20 shall be the Commission Secretary. The bond approval process will entail investigation by the Secretary or the Commission's Office of Investigations to determine the veracity of all factual information set forth in the bond and the accompanying documentation (*e.g.*, powers of attorney), as well as any additional verification required by 31 CFR Parts 223, 224, and 225, or the Commission rules. The Secretary may reject a bond on one or more of the following grounds:

(i) Failure to comply with the instructions in the Commission determination, order, or notice directing the complainant to post a bond;

(ii) Failure of the surety or the bond to provide information or supporting documentation required by the Commission rules, 31 U.S.C. 9304 and 31 CFR Parts 223 and 224, or governing Treasury circulars or because of a limitation prescribed in a governing statute, regulation, or circular;

(iii) Failure of an individual surety to execute and file with the bond, an affidavit of the type shown in Appendix A to § 210.58, which corresponds to Customs Form 3579 (19 CFR 113.35) and sets forth information about the surety's assets, liabilities, net worth, real estate and other property of which the individual surety is the sole owner, other bonds on which the individual surety is a surety (and which must be updated at 4-month intervals while the bond is in effect, measured from the date on which the bond is approved by the Secretary on behalf of the Commission or by the Commission);

(iv) Any question about the solvency or financial responsibility of the surety, or any question of fraud, misrepresentation, or prejury which comes to light as a result of the verification inquiry during the bond approval process; and

(v) Any other reason deemed appropriate by the Secretary.

If the complainant believes that the Secretary's rejection of the bond was erroneous as a matter of law, the complainant may appeal the Secretary's rejection of the bond by filing a petition with the Commission in the form of a letter to the Chairman, within ten (10) days after service of the rejection letter.

(8) After the bond is approved and the temporary exclusion order it secures is issued, if any question concerning the continued solvency of the individual or the legality or enforceability of the bond or undertaking develops, the Commission may take the following action, sua sponte or on motion;

(i) Revoke the Commission approval of the bond and require complainant to post a new bond; or

(ii) Revoke or vacate the temporary exclusion order for public interest reasons or changed conditions of law or

fact (criteria that are the basis for modification or rescission of final Commission action pursuant to § 211.57(a)(1) of this Chapter); and/or

(iii) Notify the Treasury Department if the problem involves a corporate surety licensed to do business with the United States under 31 U.S.C. 9303–9306 and 31 CFR Parts 223 and 224; and/or

(iv) Refer the matter to the U.S. Department of Justice if there is a suggestion of fraud, perjury, or related conduct.

(c) Forfeiture of complainant's bonds.

(1) When the Commission determines that one or more of the respondents whose merchandise was covered by the temporary exclusion order have not violated section 337 to the extent alleged in the motion for temporary relief and provided for in the temporary exclusion order, the complainant must file within thirty (30) days after the effective date of the aforesaid Commission determination, a written submission discussing whether the Commission should or should not order forfeiture of the bond. The factors the Commission will consider (and which the complainant's submission must address) in determining whether forfeiture of the bond should be ordered in whole or in part include the following:

(i) The extent to which the Commission has determined that section 337 has not been violated;

(ii) Whether the complainant's assertions with respect to the violation alleged as the basis for obtaining a temporary exclusion order were substantially justified, taking into account the record of the investigation as a whole;

(iii) Whether forfeiture would be consistent with the legislative intent of the forfeiture authority (which is to provide a "disincentive" to the abuse of temporary relief by complainants);

(iv) Whether forfeiture would be in the public interest; and

(v) Any other legal, equitable, or policy considerations that are relevant to the issue of forfeiture.

(2) The other parties to the investigation may file responses to the complainant's submission that address the aforesaid issues within fifteen (15) days after service of the complainant's submission.

(3) If the investigation is terminated on the basis of a settlement agreement or a consent order with no concurrent determination concerning the violation of section 337, the parties will not address, and the Commission will not determine the issue of whether the bond should be forfeited.

(4) The Commission's determination on whether to order forfeiture of the bond will be made by using the initial determination/discretionary Commission review procedure set forth in § 210.53(j) and §§ 210.54 through 210.56(c), which allow for longer filing deadlines, petitions for review and responses thereto with no page limitations, and broader criteria for reviewing, modifying and reversing an initial determination than the procedures and criteria set forth in § 210.24(e) (17) and (18) which govern the disposition of motions for temporary relief and the posting of bonds by complainants. In accordance with § 210.53 (a) and (h), the initial determination on forfeiture of the bond will become the determination of the Commission within forty-five (45) days after issuance of the presiding administrative law judge's initial determination on forfeiture unless the Commission orders a review or extends the deadline for determining whether to order a review.

(5) Motions to stay forfeiture proceedings or the effective date of a forfeiture order pending the outcome of judicial review of the violation determination will not be granted. If the negative violation determination supporting the forfeiture order is reversed on judicial review, within sixty (60) days after the judgment or judicial order becomes final, the complainant may file a petition with the Commission for a refund of the amount of the bond forfeited to the Treasury (if any). The other parties to the investigation may file responses to the forfeiture refund petition within ten (10) days after service of the petition. If the Commission determines in response to the complainant's petition or sua sponte that the bond amount forfeited to the Treasury should be refunded in whole or in part, the Commission shall issue an order directing that the appropriate sum be refunded as expeditiously as possible in accordance with the governing Treasury procedures and regulations.

BILLING CODE 7020-02-M

Appendix A to § 210.58
Affidavit by Individual Surety

UNITED STATES INTERNATIONAL TRADE COMMISSION

AFFIDAVIT BY INDIVIDUAL SURETY

19 C F R 210.58

STATE OF)
) SS:
COUNTY)

I, the undersigned, being duly sworn, depose and say that I am a citizen of the United States, and of full age and legally competent; that I am not a partner in any business of the principal on the bond or bonds on which I appear as surety; that the information herein below furnished is true and complete to the best of my knowledge. This affidavit is made to induce the United States International Trade Commission to accept me as surety on the bond(s) filed or to be filed with the United States International Trade Commission pursuant to 19 C F R 210.58. I agree to notify the Commission of any transfer or change in any of the assets herein enumerated.

1. NAME (First, Middle, Last)	2. HOME ADDRESS
3. TYPE & DURATION OF OCCUPATION	4. NAME OF EMPLOYER (If Self-Employed, So State)
5. BUSINESS ADDRESS	5. TELEPHONE NO. HOME - BUSINESS -

7. THE FOLLOWING IS A TRUE REPRESENTATION OF MY ASSETS, LIABILITIES, AND NET WORTH AND DOES NOT INCLUDE ANY FINANCIAL INTEREST I HAVE IN THE ASSETS OF THE PRINCIPAL ON THE BOND(S) ON WHICH I APPEAR AS SURETY.

a. Fair value of solely owned real estate*	$_____
b. All mortgages or other encumbrances on the real estate included in Line a	_____
c. Real estate equity (subtract Line b from Line a)	_____
d. Fair value of all solely owned property other than real estate	_____
e. Total of the amounts on Lines c and d	_____
f. All other liabilities owing or incurred not included in Line b	_____
g. Net worth (subtract Line f from Line e)	_____

*Do not include property exempt from execution and sale for any reason. Surety's interest in community property may be included if not so exempt.

84b

8. LOCATION AND DESCRIPTION OF REAL ESTATE OF WHICH I AM SOLE OWNER, THE VALUE OF WHICH IS INCLUDED IN LINE (a), ITEM 7 ABOVE 1/

Amount of assessed value of above real state for taxation purposes:

9. DESCRIPTION OF PROPERTY INCLUDED IN Line (d), ITEM 7 ABOVE (List the value of each category of property separately) 2/

10. ALL OTHER BONDS ON WHICH I AM SURETY (State character and amount of each bond; if none, so state) 3/

11. SIGNATURE	12. BOND AND COMMISSION INVESTIGATION TO WHICH THIS AFFIDAVIT RELATES

SUBSCRIBED AND SWORN TO BEFORE ME AS FOLLOWS:

DATE OATH ADMINISTERED MONTH DAY YEAR	CITY	STATE (Or Other Jurisdiction)

NAME & TITLE OF OFFICIAL ADMINISTERING OATH	SIGNATURE	MY COMMISSION EXPIRES

INSTRUCTIONS

1. Here describe the property by giving the number of the lot and square or block, and addition or subdivision, if in a city, and, if in the country after showing state, county, and township, locate the property by metes and bounds, or by part of section, township, and range, so that it may be identified.

2. Here describe the property by name so that it can be identified - for example "Fifteen shares of the stock of the National Metropolitan Bank, New York City," or "Am. T. & T. s. f.5's 60".

3. Here state what other bonds the affiant has already signed as surety, giving the name and address of the principal, the date, and the amount and character of the bond.

BILLING CODE 7020-02-C

9. Paragraph (b) of § 210.59 is revised to read as follows:

§ 210.59 Period for concluding Commission investigation.

* * * * *

(b) An investigation may be designated "more complicated" by the Commission or the presiding administrative law judge pursuant to § 210.24(e)(11) for the purpose of extending the statutory deadline for determining whether to grant or deny a motion for temporary relief, as well as the issues of bonding by the complainant if a temporary exclusion order is to be issued and the amount of the bond. The Commission's or the administrative law judge's reasons for designating the investigation "more complicated" for that purpose shall be published in the **Federal Register.** In computing the statutory deadline for determining whether to grant or deny a motion for temporary relief in an investigation designated "more complicated" pursuant to this paragraph (and § 210.24(e)(11), there shall be excluded any period of time during which the investigation is suspended because of proceedings in a court or agency of the United States involving similar questions concerning the subject matter of such investigation.

* * * * *

By order of the Commission.

Issued: November 29, 1988.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 74 and 201

[Docket No. 86C-0192]

FD&C Yellow No. 6 Label Declaration

AGENCY: Food and Drug Administration.

ACTION: Final rule; suspension.

SUMMARY: The Food and Drug Administration (FDA) is announcing that, pending further agency action, it will not enforce the provisions of the FD&C Yellow No. 6 regulations (21 CFR 74.706(d)(2), 74.1706(c)(2), and 201.20(c)) that require that beginning January 1, 1989, the labels of all foods and drugs that contain this color additive declare its presence.

DATE: Sections 74.706(d)(2), 74.1706(c)(2), and 201.20(c) are suspended as of December 6, 1988.

FOR FURTHER INFORMATION CONTACT: Blondell Anderson, Center for Food Safety and Applied Nutrition (HFF-334), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of November 19, 1986 (51 FR 41765), FDA published a final rule that permanently listed FD&C Yellow No. 6 for use in food, drugs, and cosmetics. That final rule also established a label declaration requirement for all food and drug products (21 CFR 74.706(d)(2), 74.1706(c)(2), and 201.20(c)) containing the color additive because of reported allergic reactions to FD&C Yellow No. 6. In that final rule, the agency stated that the compliance date for declaring FD&C Yellow No. 6 on product labels would be November 19, 1987.

FDA received several objections to the labeling requirement for FD&C Yellow No. 6. Those objections addressed, among other things, the evidence used by the agency to establish the ruling, the fact that FDA did not propose labeling before making it a requirement in a final rule, and the effective date for the labeling requirement.

FDA evaluated the objections and presented its responses in the **Federal Register** of June 8, 1987 (52 FR 21505). The agency reiterated its reasoning for establishing the labeling requirements for FD&C Yellow No. 6. In response to some of the objections, the agency made revisions in the labeling language for drug products and extended the effective date for compliance with the label declaration requirement to January 1, 1989.

On October 5, 1987, the Certified Color Manufacturers Association, Inc. (CCMA), filed in the U.S. Court of Appeals for the District of Columbia Circuit a petition challenging only that portion of the final rule dated June 8, 1987, that required by making final the rule of November 19, 1986, that all food labeling declare the presence of FD&C Yellow No. 6. The issues raised by CCMA were: (1) Whether FDA provided sufficient notice under the agency's regulations, the Administrative Procedure Act, the Federal Food, Drug, and Cosmetic Act and the Due Process Clause of the U.S. Constitution for that portion of the above-mentioned final rule, and (2) whether that portion of the final rule is supported by sufficient evidence. On February, 29, 1988, FDA and CCMA filed a stipulation for the voluntary dismissal of the petition for judicial review. The stipulation was based on the fact that FDA had agreed to issue in the **Federal Register** a notice withdrawing, as a final rule, the labeling requirement set forth at 52 FR 21505 and simultaneously to publish, as a proposed rule, a label declaration requirement for products containing FD&C Yellow No. 6. This agreement did not affect the permanent listing of the color additive as confirmed in the June 8, 1987, **Federal Register** document.

FDA is preparing the notice withdrawing this requirement and the proposed rule. Until further agency action, however, FDA will not enforce the provisions (21 CFR 74.706(d)(2), 74.1706(c)(2), and 201.20(c)) that require the label declaration of FD&C Yellow No. 6. Any food or drug product on the market on or after January 1, 1989, the effective date for labeling compliance, that contains the color additive but that does not have the specific declaration will not be considered out of compliance with the FD&C Yellow No. 6 regulations.

Dated: November 28, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 88-27848 Filed 12-5-88; 8:45 am]

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

24 CFR Part 511

[Docket No. R-88-1401; FR-2472]

Rental Rehabilitation Grants

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Final rule.

SUMMARY: This final rule implements sections 150(a), (c), (d), (e) and 311 of the Housing and Community Development Act of 1987 (Pub. L. 100-242, approved February 5, 1988). Section 150 makes a number of changes in the Rental Rehabilitation Grant Program authorized by section 17(a)(1)(A) of the United States Housing Act of 1937 and codified at 24 CFR Part 511.

EFFECTIVE DATE: Under section 7(o)(3) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(o)(3)), this final rule cannot become effective until after the first period of 30 calendar days of continuous session of Congress which occurs after the date of the rule's publication. HUD will publish a notice

of the effective date of this rule following expiration of the 30-session-day waiting period. Whether or not the statutory waiting period has expired, this rule will *not* become final until HUD's separate notice is published announcing a specific effective date.

FOR FURTHER INFORMATION CONTACT: Mary Kolesar, Director, Rehabilitation Management Division, Office of Urban Rehabilitation, Room 7162, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 755–5970. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Purpose

HUD's regulations at 24 CFR Part 511 authorize the Secretary of Housing and Urban Development to make rental rehabilitation grants to help support the rehabilitation of privately owned real property to be used for primarily residential rental purposes. This rule makes final a previously published interim rule to implement statutory revisions permitting a grantee to use uncommitted funds from prior years as well as FY 1988 funds to carry out its rental rehabilitation programs. The changes include permitting grantees to use a portion of their funds for administrative expenses, and increasing the per-unit assistance limits.

Two other 1987 Act amendments, one making eligible for rental rehabilitation assistance real property that will be privately owned upon completion of rehabilitation, and the other making eligible property owned by certain non-profit organizations, are not implemented by this rule.

The Department published an interim rule on July 6, 1988 (53 FR 25462) seeking public comment. HUD received one comment in support of the rule.

Finding and Certifications

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(c) of the National Environmental Policy Act of 1969. The revisions in the Rental Rehabilitation Program regulations are not environmentally significant because the changes are administrative and will not result in significant impact on the physical environment. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410.

This rule does not contribute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulations issued by the President on February 17, 1981. An analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In accordance with 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule implements several statutory provisions that improve the Rental Rehabilitation Program. These changes will have neither a significant economic impact on, nor an effect on a substantial number of, small entities.

The General Counsel, as the Designated Official under Executive Order 12606, *The Family*, has determined that the rule will not have a significant impact on the family. The final rule implements several statutory provisions that improve the Rental Rehabilitation Program and will have little, if any, impact on family formation, maintenance and general well-being.

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12611, *Federalism*, has determined that the final rule does not involve the preemption of State law by Federal statute or regulation, and does not have substantial direct effects on States or their political subdivisions, or on the relationship or distribution of power among the various levels of government. The rule, which permits a grantee to use uncommitted funds from prior years as well as FY 1988 funds to carry out its rental rehabilitation programs will not have a significant impact on the States.

The Catalog of Federal Domestic Assistance Program number is 14.230.

The rule was listed as Sequence No. 1026 in the Department's Semiannual Agenda of Regulations published on October 24, 1988 (53 FR 41974, 42003) under Executive Order 12291 and the Regulatory Flexibility Act.

List of Subjects in 24 CFR Part 511

Rental rehabilitation grants, Administrative practice and procedure, Grants programs: housing and community development, Low and moderate income housing, Reporting and recordkeeping requirements.

Accordingly, the Interim Rule published in the **Federal Register** on July 6, 1988 (53 FR 25462), as corrected on July 26, 1988 (53 FR 28115), is adopted as final without changes.

Date: November 28, 1988.

Jack R. Stokvis,

Assistant Secretary for Community Planning and Development.

[FR Doc. 88–27980 Filed 12–5–88; 8:45 am]

BILLING CODE 4210–29–M

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 885

[Docket No. N–88–1891; FR–2587]

Section 202 Loans for Housing for the Elderly or Handicapped; Fiscal Year 1989 Loan Interest Rate

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Announcement of Section 202 Loan Interest Rate—Fiscal Year 1989.

SUMMARY: Under 24 CFR 885.410(g), the interest rate for a loan for housing for the elderly or handicapped under section 202 of the Housing Act of 1959 is set at one of two rates: (1) The annual interest rate announced by HUD under § 885.410(g)(1); or (2) the optional interest rate elected by the Borrower and computed by HUD at the time of the Borrower's request for conditional or firm commitment under § 885.410(g)(2). This document establishes 9.25 percent as the annual interest rate for Fiscal Year 1989. (Information concerning the calculation of the optional interest rate will be provided to Borrowers upon request. See § 885.410(h).)

FOR FURTHER INFORMATION CONTACT: Robert W. Wilden, Director, Assisted Elderly and Handicapped Housing Division, 451 Seventh Street, SW., Room 6116, Washington, DC 20401–8000, telephone (202) 426–8730. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Under 24 CFR 885.410(g), the interest rate for a loan for housing for the elderly or handicapped under section 202 of the Housing Act of 1959 is set at one of two rates: (1) The annual interest rate announced by HUD under § 885.410(g)(1); or (2) the optional interest rate elected by the Borrower

and computed by HUD at the time of the Borrower's request for conditional or firm commitment under § 885.410(g)(2). The citations in this document are to the interim rule published June 1, 1988 (53 FR 19899) and the final rule published November 9, 1988 (53 FR 45265).

This document announces HUD's determination of the annual interest rate. (Information concerning the calculation of the optional interest rate will be provided to Borrowers upon request. See § 885.410(h).)

The annual interest rate under § 885.410(g)(1) may not exceed:

(1) The average yield on the most recently issued 30-year marketable obligations of the United States during the three-month period immediately preceeding the fiscal year in which the loan is made (adjusted to the nearest one-eight of one percent) plus an allowance to cover administrative costs and probable losses under the program. (This allowance has been determined by the Secretary of Housing and Urban Development to be one-fourth of one percent (0.25 percent) per annum for both the construction and permanent loan periods); and

(2) Any applicable statutory ceiling on the loan interest rate including the allowance to cover administrative costs and probable losses. (§ 885.410(g)(1)(ii)). The current statutory ceiling is 9.25 percent per annum.

The average yield on the described interest-bearing obligations of the United States during the last three months of Fiscal Year 1988 was 9.125 percent. This rate plus the 0.25 percent allowance for administrative costs and probable losses yields an interest rate of 9.375 percent, a rate in excess of the 9.25 percent statutory ceiling. Accordingly, this Notice establishes the annual interest rate for section 202 loans made during Fiscal Year 1989 at the statutory ceiling of 9.25 percent per annum.

Under 24 CFR 50.20(l), an environmental finding is not necessary because the statutorily required establishment of interest rates is among matters that are categorically excluded from the environmental requirements of 24 CFR Part 50.

Authority: Sec. 202, Housing Act of 1959 (12 U.S.C. 1701q); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: November 28, 1988.

Thomas T. Demery,

Assistant Secretary for Housing, Federal Housing Commissioner.

[FR Doc. 88-28000 Filed 12-5-88; 8:45 am]

BILLING CODE 4210-27-M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2619

Valuation of Plan Benefits in Single-Employer Plans; Expected Retirement Age

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This rule amends the Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Benefits in Single-Employer Plans (29 CFR Part 2619) by adding a new Table I–89 to Appendix D. Table I–89 is to be used by any terminating pension plan with a valuation date falling in 1989 to determine expected retirement ages for plan participants in order to compute the value of early retirement benefits and, thus, the total value of benefits under the plan.

EFFECTIVE DATE: January 1, 1989.

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy, Attorney, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, DC 20006; 202–778–8820 (202–778–8859 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The Pension Benefit Guaranty Corporation's ("PBGC's") regulation on Valuation of Plan Benefits in Single-Employer Plans (29 CFR Part 2619) sets forth the methods for valuing plan benefits of terminating single-employer plans covered under Title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Although the amendments to Title IV effected by the Single-Employer Pension Plan Amendments Act of 1986 and the Pension Protection Act (Part II of Subtitle D of Title IX of the Omnibus Budget Reconciliation Act of 1987) change significantly the rules for terminating single-employer plans, the rules for valuing benefits in such plans are much the same. Under ERISA section 4041(c), plans wishing to terminate in a distress termination generally must value guaranteed benefits and benefit liabilities under the plan using formulas set forth in Part 2619. Plans terminating in a standard termination may also use the formulas in Part 2619 to value benefit liabilities for purposes of the notice to the PBGC required by ERISA section 4041(b)(2)(A), although this is not required. (Such plans may value benefit liabilities that are payable as annuities on the basis of a qualifying bid obtained from an insurer.)

Under § 2619.46, early retirement benefits are valued according to the annuity starting date, if a retirement date has been selected, or according to the expected retirement age, if the annuity starting date is not known on the valuation date. Subpart D of Part 2619 sets forth rules for determining the expected retirement ages for plan participants entitled to early retirement benefits. Appendices D and E of Part 2619 contain tables and examples to be used in determining the expected early retirement ages.

There are two sets of tables in Appendix D. The first set, Selection of Retirement Rate Category (I–79 through I–88), is used to determine whether a participant has a low, medium, or high probability of retiring early. The second set of tables, Expected Retirement Ages for Individuals in the Low/Medium/High Categories (II–A, II–B, and II–C), is used to determine the expected retirement age after the probability of early retirement has been determined.

The first set of tables determines the probablility of early retirement based on the year a participant would reach normal retirement age and the participant's monthly benefit at normal retirement age. The second set of tables establishes, by probability category, the expected retirement age based on both the earliest age a participant could retire under the plan and the normal retirement age under the plan. This expected retirement age is used to compute the value of the early retirement benefit and, thus, the total value of benefits under the plan.

Tables I–79 through I–88 in Appendix D establish retirement rate categories for the calendar years 1979 through 1988. The table for each year applies only to plans with valuation dates in that year. This rule amends Appendix D to add Table I–89 in order to provide an updated correlation, appropriate for calendar year 1989, between the amount of a participant's benefit and the probability that the participant will elect early retirement. Table I–89 will be used to value benefits in plans with valuation dates that occur during calendar year 1989.

The PBGC has determined that notice of and public comment on this rule are impracticable and contrary to the public interest.

Plan administrators need to be able to estimate accurately the value of plan benefits as early as possible before initiating the termination process. For that purpose, if a plan has a valuation date in 1989, the plan administrator needs the updated table being promulgated in this rule. Accordingly,

the public interest is best served by issuing this table expeditiously, without an opportunity for notice and comment, to allow as much time as possible to estimate the value of plan benefits with the proper table for plans with valuation dates in early 1989. Moreover, because of the need to provide immediate guidance for the valuation of benefits under such plans, and because no adjustment by ongoing plans is required by this amendment, the PBGC finds that good cause exists for making this amendment to the regulation effective less than 30 days after publication.

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291 because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity or innovation.

Because no general notice of proposed rulemaking is required for this regulation, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

List of Subjects in 29 CFR Part 2619

Employee benefit plans, Pension insurance, Pensions.

In consideration of the foregoing, Appendix D to Part 2619 of Chapter XXVI of Title 29, Code of Federal Regulations, is hereby amended as follows:

PART 2619—[AMENDED]

1. The authority citation for Part 2619 continues to read as follows:

Authority: 29 U.S.C. 1301(a), 1302(b)(3), 1341, 1344, 1362, as amended by secs. 9312–13, Pub. L. 100–203, 101 Stat. 1330.

2. Appendix D to Part 2619 is amended by adding Table I–89 as follows:

Appendix D—Tables Used to Determine Expected Retirement Age

* * * * *

TABLE I–89.—SELECTION OF RETIREMENT RATE CATEGORY

[For plans with valuation dates after December 31, 1988, and before January 1, 1990]

Participant reaches NRA in year—	Participant's retirement rate category is—			
	Low [1] if monthly benefit at NRA is less than—	Medium [2] if monthly benefit at NRA is—		High [3] if monthly benefit at NRA is greater than—

DEPARTMENT OF EDUCATION

34 CFR Parts 74, 75, 76, 80, 100, 200, 222, 241, 251, 253, 254, 255, 256, 257, 258, 263, 298, 300, 302, 307, 309, 315, 324, 326, 338, 361, 366, 367, 369, 370, 385, 386, 387, 388, 389, 390, 396, 538, 600, 607, 624, 626, 628, 637, 639, 643, 644, 649, 650, 653, 656, 657, 668, 674, 675, 676, 682, 690, 745, 755, 762, 769, 776, 777, 778, 779, 787, and 790

OMB Control Numbers

AGENCY: Department of Education.

ACTION: Final regulations; technical amendments.

SUMMARY: The Secretary amends Title 34 of the Code of Federal Regulations (CFR) to add Office of Management and Budget (OMB) control numbers to certain sections of the regulations. These sections contain information collection requirements approved by OMB. The Secretary takes this action to ensure that valid OMB control numbers are displayed for these sections of Department regulations.

EFFECTIVE DATE: These regulations are effective December 6, 1988.

FOR FURTHER INFORMATION CONTACT: A. Neal Shedd, Director, Division of Regulations Management, 400 Maryland Avenue SW., (Room 2131, FOB–6), Washington, DC 20202. Telephone: (202) 732–2887.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1980, Pub. L. 96–511, establishes policies and procedures for controlling paperwork burdens imposed by Federal agencies on the public. Under the Act, the Director of OMB has oversight authority for information collection activities. The Act authorizes the Director of OMB to promulgate necessary rules, regulations, or procedures (44 U.S.C. 3516).

OMB regulations published at 5 CFR 1320.4(a) and 1320.7(f)(2) require publication of these control numbers in the **Federal Register** for inclusion in the CFR.

In accordance with the applicable OMB regulations, the Secretary publishes OMB control numbers in this document for certain sections of regulations promulgated prior to OMB's publication of regulations implementing the Paperwork Reduction Act of 1980.

The Department has determined that some sections of final regulations listed as subject to OMB approval do not require review under the Paperwork Reduction Act of 1980. These sections became effective at the same time as the other regulations with which they were published. These sections include 34 CFR 628.32, Endowment Challenge Grant Program, published on July 12, 1984 (49 FR 28520); 34 CFR 690.72, Pell Grant Program, published on March 15, 1985 (50 FR 10710); and 34 CFR 706.21 and 706.22, Regional Educational Laboratories and Research and Development Centers Program: General Provisions, published on July 23, 1984 at (49 FR 29746).

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Waiver of Proposed Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)) and the Administrative Procedure Act (5 U.S.C. 551 *et seq.*), it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations. However, the publication of OMB control numbers is purely technical and does not establish substantive policy. Therefore, the Secretary has determined, under 5 U.S.C. 553(b)(B), that proposed rulemaking on these regulations is unnecessary and contrary to the public

interest and that a delayed effective date is not required under 5 U.S.C. 553(d)(3).

List of Subjects

34 CFR Part 74

Administrative practice and procedure, Grant programs—education, Grants administration.

34 CFR Part 75

Grant programs—education, Grants administration.

34 CFR Part 76

Grant programs—education, Grants administration, Intergovernmental relations, State-administered programs.

34 CFR Part 80

Accounting, Administrative practice and procedure, Grants administration, Insurance, Reporting and recordkeeping requirements.

34 CFR Part 100

Administrative practice and procedure, Civil rights.

34 CFR Part 200

Education of disadvantaged, Education of handicapped, Elementary and secondary education, Juvenile delinquency, Migrant labor.

34 CFR Part 222

Education of handicapped, Elementary and secondary education, Federally affected areas, Grant programs—education.

34 CFR Part 241

Education, Educational study programs, Elementary and secondary education, Grant programs—education, Law.

34 CFR Parts 251, 253, 254, 255, and 256

Elementary and secondary, Grant programs—Indians, Indians—education.

34 CFR Part 257

Grants programs—Indians, Indians—education, Teachers.

34 CFR Part 258

Adult education, grant programs—Indians, Indians—education.

34 CFR Part 263

Business and industry, Colleges and universities, Indians—education, Scholarships and fellowships, Teachers.

34 CFR Part 298

Administrative practice and procedure, Elementary and secondary education, Grant programs—education, State-administered programs.

34 CFR Part 300

Education of handicapped, Grant programs—education.

34 CFR Part 302

Education of handicapped, Elementary and secondary education, Grants programs—education.

34 CFR Part 307

Education of handicapped, Government contracts, Grant programs—education.

34 CFR Part 309

Education of handicapped, Grant programs—education.

34 CFR Part 315

Education of handicapped, Education—research, Grant programs—education, Teachers.

34 CFR Part 324

Education of handicapped, Grant programs—education, Scholarships and fellowships, Teachers.

34 CFR Part 326

Education of handicapped, Transitional services.

34 CFR Part 338

Adult education, Colleges and universities, Education of handicapped, Vocational education.

34 CFR Part 361

Administrative practice and procedure, Grant programs—education, Vocational rehabilitiation.

34 CFR Parts 366, 367, 369, 385, 386, 387, 388, 389, 390, and 396

Grant programs—education, Vocational rehabilitation.

34 CFR Part 370

Reporting and recordkeeping requirements, Vocational rehabilitation.

34 CFR Part 538

Bilingual education, Elementary and secondary education, Grant programs—education, Refugees.

34 CFR Part 600

Dated: November 30, 1988.

Lauro F. Cavazos,

Secretary of Education.

(Catalog of Federal Domestic Assistance does not apply)

The Secretary amends Parts 74, 75, 76, 80, 100, 200, 222, 241, 251, 253, 254, 255, 256, 257, 258, 263, 298, 300, 302, 307, 309, 315, 324, 326, 338, 361, 366, 367, 369, 370, 385, 386, 387, 388, 389, 390, 396, 538, 600, 607, 624, 626, 628, 637, 639, 643, 644, 649, 650, 653, 656, 657, 668, 674, 675, 676, 682, 690, 745, 755, 769, 776, 777, 778, 779, 787, and 790 of Title 34 of the Code of Federal Regulations as follows:

PART 74—ADMINISTRATION OF GRANTS

1. The authority citation for Part 74 continues to read as follows:

Authority: 20 U.S.C. 3474; OMB Circular A-110, unless otherwise noted.

§§ 75.61, 74.73, 74.74, 74.75, 74.76, 74.82, and 74.140 [Amended]

2. Sections 74.61, 74.73, 74.74, 74.75, 74.76, 74.82, and 74.140 are amended by adding "(Approved by the Office of Management and Budget under control number 1880–0513)" following each section.

PART 75—DIRECT GRANT PROGRAMS

3. The authority citation for Part 75 continues to read as follows:

Authority: 20 U.S.C. 1221e–3(a)(1), unless otherwise noted.

§§ 75.107, 75.108, 75.118, 75.119, 75.210, 75.261, 75.720, 75.730, and 75.732 [Amended]

4. Sections 75.107, 75.108, 75.118, 75.119, 75.210, 75.261, 75.720, 75.730, and 75.732 are amended by adding "(Approved by the Office of Management and Budget under control number 1880–0513)" following each section.

PART 76—STATE-ADMINISTERED PROGRAMS

5. The authority citation for Part 76 continues to read as follows:

Authority: 20 U.S.C. 1221e–3(a)(1), unless otherwise noted.

§§ 76.131, 76.301, 76.302, 76.720, 76.730, 76.771, 76.780, and 76.781 [Amended]

6. Sections 76.131, 76.301, 76.302, 76.720, 76.730, 76.771, 76.780, and 76.781 are amended by adding "(Approved by the Office of Management and Budget under control number 1880–0513)" following each section.

PART 80—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

7. The authority citation for Part 80 continues to read as follows:

Authority: 20 U.S.C. 3474; OMB Circular A-102, unless otherwise noted.

§§ 80.10, 80.20, 80.24, 80.30, 80.32, 80.36, 80.40, 80.41, 80.42 and 80.50 [Amended]

8. Sections 80.10, 80.20, 80.24, 80.30, 80.32, 80.36, 80.40, 80.41, 80.42 and 80.50 are amended by adding "(Approved by the Office of Management and Budget under control number 1880–0517)" following each section.

PART 100—NONDISCRIMINATION UNDER PROGRAMS RECEIVING FEDERAL ASSISTANCE THROUGH THE DEPARTMENT OF EDUCATION EFFECTUATION OF TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

9. The authority citation for Part 100 continues to read as follows:

Authority: Sec. 602, 78 Stat. 252; 42 U.S.C. 2000d–1, unless otherwise noted.

§ 100.6 [Amended]

10. Section 100.6 is amended by adding "(Approved by the Office of Management and Budget under control number 1870–0500)" following the section.

PART 200—FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES TO MEET SPECIAL EDUCATIONAL NEEDS OF DISADVANTAGED CHILDREN

11. The authority citation for Part 200 continues to read as follows:

Authority: Secs. 552–559, 591–596 of the Education Consolidation and Improvement Act of 1981, 20 U.S.C. 3801–3808, 3871–3876, unless otherwise noted.

§ 200.13 [Amended]

12. Section 200.13 is amended by adding "(Approved by the Office of Management and Budget under control number 1810–0504)" following the section.

PART 222—ASSISTANCE FOR LOCAL EDUCATIONAL AGENCIES IN AREAS AFFECTED BY FEDERAL ACTIVITIES AND ARRANGEMENTS FOR EDUCATION OF CHILDREN WHERE LOCAL EDUCATIONAL AGENCIES CANNOT PROVIDE SUITABLE FREE PUBLIC EDUCATION

13. The authority citation for Part 222 continues to read as follows:

Authority: 20 U.S.C. 236–244, unless otherwise noted.

§§ 222.22, 222.23, 222.25 and 222.40 [Amended]

14. Sections 222.22, 222.23, 222.25 and 222.40 are amended by adding "(Approved by the Office of Management and Budget under control number 1880–0036)" following each section.

PART 241—LAW-RELATED EDUCATION PROGRAM

15. The authority citation for Part 241 is revised to read as follows:

Authority: 20 U.S.C. 3851, unless otherwise noted.

§§ 241.30 and 241.31 [Amended]

16. Sections 241.30 and 241.31 are amended by adding "(Approved by the Office of Management and Budget under control number 1880–0507)" following each section.

PART 251—FORMULA GRANTS—LOCAL EDUCATIONAL AGENCIES

17. The authority citation for Part 251 continues to read as follows:

Authority: 20 U.S.C. 2601–2606, unless otherwise noted.

§ 251.41 [Amended]

18. Section 251.41 is amended by adding "(Approved by the Office of Management and Budget under control number 1810–0021)" following the section.

PART 253—INDIAN CONTROLLED SCHOOLS—ENRICHMENT PROJECTS

19. The authority citation for Part 253 continues to read as follows:

Authority: Title IV, Part A, Pub. L. 92–318 (the Indian Education Act), 86 Stat. 334, as amended (20 U.S.C. 241bb(b)), unless otherwise noted.

§ 253.31 [Amended]

20. Section 253.31 is amended by adding "(Approved by the Office of Management and Budget under control number 1810–0021)" following the section.

PART 254—EDUCATIONAL SERVICES FOR INDIAN CHILDREN

21. The authority citation for Part 254 continues to read as follows:

Authority: Title IV, Part B, Pub. L. 92–318 (the Indian Education Act), 86 Stat. 339, as amended (20 U.S.C. 3385(a), (c)), unless otherwise noted.

§ 254.32 [Amended]

22. Section 254.32 is amended by adding "(Approved by the Office of Management and Budget under control number 1810–0021)" following the section.

PART 255—PLANNING, PILOT, AND DEMONSTRATION PROJECTS FOR INDIAN CHILDREN

23. The authority citation for Part 255 continues to read as follows:

Authority: Title IV, Part B, Pub. L. 92–318 (the Indian Education Act), 86 Stat. 339, as amended (20 U.S.C. 3385(a), (b)), unless otherwise noted.

§§ 255.32, 255.33 and 255.34 [Amended]

24. Sections 225.32, 255.33, and 255.34 are amended by adding "(Approved by the Office of Management and Budget under control number 1810–0021)" following each section.

PART 256—EDUCATIONAL PERSONNEL DEVELOPMENT

23. The authority citation for Part 255 continues to read as follows:

Authority: Title IV, Part B, Pub. L. 92–318, 86 Stat. 339, as amended (20 U.S.C. 3385); and the Indian Education Act, Section 422, as amended (20 U.S.C. 3385a), unless otherwise noted.

§ 256.32 [Amended]

26. Section 256.32 is amended by adding "(Approved by the Office of Management and Budget under control number 1810–0021)" following the section.

PART 257—EDUCATIONAL SERVICES FOR INDIAN ADULTS

27. The authority citation for Part 257 continues to read as follows:

Authority: Title IV, Part C, Pub. L. 92–318 (The Indian Education Act), 86 Stat. 342, as amended (20 U.S.C. 1211a), unless otherwise noted.

§ 257.31 [Amended]

28. Section 257.31 is amended by adding "(Approved by the Office of Management and Budget under control number 1810–0021)" following the section.

PART 258—PLANNING, PILOT, AND DEMONSTRATION PROJECTS FOR INDIAN ADULTS

29. The authority citation for Part 258 continues to read as follows:

Authority: Title IV, Part C, Pub. L. 92–318 (the Indian Education Act), 86 Stat. 342, as amended (20 U.S.C. 1211a), unless otherwise noted.

§§ 258.32, 258.33 and 258.34 [Amended]

30. Sections 258.32, 258.33, and 258.34 are amended by adding "(Approved by the Office of Management and Budget under control number 1810–0021)" following each section.

PART 263—INDIAN FELLOWSHIP PROGRAM

31. The authority citation for Part 263 continues to read as follows:

Authority: Sec. 423, Indian Education Act, as amended (20 U.S.C. 3385b), unless otherwise noted.

§§ 263.12 and 263.23 [Amended]

32. Sections 263.12 and 263.23 are amended by adding "(Approved by the Office of Management and Budget under control number 1810–0020)" following each section.

PART 298—CHAPTER 2 OF THE EDUCATION CONSOLIDATION AND IMPROVEMENT ACT OF 1981

33. The authority citation for Part 298 continues to read as follows:

Authority: Secs. 561–596 of the Education Consolidation and Improvement Act of 1981, 20 U.S.C. 3811–3876, unless otherwise noted.

§ 298.4 [Amended]

34. Section 298.4 is amended by adding "(Approved by the Office of Management and Budget under control number 1810–0053)" following the section.

PART 300—ASSISTANCE TO STATES FOR EDUCATION OF HANDICAPPED CHILDREN

35. The authority citation for Part 300 continues to read as follows:

Authority: 20 U.S.C. 1411–1420, unless otherwise noted.

§§ 300.121 through 300.134, 300.136 through 300.141, 300.144, 300.146, 300.148 through 300.151, 300.380 through 300.385, 300.387 and 300.754 [Amended]

36. Sections 300.121, 300.122, 300.123, 300.124, 300.125, 300.126, 300.127, 300.128, 300.129, 300.130, 300.131, 300.132, 300.133, 300.134, 300.136, 300.137, 300.138, 300.139, 300.140, 300.141, 300.144, 300.146, 300.148, 300.149, 300.150, 300.151, 300.380, 300.381, 300.382, 300.383, 300.384, 300.385, 300.387, and 300.754 are amended by adding "(Approved by the Office of Management and Budget under control number 1820–0030)" following each section.

§ 300.507 [Amended]

37. Section 300.507 is amended by adding "(Approved by the Office of Management and Budget under control number 1820–0509)" following the section.

PART 302—STATE OPERATED PROGRAMS FOR HANDICAPPED CHILDREN

38. The authority citation for Part 302 is revised to read as follows:

Authority: 20 U.S.C. 241c–1, unless otherwise noted.

§§ 302.21 and 302.30 [Amended]

39. Sections 302.21 and 302.30 are amended by adding "(Approved by the Office of Management and Budget under control number 1820–0510)" following each section.

§ 302.25 [Amended]

40. Section 302.25 is amended by adding "(Approved by the Office of Management and Budget under control

number 1820–0513)" following the section.

PART 307—SERVICES FOR DEAF-BLIND CHILDREN AND YOUTH

41. The authority citation for Part 307 continues to read as follows:

Authority: Sec. 622 of the Education of the Handicapped Act (20 U.S.C. 1422), unless otherwise noted.

§§ 307.31 and 307.40 [Amended]

42. Sections 307. 31 and 307.40 are amended by adding "(Approved by the Office of Management and Budget under control number 1820–0028)" following each section.

PART 309—HANDICAPPED CHILDREN'S EARLY EDUCATION PROGRAM

43. The authority citation for Part 309 continues to read as follows:

Authority: 20 U.S.C. 1423, unless otherwise noted.

§ 309.21 [Amended]

44. Section 309.21 is amended by adding "(Approved by the Office of Management and Budget under control number 1820–0028)" following the section.

PART 315—PROGRAM FOR SEVERELY HANDICAPPED CHILDREN

45. The authority citation for Part 315 continues to read as follows:

Authority: 20 U.S.C. 1424.

§§ 315.32 and 315.33 [Amended]

46. Sections 315.32 and 315.33 are amended by adding "(Approved by the Office of Management and Budget under control number 1820–0028)" following each section.

PART 324—RESEARCH IN EDUCATION OF THE HANDICAPPED PROGRAM

47. The authority citation for Part 324 is revised to read as follows:

Authority: 20 U.S.C. 1414–1444, unless otherwise noted.

§§ 324.31 and 324.32 [Amended]

48. Sections 324.31 and 324.32 are amended by adding "(Approved by Office of Management and Budget under control number 1820–0028)" following each section.

PART 326—SECONDARY EDUCATION AND TRANSITIONAL SERVICES FOR HANDICAPPED YOUTH PROGRAM

49. The authority citation for Part 326 continues to read as follows:

Authority: 20 U.S.C. 1425, unless otherwise noted.

§§ 326.32 and 326.33 [Amended]

50. Sections 326.32 and 326.33 are amended by adding "(Approved by Office of Management and Budget under control number 1820–0028)" following each section.

PART 338—POSTSECONDARY EDUCATION PROGRAMS FOR HANDICAPPED PERSONS

51. The authority citation for Part 338 continues to read as follows:

Authority: 20 U.S.C. 1424a, unless otherwise noted.

§ 338.31 [Amended]

52. Section 338.31 is amended by adding "Approved by the Office of Management and Budget under control number 1820–0028)" following the section.

PART 361—THE STATE VOCATIONAL REHABILITATION SERVICES PROGRAM

53. The authority citation for Part 361 continues to read as follows:

Authority: 20 U.S.C. 711(c), unless otherwise noted.

§§ 361.2, 361.17, 361.18, 361.36, 361.39, 361.40, 361.41, and 361.48 [Amended]

54. Sections 361.2, 361.17, 361.18, 361.36, 361.39, 361.40, 361.41, and 361.48 are amended by adding "(Approved by the Office of Management and Budget under control number (1820–0500)" following each section.

PART 366—CENTERS FOR INDEPENDENT LIVING

55. The authority citation for Part 366 continues to read as follows:

Authority: 29 U.S.C. 711(c), and 796(e), unless otherwise noted.

§§ 366.20 and 366.31 [Amended]

56. Sections 366.20 and 366.31 are amended by adding "(Approved by the Office of Management and Budget under control number 1820–0018)" following each section.

PART 367—INDEPENDENT LIVING SERVICES FOR OLDER BLIND INDIVIDUALS

57. The authority citation for Part 367 continues to read as follows:

Authority: 29 U.S.C. 796f, unless otherwise noted.

§§ 367.20 and 367.21 [Amended]

58. Sections 367.20 and 367.21 are amended by adding "(Approved by the Office of Management and Budget under control number 1820–0018)" following each section.

PART 369—VOCATIONAL REHABILITATION SERVICE PROJECTS

59. The authority citation for Part 369 continues to read as follows:

Authority: 29 U.S.C. 711(c), 732, 750, 775, 777(a)(1), 777(a)(3), 777(b), 777f, and 795g, unless otherwise noted.

§ 369.31 [Amended]

60. Section 369.31 is amended by adding "(Approved by the Office of Management and Budget under control number 1820–0018)" following the section.

PART 370—CLIENT ASSISTANCE PROGRAM

61. The authority citation for Part 370 is revised to read as follows:

Authority: 29 U.S.C. 732, unless otherwise noted.

§ 370.44 [Amended]

62. Section 370.44 is amended by adding "(Approved by the Office of Management and Budget under control number 1820–0528)" following the section.

PART 385—REHABILITATION TRAINING

63. The authority citation for Part 385 continues to read as follows:

Authority: 29 U.S.C. 711(c), 744, and 776, unless otherwise noted.

64. Section 385.32 is amended by adding "(Approved by the Office of Management and Budget under control number 1820–0018)" following the section.

PART 386—REHABILITATION TRAINING: REHABILITATION LONG-TERM TRAINING

65. The authority citation for Part 386 continues to read as follows:

Authority: 29 U.S.C. 711(c) and 774, unless otherwise noted.

§ 386.30 [Amended]

66. Section 386.30 is amended by adding "(Approved by the Office of Management and Budget under control number 1820–0018)" following the section.

PART 387—EXPERIMENTAL AND INNOVATIVE TRAINING

67. The authority citation for Part 387 continues to read as follows:

BEST COPY AVAILABLE

Authority: 29 U.S.C. 711(c) and 774, unless otherwise noted.

§ 387.30 [Amended]

68. Section 387.30 is amended by adding "(Approved by the Office of Management and Budget under control number 1820–0018)" following the section.

PART 388—STATE VOCATIONAL REHABILIATATION UNIT IN-SERVICE TRAINING

69. The authority citation for Part 388 continues to read as follows:

Authority: 29 U.S.C. 711(c) and 774, unless otherwise noted.

§ 388.30 [Amended]

70. Section 388.30 is amended by adding "(Approved by the Office of Management and Budget under control number 1820–0018)" following the section.

PART 389—REHABILITATION CONTINUING EDUCATION PROGRAMS

71. The authority citation for Part 389 continues to read as follows:

Authority: 29 U.S.C. 711(c) and 774, unless otherwise noted.

§ 389.30 [Amended]

72. Section 389.30 is amended by adding "(Approved by the Office of Management and Budget under control number 1820–0018)" following the section.

PART 390—REHABILITATION SHORT-TERM TRAINING

73. The authority citation for Part 390 continues to read as follows:

Authority: 29 U.S.C. 711(c) and 774, unless otherwise noted.

§ 390.30 [Amended]

74. Section 390.30 is amended by adding the authority citation "(Authority: 29 U.S.C. 711(c) and 774)" following the section and adding "(Approved by the Office of Management and Budget under control number 1820–0018)".

PART 396—TRAINING OF INTERPRETERS FOR DEAF INDIVIDUALS

75. The authority citation for Part 396 continues to read as follows:

Authority: Sec. 304(d) of the Rehabilitation Act of 1973, as amended by Pub. L. 95–602, 92 Stat. 2970 (29 U.S.C. 774(d)), unless otherwise noted.

§§ 396.20 and 396.30 [Amended]

76. Sections 396.20 and 396.30 are amended by adding "(Approved by the Office of Mangement and Budget under control number 1820–0018)" following each section.

PART 538—TRANSITION PROGRAM FOR REFUGEE CHILDREN

77. The authority citation for Part 538 continues to read as follows:

Authority: Immigration and Nationality Act, as amended by the Refugee Act of 1980, Pub. L. 96–212, 8 U.S.C. 1522(d), unless otherwise noted.

§ 538.20 [Amended]

78. Section 538.20 is amended by adding "(Approved by the Office of Management and Budget under control number 1885–0503)" following the section.

PART 600—INSTITUTIONAL ELIGIBILITY UNDER THE HIGHER EDUCATION ACT OF 1965, AS AMENDED

79. The authority citation for Part 600 continues to read as follows:

Authority: 20 U.S.C. 1085 (a), (b), and (e), 1088 (b) and (c), 1094(c)(3), and 1141 (a), unless otherwise noted.

§§ 600.8, 600.10, 600.20, 600.30 and 600.31 [Amended]

80. Sections 600.8, 600.10, 600.20, 600.30, and 600.31 are amended by adding "(Approved by the Office of Management and Budget under control number 1840–0098)" following each section.

PART 607—STRENGTHENING INSTITUTIONS PROGRAM

81. The authority citation for Part 607 continues to read as follows:

Authority: 20 U.S.C. 1057–1059, 1066–1069f, unless otherwise noted.

§ 607.8 [Amended]

82. Section 607.8 is amended by adding "(Approved by the Office of Management and Budget under control number 1840–0114)" following the section.

PART 624—INSTITUTIONAL AID PROGRAMS—GENERAL PROVISIONS

83. The authority citation for Part 624 continues to read as follows:

Authority: 20 U.S.C. 1051–1069c, unless otherwise noted.

§ 624.21 [Amended]

84. Section 624.21 is amended by adding "(Approved by the Office of Management and Budget under control number 1840–0593)" following the section.

PART 626—SPECIAL NEEDS PROGRAM

85. The authority citation for Part 626 continues to read as follows:

Authority: Secs. 321–324 and 341–347 of Title III of the Higher Education Act of 1965 (20 U.S.C. 1060–1063 and 1066–1069c), unless otherwise noted.

§ 626.21 [Amended]

86. Section 626.21 is amended by adding "(Approved by the Office of Management and Budget under control number 1840–0593)" following the section.

PART 628—ENDOWMENT CHALLENGE GRANT PROGRAM

87. The authority citation for Part 628 continues to read as follows:

Authority: 20 U.S.C. 1065a, unless otherwise noted.

§§ 628.41 and 628.47 [Amended]

88. Sections 628.41 and 628.47 are amended by adding "(Approved by the Office of Management and Budget under control number 1840–0564)" following each section.

PART 637—MINORITY SCIENCE IMPROVEMENT PROGRAM

89. The authority citation for Part 637 continues to read as follows:

Authority: 20 U.S.C. 1135b–1135b–3, 1135d–1135d–6, unless otherwise noted.

§ 637.32 [Amended]

90. Section 637.32 is amended by adding "(Approved by the Office of Management and Budget under control number 1840–0109)" following the section.

PART 639—LAW SCHOOL CLINICAL EXPERIENCE PROGRAM

91. The authority citation for Part 639 continues to read as follows:

Authority: 20 U.S.C. 1134s–1134t, unless otherwise noted.

§ 639.31 [Amended]

92. Section 639.31 is amended by adding "(Approved by the Office of Management and Budget under control number 1840–0041)" following the section.

PART 643—TALENT SEARCH PROGRAM

93. The authority citation for Part 643 continues to read as follows:

Authority: 20 U.S.C. 1070d–1, unless otherwise noted.

§§ 643.31 and 643.32 [Amended]

94. Sections 643.31 and 643.32 are amended by adding "(Approved by the Office of Management and Budget under control number 1840–0549)" following each section.

PART 644—EDUCATIONAL OPPORTUNITY CENTERS PROGRAM

95. The authority citation for Part 644 continues to read as follows:

Authority: 20 U.S.C. 1070d–1c.

§ 644.31 [Amended]

96. Section 644.31 is amended by adding "(Approved by the Office of Management and Budget under control number 1840–0065)" following the section.

PART 649—PATRICIA ROBERTS HARRIS FELLOWSHIPS PROGRAM

97. The authority citation for Part 649 continues to read as follows:

Authority: 20 U.S.C. 1134d to 1134f, unless otherwise noted.

§ 649.12 [Amended]

98. Section 649.12 is amended by adding "(Approved by the Office of Management and Budget under control number 1840–0508)" following the section.

§ 649.13 [Amended]

99. Section 649.13 is amended by adding "(Approved by the Office of Management and Budget under control number 1840–0509)" following the section.

PART 650—NATIONAL GRADUATE FELLOWS PROGRAM

100. The authority citation for Part 650 continues to read as follows:

Authority: 20 U.S.C. 1134h–1134k, unless otherwise noted.

§ 650.44 [Amended]

101. Section 650.44 is amended by adding "(Approved by the Office of Management and Budget under control number 1840–0562)" following the section.

PART 653—PAUL DOUGLAS TEACHER SCHOLARSHIP PROGRAM

102. The authority citation for Part 653 continues to read as follows:

Authority: 20 U.S.C. 1111–1111h, unless otherwise noted.

§ 653.21 [Amended]

103. Section 653.21 is amended by adding "(Approved by the Office of Management and Budget under control number 1840–0595)" following the section.

PART 656—NATIONAL RESOURCE CENTERS PROGRAM FOR FOREIGN LANGUAGE AND AREA STUDIES OR FOREIGN LANGUAGE AND INTERNATIONAL STUDIES

104. The authority citation for Part 656 continues to read as follows:

Authority: 20 U.S.C. 1122, unless otherwise noted.

§§ 656.21 and 656.22 [Amended]

105. Sections 656.21 and 656.22 are amended by adding "(Approved by the Office of Management and Budget under control number 1840–0068)" following each section.

PART 657—FOREIGN LANGUAGE AND AREA STUDIES FELLOWSHIPS PROGRAM

106. The authority citation for Part 657 continues to read as follows:

Authority: 20 U.S.C. 1122, unless otherwise noted.

§§ 657.3 and 657.21 [Amended]

107. Sections 657.3 and 657.21 are amended by adding "(Approved by the Office of Management and Budget under control number 1840–0068)" following each section.

PART 668—STUDENT ASSISTANCE GENERAL PROVISIONS

108. The authority citation for Part 668 continues to read as follows:

Authority: 20 U.S.C. 1085, 1088, 1091, 1092, 1094 and 1141, unless otherwise noted.

§§ 668.8, 668.13, 668.14, 668.15, 668.17, 668.22, 668.23, 668.32, 668.33, 668.34, 668.35, and 668.96 [Amended]

109. Sections 668.8, 668.13, 668.14, 668.15, 668.17, 668.22, 668.23, 668.32, 668.33, 668.34, 668.35, and 668.96 are amended by adding "(Approved by the Office of Management and Budget under control number 1840–0537)" following for each section.

PART 674—PERKINS LOAN PROGRAM

110. The authority citation for Part 674 continues to read as follows:

Authority: 20 U.S.C. 1087aa–1087hh and 20 U.S.C. 421–429, unless otherwise noted.

§§ 674.8, 674.10, 674.16, 674.19, 674.20, 674.31, 674.34, 674.35, 674.37, 674.38, 674.52, and 674.58 [Amended]

111. Sections 674.8, 674.10, 674.16, 674.19, 674.20, 674.31, 674.34, 674.35, 674.37, 674.38, 674.52, and 674.58 are amended by adding "(Approved by the Office of Management and Budget under control number 1840–0535)" following each section.

§§ 674.42, 674.43, 674.45, 674.48, 674.49, and 674.50 [Amended]

112. Sections 674.42, 674.43, 674.45, 674.48, 674.49, and 674.50 are amended by adding "(Approved by the Office of Management and Budget under control number 1840–0581)" following each section.

PART 675—COLLEGE WORK-STUDY AND JOB LOCATION AND DEVELOPMENT PROGRAMS

113. The authority citation for Part 675 is revised to read as follows:

Authority: 42 U.S.C. 2751–2756a, unless otherwise noted.

§§ 675.10, 675.16, 675.19, 675.20, 675.27, 675.34, and 675.35 [Amended]

114. Sections 675.10, 675.16, 675.19, 675.20, 675.27, 675.34, and 675.35 are amended by adding "(Approved by the Office of Management and Budget under control number 1840–0535)" following each section.

PART 676—SUPPLEMENTAL EDUCATIONAL OPPORTUNITY GRANT PROGRAM

115. The authority citation for Part 676 continues to read as follows:

Authority: 20 U.S.C. 1070b–107b–3, unless otherwise noted.

§§ 676.16 and 676.19 [Amended]

116. Sections 676.16 and 676.19 are amended by adding "(Approved by the Office of Management and Budget under control number 1840–0535)" following each section.

PART 682—GUARANTEED STUDENT LOAN AND PLUS PROGRAMS

117. The authority citation for Part 682 continues to read as follows:

Authority: 20 U.S.C. 1071 to 1087–2, unless otherwise noted.

§ 682.301 [Amended]

118. Section 682.301 is amended by adding "(Approved by the Office of Management and Budget under control number 1840–0110)" following the section.

PART 690—PELL GRANT PROGRAM

119. The authority citation for Part 690 continues to read as follows:

Authority: 20 U.S.C. 1070a through 1070a–6, unless otherwise noted.

§ 690.81 [Amended]

120. Section 690.81 is amended by adding "(Approved by the Office of

Management and Budget under control number 1840–0536)" following the section.

PART 745—WOMEN'S EDUCATIONAL EQUITY ACT PROGRAM

121. The authority citation for Part 745 continues to read as follows:

Authority: 20 U.S.C. 3341–3348, unless otherwise noted.

§§ 745.8 and 745.30 through 745.35 [Amended]

122. Sections 745.8, 745.30, 745.31, 745.32, 745.33, 745.34, and 745.35 are amended by adding "(Approved by the Office of Management and Budget under control number 1810–0062)" following each section.

PART 755—SECRETARY'S DISCRETIONARY PROGRAM FOR MATHEMATICS, SCIENCE, COMPUTER LEARNING, AND CRITICAL FOREIGN LANGUAGES

123. The authority citation for Part 755 continues to read as follows:

Authority: 20 U.S.C. 3972, unless otherwise noted.

§§ 755.32 and 755.33 [Amended]

124. Sections 755.32 and 755.33 are amended by adding "(Approved by the Office of Management and Budget under control number 1880–0510)" following each section.

PART 762—OFFICE OF EDUCATIONAL RESEARCH AND IMPROVEMENT FELLOWS PROGRAM

125. The authority citation for Part 762 continues to read as follows:

Authority: 20 U.S.C. 1221e, unless otherwise noted.

§ 762.21 [Amended]

126. Section 762.21 is amended by adding "(Approved by the Office of Management and Budget under control number 1850–0620)" following the section.

PART 769—THE LIBRARY SERVICES AND CONSTRUCTION ACT LIBRARY LITERACY PROGRAM

127. The authority citation for Part 769 continues to read as follows:

Authority: 20 U.S.C. 351 *et seq.*, unless otherwise noted.

§ 769.31 [Amended]

128. Section 769.31 is amended by adding "(Approved by the Office of Management and Budget under control number 1850–0587)" following the section.

PART 776—LIBRARY CAREER TRAINING PROGRAM

129. The authority citation for Part 776 continues to read as follows:

Authority: 20 U.S.C. 1021, 1031, 1032, unless otherwise noted.

§§ 776.10, 776.21, 776.22 and 776.23 [Amended]

130. Sections 776.10, 776.21, 776.22 and 776.23 are amended by adding "(Approved by the Office of Management and Budget under control number 1850–0022)" following each section.

PART 777—LIBRARY RESEARCH AND DEMONSTRATION PROGRAM

131. The authority citation for Part 777 continues to read as follows:

Authority: 20 U.S.C. 1021 *et seq.*, unless otherwise noted.

§ 777.31 [Amended]

132. Section 777.31 is amended by adding "(Approved by the Office of Management and Budget under control number 1850–0600)" following the section.

PART 778—STRENGTHENING RESEARCH LIBRARY RESOURCES

133. The authority citation for Part 778 continues to read as follows:

Authority: 20 U.S.C. 1021, 1041, 1042, unless otherwise noted.

§§ 778.2, 778.21 and 778.22 [Amended]

134. Sections 778.2, 778.21, and 778.22 are amended by adding "(Approved by the Office of Management and Budget under control number 1850–0054)" following each section.

PART 779—COLLEGE LIBRARY TECHNOLOGY AND COOPERATIVE GRANTS PROGRAM

135. The authority citation for Part 779 continues to read as follows:

Authority: 20 U.S.C. 1021 and 1047, unless otherwise noted.

§ 779.30 [Amended]

136. Section 779.30 is amended by adding "(Approved by the Office of Management and Budget under control number 1850–0622)" following the section.

PART 787—NATIONAL DIFFUSION NETWORK: DISSEMINATION PROJECTS

137. The authority citation for Part 787 continues to read as follows:

Authority: 20 U.S.C. 3851, unless otherwise noted.

§ 787.10 [Amended]

138. Section 787.10 is amended by adding "(Approved by the Office of Management and Budget under control number 1850–0086)" following the section.

PART 790—TERRITORIAL TEACHER TRAINING ASSISTANCE

139. The authority citation for Part 790 continues to read as follows:

Authority: Title XV, Part C, sec. 1525, Education Amendments of 1978 (Pub. L. 95–561), 92 Stat. 2379, unless otherwise noted.

§ 790.20 [Amended]

140. Section 790.20 is amended by adding "(Approved by the Office of Management and Budget under control number 1850–0619)" following the section.

[FR Doc. 88–27955 Filed 12–5–88; 8:45 am]
BILLING CODE 4000–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 796 and 798

[OPTS–42079C; FRL–3487–5]

Technical Amendments to Certain Chemical Fate and Health Effects Test Guidelines

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is issuing technical amendments to certain chemical fate and health effects test guidelines used in the testing of chemical substances under section 4 of the Toxic Substances Control Act. These amendments are necessary to incorporate changes resulting from comments by interested parties on the regulations and to correct specific editorial errors.

EFFECTIVE DATE: Effective on December 6, 1988.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Acting Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Room EB–44, 401 M Street SW., Washington, DC 20460, (202) 554–1404. TDD: (202) 554–0551.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of September 20, 1985 (50 FR 39252), EPA issued as final regulations test guidelines that were previously available through the National Technical Information Service (NTIS). These guidelines are used in the testing of chemicals designated for priority testing by the Interagency

Testing Committee under section 4 of the Toxic Substances Control Act. These regulations under 40 CFR Parts 796 through 798, were amended in the **Federal Register** of May 20, 1987 (52 FR 19056).

These technical amendments incorporate changes resulting from comments from interested parties to § 798.2250 *Dermal toxicity;* § 798.2450 *Inhalation toxicity;* and § 798.2650 *Oral toxicity.* Since the comments were considered minor and nonsubstantive in nature, the Agency finds no need for detailed discussion of those comments in the preamble. Specific editorial amendments are also made in:

1. Sections 796.3140(b)(2)(i) (A) and (C).
2. Sections 798.2250 (a), (e)(7), (9)(vi), (10) (i) (A) and (B), (ii) (A) and (B), (11)(ii) and (12) (iv) and (vi).
3. Sections 798.2450 (a), (b)(7), (d)(11)(i), (12)(ii), (13) (v) and (vi) and (e)(13).
4. Sections 798.2650(b) (1) and 4), (e)(8)(vii), (9)(i) (A) and (B), (10)(ii) and (f)(3).

List of Subjects in 40 CFR Parts 796 and 798

Chemical fate, Health effects, Chemicals, Environmental protection, Hazardous substances, Laboratories.

Dated: November 28, 1988.

Victor J. Kimm,

Acting Assistant Administrator for Pesticides and Toxic Substances.

Therefore, 40 CFR, Chapter I, Subchapter R is amended as follows:

PART 796—[AMENDED]

1. In Part 796:

a. The authority citation continues to read as follows:

Authority: 15 U.S.C. 2603.

b. Section 796.3140 is amended by revising paragraphs (b)(2)(i) (A) and (C) to read as follows:

§ 796.3140 Anaerobic biodegradability of organic chemicals.

* * * * *

(b) * * *

(2) * * *

(i) * * *

(A) Prereduced medium is prepared by adding 8 mL of stock solution S–1, 8 mL of S–2, and 40 mL of S–3 to approximately 3,500 mL of deionized water in a 4–L Florence or Erlenmeyer flask. This medium is heated to a boil, while being stirred with a magnetic stir bar and sparged with oxygen (O_2)-free nitrogen. The O_2-free nitrogen is obtained by passing nitrogen gas through a quartz cylinder filled with copper filings heated to 400 °C. Alternatively, commercial nitrogen free of oxygen may be used.

* * * * *

(C) When the medium has cooled to 35 °C, the flask is removed from the ice bath and the following components are added: 4 mL of solution S–4; 20 mL of solution S–5; 10.56 g sodium bicarbonate; and 400 mL of sludge inoculum. The final volume should be approximately 4 L.

* * * * *

PART 798—[AMENDED]

2. In Part 798:

a. The authority citation continues to read as follows:

Authority: 15 U.S.C. 2603.

b. Section 798.2250 is amended by revising paragraphs (a); the introductory text of (e)(7) and (9)(vi); 10(i) (A) and (B) and (ii) (A) and (B); 11(ii); and (12) (iv) and (vi) to read as follows:

§ 798.2250 Dermal toxicity.

(a) *Purpose.* In the assessment and evaluation of the toxic characteristics of a chemical, the determination of subchronic dermal toxicity may be carried out after initial information on toxicity has been obtained by acute testing. The subchronic dermal study has been designed to permit the determination of the no-observed-effect level and toxic effects associated with continuous or repeated exposure to a test substance for a period of 90 days. The test is not capable of determining those effects that have a long latency period for development (e.g., carcinogenicity and life shortening). It provides information on health hazards likely to arise from repeated exposure by the dermal route over a limited period of time. It will provide information on target organs, the possibilities of accumulation, and can be of use in selecting dose levels for chronic studies and for establishing safety criteria for human exposure.

* * * * *

(e) * * *

(7) Preparation of animal skin.

* * * * *

(9) * * *

(vi) At the end of the study period, all survivors in the nonsatellite treatment groups shall be sacrificed. Moribund animals shall be removed and sacrificed when noticed.

(10) * * *

(i) * * *

(A) Certain hematology determinations shall be carried out at least two times during the test period on all groups of animals including concurrent controls: After 30 days of test and just prior to terminal sacrifice at the end of the test period. Hematology determinations which are appropriate to all studies: Hematocrit, hemoglobin concentration, erythrocyte count, total and differential leukocyte count, and a measure of clotting potential such as clotting time, prothrombin time, thromboplastin time, or platelet count.

(B) Certain clinical biochemistry determinations on blood should be carried out at least two times during the test period on all groups of animals including concurrent controls: After 30 days of test and just prior to terminal sacrifice at the end of the test period. Clinical biochemistry test areas which are considered appropriate to all studies: Electrolyte balance, carbohydrate metabolism, and liver and kidney function. The selection of specific tests will be influenced by observations on the mode of action of the substance. Suggested determinations: Calcium, phosphorus, chloride, sodium, potassium, fasting glucose (with period of fasting appropriate to the species), serum glutamic pyruvic transaminase (now known as serum alanine aminotransferase), serum glutamic oxaloacetic transaminase (now known as serum aspartate aminotransferase), ornithine decarboxylase, gamma glutamyl transpeptidase, urea nitrogen, albumen blood creatinine, total bilirubin, and total serum protein measurements. Other determinations which may be necessary for an adequate toxicological evaluation include: Analyses of lipids, hormones, acid/base balance, methemoglobin, and cholinesterase activity. Additional clinical biochemistry may be employed, where necessary, to extend the investigation of observed effects.

(ii) * * *

(A) Ophthalmological examination, using an ophthalmoscope or equivalent suitable equipment, shall be made prior to exposure to the test substance and at the termination of the study.

(B) Urinalysis is not recommended on a routine basis, but only when there is an indication based on expected or observed toxicity.

(11) * * *

(ii) The liver, kidneys, adrenals, brain, and gonads shall be weighed wet, as soon as possible after dissection, to avoid drying. In addition, for the rodent, the brain; for the non-rodent, the thyroid with parathyroids also shall be weighed wet.

* * * * *

(12) * * *

(iv) The tissues listed in parenthesis in paragraph (e)(11)(iii) of this section, if indicated by signs of toxicity or expected target organ involvement.

* * * * *

(vi) When a satellite group is used, histopathology shall be performed on tissues and organs identified as showing effects in the treated groups.

* * * * *

c. Section 798.2450 is amended by revising paragraphs (a); (b)(7); the introductory text of (d) (11)(i), (12)(ii), (13) (v) and (vi); and the introductory text of (e)(3) to read as follows:

§ 798.2450 Inhalation toxicity.

(a) *Purpose.* In the assessment and evaluation of the toxic characteristics of a gas, volatile substance, or aerosol/particulate, determination of subchronic inhalation toxicity may be carried out after initial information on toxicity has been obtained by acute testing. The subchronic inhalation study has been designed to permit the determination of the no-observed-effect level and toxic effects associated with continuous or repeated exposure to a test substance for a period of 90 days. The test is not capable of determining those effects that have a long latency period for development (e.g., carcinogenicity and life shortening). It provides information on health hazards likely to arise from repeated exposures by the inhalation route over a limited period of time. It will provide information on target organs, the possibilities of accumulation, and can be of use in selecting dose levels for chronic studies and for establishing safety criteria for human exposure. Hazards of inhaled substances are influenced by the inherent toxicity and by physical factors such as volatility and particle size.

(b) * * *

(7) Cumulative toxicity is the adverse effects of repeated doses occuring as a result of prolonged action on, or increased concentration of the administered test substance or its metabolites in susceptible tissues.

* * * * *

(d) * * *

(11) * * *

(i) The following examinations shall be made on all animals of each sex in each group:

(A) Certain hematology determinations shall be carried out at least two times during the test period on all groups of animals including concurrent controls: After 30 days of test and just prior to terminal sacrifice at the end of the test period. Hematology determinations which are appropriate to all studies: Hematocrit, hemoglobin concentration, erythrocyte count, total and differential leukocyte count, and a measure of clotting potential such as clotting time, prothrombin time, thromboplastin time, or platelet count.

(B) Certain clinical biochemistry determinations on blood should be carried out at least two times during the test period on all groups of animals including concurrent controls: After 30 days of test and just prior to terminal sacrifice at the end of the test period. Clinical biochemistry test areas which are considered appropriate to all studies: Electrolyte balance, carbohydrate metabolism, and liver and kidney function. The selection of specific tests will be influenced by observations on the mode of action of the substance. Suggested determinations: calcium, phosphorus, chloride, sodium, potassium, fasting glucose (with period of fasting appropriate to the species), serum glutamic-pyruvic transaminase, (now known as serum alanine aminotransferase), serum glutamic-oxaloacetic transaminase (now known as serum aspartate aminotransferase), ornithine decarboxylase, gamma glutamyl transpeptidase, urea nitrogen, albumen, blood creatinine, total bilirubin, and total serum protein measurements. Other determinations which may be necessary for an adequate toxicological evaluation include: Analyses of lipids, hormones, acid/base balance, methemoglobin, and cholinesterase activity. Additional clinical biochemistry may be employed, where necessary, to extend the investigation of observed effects.

* * * * *

(12) * * *

(ii) At least the liver, kidneys, adrenals, brain, and gonads shall be weighed wet, as soon as possible after dissection to avoid drying. In addition, for the rodent, the brain; for the non-rodent, the thyroid with parathyroids also shall be weighed wet.

* * * * *

(13) * * *

(v) Lungs of animals (rodents) in the low and intermediate dose groups shall also be subjected to histopathological examination, primarily for evidence of infection since this provides a convenient assessment of the state of health of the animals.

(vi) When a satellite group is used, histopathology shall be performed on tissues and organs identified as showing effects in the treated groups.

* * * * *

(e) * * *

(3) *Test report.* In addition to the reporting requirements as specified under EPA Good Laboratory Practice Standards, 40 CFR Part 792, Subpart J, the following specific information shall be reported:

* * * * *

d. Section 798.2650 is amended by revising paragraphs (b) (1) and (4); (e)(8)(vii), (9)(i) (A) and (B) and (10)(ii); and the introductory text of (f)(3) to read as follows:

§ 798.2650 Oral toxicity.

* * * * *

(b) * * *

(1) Subchronic oral toxicity is the adverse effects occurring as a result of the repeated daily exposure of experimental animals to a chemical by the oral route for a part (approximately 10 percent) of a life span.

* * * * *

(4) Cumulative toxicity is the adverse effects of repeated doses occurring as a result of prolonged action on, or increased concentration of, the administered test substance or its metabolites in susceptible tissue.

* * * * *

(e) * * *

(8) * * *

(vii) At the end of the 90-day period all survivors in the nonsatellite treatment groups shall be sacrificed. Moribund animals shall be removed and sacrificed when noticed.

* * * * *

(9) * * *

(i) * * *

(A) Certain hematology determinations shall be carried out at least two times during the test period on all groups of animals including concurrent controls: After 30 days of test and just prior to terminal sacrifice at the end of the test period. Hematology determinations which are appropriate to all studies: Hematocrit, hemoglobin concentration, erythrocyte count, total and differential leukocyte count, and a measure of clotting potential such as clotting time, prothrombin time, thromboplastin time, or platelet count.

(B) Certain clinical biochemistry determinations on blood should be carried out at least two times during the test period on all groups of animals including concurrent controls: After 30 days of test and just prior to terminal sacrifice at the end of the test period. Clinical biochemistry test areas which are considered appropriate to all studies: Electrolyte balance, carbohydrate metabolism, and liver and kidney function. The selection of specific tests will be influenced by observations on the mode of action of the substance. Suggested

determinations: Calcium, phosphorus, chloride, sodium, potassium, fasting glucose (with period of fasting appropriate to the species), serum glutamic-pyruvic transaminase (now known as serum alanine aminotransferase), serum glutamic oxaloacetic transaminase (now known as serum aspartate aminotransferase), ornithine decarboxylase, gamma glutamyl transpeptidase, urea nitrogen, albumen, blood creatinine, total bilirubin, and total serum protein measurements. Other determinations which may be necessary for an adequate toxicological evaluation include: Analyses of lipids, hormones, acid/base balance, methemoglobin, and cholinesterase activity. Additional clinical biochemistry may be employed, where necessary, to extend the investigation of observed effects.

* * * * *

(10) * * *

(ii) At least the liver, kidneys, adrenals, and gonads shall be weighed wet, as soon as possible after dissection to avoid drying. In addition, for the rodent, the brain; for the non-rodent, the thyroid with parathyroids also shall be weighed wet.

* * * * *

(f) * * *

(3) *Test report.* In addition to the reporting requirements as specified under EPA Good Laboratory Practice Standards, 40 CFR Part 792, Subpart J, the following specific information shall be reported:

Bureau of Land Management

43 CFR Public Land Order 6690

[AK-932-09-4214-10; AA-5671]

Partial Revocation of Public Land Order No. 960 for Selection of Land by the State of Alaska; Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes a public land order (PLO) insofar as it affects 7.30 acres of public land withdrawn for the Federal Aviation Administration for inclusion into Air Navigation Site No. 4. The land is no longer needed for the purpose for which it was withdrawn. This action makes the land available for selection by the State of Alaska, if such land is otherwise available. If not selected by the State, the land will be subject to the terms and conditions of PLO No. 5186, and will remain closed to location for metalliferous minerals until a further opening order is published.

EFFECTIVE DATE: December 6, 1988.

FOR FURTHER INFORMATION CONTACT: Sandra C. Thomas, BLM State Office, 701 C Street, Box 13, Anchorage, Alaska 99513, 907-271-3342.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, and by section 17(d)(1) of the Alaska Native Claims Settlement Act of December 18, 1971, 85 Stat. 708 and 709; 43 U.S.C. 1616(d)(1), it is ordered as follows:

1. Public Land Order No. 960 is hereby revoked insofar as it affects the following described land:

Copper River Meridian

T. 31 S., R. 59 E., partially surveyed,
Sec. 2, lots 7, 8, 9, and 17.

The area described contains approximately 7.30 acreas.

2. Subject to valid existing rights, the land described above is hereby opened to selection by the State of Alaska under either the Alaska Statehood Act of July 7, 1958, 72 Stat. 339, et seq.; 48 U.S.C. prec. 21, or section 906(b) of the Alaska National Interest Lands Conservation Act of December 2, 1980, 94 Stat. 2371, 2437-2438; 43 U.S.C. 1635.

3. As provided by section 6(g) of the Alaska Statehood Act, the State of Alaska is provided a preference right of selection for the land described above, for a period of ninety-one (91) days from the date of publication of this order, if the land is otherwise available. Any of the land described herein that is not selected by the State of Alaska will be subject to the terms and conditions of PLO No. 5186, and any other withdrawal of record, and shall remain closed to location for metalliferous mining until a further opening order is published.

J. Steven Griles,

Assistant Secretary of the Interior.

November 28, 1988.

BILLING CODE 4310-JA-M

NATIONAL TRANSPORTATION SAFETY BOARD

49 CFR Part 840

Rules Pertaining to Notification of Railroad Accidents

AGENCY: National Transportation Safety Board.

ACTION: Final rule.

SUMMARY: By this rule change, the Board is amending § 840.3 to reduce the period of time during which notification of certain railroad accidents is mandatory to 2 hours after the occurrence of an accident that results in a fatality or serious injury to two or more crewmembers or passengers, the emergency evacuation of a passenger train, or the release of hazardous materials, as further described herein; and to 4 hours for any accident that requires an evaluation of property damage.

EFFECTIVE DATE: February 6, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. William G. Zielinski, Chief, Railroad Accident Division, 800 Independence Avenue, SW., Washington, DC 20594 ((202) 382-6840).

SUPPLEMENTARY INFORMATION: Section 840.3 requires notification to the National Transportation Safety Board of certain railroad, and, included therein, rail rapid transit accidents, at the earliest practical time. The Safety Board's rules that pertain to notification of railroad accidents, specifically Rule 840.3, provide a convenient mechanism for complying with the notification requirement in the form of a toll-free telephone number, and, prior to this amendment, those Rules imposed a six-hour time limit during which reporting was mandatory. Notwithstanding the toll-free telephone number and the six-hour time limit, the Safety Board determined that there were still numerous instances where reporting of accidents was not sufficiently expeditious as to afford Board personnel access to the accident site before the initiation of post-accident cleanup efforts. In order to remedy the situation, and after notice and public procedure (53 FR 11520; published April 7, 1988), the Board is amending its railroad accident notification rules to require notification within two hours of any railroad accident that involves a fatality, injury that requires admission to a hospital of two or more crewmembers or passengers, the release of hazardous materials, or an emergency evacuation. In cases that do not involve any of these eventualities but that

require a preliminary monetary estimate of damages, a four-hour limit is being placed on the notification time.

Additionally, although virtually all railroad trains and facilities are at present equipped for radio communication, the Board recognizes that in certain extraordinary circumstances, communication from the site of an accident immediately after its occurrence may be problematical. This could be the case in accidents occurring in remote areas where radio transmission is ineffective. In such instances the reporting time limits prescribed in § 840.3(a) can be computed from the time railroad personnel, other than those at the accident site at the time of its occurrence, have received notice of the accident. This provision is contained in paragraph (d) of the revised regulation.

The Safety Board received five comments in response to its notice of proposed rulemaking which was published April 7, 1988 (53 FR 11520). The Board has given the views expressed in those responses its careful consideration but finds that our expressed goal of affording Board personnel access to the accident site as early as possible, and, wherever feasible, before initiation of clean-up efforts, is paramount, and that the deleterious effects of earlier reporting may in fact never materialize.

The major obstacle to the requirements for earlier reporting concerns the difficulty of arriving at a preliminary monetary estimate of damage. One commentator expressed concern that accidents that do not meet the Board's estimated damage criteria would be reported because of hasty damage evaluation. The Board considered that possibility when it proposed a 4-hour limit for any accident requiring a damage estimate. Moreover, the Board does not believe that the reporting of any accidents that do not meet those criteria will impose an undue administrative burden on either the reporting railroad or on the Safety Board's staff.

In respect to the comment that initiation of clean-up efforts should take precedence over all other activities, the Board believes that the accident cure and prevention objectives that are its investigatory goal are equally essential. It is patent that a number of tasks, such as the proper control of hazardous materials, must be undertaken at once; however, notification to the Board at the earliest practicable time after the occurrence is equally in the best interests of public safety and accident prevention, and it is imperative that the Board be notified as soon as possible if hazardous materials are involved.

As do other agencies of Government, the Department of Transportation's Research and Special Programs Administration requires immediate reporting of most hazardous materials spills by any carrier that transports them (49 CFR 171.15); accordingly, notification to the Board through the National Response Center's telephone service is not an additional burden. All other matters dealt with in the comments, especially alternative proposals, have been give consideration by the Board.

Under the criteria of section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Safety Board has determined that these amendments will not have a significant economic impact on a substantial number of small entities because the new rules require only a somewhat more expeditious reporting, and they do not create any increase in the number of accidents for which notification must be made, the costs of complying with the rule are not substantial, and the Safety Board has so certified.

List of Subjects in 49 CFR Part 840

Administrative practice and procedure, Investigations, Hazardous materials transportation, Railroad Safety, Reporting and recordkeeping requirements.

PART 840—[AMENDED]

1. Accordingly, the authority citation for 49 CFR Part 840 continues to read as follows:

Authority: Sec. 304(a)(1)(c), Independent Safety Board Act of 1974, as amended (49 U.S.C. 1903).

2. Section 840.3 of Part 840, Chapter VIII, Title 49, Code of Federal Regulations, is revised to read as follows:

§ 840.3 Notification of railroad accidents.

The operator of a railroad shall notify the Board by telephoning the National Response Center at telephone 800–424–0201 at the earliest practicable time after the occurrence of any one of the following railroad accidents:

(a) No later than 2 hours after an accident which results in:

(1) A passenger or employee fatality or serious injury to two or more crewmembers or passengers requiring admission to a hospital;

(2) The evacuation of a passenger train;

(3) Damage to a tank car or container resulting in release of hazardous materials or involving evacuation of the general public; or

(4) A fatality at a grade crossing.

(b) No later than 4 hours after an accident which does not involve any of the circumstances enumerated in paragraph (a) of this section but which results in:

(1) Damage (based on a preliminary gross estimate) of $150,000 or more for repairs, or the current replacement cost, to railroad and nonrailroad property; or

(2) Damage of $25,000 or more to a passenger train and railroad and nonrailroad property.

(c) Accidents involving joint operations must be reported by the railroad that controls the track and directs the movement of trains where the accident has occurred.

(d) Where an accident for which notification is required by paragraph (a) or (b) of this section occurs in a remote area, the time limits set forth in that paragraph shall commence from the time the first railroad employee who was not at the accident site at the time of its occurrence has received notice thereof.

Signed at Washington, DC on November 29, 1988.

James L. Kolstad,

Acting Chairman.

[FR Doc. 88–27878 Filed 12–5–88; 8:45 am]

BILLING CODE 7533–01–M

Proposed Rules

Federal Register
Vol. 53, No. 234
Tuesday, December 6, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 979

Melons Grown in South Texas; Proposed Expenses and Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule regarding South Texas melons would authorize expenses and establish an assessment rate under Marketing Order 979 for the 1988–89 fiscal period. Authorization of this budget would allow the South Texas Melon Committee to incur expenses reasonable and necessary to administer the program. Funds for this program would be derived from assessments on handlers.

DATE: Comments must be received by December 16, 1988.

ADDRESS: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2085–S, Washington, DC 20090–6456. Comments should reference the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Robert F. Matthews, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone 202–447–2431.

SUPPLEMENTARY INFORMATION:

This rule is proposed under Marketing Order No. 979 (7 CFR Part 979), regulating the handling of melons grown in South Texas. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 35 handlers of Texas melons under this marketing order, and approximately 70 producers. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of the handlers and producers may be classified as small entities.

The marketing order requires that the assessment rate for a particular fiscal year shall apply to all assessable melons handled from the beginning of such year. An annual budget of expenses is prepared by the committee and submitted to the Department of Agriculture for approval. The members of the committee are handlers and producers of melons. They are familiar with the committee's needs and with the costs for goods, services and personnel in their local area and are thus in a position to formulate an appropriate budget. The budget was formulated and discussed in a public meeting. Thus, all directly affected persons have had an opportunity to participate and provide input.

The assessment rate recommended by the committee is derived by dividing anticipated expenses by expected shipments of melons. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the committee;s expected expenses. A recommended budget and rate of assessment is usually acted upon by the committee before the season starts, and expenses are incurred on a continuous basis. Therefore, budget and assessment rate approval must be expedited so that the committee will have funds to pay its expenses.

The South Texas Melon Committee met on November 1, 1988, and unanimously recommended a 1988–89 budget of $308,438. This total exceeds last year's budget of $251,811 by $56,627, reflecting an increase in production research project expenses from $50,723 to $104,398. Administrative expenses are up $3,517 from last year to $84,040, and promotion expenses have been reduced $565 to $120,000.

The committee also unanimously recommended an assessment rate of 4 cents per carton, down one cent from the 1987–88 rate. The recommended assessment rate, when applied to anticipated shipments of 7.7 million cartons, would yield $308,000 in assessment revenue. This amount, when added to $438 from the reserve, would be adequate to cover budgeted expenses. The current reserve minus $438 would result in a yearend reserve of $382,353. This total is within the limit of two fiscal periods' expenses allowed by the order.

While this proposed action would impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs would be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

Based on the foregoing, it is found and determined that a comment period of less than 30 days is appropriate because the assessment rate approval for this program needs to be expedited. The committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis.

List of Subjects in 7 CFR Part 979

Marketing agreements and orders, Melons (Texas).

For the reasons set forth in the preamble, it is proposed that 7 CFR Part 979 be amended as follows:

PART 979—MELONS GROWN IN SOUTH TEXAS

1. The authority citation for 7 CFR Part 979 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 970.211 is added to read as follows:

§ 979.211 Expenses and assessment rate.

Expenses of $308,438 by the South Texas Melon Committee are authorized and an assessment rate of $0.04 per carton of melons is established for the fiscal period ending September 30, 1989. Unexpended funds may be carried over as a reserve.

Dated: December 1, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

[Docket Nos. AO–368–A16 and AO–226–A32; DA–88–108]

Milk in the Oregon-Washington and Puget Sound-Inland Marketing Areas; Decision on Proposed Amendments to Marketing Agreements and to Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision merges the Oregon-Washington and Puget Sound-Inland Federal orders, based on industry proposals considered at a public hearing held November 17–18, 1987. In addition to the presently regulated marketing areas, the merged "Pacific Northwest" marketing area would include five additional Washington counties, the unregulated portion of another Washington county, and three central Oregon counties. The Class I differentials at Portland, Oregon, and Spokane, Washington, are reduced from $1.95 to $1.90; and the Class I differentia at Seattle, Washington, is increased from $1.85 to $1.90.

The provisions of the merged order are patterned largely after those of the present Puget Sound order, with some modifications to accommodate specific marketing conditions of the Oregon-Washington order area. Provisions of the merged order that represent significant changes in regulation for handlers and producers currently pooled under the Oregon-Washington order include a single butterfat differential for adjusting order prices for variations in butterfat content, payment to producers on the basis of a uniform price for all production rather than a base-excess plan, and determination of handler obligations to the marketwide pool on an equalization basis (the difference between the use value of producer receipts and the value of those receipts at the uniform price).

The merger is needed to reflect changes in market structure in that the two separately regulated areas have become, in effect, one common market. Cooperative associations will be polled to determine whether producers favor the issuance of the merged order.

FOR FURTHER INFORMATION CONTACT: Constance M. Brenner, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 447–7183.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. The amended order will promote more orderly marketing of milk by producers and regulated handlers.

Prior documents in this proceeding:

Notice of Hearing: Issued October 26, 1987; published October 29, 1987 (52 FR 41566).

Recommended Decision: Issued September 7, 1988; published September 19, 1988 (53 FR 36291).

Preliminary Statement

A public hearing was held upon proposed amendments to the marketing agreements and the orders regulating the handling of milk in the Oregon-Washington and Puget Sound-Inland marketing areas. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the applicable rules of practice (7 CFR Part 900), at Portland, Oregon on November 17–18, 1987. Notice of such hearing was issued on October 26, 1987 and published October 29, 1987 (52 FR 41566).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Administrator, AMS, on September 7, 1988, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues, findings and conclusions, rulings, and general findings of the recommended decision are hereby approved and adopted and are set forth in full herein, subject to the following modifications:

1. Under the heading "6. Classification of milk.", one paragraph is added at the end.

2. Under the heading "7. Class prices, location adjustments and butterfat differential.", two paragraphs are added after paragraph 9.

3. Under the heading "8. Handler obligations to the pool.", one paragraph is added after paragraph 4.

4. Under the heading "9. Payments to producers.", one paragraph is added at the end.

The material issues on the record of the hearing relate to:

1. Whether the handling of milk produced for sale in the proposed merged and expanded marketing area is in the current of interstate commerce or directly burdens, obstructs, or affects interstate commerce in milk or its products;

2. Whether the marketing areas of the Oregon-Washington and Puget Sound-Inland orders should be included under one order;

3. Whether the proposed merged marketing area should be expanded to include additional territory;

4. Milk to be priced and pooled;

5. Handler reports;

6. Classification of milk;

7. Class prices, location adjustments and butterfat differential;

8. Handler obligations to the pool;

9. Payments to producers;

10. Administrative provisions.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Character of commerce.* The handling of milk in the proposed and expanded marketing area is in the current of interstate commerce and directly burdens, obstructs and affects interstate commerce in milk and milk products.

The marketing area specified in the proposed order, hereinafter referred to as the "Pacific Northwest marketing

area", includes 72 contiguous counties, of which 37 are in the State of Washington, 29 in Oregon and six in Idaho. The principal cities in the marketing area are Eugene and Portland, Oregon; and Seattle and Spokane, Washington. The specific territory included in the marketing area is set forth in the marketing area discussion.

Handlers located in the Oregon-Washington area have route sales in Oregon and Washington, while handlers regulated under the Puget Sound-Inland order distribute milk in the States of Alaska, Idaho, Montana, Oregon and Washington. Handlers located in the States of California, Idaho, Montana, Oregon and Washington distribute milk within the proposed marketing area.

Similarly, milk procurement for the proposed merged area crosses state boundaries. Handlers regulated by the Puget Sound-Inland order procure milk from producers located in Idaho, Oregon and Washington. The milk needed to supply Oregon-Washington distributing plants is procured from California, Idaho, Oregon and Washington.

There are numerous manufacturing plants located within the proposed marketing area that manufacture dairy products. These products are sold in California, Oregon, Washington and other states in competition with manufactured products produced in many other states.

2. *Need for merger of the orders.* Marketing conditions in the two separately regulated marketing areas under consideration justify the issuance of a single order regulating the handling of milk in these areas. This single order would be the most appropriate means of effectuating the declared policy of the Act.

Federal regulation of milk marketing in northwestern Washington State was initiated May 1, 1951, when the Puget Sound order became effective. The marketing area was later amended in December 1952 and July 1966 to include Island and San Juan Counties and most of the remaining portions of Grays Harbor, King, Lewis, Skagit, Snohomish and Whatcom Counties. Milk marketing in northeastern Washington State and northern Idaho came under Federal regulation March 1, 1956, when the Inland Empire order became effective. The Inland Empire marketing area was later amended in October 1957 and in March 1962 to add the Idaho Counties in Benewah, Boundary, Latah and Shoshone and the remaining unregulated portions of Bonner and Kootenai Counties; and Whitman County, Washington. The Puget Sound and Inland Empire marketing areas were merged to become the Puget Sound-Inland order effective January 1, 1984. The Washington Counties of Adams, Chelan, Douglas, Ferry, Grant, Kittitas, Lincoln and Okanogan, and the remaining unregulated portions of Pend Oreille and Stevens Counties, were included in the merged Puget Sound-Inland order in addition to the already regulated areas.

Milk marketing in western Oregon and southwestern Washington became federally regulated under the Oregon-Washington order on January 1, 1970. The marketing area of the Oregon-Washington order has not changed since it became effective.

The merger of the Oregon-Washington and Puget Sound-Inland orders was proposed by six cooperative associations representing dairy farmer members whose milk is pooled under the two orders. The merger proponents represent a substantial majority of the producers whose milk would be pooled under the merged order.

The principal proponent witness, a representative of Northwest Dairymen's Association (NDA) stated that the merged order is needed because the proposed marketing area is becoming one competitive market. He stated that NDA, which represents about 60 percent of the producers delivering milk to the two Federal order marketing areas, has producer members located in almost every county in the proposed marketing area and supplies bulk milk to handlers operating plants with distribution in all parts of the proposed marketing area. The witness testified that the existence of two Federal orders in an area that has become one competitive marketing area has required NDA to alter the movement of member milk to plants in order to prevent inequities between the prices paid to NDA members supplying different markets. He also stated that operating within the constraints of two separate orders sometimes causes difficulty and inefficiency in supplying the demands of each order market as those demands vary over time.

The NDA witness concluded that a merger would increase the efficiency of administering marketing order regulations in the Pacific Northwest, and would reduce the complexity of reports which must be filed by regulated handlers. No opposition to a merger of the two orders was expressed at the hearing.

The record indicates that the Oregon-Washington and Puget Sound-Inland marketing areas have become interrelated to such an extent that a merger is the most appropriate means of regulating milk marketing in the area involved. When the two orders were promulgated, they regulated the handling of milk in areas that were clearly distinguishable as separate markets for particular handlers and producer groups. Changes in marketing practice and market structure since that time, however, have caused these separately regulated areas to become substantially interrelated in both distribution and supply arrangements.

In September 1987, a majority of the pooled handlers regulated under the Puget Sound-Inland milk order distributed fluid milk products within the Oregon-Washington marketing area. At the same time, 20 percent of Oregon-Washington pooled handlers distributed milk within the Puget Sound-Inland order. The fact that one-third of the handlers regulated under the two orders distribute milk in competition with handlers regulated under the other order is an indication of the degree of interrelationship that has developed between the two markets. A merger of the two marketing areas under one order will assure that fully regulated handers competing with each other are subject to the same regulatory provisions and aligned prices.

NDA markets the milk of producers located throughout the proposed merged marketing area, and Darigold, Inc., NDA's marketing agent, distributes fluid milk products throughout the proposed area from its five bottling plants that are currently pooled under the two orders. Many of NDA's member producers are located in production areas from which the milk produced on neighboring farms is delivered to pool plant regulated under the two different Federal orders. The differing provisions of the two orders prevent the cooperative from easily being able to shift the milk of a producer from a plant pooled under one order to a plant regulated by the other order, even when such a shift would be the most efficient means of moving milk to where it is needed. The Oregon-Washington order's base-excess plan is one such provision that prevents an easy interchange of producer milk between the two orders. The milk of baseholding producers cannot be pooled under the Puget Sound-Inland order without those producers losing the benefit of their earned bases. At the same time, producers previously pooled under the Puget Sound-Inland order have not earned Oregon-Washington production bases and thus would receive less for their milk if it were pooled under the Oregon-Washington order. Because of this feature of regulation by the two separate orders, it is not practicable for a handler such as NDA to haul the milk of some

neighboring producers in the same loads.

An occasional need to deliver the milk of producers customarily pooled under one order to a plant location normally priced under the other order is another situation in which the existence of the two interconnected orders causes marketing problems for handlers. Problems arise because of the differing location adjustments under the two orders. Milk produced in the Yakima Valley and customarily pooled under the Oregon-Washington order that is surplus to the market's fluid needs is usually hauled to Chehalis, Washington, where there is no location adjustment under the Oregon-Washington order. If the Chehalis facility is already operating at capacity, however, the milk must be moved to manufacturing plants at Issaquah or Lynden, Washington, where the Oregon-Washington location adjustments are minus 25.5 and 40.5 cents, respectively. If the same milk from Yakima Valley were pooled under the Puget Sound-Inland order at Issaquah or Lynden, however, it would be subject to location adjustments of zero or minus six cents.

The differences in Class I and producer prices under the two orders at the same location is also a factor that causes marketing difficulties for Darigold, and for any other handler attempting to market milk under both orders in an efficient manner. Specifically, larger amounts of the milk surplus to the fluid needs of each order area are delivered to a Darigold manufacturing plant in Chehalis, Washington. Chehalis is located in the production area of both Federal order markets, and is approximately equidistant from Portland, Oregon, and Seattle, Washington. The Puget Sound-Inland location adjustment at Chehalis is a minus six cents, while there is no price adjustment at Chehalis under the Oregon-Washington order. Because of the 10-cent difference between the two orders' Class I prices, the Class I price difference at Chehalis is actually 16 cents.

However, because the milk received at Chehalis is used for manufactured products rather than for Class I use, the difference in producer pay prices between the two orders at the same location is the primary cause of inequity at Chehalis. The price difference between the two orders extends to producer payments because the orders' minimum uniform prices are subject to the same location adjustments as are the Class I prices.

Although the difference in Class I prices as Chehalis is 16 cents, the difference in order prices due to producers for milk delivered to Chehalis under the Puget Sound-Inland and Oregon-Washington orders is normally less, but nevertheless significant. During 1986 and the months of 1987 preceding the hearing, the Oregon-Washington uniform price to producers exceeded the Puget Sound-Inland uniform price by an average of 6.7 cents, with the difference ranging from two to 13 cents. When the six-cent location adjustment under the Puget Sound-Inland order is taken into account, prices paid to similarly located producers for milk delivered to Chehalis under the two orders differed by an average of 12.7 cents per hundredweight, and by as much as 19 cents. The location adjustment differences at the same location under the two orders, therefore, result in a significant difference in returns to producers whose milk is delivered to the same location.

For the reasons described above, a merger of the Oregon-Washington and Puget Sound orders will represent the most effective means of achieving efficient and orderly handling and marketing of milk in the Pacific Northwest. The merger will permit the minimizing of hauling expenses by allowing surplus milk supplies to be better matched to the nearest plant location without consideration of the regulatory effects of the two orders. Similarly located handlers and producers will be subject to more equitable pooling provisions under a single order than under the two separate orders. Accordingly, the merger should be adopted.

3. *Merged and expanded marketing area.* The marketing area of the proposed merged order should include all of the territory in the presently designated marketing areas of the Oregon-Washington and Puget Sound-Inland orders. Certain additional territory adjacent to the two present marketing areas also should be part of the merged marketing area. The additional territory to be included are the entire Washington counties of Asotin, Columbia, Garfield, Kitsap and Mason, and the portion of Pierce County that is currently unregulated; and the Oregon counties of Crook, Lake and Wheeler. All territory within the boundaries of the designated marketing area which is occupied by government (municipal, State or Federal) reservations, installations, institutions or other establishments, likewise should be part of the marketing area. Where such an establishment is partly within and partly without such territory, the entire establishment should be included in the marketing area.

The merged and expanded marketing area consists of 37 Washington State counties (omitting only Clallam and Jefferson), 29 western and central Oregon counties, and the same six northern Idaho counties that are included in the present Puget Sound-Inland marketing are. The total population of the merged and expanded marketing area, according to the 1980 census, was approximately 6,738,000 people, or about 224,000 more people than the two separate order areas contain. The territory proposed to be added to the merged order, therefore, increases the population of the merged marketing area by less than four percent over that of the separate marketing areas. Data obtained from 1986 population estimates of the proposed merged area give approximately the same results.

The territory to be added to the merged marketing area was proposed for inclusion by Darigold. Proponent witness states that no additional handlers would become regulated as a result of adding the proposed areas to the merged marketing area. He also testified that all of the route distribution in the areas to be added is by handlers regulated under one or both of the two orders proposed to be merged. The witness stated that incorporating the proposed additional area into the merged order would eliminate much of the recordkeeping currently required of handlers to report out-of-area sales, and would improve the efficiency of order administration by reducing the complexity of handlers' exports.

On the basis of the evidence received and in view of the fact that there was no opposition to the addition of the proposed territory to the marketing area or contradiction of proponent's characterization of the counties proposed to be added as supplied with fluid milk products entirely by handlers currently regulated under the two existing orders, the marketing area of the merged orders should be defined as proposed.

4. *Milk to be priced and pooled.* It is necessary to designate clearly what milk and which persons would be subject to the merged order. This is accomplished by providing definitions to describe the persons, plants and milk to which the applicable provisions of the order relate.

The following definitions included in the proposed order will serve to identify the specific types of milk and milk products to be subject to regulation and the persons and facilities involved with the handling of such milk and milk products. Definitions relating to handling and facilities are "route disposition," "plant," "distributing plant," "supply plant," "pool plant" and

"nonpool plant". Definitions of persons include "handler," "producer-handler," "cooperative reserve supply unit," "producer" and "cooperative association." Definitions relating to milk and milk products include "producer milk," "other source milk," "fluid milk product," "fluid cream product" and "filled milk." Some of these definitions were of particular issue at the hearing or are substantially different than those presently contained in either the Oregon-Washington or Puget Sound-Inland orders. Such definitions are discussed below.

Plant. The definition of a "plant" included in the proposed merged order should be adopted as proposed. However, due to some contradictory testimony in the hearing record, some clarification is needed. Milk may be considered a receipt for accounting and pricing purposes only at a "plant", and may not be considered a receipt for either purpose at a reload point at which bulk milk is transferred from one tank truck to another.

Pool plant. It is necessary to establish minimum performance requirements to distinguish between plants that serve the fluid milk needs of the regulated market and those that do not serve the market to a degree that warrants their sharing in the Class I utilization of the market by being included in the marketwide pool. The pooling standards for distributing plants and supply plants that are included in the attached order are the most appropriate means of determining which plants should be eligible to share in the marketwide pool under the marketing conditions present in the merged marketing area.

The pool plant definition of the merged order should be based on those contained in the two present orders. Because the pool status of handlers that customarily have been pooled under the two separate orders should not be altered by the provisions of the merged order, the pooling standards adopted for the merged order should reflect the more liberal of the pooling standards contained in the separate orders.

The proposed pool distributing plant definition, based on the definition in the Puget Sound-Inland order, should be adopted with some modification. The proposed pool supply plant definition, based on the definition in the Oregon-Washington order, also should be incorporated in the merged order in a modified form. The proposed definition of a cooperative supply plant should not be adopted. A provision allowing the Director of the Dairy Division to revise temporarily the pooling standards for distributing and supply plants should be included in the merged order.

The Darigold witness testified that the percentage of receipts disposed of as route dispositions within the marketing area required for pool status under the present Puget Sound-Inland Federal order would be an appropriate standard for determining pool qualifications under the proposed merged order. He stated that the Oregon-Washington order's separate requirement that a minimum of 30 percent of a handler's total receipts be distributed on routes is probably not necessary for the merged order, as most of the out-of-area sales by handlers currently regulated under the two separate orders are within the marketing area of the other order. Therefore, he concluded, handlers regulated under the merged order should have a relatively small volume of route dispositions outside the marketing area, and should be subject only to a requirement that 10 percent of their receipts be distributed on routes within the marketing area. The witness also advocated adoption of a provision of the present Oregon-Washington order that allows a handler operating more than one distributing plant to have those plants considered on a combined basis for the purpose of meeting pooling qualifications.

The Darigold witness supported adoption of the same supply plant pooling requirements currently in effect under the Oregon-Washington order. He urged that the pool supply plant definition continue as part of the merged order so that organizations currently operating nonpool plants that receive substantial quantities of Grade A milk by diversion from handlers or cooperative associations may qualify as pool supply plants if they so desire. The percentage of receipts proposed to be required of pool supply plants as shipments to pool distributing plants is the same as that contained in the present Oregon-Washington order. During the months of September through November, a pool supply plant would have to ship to pool distributing plants or distribute on routes in the marketing area at least 40 percent of the producer milk physically received at the plant or diverted directly from producers' farms to another plant. The applicable percentage for other months would be 30 percent. Direct shipments of producer milk could be counted for qualification only to the extent they do not exceed transfers of bulk milk from the supply plant.

The witness explained that at present, there is only one pool supply plant regulated under the Oregon-Washington order, and none under the Puget Sound-Inland order. The witness pointed out that at times in the past more than one supply plant has been regulated under the Oregon-Washington order, and that the possibility that there may be other supply plants in the future would justify inclusion of a provision that would allow two or more supply plant operators to have their plants' pool qualifications determined on a combined basis. Such a provision, he explained, is included in the present Oregon-Washington order.

In addition to the definition for a pool distributing plant and a pool supply plant, the Darigold representative supported adoption of a provision defining a "cooperative supply plant" as a pool plant. The witness explained that cooperative associations generally provide services to the market which are not provided by proprietary plants, such as operating a plant that separates milk and provides skim milk to pool distributing plants as required. He stated that because of seasonal variations in demand for bulk skim milk, a cooperative association operating such a plant may find it difficult to meet the necessary volume of milk shipments required to meet pooling qualifications. For this reason, the witness advocated defining as a pool plant a cooperative association plant that ships at least 30 percent of its receipts of producer milk to pool distributing plants by any combination of direct shipments (from farm to plant) and transfers from the supply plant to distributing plants.

The Darigold witness also supported adoption of a provision not currently contained in either order that would allow the Director of the Dairy Division to make temporary adjustments in the performance standards for the pooling qualification of distributing plants, supply plants, and cooperative supply plants. The witness stated that such a provision would give the order flexibility in dealing with sudden or marked increases or decreases in supply, demand, or both, without necessitating emergency hearings to amend the pooling standards.

A spokesman for Tillamook County Creamery Association (TCCA) testified that modifications to the proposed "cooperative supply plant" definition would be necessary if the provision is to meet TCCA's needs and current operations. He proposed limiting the months during which such a supply plant would be required to meet the proposed order's 30-percent shipping requirement to the months of September through February, and adding a provision that would allow a "cooperative supply plant" that met the order's shipping requirements for those months to be pooled for the months of

March through August without having to meet required shipping percentages. The witness stated that such modifications are necessary to assure the continued pooling of TCCA members' milk without requiring uneconomic and inefficient handling solely for the purpose of maintaining the producers' association with the pool. He observed that TCCA would have failed to qualify for pooling under the proposed standards in three summer months of each of the past two years, and barely would have met the standards in three additional months during that period. According to the witness, a lower percentage of shipping requirement is also necessary to accommodate the pooling of the rapidly increasing volume of milk produced by TCCA members. The witness testified that TCCA currently is pooled under the existing pool supply plant definition of the Oregon-Washington order, and suggested that the proposed "cooperative pool supply plant" definition would better accommodate TCCA's operations if it were modified to more closely resemble the order's present pool supply plant definition.

A witness representing Olympia Cheese Company, a proprietary cheese plant, testified that the small cooperative associations that supply milk to Olympia Cheese are facing increased difficulties in meeting the order's requirements for pooling their members' milk. The witness stated that if the Olympia Cheese operation, which is currently a nonpool plant, were able to qualify as a pool supply plant by separating milk and supplying skim milk to distributing plants, the cooperative associations supplying milk to the cheese plant would be assured of the pool status of their members' milk, and Olympia Cheese would be assured of a continued supply of milk. For Olympia Cheese to achieve pool supply plant status, the witness suggested, the proposed pool supply plant definition should be modified to require only 30 percent of a supply plant's receipts year-round to be shipped to pool distributing plants. He stated that such a modification would eliminate what he characterized as the proposed definition's discrimination against proprietary supply plants and in favor of cooperative-owned supply plants.

The proposed pool distributing plant definition should be adopted with only minor modification. Although the proposed percentage of receipts used in route disposition, in total and within the marketing area, (10 percent) is quite low for the purpose of defining a plant primarily engaged in the processing and distributing of fluid milk, the proposed percentage apparently is necessary to ensure the continued pool status of a plant that historically has been pooled under the Puget Sound-Inland order. An exhibit in the hearing record indicates that during at least one month of the 17 months preceding the hearing, the distributing plant in question exceeded the 10-percent requirement by only one percentage point. According to the exhibit, all of the other distributing plants pooled under the two orders during the four months covered in the exhibit disposed of at least 40 percent of their receipts as fluid milk products on routes. Although the proposed standard of route dispositions as a percentage of receipts may not be high enough to avoid pooling plants that are not primarily distributing plants, that level has existed in the Puget Sound-Inland order for some time and there was no testimony that would support increasing it.

Because the total percentage of receipts required to be disposed of on routes to assure pool status is to be set at such a minimal level, there is no reason to incorporate in the merged order the provision of the present Oregon-Washington order that allows a handler operating two or more distributing plants to have their operations considered on a combined basis for the purpose of meeting pooling standards. The Oregon-Washington order requires a pool distributing plant to distribute at least 30 percent of its receipts as route dispositions. Under such a requirement, it is possible that a handler who would find it more economical to concentrate milk by-product processing in one of its distributing plants could still justify having such a plant pooled on the basis of the combined receipts and route dispositions from two or more distributing plants. It would be difficult, however, to consider any plant that distributes less than 10 percent of its receipts on routes as qualifying as a distributing plant regardless of the extent of fluid milk dispositions from any of its operator's other plants.

The two proposed pool supply plant definitions should be combined into one. According to the hearing record, the only plant that either of the two proposed definitions would apply to at the present time is the TCCA plant. Adoption of the "cooperative supply plant" definition would result in the TCCA plant being pooled under that definition only when it failed to meet the shipping standards of the regular "pool supply plant" definition. Such changes in regulation are needlessly confusing. The TCCA witness testified that certain modifications of the proposed "cooperative supply plant" definition would assure the continued pooling of the TCCA supply plant. Application of the suggested modifications and certain features of the proposed "cooperative supply plant" definition to the regular "pool supply plant" definition would eliminate the need for a second "supply plant" definition. It would also allow the order to avoid establishing differing pool standards for cooperative and proprietary pool plants.

The pool supply plant definition should establish a year-round shipping standard of 30 percent, rather than a higher standard for certain fall months. This standard would allow TCCA to maintain the pool status of its members' milk and would accommodate the increasing volume of producer milk handled by the association. In addition, a cooperative's member producer milk which is delivered directly to pool distributing plants should be included as qualifying shipments without any limit on the quantity which may be so included. Such shipments represent as great a commitment by a cooperative to supplying the market's fluid milk needs as do transfers from a supply plant. One of the principal distinctions between the proposed "supply plant" and "cooperative supply plant" definitions is that the "supply plant" definition limits the amount of direct-shipped milk that may be included in a supply plant's qualifying shipments to the amount of milk transferred from the supply plant to pool distributing plants. Maintaining such a limit serves no real purpose under either definition, and therefore should not constitute a reason to define a special category of pool supply plants.

The inclusion of a supply plant's route dispositions of fluid milk products within the marketing area as a qualifying shipment should be continued under the merged order, as should the provision enabling a supply plant that qualified for pooling during the months of September through February to continue to be pooled in each of the following months of March through August. These are provisions that have been included in the Oregon-Washington order and apparently are necessary to maintain the pool status of the TCCA supply plant and TCCA's member producers.

The proposed provision that would allow the Director of the Dairy Division to revise pool plant performance standards temporarily if such revision is found to be appropriate should be adopted. Such a provision will give the merged order needed flexibility to deal with fluctuations in supply and demand.

Without such a provision, the only possible adjustments to rapidly changing marketing conditions are suspensions, which leave an order with no pooling standards at all, or amendatory proceedings, which do not allow timely action. Allowing the Director the discretion to temporarily adjust pooling standards, with appropriate input from the industry, is a means by which timely reaction to changed marketing conditions may be achieved.

Under the paragraph in the "pool plant" definition that describes plants that are not to be considered pool plant is a description of a "portion of a plant that is physically separated from the Grade A portion of such plant, is operated separately, and is not approved by any regulatory agency for the receiving, processing, or packaging of any fluid milk products for Grade A disposition." In his testimony, the principal Darigold witness advocated that such a portion of a plant be allowed to be connected by pipeline to the Grade A or pooled portion of the plant for the purpose of easily moving surplus milk and cream from the pool plant to the nonpool plant. Such an arrangement may make it difficult to assure that milk is moving through the pipeline only in the amounts and direction reported by the handler. If milk is to be allowed to move by pipeline from a pool plant to a nonpool plant located on the same premises, each individual arrangement must meet with the market administrator's approval by complying with specific guidelines developed by the market administrator. Only under fairly close scrutiny can it be assured that a pipeline arrangement from a pool plant to a nonpool plant is operated in conformity with the order.

Handler. The impact of regulation under an order is primarily on handlers. The handler definition identifies persons who will have responsibility for filing reports and/or making payments for milk under the merged order. The handler definition proposed by proponents should be adopted. As herein provided, the following persons are defined as handlers under the order:

(1) The operator of one or more pool plants;

(2) A cooperative association with respect to the milk of producers that it causes to be picked up at the farms and delivered to a pool plant unless the cooperative and the pool plant operator agree that the pool plant operator will be the handler on such milk, or diverted for the cooperative's account to a nonpool plant;

(3) The operator of an other order plant from which milk is disposed of in the marketing area;

(4) A producer-handler;

(5) The operator of a partially regulated distributing plant;

(6) The operator of an unregulated supply plant; and

(7) The operator of an exempt plant.

All such persons are now defined as handlers under the Puget Sound-Inland order, and most are so defined under the present Oregon-Washington order. Each person that may incur an obligation (reporting and/or financial) under the order should be designated a handler. This will assure that all information necessary to determine their regulatory status under the order can be readily determined by the market administrator.

Proponent witness testified that the proposed definition is essentially the same as those contained in the separate orders and is intended to serve the same purpose. Specifically, the definition is identical to the one contained in the present Puget Sound-Inland order. Adoption of the handler definition described above should help to assure orderly marketing in the merged marketing area.

A proposal to adopt a "cooperative reseve supply unit" should be adopted, but not as part of the handler definition. The "cooperative reserve supply unit" is discussed below.

Producer-handler. The merged order should continue the exemption now contained in each of the two individual orders of a "producer-handler" from the pooling and pricing provisions of the order. Under the merged order, the definition of a producer-handler should be the same as that now contained in the Puget Sound-Inland order.

Proponent witness stated that retaining the provision of the present Puget Sound-Inland order that requires a producer-handler to distribute a daily average of at least 300 pounds of fluid milk products on routes will eliminate from producer-handler status 5 of the operations that currently have producer-handler status under the Oregon-Washington order.

The witness for proponents observed that the percentages of Class I disposition by producer-handlers in the Puget Sound-Inland and Oregon-Washington marketing areas are, respectively, the highest and third highest of any Federal orders in the United States. He cited such activity as evidence that the producer-handler provisions in these orders are not unduly restrictive. The witness stated that any relaxation of the present and proposed provisions would provide producer-handlers an additional unfair advantage in their competition with regulated handlers for the sale of fluid milk products on routes in the marketing area.

In addition to testimony about the provisions proposed for the actual producer-handler definition, proponent witness testified that the proposed order should include a provision of the present Oregon-Washington order that directs that fluid milk producers received or acquired for disposition by a pooled handler from a producer-handler be allocated to the extent possible first to Class III, then to Class II, and finally to Class I use. The witness stated that the provision had been incorporated into the Oregon-Washington order at its promulgation in response to a situation in which a handler wished to receive unlimited quantities of packaged products from a producer-handler at a location outside the handler's plant without accounting to the pool for such receipts.

A primary basis for exempting a producer-handler from the pricing and pooling provisions of the order is that such a person customarily has a relatively small operation and is operating in a self-sufficient manner. The milk that is processed, packaged and distributed by a producer-handler is obtained from the producer-handler's own production. Any fluctuation in a producer-handler's daily and seasonal milk needs is met through his own farm production, and any excess milk supplier are disposed of at his own expense. Under this arrangement, a producer-handler seldom can be a major competitive factor in the market for regulated handlers, nor can such a person have a preferred market for his milk relative to producers who supply the regulated handlers and share in the proceeds of the marketwide pool.

If a producer-handler processes milk from his own farm but also relies on pool plants for substantial supplies, either in bulk or packaged form, his operations are not significantly different than the operations conducted by a pool handler. Since his operation is not fully regulated, the pool does not receive the benefits of the producer-handler's Class I sales. At the same time, the other producers in the market are bearing the cost of balancing his operation by carrying such operator's necessary reserve milk supplies. Such an operator should not have producer-handler status under the merged order, but should be accorded pool status similar to that of any other handler receiving milk directly from dairy farms.

There was no opposition to adoption of the producer-handler definition as proposed. In view of the fact that producer-handlers supply a significant share of the fluid milk dispositions in the marketing area, and yet are not subject to the same pricing and pooling provisions of the order as are regulated handlers, it is appropriate to require producer-handlers to rely almost totally on their own milk production to balance their fluid sales and to find outlets for their surplus production outside the fluid market. Only in this way can there be any reasonable assurance that their exemption would not have an adverse impact on the market.

Therefore, as adopted herein, a producer-handler would be allowed, within the limitations on supplemental purchases, to purchase fluid milk products in bulk or packaged form. This change would not undermine the concept of self-sufficiency, but rather would provide a producer-handler with the flexibility to purchase supplemental fluid milk products in the form that fits his needs. It is appropriate to include handlers who produce and distribute less than 300 pounds of milk per day in the order's "exempt plant" definition. Such handlers represent far too small a share of the total market for fluid milk production to justify the same degree of administrative attention necessary to assure that larger producer-handlers operate within the parameters of the producer-handler definition adopted herein.

The provision of the Oregon-Washington order directing that products acquired from a producer-handler for sale by a regulated handler be reported as receipts and allocated first to Class III, then to Class II, and finally to the handler's Class I use, should be included in the merged order. Adoption of this provision also requires that any such receipts allocated to Class I will be subject to a compensatory payment to the producer-settlement fund at a rate determined by the difference between the Class I and Class III prices.

Without such a provision, a producer-handler would be able to find a fluid outlet for any of its milk production that might exceed demand for its fluid milk products sold through customary channels. In addition, regulated handlers associated with retail outlets would have access to unregulated and potenially lower-cost supplies of fluid milk products, giving them a competitive advantage over other pooled handlers who must pay the order's Class I price for fluid milk products disposed of on routes.

Cooperative reserve supply unit. A proposal to include in the merged order a "cooperative reserve supply unit" should be adopted. Such a provision will assure the continued pooling of the milk of coooperative association members having an historical relationship with the market. In order to qualify as a reserve supply unit, a cooperative association must have been a handler of producer milk under the merged order or one of its two predecessor orders for at least the immediately preceding twelve months. In addition, a cooperative reserve supply unit must supply milk to pool distributing plants located within 125 miles of the majority of its producers as directed by the market administrator when the market administrator has determined that such shipments are necessary to assure consumers an adequate supply of fluid milk products.

The "cooperative reserve supply unit" provision was proposed on behalf of two cooperative associations whose members' milk is pooled under the Oregon-Washington and Puget Sound-Inland orders. A witness representing one of the cooperatives, Northwest Independent Milk Producers Association (NWI), testified that the production of NWI members represents approximately 1 percent of the milk pooled under the two Northwest orders. He stated that NWI historically has marketed 25–30 percent of its members' production to a pool distributing plant, with the balance diverted to a nonpool cheese plant, and asserted the cooperative's willingness to continue to supply the fluid market. However, the witness testified, NWI's sole pool distributing plant customer signed a full-supply agreement with Darigold in October 1986 for necessary shipments of milk to supplement the plant's nonmember milk supply. He stated that he contracted and met with out the pool plant operators in the marketing area in an unsuccessful attempt to arrange for alternative pool outlets for the cooperative's milk. The witness described NWI's position as a participant in the marketwide pool as vulnerable, although the cooperative's pool plant customer has continued to receive enough of NWI's production to assure the pool status of the cooperative's members. He urged adoption of the "cooperative reserve supply unit" provision as a means of correcting the potential inequity of being excluded from the marketwide pool. The witness stated that failure to qualify the cooperative's member producers' milk for pooling would result in their receiving 65 to 70 cents per hundredweight less for their milk than pooled producers receive.

The NWI witness recommended that the "call area" from which the market administrator could require milk to be shipped by cooperative reserve supply units from members' farms to pool distributing plants be defined as 100 miles. He stated that this would represent a reasonable distance over which milk supplies needed for fluid use might be required to be shipped. The witness observed that adequate supplies of milk for fluid use are produced within 100 miles of both Portland and Seattle, and that expanding a "call area" much beyond 100 miles would result in inefficient and prohibitively expensive hauling.

The witness representing Darigold and NDA testified that those organizations would have no objection to a "cooperative reserve supply unit" provision as long as certain safeguards are included so that producers not actually associated with the market would not be eligible to participate in the marketwide pool. The Darigold representative proposed that a "cooperative reserve supply unit" be required to have qualified for pool status for the 24 consecutive months immediately preceding its reserve supply unit status, and that the headquarters and all of the producer members of the association should be located within the marketing area. The witness based the need for such modifications on the possibility that producer groups having no real historical supply relationship with the market might otherwise attempt to be pooled under the provision.

The provision defining a "cooperative reserve supply unit" should be included in the merged order to assure the continued pooling of the milk of producers historically associated with the market. The provision will protect the member producers of marketing cooperatives who have been associated with the market over a significant period of time and have demonstrated their willingness and ability to supply milk to the fluid market from losing their association with the pool as a result of forces beyond their control. The order's requirement that such an association supply milk to pool distributing plants as specified by the market administrator in order to retain pool status will assure that the milk supplies of a "cooperative reserve supply unit" would be made available for fluid use whenever needed by the market. The specific order language proposed by proponent should be modified to better reflect the role that a cooperative reserve supply unit would play in the merged order. It is not necessary to define such an entity as a "handler" since the only means it has of marketing its members' milk is by moving it to either pool plants or

nonpool plants. Both of those possible movements, when directed by a cooperative, are already included in the handler definition. Therefore, a "cooperative reserve supply unit" has been defined in a separate section, and an exemption from the constraints of diversion limits has been included in the "producer milk" definition.

In addition, the concept of a "call area" to determine the area containing the producers whose milk is required to be shipped and the pool distributing plants to which the milk is to be shipped is not appropriate in the context of this provision. The area encompassing the locations of producers' farms is likely to be more difficult to delineate than the supply plants from which milk supplies are "called" under similar provisions in other orders. The market administrator has the information necessary to determine whether the members of any "cooperative reserve supply units" are within a reasonable distance of pool distributing plants in need of milk supplies and, if so, how much milk should be shipped. The testimony dealing with the distance over which such shipments should be required indicated that some producers in Whatcom County, Washington, are more than 100 miles from Seattle, the nearest likely market for their milk. Therefore, a reserve supply unit should not be "called" upon for milk needed at locations more than 125 miles from the majority of its producers. It would not be reasonable to compel such a unit to move milk several hundred miles if there is an adequate supply nearer to the area experiencing a shortage. It also would not be reasonable to require shipments from a cooperative reserve supply unit at a percentage level of its supply that exceeds the percentage of milk supplied to pool distributing plants by other pooled handlers.

Another change needed in the proposed definition is in the penalty for failure of a unit to comply with any announced shipping requirements. The penalty proposed by proponent, that loss of reserve supply unit status would preclude the unit from qualifying for such status for a period of one year, leaves unclear the status of the cooperative for the next year and the steps that must be taken for such a unit to regain "cooperative reserve supply unit" status. Instead of the proposed language, the merged order should require a cooperative that loses reserve supply unit status to meet the order's pooling requirements for 12 consecutive months before again becoming eligible for "cooperative reserve supply unit" status.

Darigold's proposed modification to the provision, that a cooperative reserve supply unit be required to meet the order's pooling standards for its producers' milk for 24 consecutive months, is not necessary and should not be adopted. A handler whose producers have been pooled for 12 consecutive months has demonstrated a considerable association with the fluid milk market. Extending the period to 24 months would serve no useful purpose beyond delaying for a year a handler's ability to pool milk under the "cooperative reserve supply unit" provision. Darigold's argument that a handler can obtain a 12-month milk supply contract to meet the order's delivery requirements is not sufficient to require a 24-month association with the market. The order cannot erect unreasonable barriers to the entry of producers or producer groups that are not currently included in the marketwide pool.

Another proposed modification, that the headquarters and all of the members of a reserve supply unit be located within the marketing area, is not a reasonable restriction. The market statistics clearly show that milk production for the two orders is not normally limited to the marketing areas of the orders. Production from counties on the Olympic Peninsula and from other counties near the boundaries of the present marketing areas is currently pooled under both of the present orders. There is no basis on which to limit the membership of cooperatives operating reserve supply units to the marketing area when other cooperatives are not so limited. However, because a reserve supply unit will be required to ship milk only to pool distributing plants located within 125 miles of the majority of its producers, only those units having a majority of their member producers located within 125 miles of a pool distributing plant should qualify for reserve supply unit status.

Changes in other order provisions that will accommodate the pooling of milk handled by a "cooperative reserve supply unit" should be made where necessary.

Producer milk. For the most part, the producer milk definition should be very similar to the one proposed by proponents, which is the same as the current Puget Sound-Inland definition, and similar to the present Oregon-Washington definition. However, some changes in the producer milk definition of the merged order will be necessary to accommodate the continued pooling of the milk currently pooled under the two orders, and to conform with other features of the merged order. As in the case of pool provisions for handlers, the pool status of producers that customarily have been pooled under the two separate orders should not be altered by the provisions of the merged order. Therefore, the pooling standards adopted for producers and producer milk under the merged order should reflect the more liberal of the pooling standards contained in the separate orders.

Adoption of the "cooperative reserve supply unit" provision will necessitate omission of references to "diversion from" particular kinds of plants. By definition, milk pooled by a reserve supply unit will have no attachment to any particular pool plant, and therefore cannot be considered as being "diverted from" a pool plant. Milk delivered directly to manufacturing plants can be considered to be "diverted from" the fluid market rather than from a pool distributing plant or a pool supply plant. This change in the terminology relating to diverted milk will result in non-substantive changes in the wording of some of the paragraphs of the "producer milk" definition. Additionally, it will require that the proposed distinction between the percentages of allowable diversions from pool distributing plants and pool supply plants be omitted.

The language requiring different levels of allowable diversions from pool distributing and pool supply plants is contained in the present Puget Sound-Inland order. The only supply plant expected to be pooled under the merged order is operated by Tillamook County Creamery Association. The plant is currently a supply plant under the Oregon-Washington order, which applies the same diversion limits to all producer milk, regardless of the type of pool plant from which it is diverted.

The limits on diversions of producer milk proposed for the merged order are taken from the Puget Sound-Inland order, and are slightly more liberal than those in the present Oregon-Washington order. Allowances for the movement of producer milk direct from producers' farms to nonpool plants enable handlers to move milk more economically and efficiently than if all producer milk were required to be received first at pool plants. The proposed 80-percent limit on diversions of producer milk during the months of September through April, with no limit during May through August, will permit handlers the same degree of flexibility and efficiency in handling milk that they now enjoy under the Puget Sound-Inland order.

Also as proposed by proponents, the merged order should contain no

restrictions on the amount of an individual producer's milk that may be diverted to nonpool plants (commonly referred to as "touch-base" requirements). Proponent witness testified that a large portion of the milk pooled under the Puget Sound-Inland order is produced in Whatcom County, Washington, located 110–120 miles from Seattle and from most of the order's pool plants. According to the witness, most of the Whatcom County milk is delivered directly to a nearby manufacturing plant. The Darigold witness stated that milk produced in such locations, much closer to manufacturing outlets than to any pool plants, should not be required to be delivered to a pool plant simply to demonstrate an association with the market.

The present Puget Sound-Inland order has no requirement that any particular percentage or amount of each producer's milk be received at pool plants, and there is no basis in the record of this proceeding on which more demanding delivery requirements could be adopted. Therefore, in accordance with the approach of adopting the more liberal pooling requirements of the two present orders, the merged order should contain no "touch-base" requirement.

5. *Handler reports.* Reports required to be submitted by handlers should be the same as those currently required under the Puget Sound-Inland order, and similar to those proposed by proponents. Exempt plants and unregulated supply plants should not be required to report in the same detail as pooled handlers are required to do. Instead, any requirements of such handlers to file reports would be at the discretion of the market administrator.

The adopted requirements for handler reports, payroll reports and other reports are identical to those currently contained in the Puget Sound-Inland order and very similar to those of the present Oregon-Washington order. Proponenet failed to establish sufficient reason for requiring exempt and unregulated supply plants to be subject to the same reporting requirements as regulated handlers. There was no testimony that any current difficulties exist in evaluating the status of such plants. Therefore, such handlers should be required to file no more reports, nor in any greater detail, than prescribed by the market administrator.

6. *Classification of milk.* The merged order should use essentially the same uniform classification plan that is commonly provided in most other Federal milk orders. However, the plan should be modified in several respects to conform to local market conditions. Basically, the plan adopted herein provides, as is the case under the individual orders, for the classification of milk according to use, including rules for determining the classification of milk moved from one plant to another and the classification of shrinkage. The plan also sets forth a procedure for allocating a handler's receipts of milk and milk products from various sources to his utilization in each class in order to determine the classification of producer milk.

Under the classification plan here adopted, Class I milk would include all skim milk and butterfat disposed of in the form of milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, milkshakes and ice milk mixes containing less than 20 percent total solids and mixtures of cream and milk or skim milk containing less than 15 percent butterfat. Skim milk and butterfat disposesd of in any such product that is flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted likewise should be classified as Class I milk. Such classification should apply whether the products are disposed of in fluid or frozen form.

Skim milk disposed of in any product described above that is modified by the addition of nonfat milk solids should be Class I milk only to the extent of the weight of the skim milk in an equal volume of an unmodified product of the same nature and butterfat content. The remaining volume of the product, which represents the skim milk equivalent of added nonfat milk solids, would be classified as Class III.

Each product designated herein as a Class I product would be considered a "fluid milk product" as defined in the order. In addition to these fluid milk products, Class I milk would include any skim milk and butterfat not specifically accounted for in Class II or III, other than shrinkage permitted as Class III classification.

Class III milk should include products which are make from surplus Grade A milk and which compete in a national market with similar products made from manufacturing grade milk. These products include cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese), butter, any milk product in dry form (such as nonfat dry milk), any concentrated milk product in bulk, fluid form that is used to produce a Class III product, and evaporated or condensed milk (plain or sweetened) in a consumer-type package. Additionally, Class III milk should include any product not specified in Class I or Class II.

An intermediate class, Class II, should apply to certain products which can command a higher value than Class III products but which must be competitively priced below Class I in order to compete with non-dairy substitute products or manufactured dairy products that can be used in making Class II products. Class II milk should include skim milk and butterfat disposed of in the form of a "fluid cream product," eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles one of these products. As defined in the order, "fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 15 percent or more butterfat, with or without the addition of other ingredients.

Class II milk would also include bulk fluid milk products and bulk cream products disposed of to any commercial food processing establishment at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages. In addition, it would include milk used to produce cottage cheese, lowfat cottage cheese, dry curd cottage cheese, milkshake and ice milk mixes containing 20 percent or more total solids, frozen desserts, frozen dessert mixes, milk or milk products sterilized and packaged in hermetically sealed metal or glass containers, and certain other products as specified in the order.

The classification plan adopted herein was proposed by the merger proponent and embraces the basic features of the uniform classification plan contained in many other Federal orders. This plan was developed from exhaustive hearings held on the broad issue of classification in 1971 for 39 markets. A full discussion and appropriate order language on the uniform classification plan is contained in a final decision issued February 19, 1974 (34 FR 8202, 8452, 8712, 9012). This decision was duly noted on the record of this proceeding. Proponent testified that this classification system, with certain minor revisions, would be fully appropriate for the merged order and would comport with the need for greater uniformity among those essential provisions of marketing orders that should be uniform.

The minor revisions to the uniform classification plan applicable to most orders, which were proposed by the merger proponent and adopted herein,

concern the classification of certain fluid cream products and ending inventories of packaged fluid milk products. Under the adopted classification plan, any mixtures of cream and milk or skim milk containing less than 15 percent butterfat would continue to be Class I. Such products are Class II under the 39-market uniform classification plan. Although inventories of fluid milk products in packaged form on hand at the end of the month are included in Class III in most other Federal orders, they should be classified in Class I under the merged order. Such inventories in bulk form, however, should be classified in Class III. This procedure for handling fluid milk product inventories is identical with that provided under both the present Puget Sound-Inland and Oregon-Washington orders.

Such revisions to the 39-market uniform classification plan that are herein adopted make allowance for the provisions under which Northwest handlers are accustomed to operating. On the basis of the hearing record, there is no reason to change the classification of cream and milk mixtures containing less than 15 percent butterfat (half-and-half) from Class I to Class II. Proponent witness supported retaining such products in Class I on the basis that they are customarily used in coffee as a beverage and as an alternative to whole milk for many purposes. The witness explained that the limit on the butterfat content of fluid milk products should be reduced from 18 percent to 15 percent in order to eliminate any possibility of sour cream being classified as a fluid milk product instead of a fluid cream product.

A brief filed on behalf of Carnation Company, a proprietary handler operating three pool distributing plants in the proposed merged marketing area, proposed lowering the limit on butterfat content of fluid milk products from the current level of 18 percent to 9 percent. The handler supported such a change by stating that half-and-half and related by-products are classified in Class II by Federal orders in surrounding states, and that such products are moving greater distances than before from processing plants through grocery chain warehouse deliveries. The Carnation brief also advocated Class II classification for "biscuit mix", a skim milk formula with added stabilizer, salt and biscuit flour. The handler observed that such a product has been classified as Class II in the Ohio Valley Federal order.

Although the uniform classification plan does classify a milk and cream mixture containing 9 percent or more butterfat in Class II, there is no evidence that the proposed merged order should do so. The only Federal order in a state adjoining the proposed marketing area is the Southwest Idaho-Eastern Oregon order. The nearest distributing plant in that market is in Boise, Idaho, located nearly 400 miles from distributing plants in Spokane, Washington, and over 400 miles from distributing plants in Eugene or Portland, Oregon. Although milk products such as half-and-half may be moving greater distances than before, there is no testimony or data in the hearing record that would support a conclusion that handlers in the proposed merged marketing area are competing for sales of half-and-half with handlers from other areas who are subject to a lower price. Similarly, there is nothing in the hearing record that would support a Class II classification for "biscuit mix".

At the hearing, proponents' principal witness testified that certain diversion provisions in each of the two orders should not be included in the merged order. The merged order proposed by proponents would omit the Oregon-Washington order provision allowing pooled handlers to divert milk from producers' farms to other pool plants at Class III use if so requested by both handlers. The witness suggested that the Puget Sound-Inland order provision allowing producer milk to be diverted to a commercial food processor located in Pacific County, Washington, and classified as Class II not be included in the merged order because the commercial food processor affected by the provision has moved its operation to Seattle and no longer receives diverted producer milk.

The ability of handlers to divert milk from producers' farms to other pool plants and to commercial food processing plants should be retained in the merged order, with diversions between pool plants accommodated in all three classes of use. Direct shipments of producer milk are the most efficient and economical means of moving milk from farms to the plants in which it ultimately will be used. Such efficiencies should not be prohibited by order provisions. Although the food processing plant that previously received such shipments apparently has ceased to do so, such a means of disposing efficiently of producer milk surplus to the fluid needs of the market should continue to be available to other milk handlers and commercial food processors. The order should continue to assure that the records of a commercial food processing plant receiving Class II milk by transfers or diversions from regulated handlers will be available to the market administrator for audit and verification purposes.

Two changes in the order language included with the recommended decision have been made in the order language accompanying this decision to reflect accommodation of producer milk diversions to pool, as well as to nonpool, plants.

7. *Class prices, location adjustments and butterfat differential.* The Class I price for the merged Pacific Northwest market should be the basic formula price for the second preceding month plus a Class I differential of $1.90. This price should apply to plants located within zones established to approximate distances of 90 miles from Spokane and Seattle, Washington; and Eugene and Portland, Oregon. For the purpose of applying location adjustments, the marketing area should be divided into four pricing zones. Zone 1, which would be the base zone and would have no price adjustment, should include northern Idaho and most of eastern Washington; western Washington, except for the counties of Clallam, Jefferson, San Juan and Whatcom; and western Oregon north of, and including, Douglas County. Zone 2, with a location adjustment of minus 6 cents, should consist of Whatcom County, Washington. Zone 3 would have a location adjustment of minus 8 cents, and would include three southern Oregon counties. Zone 4 would have a minus 15-cent location adjustment, and would include the Idaho counties of Lewis and Nez Perce, twelve central and northeastern Oregon counties, fourteen central and southeastern Washington counties, and three northwestern Washington counties. The Class II and Class III prices to be effective under the merged order should be adopted as proposed.

The location adjustment for each zone, the resulting Class I differential (shown parenthetically), and the territory that should be included in each zone are as follows:

Zone 1—No Adjustment ($1.90)

Idaho Counties

Benewah	Boundary	Latah
Bonner	Kootenai	Shoshone

Oregon Counties

Benton	Hood River	Multnomah
Clackamas	Lane	Polk
Clatsop	Lincoln	Tillamook
Columbia	Linn	Washington
Douglas	Marion	Yamhill

Washington Counties

Clark	Island	Lincoln
Cowlitz	King	Mason
Ferry	Kitsap	Pacific
Grays Harbor	Lewis	Pend Oreille

Pierce	Skamania	Thurston
Skagit	Spokane	Wahkiakum
Snohomish	Stevens	Whitman

Zone 2—Minus 6 cents ($1.84)

Whatcom County, Washington

Zone 3—Minus 8 cents ($1.82)

Oregon Counties

Coos	Jackson	Josephine

Zone 4—Minus 15 cents ($1.75)

Idaho Counties

Lewis	Nez Perce

Oregon Counties

Crook	Klamath	Umatilla
Deschutes	Lake	Wallowa
Gilliam	Morrow	Wasco
Jefferson	Sherman	Wheeler

Washington Counties

Adams	Douglas	Klickitat
Asotin	Franklin	Okanogan
Benton	Garfield	San Juan
Chelan	Grant	Walla Walla
Clallam	Jefferson	Yakima
Columbia	Kittitas	

At plant locations outside the zones specified above, the Class I price and the uniform price to producers should be reduced by 1.5 cents for each 10 miles that the plant is from the nearer of the county courthouse in Spokane, Washinton; the Multnomah County Courthouse in Portland, Oregon; or the city hall in Eugene, Oregon.

The single butterfat differential currently in use under the Puget Sound-Inland order should be adopted for the merged order, rather than the provisions of the Oregon-Washington order under which the price of milk used by handlers in Class I is adjusted by a different butterfat differential than the price of milk used in Classes II and III.

Class I price. The Class I price differentials effective at the primary population centers of the merged marketing area should be changed to $1.90. Currently, the Class I price differential at Portland, Oregon, and Spokane, Washington, is $1.95, while the corresponding differential at Seattle, Washington, is $1.85.

The Darigold witness testified that adequate supplies of milk are produced within short distances of each of the Pacific Northwest cities in which population and distributing plants are concentrated. He also observed that packaged Class I milk products move freely between the population centers without being impeded by the price differences. The witness stated that the proposed reduction in the Class I price level at Portland and Spokane would more than offset the effect of the proposed increase at Seattle on prices to producers.

A producer from the Spokane area opposed the proposed 5-cent reduction of the Class I differential at Spokane. Instead, he suggested, the differential should be increased to $2.00. The witness expressed his concern that the proposed 5-cent increase in the Class I differential at Seattle would cause dairy farmers to move their operations to the Seattle area for the benefits of a higher Class I price and lower hauling costs. He also stated that the proposed change would cost him 5 cents per hundredweight.

Adoption of the $1.90 Class I differential for all of the marketing area's population centers will bring the prices for fluid milk at those locations into line without significantly changing total returns to producers. In view of the volume of milk supplies produced in the vicinity of all the market's population centers, there is no reason to maintain a higher price level at some of the metropolitan areas than at others. The hearing record provides no support for the Spokane-area producer's concerns about a reduction in his returns for milk or a migration of dairy farmers from eastern Washington State to the Seattle area. The effect of the decrease in the Class I differential at Spokane and Portland will be largely offset by the increase in the Class I differential at Seattle. As a result, little change in the uniform price paid to producers should be attributable to the changes in Class I differentials. As a result of the merger of the two orders, however, the uniform price paid to producers currently pooled under the Puget Sound-Inland order should increase by several cents. Such an increase would result from the relatively higher percentage of milk used in Class I in the Oregon-Washington market.

As for the possibility of eastern Washington producers moving to the Seattle area because of the increase in the Class I price there, in combination with lower hauling rates, such a shift in production area is unlikely. For one thing, producers in both parts of the marketing area will be receiving the same uniform price, regardless of the class in which their milk is used. For another, the Washington area that appears to be experiencing marked increases in milk production is Yakima County. Milk received at plants located in central Washington is subject to significant location adjustments under both of the two separate orders, reducing prices to producers by 15 or 20 cents below the uniform price. Milk produced in Yakima County that is surplus to the fluid milk needs of central Washington handlers must be hauled over 150 miles to the nearest plants in Spokane, Portland or the Seattle area, at substantial hauling costs to producers. In spite of these advantages in price and hauling cost, Yakima County appears to be one of the fastest-growing areas of milk production in the merged marketing area. It is apparent that there are factors beyond the local Class I differential and effective hauling rates that influence milk production trends in any given area.

Proponents originally proposed that the Commodity Credit Corporation allowance for manufacturing butter and powder (currently $1.22) be used in the computation of the Class III price under the merged order instead of the 48-cent manufacturing allowance provided for in the two separate orders. At the hearing, proponents withdrew that proposed change, and stated that they wished to use the formula currently used in the two separate orders. Modification of the proposal was not discussed in the recommended decision, nor was the change incorporated into the order language accompanying the decision. Two of the merger proponents and Northwest Independent Milk Producers Association filed exceptions to adoption of the Class III price computation as originally proposed, noting correctly that failure to adopt the language as modified at the hearing must be the result of an error.

The Class III price computation in the merged order should reflect the modification proposed at the hearing by proponents. If adopted as originally proposed, the Class III price under the merged order could fall as much as 74 cents below the current Class III price level, depending on the margin by which the Minnesota-Wisconsin, or basic formula, price exceeds the butter-powder snubber price computed with the use of the designated manufacturing allowance. Such a price reduction would significantly reduce the blend prices to be paid to producers, and would give Pacific Northwest manufacturing plant operators a significant advantage in competing for sales of butter, cheese and nonfat dry milk with manufacturing operations elsewhere in the United States. Therefore, the Class III price computation procedure under the merged order should be changed from that contained in the recommended decision to the procedure followed in the two individual orders.

Location adjustments. A system of establishing location adjustments by the zone in which a plant is located is appropriate for the merged order, since location pricing under the separate orders is determined largely by zones. The amounts of most of the proposed adjustments are also appropriate, and should be adopted. The Darigold

witness testified that location adjustments should be reduced at all locations in the marketing area that are subject to adjustments to the Class I and uniform prices. He supported proponents' proposal that location adjustments be reduced from 10 cents to 8 cents in southern Oregon; from 18 and 20 cents to 15 cents in central Oregon; and from 20 cents under the Oregon-Washington order to 15 cents in central Washington. The 15-cent adjustment of this latter area, however, would mean a 5-cent greater adjustment than now exsits under the Puget Sound-Inland order. The witness also supported the elimination of location adjustments at locations between Seattle and Portland, and the reduction of the present 6-cent adjustment at locations in Whatcom County, Washington, to 3 cents.

The Darigold witness based his support of a reduction in the adjustments to be made in Class I and uniform prices on two principal arguments. First, he stated, location adjustments to producer prices under the Oregon-Washington order have been applied only to the amount of each producer's base production, and not to producers' total production. With the elimination of the base-excess plan, he said, location adjustments will be applied to the unform price for all of each producer's milk, and will have a greater impact on producer returns. According to the witness, another reason for reducing the amounts of location adjustments is to "modernize" the merged order. He cited recent Federal order decisions in which location adjustments were reduced, eliminated or not adopted as evidence of such a trend.

Opposition to the proposal to reduce the location adjustment at Darigold's Lynden, Washington, manufacturing plant in Whatcom County from 6 to 3 cents was expressed in two briefs received by the Department. Both Northwest Independent Milk Producers Association and Carnation Company protested that the current 6-cent location adjustment rate is too low when compared to the cost of handling milk from Whatcom County to Seattle. The handlers stated that Darigold's ability to charge its producers a very low hauling rate because of their proximity to Darigold's manufacturing plant makes it very difficult for other handlers to procure milk supplies in that area for the Seattle fluid milk market. The handlers argued that the location adjustment for Whatcom County should, if changed at all, be increased to more closely reflect the actual cost of hauling milk from Whatcom County to Seattle.

The location adjustments in most parts of the marketing area should be changed as proposed. Most of the locations affected by such price adjustments obtain milk supplies from producers currently pooled under the Oregon-Washington order. The location adjustments deducted from the prices paid for these producers' milk are calculated on the basis of the producers' base production. According to the Darigold witness, base production under the Oregon-Washington base-excess plan generally represents about 80 percent of producers' total production. Under the proposed merged order, each producer's entire production will be subject to the full price adjustment at the location of the plant at which it is received. Accordingly, a slight (approximately 20 percent) reduction in the location adjustment rates at those locations will result in a minimal impact on producer returns when considered with the elimination of the base-excess plan.

The proposed changes in location adjustments at locations in the Oregon-Washington marketing area should have little or no effect on the handlers at those locations. Most of the southern and central Oregon and central Washington handlers have, according to the Darigold witness, more than adequate supplies of milk available nearby and no nearby competition for producer milk supplies from manufacturing plants. The handlers in these areas are located at great enough distance from each other and from handlers in the zero location adjustment zone that changes of 2 to 5 cents in location adjustment rates should not affect their competitive relationships with other distributing plants.

The location adjustments effective at locations between Portland and Seattle under the two separate orders should be eliminated. Areas within 90 miles of Eugene, Portland, Seattle and Spokane should be free of location adjustments. The record indicates that ample milk supplies for the market's population centers are available within 90 miles of those centers. The distance between Portland and Seattle is less than 180 miles, so any plant located between the two cities must be less than 90 miles from either Portland or Seattle.

Location adjustments for the northern Olympic Peninsula and San Juan County, Washington, should be reduced by 1 cent, from 16 cents to 15 cents, as proposed. It appears that there are no pool plants in this area to which location adjustments could be applied. Therefore, the 1-cent change is unlikely to make any real difference.

Proponents' arguments for reducing the present 6-cent location adjustment at locations in Whatcom County, Washington, are less persuasive. The location adjustment should not be reduced. One reason given for such a reduction was that the nearby manufacturing plant in Lynden provides an outlet for milk surplus to the market's fluid needs, while location adjustments are still needed at locations in southern and central Oregon and central Washington precisely because no nearby manufacturing plants exist to provide an outlet for surplus milk produced in those areas. In fact, the situation thus described by the Darigold witness should result in a greater location adjustment for Whatcom County than, for instance, Jackson County, Oregon. The receipt of milk at a manufacturing plant located in an area of heavy milk production at some distance from the market's center is the classic situation to which location adjustments were designed to apply. Prices paid for such milk are adjusted downward for location to compensate for the fact that the milk has not had to be hauled to distant bottling plants but instead has been shipped a relatively short distance at a significantly lower hauling cost.

Another reason advanced by the Darigold witness for a reduction in the location adjustment rate at Whatcom County was the need to "modernize" the order. According to the witness, reduction and elimination of location adjustments in Federal orders generally has become a trend that should be followed in the merged order. The witness cited 3 relatively recent decisions relating to the Southwestern Idaho-Eastern Oregon, Eastern Ohio-Western Pennsylvania and Greater Kansas City orders in which location adjustments had been, respectively, not adopted, eliminated and reduced.

None of the reasons given in the cited decisions for the actions taken are relevant to marketing conditions in the Pacific Northwest. The Southwestern Idaho-Eastern Oregon decision found that no location adjustments were necessary for that marketing area because all of the distributing plants that were expected to be regulated by the order were located in counties in which enough milk was produced to satisfy the local distributing plant's demand for fluid milk. Also, the distributing plants were found to be distributed throughout the marketing area, not concentrated in one or two large population centers.

In the Eastern Ohio-Western Pennsylvania decision, location

BEST COPY AVAILABLE

adjustments at locations in the marketing area were eliminated because most of the distributing plants had moved out of the population centers nearer to the production areas, leaving the leading population centers as no longer significant fluid milk processing centers. The decision reiterated the traditional rationale for location adjustments, but determined that the conditions for which location adjustments were designed no longer existed in the Eastern Ohio-Western Pennsylvania marketing area.

The Greater Kansas City decision referred to by proponent expanded the order's location adjustment-free area to assure that prices at a pool supply plant located south of Kansas City and closer to a higher-priced order would not be subject to a negative adjustment. The decision was part of a 6-market proceeding held to consider location adjustment changes for the purpose of assuring inter-market price alignment after Class I prices were legislatively amended in many Federal orders. In the six orders affected by the decision, location adjustments were increased in 3, reduced in 1, and unchanged in 2.

The decisions cited by the Darigold witness address marketing conditions that differ markedly from those in the proposed merged marketing area. However, the witness failed to cite decisions affecting the New England and New York-New Jersey orders in which location adjustments were increased to reflect increases in hauling costs. These markets, with manufacturing plants located in the heavy production areas distant from most distributing plant locations, are more comparable to the situation of Whatcom County. Such increases, that update location adjustments to correspond to the significant increases in hauling costs that have been experienced since most location adjustment provisions were written, are actually the only means of "modernizing" location adjustments. It is very possible that it would be appropriate to "modernize," or increase, the location adjustment at Whatcom County, as urged by Northwest Independent Milk Producers Association and Carnation Company. However, there is inadequate data and testimony in the record of this proceeding to determine an appropriate change in the level of location adjustment for Whatcom County. Therefore, there should be no change in the present 6-cent adjustment.

Butterfat differential. The merged order should provide for a single butterfat differential for adjusting order prices to the butterfat content of the milk being priced. The differential should be the Chicago 92-score butter price for the month multiplied by a factor of 0.115, rounded to the nearest 0.1 cent. Such differential should be announced on the fifth day after the end of the month to which it applies.

This differential is now used under the present Puget Sound-Inland order. However, the Oregon-Washington order provides for three separate butterfat differentials. The Class I butterfat differential for handlers is determined by multiplying the Chicago butter price for the preceding month by 0.12, while the handler Class II and III differentials are determined by multiplying the butter price for the current month by 0.115. The butterfat differential applicable in adjusting the uniform price to producers is the average of the Class I, Class II and Class III butterfat differentials weighted by the proportion of buttefat in producer milk in each class.

Presently, the Class I, Class II, and Class III differentials for the Oregon-Washington order are announced on the fifth day of the month. The Class I differential applies to the month in which announced, while the Class II and Class III differentials apply to the preceding month. The producer butterfat differential is announced on the 14th day of each month and applies to milk received during the preceding month.

The merger proponents proposed that all class prices and uniform prices under the merged order be subject to an adjustment by a butterfat differential based on the Chicago butter price and the factor of 0.115. No opposition to the use of this single factor was presented at the hearing.

As proposed and as herein adopted, using a single factor of 0.115 for computing class butterfat differentials will change the relationship of Class I skim milk and butterfat values of those handlers that are presently regulated by the Oregon-Washington order. The impact of this change will increase such handlers' cost of skim milk since less value will be assigned to the butterfat component of Class I milk. However, the absolute effect on a handler's cost for Class I milk is dependent on the average test of his Class I products.

Nevertheless, adopting a lower Class I butterfat differential for the Oregon-Washington portion of the proposed merged marketing area gives recognition to the reduced demand and the related lower market value of butterfat in fluid milk products in Class I. This lower value for Class I butterfat will be reflected in returns to producers which, in turn, should provide less incentive to produce high-test milk that consumers do not want.

8. *Handler obligations to the pool.* The value of producer milk to handlers should continue to be determined on the basis of its use in the three classes of utilization, and the prices associated with each class. As proposed by proponents, each handler's obligation to the producer-settlement fund should be determined by "equalization", as is currently the case under the Puget Sound-Inland order. In an "equalization" pool, a handler pays to the producer-settlement fund the amount by which the handler's use value of producer milk exceeds the value of the producer milk at the uniform price. If the value of the producer milk at the uniform price exceeds the handler's use value, the handler receives the difference from the producer-settlement fund in order to pay the producers the uniform price. In this way, each handler pays the total use value of producer milk received and each handler is left with a sum great enough to pay all of the handler's producers for their milk at the uniform price.

Under the Oregon-Washington order, handlers are required to pay the full class use value of their producer milk to the producer-settlement fund. The market administrator then pays nonmember producers, handlers, cooperative associations and the Oregon State Division of Milk Stabilization for the milk supplied by them or by the producers for whose milk they are responsible for paying. With the cessation of payments to the State of Oregon (see below), it is no longer necessary to require handlers to pay the full use value of their milk to the producer-settlement fund. Operation of the Pacific Northwest pool as an "equalization" pool will reduce the amount of money paid into and out of the producer-settlement fund, and should improve handlers' cash flow.

Late payment charge. The merged order should include a late payment charge to be applied to handlers' payments to the producer-settlement fund, as a result of audit adjustments, and for administrative and marketing service assessments that are received after the date such payments are due under the order. The charge should be 1 percent of the amount due, and should be applied on the first day after the due date. The late payment charge should also be applied to any unpaid balance (including any previously unpaid overdue charges) on the due date for such obligation in each following month.

Proponent proposed the late payment charge on the basis that such a

provision had been found necessary in the Oregon-Washington order to assure timely payment of handlers' obligations to the producer-settlement fund and for administrative and marketing service assessments. The Darigold witness testified that the late payment charge provision, as proposed, should be modified to remove a requirement that late payment charges be assessed under the order on late payments for milk purchased from cooperative association plants by other handlers. He explained that agreements between cooperatives and their customers may enable cooperatives to impose such a charge outside the order.

Some of the wording in paragraph (b) of the section on late payment charges in the recommended decision order language appears to correspond to that part of the originally proposed section that proponents testified should not be adopted. The requirement that "All charges on overdue accounts shall be paid to the fund or to the person to whom the account was due . . ." appears to be related to the original proposal that would have instructed the market administrator to apply such charges not only to accounts overdue to the market administrator, but accounts overdue to cooperative associations and nonmember producers as well. The order language therefore is changed to reflect the omission of such an application of late payment charges.

Two briefs opposing adoption of a late payment charge were received. Carnation Company, a proprietary handler operating distributing plants under both of the two orders, objected to the imposition of a late payment charge in months when billings from cooperatives or the market administrator arrive after the date payments are due. The Carnation brief stated that the company does accept billing information by telephone so that payments can be made on time, but considers a late payment charge unreasonable unless the billings arrive on time. Carnation also stated that the 1 percent charge for a payment one day late is unreasonable. Olympia Cheese Company, a nonpool cheese plant operator, also objected to adoption of a late payment charge for the merged order. The brief filed by the handler stated that cooperatives and other handlers are able to charge late payment fees on overdue accounts outside the Federal order. Olympia Cheese's brief also stated that the proposed provision would disrupt the operation of the order, goes beyond the intent of the Act, and violates usury laws.

The late payment charge, modified as suggested by the Darigold witness, is necessary to assure that payments to the funds maintained by the market administrator will be made promptly. Prompt payment is essential in order for the market administrator to make payments to handlers on the dates specified in the order so that those handlers, in turn, may pay producers according to the timetable required by the order. Failure on the part of a handler to meet the order's due dates unnecessarily delays payments to producers and gives the late-paying handler a financial advantage over handlers who comply with the order's payment dates. Allowing a period after the due date when no late payment charge would be imposed would only encourage handlers to put off payment until the day before the charge is effective. A charge for late payments will enable the order to operate smoothly, and will assure that producers will receive payment for their milk, some of which was used by handlers over a month earlier, in a timely manner. Elimination of the proposed provision subjecting handlers' late payments to cooperative associations for milk received from cooperatives' plants will enable the market administrator to avoid unnecessary involvement in business dealings between regulated handlers.

A charge of one percent of the amount overdue should not be considered excessive. A lesser rate would constitute little deterrent to late payments. Furthermore, since handler obligations under the merged order will reflect only their equalization value (the difference between the class use value of the milk and its value at the uniform price), the amount of late payment charge imposed should not be unduly burdensome. The late payment charge is not considered interest, and is not subject to usury laws. The late payment charge assures that timely payment of a handlers' obligations to the pool will represent the most economic use of the handler's financial resources.

9. *Payments to producers.* Marketwide pooling of producer returns should be provided under the merged order as the basis of distributing among producers the proceeds from the sale of their milk. This type of pooling is now being used in each of the individual markets to be merged and was the only alternative proposed or supported for use under the merged order.

A single marketwide uniform price, adjusted for butterfat content and for location of the plant to which the milk is delivered, should be the basis of distributing total pool proceeds from producer milk in making payments to individual producers. Under this payment arrangement, each producer would share equally in the higher-valued Class I milk of the market as well as in the lower-valued Class II and Class III uses of milk. A single uniform price to producers is now applicable under the Puget Sound-Inland order.

The present Oregon-Washington order provides for a 12-month operating base plan, which is another method of distributing the total proceeds from handlers to producers. This plan provides for producers to earn daily bases that represent the producer's daily average production during the market's four lowest months of production for the previous year. For deliveries within a producer's base, the producer receives a "base" price that includes a share of the value of the market's Class I sales. For marketings in excess of his base, the producer receives an "excess" price which is comparable to the lower manufacturing, or Class III, price. In addition to the "base-excess" plan, the Oregon-Washington order includes authorization for the market administrator to pay pool proceeds to the Oregon State Milk Audit and Stabilization Division at the base and excess values for producers and cooperative associations participating in the "Oregon Base Plan."

Proponents proposed that both the Oregon-Washington Federal order base plan and provisions facilitating operation of the Oregon State Base Plan be omitted from the proposed order. The Darigold witness testified that participation by Oregon-Washington producers in the Oregon Base Plan had declined from nearly 100 percent at the time the Oregon-Washington order was promulgated to approximately 18 percent at the time of the hearing in this proceeding. He stated further that the State of Oregon was expected to discontinue operation of its base plan at the end of 1987. There was no opposition, at the hearing or in briefs, to the omission of both the Federal order base plan and the Oregon base plan from the merged order. Because no support was expressed for retention of the Federal order base plan or provisions facilitating operation of the Oregon State Base Plan in the merged order, the provisions associated with those plans should not be included.

Adoption of the equalization method of pooling the value of producers' milk will necessitate adoption of the proposed procedure for paying producers. The Oregon-Washington order currently requires the market

VOL 53 ISS 234 DE 6 1988 UMI

administrator to pay the full amounts due to producers directly to nonmember producers, cooperative associations, the Oregon State Department of Agriculture or, upon request, to the handler of nonmember producer milk. Such a payment scheme would not be possible with an equalization system under which only the differences between the values of milk at class prices and at the uniform price are paid to and from the producer-settlement fund. The market administrator would not have the necessary funds to pay for all of the milk production of individual producers. Therefore, the producer payment provisions of the present Puget Sound-Inland order should be adopted.

In testimony, the Darigold witness proposed two corrections to the proposed order language relating to payments to producers. He requested that the date by which handlers are required to pay cooperative associations for milk received from cooperatives' plants be changed from the 17th to the 15th day after the end of the month in which the milk is moved. The change should be adopted. Under the merged order, the cooperative association, as the handler of the milk, must account to the pool for such milk on the 16th day after the end of the month. The cooperative should have access to the money needed to pay for the milk before such payment is due to the producer-settlement fund.

The other proposed modification to the proposed order was to change a reference in the provision dealing with the application of location adjustments to payments for milk delivered by a cooperative association from producers' farms directly to the plant of another handler. The requested change would cause the provision to be applied instead to transfers from a cooperative association's plant to another handler's plant. Application of location adjustments to such milk movements are already covered in the order. A change of the provision referred to would result in no location adjustment being applied to a cooperative's milk received directly at another handler's plant. The proposed modification should not be adopted.

One change from the payment provisions of the present Puget Sound-Inland order, and from the recommended decision, should be made for the reason of consistency. Payments by handlers to cooperative associations are to be made 2 days prior to the dates specified for payments to producers. In § 1124.73(d)(2), final payment by handlers receiving milk for which a cooperative association is the handler under § 1124.9(c) should be made on or before the 17th day after the end of the month, rather than the 18th as specified in the recommended decision. Such payment to cooperative associations on the 17th day would correspond to final payment to producers on the 19th day after the end of the month.

10. *Administrative provisions—administrative assessment.* The maximum rate of payments by handlers for the cost of administering the merged order should be 4 cents per hundredweight. Such payments are required if the market administrator is to perform the necessary function of administering the merged order. The 4-cent per hundredweight rate is the same as under the two separate orders, and was proposed at the hearing without objection. Continuation of the 4-cent rate should enable the market administrator to administer the merged order effectively. If experience indicates that the merged order can be administered at a lesser rate, the order provides that the Secretary may adjust the rate downward without the necessity of a hearing.

Deduction for marketing services. The maximum rate of deduction from payments to nonmember producers for the cost of providing marketing services such as butterfat testing and market information should be 5 cents per hundredweight. The marketing service deduction is necessary to reimburse the market administrator for providing such services to producers to whom the services are not provided by a cooperative association.

Currently, the maximum rates under the separate orders are 6 cents under the Oregon-Washington order, and 5 cents under the Puget Sound-Inland order. A 5-cent rate, which was proposed at the hearing without objection, should enable the market administrator to provide adequate testing and information services to nonmember producers. The marketing service deduction rate, like the administrative assessment, may be adjusted downward if the maximum rate is higher than necessary.

Merger of the administrative expense, marketing service and producer-settlement funds. To accomplish the merger of the two orders effectively and equitably, the reserves in the administrative expense funds that have accumulated under the individual orders should be combined. Similar procedures should be followed with respect to the marketing service and producer-settlement fund reserves of the individual orders. Any liabilities of such funds under the individual orders should be paid from the appropriate new funds established under the merged order. Similarly, obligations that are due the several funds under the individual orders should be paid from the appropriate combined fund under the merged order.

The money paid to the administrative expense fund is each handler's proportionate share of the cost of administering the order. It is anticipated that all handlers currently regulated under the two orders will continue to be regulated under the merged order. In view of this, it would be an unnecessary administrative and financial burden to allocate back to handlers the reserve funds under the individual orders and then accumulate an adequate reserve for the merged order. It is equally equitable and more efficient to combine the administrative monies accumulated under the individual orders and to pay any liabilities against such funds from the consolidated fund of the merged order.

The money accumulated in the marketing service funds of the individual orders is that which has been paid by producers for whom the market administrator is performing services. The producers who have contributed to the marketing service fund of each order are expected to continue to supply milk for the merged Pacific Northwest market. The consolidation of the reserves in the individual marketing service funds is therefore appropriate in view of the continuation of the marketing service program for these producers under the merged order.

The producer-settlement fund balances in the two orders should be combined so that the producer-settlement fund under the merged order may be continued without interruption. The producers currently supplying the individual markets are expected to continue to supply milk for the merged Pacific Northwest market. Thus, monies now in the producer-settlement funds of the individual orders would be reflected in the uniform prices of the producers who will benefit from the merged order. The combined fund would also serve as a contingency fund from which money would be available to meet obligations [resulting from audit adjustments and otherwise] accruing under one or the other of the separate funds.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the

extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth supplement those that were made when the Oregon-Washington and Puget Sound-Inland orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) The tentative marketing agreement and the Pacific Northwest order which amends and merges the present Oregon-Washington and Puget Sound-Inland orders, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the Pacific Northwest marketing area, and the minimum prices specified in the tentative marketing agreement and the Pacific Northwest order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(c) The tentative marketing agreement and the Pacific Northwest order will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, marketing agreements upon which a hearing has been held;

(d) All milk and milk products handled by handlers as defined in the tentative marketing agreement and the merged Pacific Northwest order are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(e) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his prorata share of such expense, 4 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to milk specified in § 1124.85 of the tentative marketing agreement and the Pacific Northwest order.

Rulings on Exceptions

In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence. To the extent that the findings and conclusions and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents, a Marketing Agreement regulating the handling of milk, and an Order amending the order regulating the handling of milk in the Oregon-Washington and Puget Sound-Inland marketing area, which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered that this entire decision and the two documents annexed hereto be published in the **Federal Register**.

Determination of Producer Approval and Representative Period

September 1988 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the attached order, amending and merging the orders regulating the handling of milk in the Oregon-Washington and Puget Sound-Inland marketing areas is approved or favored by producers, as defined under the terms of the attached order who during such representative period were engaged in the production of milk for sale within the marketing area defined in such attached order.

List of Subjects in 7 CFR Parts 1124 and 1125

Milk marketing orders, Milk, Dairy products.

Signed at Washington, DC, on November 29, 1988.

Robert Melland,

Acting Deputy Secretary for Marketing and Inspection Services.

Order Amending and Merging the Orders Regulating the Handling of Milk in the Oregon-Washington and Puget Sound-Inland Marketing Areas

(This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.)

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) Findings. A public hearing was held upon certain proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the Oregon-Washington and Puget Sound-Inland marketing areas. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The Pacific Northwest order, which amends and merges the Oregon-Washington and Puget Sound-Inland orders, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the Pacific Northwest marketing area; and the minimum prices specified in the Pacific Northwest order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The Pacific Northwest order regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined in the Pacific Northwest order, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, 4 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to milk specified in § 1124.85.

Order Relative to Handling

It is therefore ordered that on and after the effective date hereof, the handling of milk in the Oregon-Washington and Puget Sound-Inland marketing areas (Parts 1124 and 1125, respectively) shall be amended and merged into one order. Part 1125 is superseded thereby, and such vacated part designation shall be reserved for future assignment. The handling of milk in the merged marketing area, to be designated as the "Pacific Northwest marketing area" (Part 1124), shall be in conformity to and in compliance with the terms and conditions of the orders, as amended, and as hereby amended and merged as follows:

The provisions of the proposed marketing agreement and order amending and merging the Oregon-Washington and Puget Sound-Inland orders contained in the recommended decision issued by the Administrator, AMS, on September 7, 1988, and published in the **Federal Register** on September 19, 1988, (53 FR 36291), shall be and are the terms and provisions of this order, and are set forth in full herein, subject to the following modifications:

1. In § 1124.9, paragraph (b) is revised.
2. In § 1124.13, paragraph (c)(1) is revised.
3. In § 1124.50, paragraph (c)(3) is revised.
4. In § 1124.73, paragraph (d)(2) is revised.
5. In § 1124.78, paragraph (b) is revised.

Accordingly, 7 CFR Part 1125 is proposed to be removed and Part 1124 is proposed to be revised as follows:

PART 1125—[REMOVED]

PART 1124—MILK IN THE PACIFIC NORTHWEST MARKETING AREA

Subpart—Order Regulating Handling

General Provisions

Sec.
1124.1 General provisions.

Definitions

1124.2 Pacific Northwest marketing area.
1124.3 Route disposition.
1124.4 Plant.
1124.5 Distributing plant.
1124.6 Supply plant.
1124.7 Pool plant.
1124.8 Nonpool plant.
1124.9 Handler.
1124.10 Producer-handler.
1124.11 Cooperative reserve supply unit.
1124.12 Producer.
1124.13 Producer milk.
1124.14 Other source milk.
1124.15 Fluid milk product.
1124.16 Fluid cream product.
1124.17 Filled milk.
1124.18 Cooperative association.
1124.19 Product prices.

Handler Reports

1124.30 Reports of receipts and utilization.
1124.31 Payroll reports.
1124.32 Other reports.

Classification of Milk

1124.40 Classes of utilization.
1124.41 Shrinkage.
1124.42 Classification of transfers and diversions.
1124.43 General classification rules.
1124.44 Classification of producer milk.
1124.45 Market administrator's reports and announcements concerning classification.

Class Prices

1124.50 Class prices.
1124.51 Basic formula price.
1124.51a Basic Class II formula price.
1124.52 Plant location adjustments for handlers.
1124.53 Announcement of class prices.
1124.54 Equivalent price.

Uniform Price

1124.60 Handler's value of milk for computing uniform price.
1124.61 Computation of uniform price.
1124.62 Announcement of uniform price and butterfat differential.

Payments for Milk

1124.70 Producer-settlement fund.
1124.71 Payments to the producer-settlement fund.
1124.72 Payments from the producer-settlement fund.
1124.73 Payments to producers and to cooperative associations.
1124.74 Butterfat differential.
1124.75 Plant location adjustments for producers and on nonpool milk.
1124.76 Payments by a handler operating a partially regulated distributing plant.
1124.77 Adjustment of accounts.
1124.78 Charges on overdue accounts.

Administrative Assessment and Marketing Service Deduction

1124.85 Assessment for order administration.
1124.86 Deduction for marketing services.

Authority: Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).

Subpart—Order Regulating Handling

General Provisions

§ 1124.1 General provisions.

The terms, definitions, and provisions in Part 1000 of this chapter are hereby referenced and made a part of this order.

Definitions

§ 1124.2 Pacific Northwest marketing area.

"Pacific Northwest Marketing Area" (hereinafter called the "Marketing Area") means all territory geographically within the places listed below including all territory fully or partly therein occupied by government (municipal, state or federal) reservations, facilities, installations, or institutions:

Idaho Counties:

Benewah, Bonner, Boundary, Kootenai, Latah, and Shoshone.

Washington Counties:

Adams, Asotin, Benton, Chelan, Clark, Columbia, Cowlitz, Douglas, Ferry, Franklin, Garfield, Grant, Grays Harbor, Island, King, Kitsap, Kittitas, Klickitat, Lewis, Lincoln, Mason, Okanogan, Pacific, Pend Oreille, Pierce, San Juan, Skagit, Skamania, Snohomish, Spokane, Stevens, Thurston, Wahkiakum, Walla Walla, Whatcom, Whitman and Yakima.

Oregon Countries:

Benton, Clackamas, Clatsop, Columbia, Coos, Crook, Deschutes, Douglas, Gilliam, Hood River, Jackson, Jefferson, Josephine, Klamath, Lake, Lane, Lincoln, Linn, Marion, Morrow, Multnomah, Polk, Sherman, Tillamook, Umatilla, Wasco, Washington, Wheeler, and Yamhill.

§ 1124.3 Route disposition.

"Route disposition" means any delivery of a fluid milk product classified as Class I milk from a plant to a retail or wholesale outlet (including any delivery through a distribution point as provided by this section, by a vendor, from a plant store or through a vending machine). The term "route disposition" does not include: (a) A delivery to a plant. However, packaged fluid milk products that are transferred to a pool distributing plant from another pool distributing plant, and classified as Class I under § 1124.42(a), shall be considered route disposition from the transferor-plant for the sole purpose of qualifying it as a pool distributing plant under § 1124.7(a), and the transferor-plant shall be assigned in-area dispositions but not in excess of the in-area dispositions of the transferee plant;

(b) A delivery in bulk to a commerical food processing establishment pursuant to § 1124.40(b)(3); or

(c) A delivery to a military or other ocean transport vessel leaving the marketing area, of fluid milk products which originated at a plant located outside the marketing area and were not received or processed at any pool plant.

§ 1124.4 Plant.

"Plant" means the buildings, facilities and equipment, whether owned or operated by one or more persons, constituting a single operating unit or establishment, which is maintained and operated primarily for the receiving, handling and/or processing of milk or milk products (including filled milk). Separate facilities used only as a distribution point for storing packaged fluid milk products in transit for route disposition or separate facilities used only as a reload point for transferring bulk milk from one tank truck to another shall not be a "plant" under this definition.

§ 1124.5 Distributing plant.

"Distributing plant" means a plant in which a fluid milk product approved by a duly constituted regulatory agency for fluid consumption, or filled milk, is processed or packaged and that has route disposition in the marketing area during the month.

§ 1124.6 Supply plant.

"Supply plant" means a plant from which a fluid milk product approved by a duly constituted regulatory agency for fluid consumption, or filled milk, is transferred during the month to a pool distributing plant.

§ 1124.7 Pool plant.

Except as provided in paragraph (d) of this section, "pool plant" means:

(a) A distributing plant from which there is route disposition (except filled milk) in the marketing area during the month equal to not less than 10 percent of receipts of Grade A milk at such plant (exclusive of transfers of packaged fluid milk products from plants qualifying as pool plants pursuant to this paragraph, filled milk, and milk received at such plant as diverted milk from another plant, which milk is classified in Class III under this order and is subject to the pricing and pooling provisions of this or another order issued pursuant to the Act) or diverted thereform pursuant to § 1124.13;

(b) A supply plant from which during any month not less than 30 percent of the total quantity of milk that is physically received at such plant from dairy farmers eligible to be producers pursuant to § 1124.12 (excluding milk received at such plant as diverted milk from another plant, which milk is classified in Class III under this order and is subject to the pricing and pooling provisions of this or another order issued pursuant to the Act) or diverted as producer milk to another plant pursuant to § 1124.13, is shipped in the form of a fluid milk product (except as filled milk) to a pool distributing plant or is a route disposition in the marketing area of fluid milk producets (except filled milk) processed and packaged at such plant; *Provided*, That:

(1) With respect to a supply plant operated by a cooperative association, the producer milk of its members which it caused to be delivered directly from their farms to pool distributing plants, shall for the purpose of this paragraph, be considered as a receipt at the cooperative's supply plant and a shipment from the supply plant to pool distributing plants;

(2) A plant which qualified as a pool plant pursuant to this paragraph in each month of September through February shall be a pool plant in each of the following months of March through August unless a written application is filed with the Market Administrator prior to the first day of any such month requesting that the plant be designated a nonpool plant for such month and each subsequent month through August during which it would not otherwise qualify as a pool plant; and

(3) For the purpose of this paragraph, the operations of two or more supply plants may be combined and considered as the operation of one plant if so requested in writing to the Market Administrator by the handler(s) operating such plants prior to the first day of the month for which such consideration is requested.

(c) The Director of the Dairy Division may reduce or increase up to 10 percentage points from the levels set forth therein the pool plant performance standards in paragraph (a) or (b) of this section, if the Director finds such revision is necessary to obtain needed shipments or to prevent uneconomic shipments. Before making such a finding, the Director shall investigate the need for revision either at the Director's own initiative or a the request of interested persons. If the investigation shows that a revision might be appropriate, the Director shall issue a notice stating that the revision is being considered and invite data, views, and arguments.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) A plant qualified pursuant to paragraph (a) of this section which also meets the pooling requirements of another Federal Order and from which, the Secretary determines, there is a greater quantity of route disposition during the month in such other Federal Order marketing area than in this marketing area, except that if such plant was subject to all the provisions of this part in the immediately preceding month it shall continue to be subject to all the provisions of this part until the fourth consecutive month in which a greater proportion of its route disposition is made in such other marketing area unless, notwithstanding the provisions of this paragraph, it is regulated under such other order;

(3) A plant qualified pursuant to paragraph (a) of this section which also meets the pooling requirements of another Federal order on the basis of route disposition in such other marketing area and from which, the Secretary determines, there is a greater quantity of route disposition in this marketing area than in such other marketing area but which plant maintains pooling status for the month under such other Federal order;

(4) A plant qualified pursuant to paragraph (b) of this section which also meets the pool plant requirements of another Federal order and from which greater shipments are made during the month to plants regulated under such other order than are made to plants regulated under this order;

(5) A distributing plant from which total route disposition (except filled milk) in the marketing area during the month averages 300 pounds or less per day; or

(6) That portion of a plant that is physically separated from the Grade A portion of such plant, is operated separately, and is not approved by any regulatory agency for the receiving, processing, or packaging of any fluid milk products for Grade A disposition.

§ 1124.8 Nonpool plant.

"Nonpool plant" means any plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which during the month an average of more than 300 pounds daily of fluid milk products is disposed of as route disposition in the marketing area.

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which fluid milk products are moved to a pool plant during the month.

(e) "Exempt distributing plant" means a plant, other than a pool supply plant or a regulated plant under another Federal order that meets all the requirements for status as a pool distributing plant except that its route disposition (exclusive of filled milk) in the marketing area in the month does not exceed an average of 300 pounds daily. For purposes of this paragraph, route disposition shall not include receipts from a transferor-plant pursuant to the proviso of § 1124.3(a).

§ 1124.9 Handler.

"Handler" means:

(a) The operator of one or more pool plants;

(b) Any cooperative association with respect to producer milk which it caused to be diverted for the account of such cooperative association to another plant or pursuant to § 1124.40(b)(3);

(c) Any cooperative association with respect to milk that it receives for its account from the farm of a producer for delivery to a pool plant of another handler in a tank truck owned and operated by, or under the control of, such cooperative association, unless both the cooperative association and the operator of the pool plant notify the market administrator prior to the time that such milk is delivered to the pool plant that the plant operator will be the handler for such milk and will purchase such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples. Milk for which the cooperative association is the handler pursuant to this paragraph shall be deemed to have been received by the cooperative association at the location of the pool plant to which such milk is delivered;

(d) Any person who operates a plant defined in § 1124.8 (a) through (e).

§ 1124.10 Producer-handler.

"Producer-handler" means a person who is engaged in the production of milk and also operates a plant from which during the month an average of more than 300 pounds daily of fluid milk products, except filled milk, is disposed of as route disposition within the marketing area and who has been so designated by the market administrator upon determination that all of the requirements of this section have been met, and that none of the conditions therein for cancellation of such designation exists. All designations shall remain in effect until canceled pursuant to paragraph (c) of this section. Any State institution shall be a producer-handler exempt from the provisions of this section and §§ 1124.30 and 1124.32 with respect to milk of its own production and receipts from pool plants processed or received for consumption in State institutions and with respect to movements of milk to or from a pool plant.

(a) *Requirements for designation.* (1) The producer-handler has and exercises (in its capacity as a handler) complete and exclusive control over the operation and management of a plant at which it handles and processes milk received from its milk production resources and facilities (designated as such pursuant to paragraph (b)(1) of this section), the operation and management of which are under the complete and exclusive control of the producer-handler (in its capacity as a dairy farmer).

(2) The producer-handler neither receives at its designated milk production resources and facilities nor receives, handles, processes or distributes at or through any of its milk handling, processing or distributing resources and facilities (designated as such pursuant to paragraph (b)(2) of this section) milk products for reconstitution into fluid milk products, or fluid milk products derived from any source other than (i) its designated milk production resources and facilities, (ii) pool plants within the limitation specified in paragraph (c)(2) of this section, or (iii) nonfat milk solids which are used to fortify fluid milk products.

(3) The producer-handler is neither directly nor indirectly associated with the business control or management of, nor has a financial interest in, another handler's operation; nor is any other handler so associated with the producer-handler's operation.

(4) Designation of any person as a producer-handler following a cancellation of its prior designation shall be preceded by performance in accordance with paragraphs (a) (1), (2), and (3) of this section for a period of 1 month.

(b) *Resources and facilities.* Designation of a person as a producer-handler shall include the determination and designation of the milk production, handling, processing and distributing resources and facilities, all of which shall be deemed to constitute an integrated operation, as follows:

(1) As milk production resources and facilities: All resources and facilities (milking herd(s), buildings housing such herd(s), and the land on which such buildings are located) used for the production of milk:

(i) Which are directly, indirectly or partially owned, operated or controlled by the producer-handler;

(ii) In which the producer-handler in any way has an interest including any contractual arrangement; and

(iii) Which are directly, indirectly or partially owned, operated or controlled by any partner or stockholder of the producer-handler. However, for purposes of this paragraph any such milk production resources and facilities which the producer-handler proves to the satisfaction of the market administrator do not constitute an actual or potential source of milk supply for the producer-handler's operation as such shall not be considered a part of the producer-handler's milk production resources and facilities; and

(2) As milk handling, processing and distributing resources and facilities: All resources and facilities (including store outlets) used for handling, processing and distribution any fluid milk product:

(i) Which are directly, indirectly or partially owned, operated or controlled by the producer-handler; or

(ii) In which the producer-handler in any way has an interest, including any contractual arrangement, or with respect to which the producer-handler directly or indirectly exercises any degree of management or control.

(c) *Cancellation.* The designation as a producer-handler shall be canceled under any of the conditions set forth in paragraphs (c)(1) and (2) of this section or upon determination by the market administrator that any of the requirements of paragraphs (a)(1),(2), and (3) of this section are not continuing to be met, such cancellation to be effective on the first day of the month following the month in which the requirements were not met, or the conditions for cancellations occurred.

(1) Milk from the designated milk production resources and facilities of the producer-handler is delivered in the name of another person as producer milk to another handler.

(2) The producer-handler handles fluid milk products derived from sources other than the designated milk production facilities and resources, with the exception of purchases from pool plants in the form of fluid milk products which do not exceed in the aggregate a daily average during the month of 100 pounds.

(d) *Public announcement.* The market administrator shall publicly announce the name, plant location and farm location(s) of person designate as producer-handlers, of those whose designations have been canceled and the effective dates of producers-handler status or loss of producer-handler status for each. Such announcements shall be controlling with respect to the accounting at plants of other handlers for fluid milk products received from any producer-handler.

(e) *Burden of establishing and maintaining producer-handler status.* The burden rests upon the handler who is designated as a producer-handler to establish through records required pursuant to § 1000.5 of this chapter that the requirements set forth in paragraph (a) of this section have been and are continuing to be met, and that the conditions set forth in paragraph (c) of this section for cancellation of designation do not exist.

§ 1124.11 Cooperative reserve supply unit.

"Cooperative reserve supply unit" means any cooperative association or its agent that is a handler pursuant to § 1124.9(b) or (c) that does not own or operate a plant, if such cooperative has been qualified to receive payments pursuant to § 1124.73 and has been a handler of producer milk under this or its predecessor order(s) during each of the 12 previous months, and if a majority of the cooperative's member producers are located within 125 miles of a pool distributing plant. A cooperative reserve supply unit shall be subject to the following conditions:

(a) The cooperative shall file a request with the market administrator for cooperative reserve supply unit status at least 15 days prior to the first day of the month in which such status is desired to be effective. Once qualified as a cooperative reserve supply unit pursuant to this paragraph, such status shall continue to be effective unless the cooperative requests termination prior to the first day of the month that change of status is requested, or the cooperative fails to meet all of the conditions of this section;

(b) The cooperative reserve supply unit supplies fluid milk products to pool distributing plants located within 125 miles of a majority of the cooperative's member producers in compliance with any announcement by the market administrator requesting a minimum level of shipments as further provided below:

(1) The market administrator may require such supplies of bulk fluid milk from cooperative reserve supply units whenever the market administrator finds that milk supplies for Class I use at pool distributing plants are needed for plants defined in § 1124.7(a). Before making such a finding, the market administrator shall investigate the need for such shipments either on the market administrator's own initiative or at the request of interested persons. If the market administrator's investigation shows that such shipments might be appropriate, the market administrator shall issue a notice stating that a shipping announcement is being considered and inviting data, views and arguments with respect to the proposed shipping announcement.

(2) Failure of a cooperative reserve supply unit to comply with any announced shipping requirements, including making any significant change in the unit's marketing operation that the market administrator determines has the impact of evading or forcing such an announcement, shall result in immediate loss of cooperative reserve supply unit status until such time as the unit has been a handler pursuant to § 1124.9(b) and (c) for at least 12 consecutive months.

§ 1124.12 Producer.

(a) Except as provided in paragraph (b) of this section, "producer" means any persons who produces milk approved by a duly constituted regulatory agency for disposition as Grade A milk and whose milk is:

(1) Received at a pool plant directly from such person;

(2) Received by a handler described in § 1124.9(c); or

(3) Diverted in accordance with § 1124.13;

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by such person that is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1124.44(a)(9)(iii) and the corresponding step of § 1124(b);

(3) Any person with respect to milk produced by such person that is reported as diverted to an other order plant if any portion of such person's milk so moved is assigned to Class I under the provisions of such order;

(4) Any person who during the month has disposed of as route disposition or to consumers at the farm an average of more than 110 pounds daily of fluid milk or fluid cream products; and

(5) Any person (known as a dairy farmer for other markets) whose milk was received at a nonpool plant or a commercial food processing establishment during the month as other than producer milk under this or any other Federal milk order.

§ 1124.13 Producer milk.

"Producer milk" means the skim milk and butterfat in milk of a producer that is:

(a) Received or diverted by a handler defined in § 1124.9(a) under one of the following conditions:

(1) Received at such handler's pool plant directly from the farm of such producer;

(2) Received at such handler's plant from a handler defined in § 1124.9(c) for all purposes other than those specified in paragraph (b)(2)(i) of this section; and

(3) Diverted for the account of the operator of the pool plant, subject to the conditions set forth in paragraph (c) of this section.

(b) Received or diverted by a cooperative defined in § 1124.9 (b) or (c) under one of the following conditions:

(1) Milk diverted for the account of the cooperative association. Except for milk moved by a cooperative reserve supply unit defined in § 1124.11, such diversions shall be subject to the conditions set forth in paragrpah (c) of this section;

(2) Milk for which the cooperative association is a handler pursuant to § 1124.9(c) to the following extent:

(i) For purposes of reporting pursuant to §§ 1124.30(c) and 1124.31(a) and making payments to producers pursuant to § 1124.73(a); and

(ii) For all purposes, with respect to any such milk which is not delivered to the pool plant of another handler;

(c) The following conditions shall apply to diverted producer milk:

(1) A cooperative association or its agent may divert for its account the milk of any producer. The total quantity of milk diverted may not exceed 80 percent during the months of September through April of the total quantity of producer milk which the association or its agent causes to be delivered to pool distributing plants or diverted. No percentage limit shall apply during the months of May through August. The percentage limits on diversions specified in this paragraph shall not apply to a cooperative reserve supply unit defined in § 1124.11;

(2) A handler other than a cooperative association that operates a pool plant may divert milk for its account to other plants or pursuant to § 1124.40(b)(3). The total quantity of milk so diverted may not exceed 80 percent during the months of September through April of the milk received at such handler's pool plant or diverted by such handler from any producer other than a member of a cooperative association which markets milk under paragraph (c)(1) of this section and for which the operator of such plant is the handler during the month. No percentage limit shall apply during the months of May through August;

(3) Milk diverted in excess of the limits specified shall not be considered producer milk, except for milk diverted by a cooperative reserve supply unit.

The diverting handler shall specify the producers whose milk is ineligible as producer milk. If a handler fails to designate such producers, producer milk status shall be forfeited with respect to all milk diverted by the handler during the month;

(4) Two or more cooperative associations may have their allowable diversions computed on the basis of their combined deliveries of producer milk which the associations cause to be delivered to pool plants or diverted during the month if each association has filed a request in writing with the market administrator on or before the first day of the month the agreement is to be effective. This request shall specify the basis for assigning overdiverted milk to the producer deliveries of each cooperative according to a method approved by the market administrator;

(5) Diverted milk shall be priced at the location of the plant or commercial food processing establishment to which diverted; and

(d) In the case of any bulk tank load of milk originating at farms and subsequently divided among plants, the proportion of the load received at each plant shall be prorated among the individual producers involved on the basis of their respective percentage of the total load.

§ 1124.14 Other source milk.

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1124.40(b)(1) from any source other than producers, handlers described in § 1124.9(c), or pool plants;

(b) Receipts in packaged form from other plants of products specified in § 1124.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1124.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1124.40(b)(1)) for which the handler fails to establish a disposition.

§ 1124.15 Fluid milk product.

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form: milk, skim milk, lowfat milk, milk drinks, buttermilk, mixtures of cream and milk or skim milk containing less than 15 percent butterfat (including those which are sterilized or aseptically packaged), filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use and milk or milk products (including filled milk) that are sterilized and packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

§ 1124.16 Fluid cream product.

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 15 percent or more butterfat, with or without the addition of other ingredients.

§ 1124.17 Filled milk.

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product; and contains less than 6 percent nonmilk fat (or oil).

§ 1124.18 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers, which the Secretary determines, after application by the cooperative association:

(a) To be qualified under the provisions of the Act of Congress of February 18, 1922, known as the "Capper-Volstead Act", and any amendments thereto;

(b) To have full authority in the sale of milk of its members and to be engaged in making collective sales of or marketing milk for its members; and

(c) To have its entire activities under the control of its members.

§ 1124.19 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1124.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A

work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday, except national holidays.

Handler Reports

§ 1124.30 Reports of receipts and utilization.

On or before the 9th day of each month each handler shall report to the market administrator, in the detail and on forms prescribed by the market administrator, the following information for the preceding month:

(a) Each handler operating a pool plant(s) shall report separately for each pool plant:

(1) The quantities of skim milk and butterfat contained in:

(i) Milk received directly from producers, showing separately any milk of own-farm production;

(ii) Milk received from a cooperative association pursuant to § 1124.9(c);

(iii) Fluid milk products and bulk fluid cream products received from other pool plants showing filled milk separately;

(iv) Other source milk showing filled milk separately; and

(v) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1124.40(b)(1).

(2) The utilization of all skim milk and butterfat required to be reported, including separate statements of quantities in route disposition inside and outside the marketing area.

(b) Each producer-handler shall report:

(1) The quantities of skim milk and butterfat contained in:

(i) Milk of own-farm production;

(ii) Receipts of fluid milk products and fluid cream products from pool plants, showing separately receipts in packaged form and in bulk; and

(iii) Other source milk, showing separately any receipts from another dairy farmer.

(2) As specified in paragraph (a)(2) of this section.

(c) Each cooperative association shall report with respect to milk for which it is the handler pursuant to either § 1124.9 (b) or (c):

(1) The quantities of skim milk and butterfat received from producers;

(2) The utilization of skim milk and butterfat for which it is the handler pursuant to § 1124.9(b); and

(3) The quantities of skim milk and butterfat delivered to each pool plant pursuant to § 1124.9(c).

(d) Each handler who operates a partially regulated distributing plant shall report as specified in paragraphs (a)(1) and (2) of this section except that receipts from dairy farmers in Grade A milk shall be reported in lieu of those in producer milk. Such report shall include separate statements, respectively, showing the respective amounts of skim milk and butterfat disposed of as route disposition in the marketing area as Class I milk and the quantity of reconstituted skim milk in fluid milk products disposed of as route disposition in the marketing area.

(e) Each handler who operates an other order plant with route disposition of fluid milk products in the marketing area shall report the quantities of skim milk and butterfat in such disposition.

(f) Each handler who operates an exempt plant or an unregulated supply plant shall report as specified in paragraphs (a)(1) and (2) of this section except that receipts from dairy farmers in Grade A milk shall be reported in lieu of those in producer milk.

§ 1123.31 Payroll reports.

On or before the 22nd day of each month handlers shall report to the market administrator as follows:

(a) Each handler with respect to each of its pool plants and each cooperative association which is a handler pursuant to § 1124.9 (b) or (c) shall submit its producer payroll for deliveries (other than own-farm production) in the preceding month which shall show:

(1) The total pounds of milk received from each producer, the pounds of butterfat contained in such milk, and the number of days on which milk was delivered by such producer in such month;

(2) The amount of payment to each producer and cooperative association; and

(3) The nature and amount of any deductions or charges involved in such payments; and

(b) Each handler operating a partially regulated distributing plant who wishes computations pursuant to § 1124.76(a) to be considered in the computation of its obligation pursuant to § 1124.76 shall submit its payroll for deliveries of Grade A milk by dairy farmers which shall show:

(1) The total pounds of milk and the butterfat content thereof received from each dairy farmer;

(2) The amount of payment to each dairy farmer (or to a cooperative association on behalf of such dairy farmer); and

(3) The nature and amount of any deductions or charges involved in such payments.

§ 1124.32 Other reports.

At such time and in such manner as the market administrator may prescribe, each handler shall report to the market administrator such information in addition to that required under §§ 1124.30 and 1124.31 as may be requested by the market administrator with respect to milk and milk products (including filled milk) handled by the handler.

Classification of Milk

§ 1124.40 Classes of utilization.

Except as provided in § 1124.42 all skim milk and butterfat required to be reported by a handler pursuant to § 1124.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section;

(2) In packaged inventory of fluid milk products at the end of the month; and

(3) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more non-milk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In all bulk fluid milk products and bulk fluid cream products disposed of or diverted to any commercial food processing establishment, subject to the conditions of § 1124.42(e), at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products

other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cotton cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk fluid form other than that specified in paragraph (c)(1)(iv) of this section.

(iv) Plastic cream, frozen cream and anhydrous milkfat.

(v) Custards, puddings, and pancake mixes;

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers; and

(vii) Any milk or milk products sterilized and packaged in hermetically sealed metal or glass containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Any concentrated milk product in bulk fluid form that is used to produce a Class III product;

(v) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(vi) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1124.15; and

(6) In shrinkage assigned pursuant to § 1125.41(a) to the receipts specified in § 1124.41(a)(2) and in shrinkage specified in § 1124.41 (b) and (c).

§ 1124.41 Shrinkage.

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1124.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraphs (b)(1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraphs (b)(1) through (6) of this section which was received in the form of a bulk fluid milk product or a bulk fluid cream product.

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant or pursuant to § 1124.40(b)(3) and milk received from a handler described in § 1124.9(c));

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1124.9(c) and in milk diverted to such plant by the operator of another pool plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted by the plant operator to another plant or pursuant to § 1124.40(b)(3), except that if the operator of the plant or establishment to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operator of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraphs (b) (1), (2), (4), (5), and (6) of this section.

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1124.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of a plant or a commerical food processing establishment pursuant to § 1124.40(b)(3) to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

§ 1124.42 Classification of transfers and diversions.

(a) *Transfers and diversions to pool plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. The classification of such transfers and diversions shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the receiving handler's plant after the computation pursuant to § 1124.44(a)(13) and the corresponding step of § 1124.44(b);

(2) If the transferor-plant or divertor-plant received during the month other source milk to be allocated pursuant to § 1124.44(a)(8) or the corresponding step of § 1124.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler or divertor-handler received during the month other source milk to be allocated pursuant to § 1123.44(a) (12) or (13) or the corresponding steps of § 1124.44(b), the skim milk or butterfat so transferred or diverted up to the total of the skim

milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant or divertee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b) (1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustments when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class II milk; and

(6) If the form in which any fluid milk product that is transferred to another order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1124.40.

(c) *Transfers and diversions to producer-handlers.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a producer-handler under this or any other Federal order shall be classified:

(1) As Class I milk is transferred or diverted in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the transferee's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to the transferee's receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not another order plant or a producer-handler plant shall be classified:

(12) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraphs (d)(2)(i) (A) and (B) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraphs (d)(2) (ii) through (viii) of this section:

(A) The transferor-handler or divertor-handler claims such classification in its report of receipts and utilization filed pursuant to § 1124.30 for the month within which such transaction occurred; and

(B) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(A) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(B) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(C) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(D) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(A) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(B) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(A) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(B) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this paragraph, any fluid milk products and

VOL 53 ISS 234 DE 6 1988 UMI

bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this paragraph.

(e) *Transfers and diversions to a commercial food processing establishment.* Skim milk and butterfat transferred or diverted to a commercial food processing establishment shall be classified:

(1) Subject to the provisions of § 1124.13(c) and, except as provided in paragraph (e)(2) of this section, as Class II milk; or

(2) Transfers of diversions shall be classified as Class I milk unless the market administrator is permitted to audit the records of the commercial food processing establishment for the purpose of verification.

§ 1124.43 General classification rules.

In determining the classification of producer milk pursuant to § 1124.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1124.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1124.9(b) or (c) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1124.40, 1124.41, and 1124.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids;

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1124.9(b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association; and

(d) For classification purposes, pursuant to §§ 1124.40 through 1124.45, butterfat in skim milk, either disposed of to others or used in the manufacture of milk products shall be accounted for at a butterfat content of 0.080 percent unless the handler has adequate records of the actual butterfat content of such skim milk.

§ 1124.44 Classification of producer milk.

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1124.9(a) for each of the handler's pool plants separately and of each handler described in § 1124.9(b) and (c) by allocating the handler's receipts of skim milk and butterfat to its utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1124.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(8)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the remaining pounds of skim milk in Class I the pounds of skim milk in packaged fluid milk products in inventory at the beginning of the month. This paragraph shall apply only if the pool plant was subject to the provisions of this paragraph or comparable provisions of another Federal milk order in the immediately preceding month;

(5) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1124.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1124.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This paragraph shall apply only if the pool plant was subject to the provisions of this paragraph or comparable provisions of another Federal milk order in the immediately preceding month;

(7) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to any product specified in § 1124.40(b) but not in excess of the pounds of skim milk remaining in Class II;

(8) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(6) of this section applies, packaged inventory at the beginning of the month of products specified in § 1124.40(b)(1) that was not subtracted pursuant to paragraphs (a)(5), (6), and (7) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products received or acquired for distribution from a producer-handler as defined under this or any other Federal Order;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section;

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant; and

(vii) Receipts of fluid milk products from a person described in § 1124.12(b)(5);

(9) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2) and (8)(v) of this section for which the handler requests a classification other than Class I, but not in excess of pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2), (8)(v), and (9)(i) of this section which are in excess of the pounds of skim milk determined pursuant to

paragraph (a)(9)(ii)(A) through (C) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount:

(A) Multiple by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler (excluding any duplication of Class I utilization resulting from reported Class I transfers between pool plants of the handler);

(B) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(8)(vi) of this section; and

(C) Multiply any plus quantity resulting above by the percentages that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant are of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(3)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(10) Subtract from the pounds of skim milk remaining in each class, in series, beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1124.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(4), (6), and (8)(i) of this section;

(11) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(12) Subject to the provisions of paragraphs (a)(12) (i) and (ii) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler), with the quantity pro rated, to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2), (6)(v), (9)(i), and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unreglated supply plant from which fluid milk products to be allocated at this step were received;

(i) Should the pounds of skim milk to be subtracted from Class II and Class III combined pursuant to this paragraph exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(ii) Should the pounds of skim milk to be subtracted from Class I pursuant to this paragraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount, beginning with the nearest plant at which Class I utilization is available;

(13) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraphs (a)(8)(vi) and (9)(iii) of this section:

(i) Subject to the provisions of paragraphs (a)(13) (ii), (iii), and (iv) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(A) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1124.45(a); or

(B) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler);

(ii) Should the proration pursuant to paragraph (a)(13)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received;

(iii) Except as provided in paragraph (a)(13)(ii) of this section, should the computations pursuant to paragraph (a)(13) (i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class II and Class III combined that exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plant(s) shall be adjusted in the reverse direction by a like amount; and

(iv) Except as provided in paragraph (a)(13)(ii) of this section, should the computations pursuant to paragraph

(a)(13) (i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class I that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount beginning with the nearest plant at which Class I utilization is available;

(14) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1124.42(a); and

(15) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to paragraph (a)(15) of this section and the corresponding step of paragraph (b) of this section.

§ 1124.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1124.44(a)(13) and the corresponding step of § 1124.44(b), estimate ane publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such recepts are allocated pursuant to § 1124.44 on the basis of such report, and thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 14th day after the end of each month, report to each cooperative association which so requests the amount and class utilization of producer milk delivered by members of such cooperative association to each handler receiving such milk. For the purpose of this report the milk so received shall be prorated to each class in accordance with the total utilization of producer milk by such handler.

Class Prices

§ 1124.50 Class prices.

Subject to the provisions of § 1124.52, the class prices for the month, per hundredweight of milk, shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.90.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price. If the Class III price for the month is computed pursuant to paragraphs (c) (1) through (3) of this section, the final Class II price shall be reduced by the amount that the Class III price is less than the basic formula price to the extent such reduction does not cause the Class II price to be less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1124.51 and add 25 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1124.51a.

(c) *Class III price.* The Class III price shall be the basic formula price for the month but not to exceed the price computed as follows:

(1) Multiply the Chicago butter price pursuant to § 1124.51 by 4.2;

(2) Multiply by 8.2 the weighted average of carlot prices per pound for nonfat dry milk solids, spray process, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department; and

(3) From the sum of the results arrived at under paragraph (c) (1) and (2) of this section subtract 48 cents and round to the nearest cent.

§ 1124.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) if Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

§ 1124.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1124.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight or milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1124.19 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following paragraphs is of the total of the data represented in paragraphs (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with relative proportions of milk determined pursuant to paragraph (c) of this section.

§ 1124.52 Plant location adjustments for handlers.

(a) The following zones are defined for the purpose of determining location adjustments:

(1) Zone 1 shall include:

(i) The Idaho counties of Benewah, Bonner, Boundary, Kootenai, Latah and Shoshone;

(ii) The Oregon counties of Benton, Clackamas, Clatsop, Columbia, Douglas, Hood River, Lane, Lincoln, Linn, Marion, Multnomah, Polk, Tillamook, Washington and Yamhill;

(iii) The Washington counties of Clark, Cowlitz, Ferry, Grays Harbor, Island, King, Kitsap, Lewis, Lincoln, Mason, Pacific, Pend Oreille, Pierce, Skagit, Snohomish, Skamania, Spokane, Stevens, Thurston, Wahkiakum, and Whitman.

(2) Zone 2 shall include: the Washington county of Whatcom.

(3) Zone 3 shall include: the Oregon counties of Coos, Jackson, and Josephine;

(4) Zone 4 shall include:

(i) The Idaho counties of Lewis and Nez Perce;

(ii) The Oregon counties of Crook, Deschutes, Gilliam, Jefferson, Klamath, Lake, Morrow, Sherman, Umatila, Wallowa, Wasco and Wheeler;

(iii) The Washington counties of Adams, Asotin, Benton, Chelan, Callam, Columbia, Douglas, Franklin, Garfield, Grant, Jefferson, Kittitas, Klickitat, Okanogan, San Juan, Walla Walla and Yakima.

(b) For milk received at a plant from producers and which is classified as Class I milk, the price specified in § 1124.50(a) shall be adjusted by the amount stated in paragraphs (b) (1) and (2) of this section for the location of such plant:

(1) For a plant located within one of the zones described in paragraphs (a) (1) through (4) of this section, the adjustment shall be as follows:

	Adjustment per hundredweight
Zone 1	No adjustment.
Zone 2	Minus 6 cents.
Zone 3	Minus 8 cents.
Zone 4	Minus 15 cents.

(2) For a plant located outside of one of the zones described in paragraphs (a) (1) through (4) of this section, the adjustment shall be minus 1.5 cents per hundredweight for each 10 miles or fraction thereof by shortest hard-surfaced highway distance that the plant is located from the nearer of the county courthouse in Spokane, Washington, the Multnomah County Courthouse in Portland, Oregon, or the city hall in Eugene, Oregon;

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (b) of this section, except that the price when adjusted for location shall not be less than the Class III price.

(d) For fluid milk products transferred in bulk from a pool plant to another pool plant at which a higher Class I price applies and which is classified as Class I, the price shall be the Class I price applicable at the location of the transferee-plant subject to a location adjustment credit for the transferor-plant determined by the market administrator as follows:

(1) Subtract from the pounds of Class I remaining at the transferee-plant after the computations pursuant to § 1124.44 (a)(13) and (b) the pounds of packaged fluid milk products from other pool plants;

(2) Subtract the pounds of bulk fluid milk products received at the transferee-plant form the following sources:

(i) Producers;

(ii) Handlers described in § 1124.9(c); and

(iii) Pool plants at which the same or a higher Class I price applies.

(3) Assign any pounds remaining to transferor-plants in sequence beginning with the plant at which the least adjustment would apply; and

(4) Multiply the pounds so computed for each transferor-plant by the difference in the Class I prices applicable at the transferee-plant and transferor-plant.

§ 1124.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

§ 1124.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the pricing constituent that is required.

Uniform Price

§ 1124.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of its pool plants and of each handler described in § 1124.9 (b) and (c) with respect to milk that was not received at a pool plant as follows:

(a) Multiply the quantity of producer milk in each class, as computed pursuant to § 1124.44(c), by the applicable class prices (adjusted pursuant to § 1124.52) and add together the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage deducted from each class pursuant to § 1124.44(a)(15) and the corresponding step of § 1124.44(b) by the class prices applicable at the location of the pool plant, as adjusted by the butterfat differential specified in § 1124.74. In case overage occurs in a nonpool plant located on the same premises as a pool plant, such overage shall be prorated between the quantity transferred from the pool plant and other source milk in such nonpool plant. In such case, add an amount equal to the value of overage prorated to the quantity transferred to the nonpool plant at the class price applicable at the pool plant.

(c) Add an amount equal to the difference between the value at the Class I price applicable at the pool plant and the value at the Class III price, with respect to skim milk and butterfat in other source milk subtracted from Class I pursuant to § 1124.44(a)(8) (i) through (iv) and (vii) and the corresponding step of § 1124.44(b) excluding receipts of bulk fluid cream products from another order plant;

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1124.44(a)(8) (v) and (vi) and the corresponding step of § 1124.44(b);

(e) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price adjusted pursuant to § 1124.52, or the Class II price as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1124.44(a)(10) and the corresponding step of § 1124.44(b);

(f) Add an amount equal to the value at the Class I price, adjusted for location of the nearest nonpool plant(s) from which an equivalent volume was received, with respect to skim milk and butterfat subtracted from Class I pursuant to § 1124.44(a)(12) and the corresponding step of § 1124.44(b), excluding such skim milk or butterfat in bulk receipts of fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by a handler fully regulated under this or any other order issued pursuant to the Act is classified and priced as Class I milk and is not used as an offset on any payment obligation under this or any other order; and

(g) Add or subtract as the case may be, the amount necessary to correct errors as disclosed by the verification of reports of such handler of the handler's receipts and utilization of skim milk and butterfat in previous months for which payment has not been made.

§ 1124.61 Computation of uniform price.

For each month the market administrator shall compute the "uniform price" per hundredweight for milk of 3.5 percent butterfat content received from producers as follows:

(a) Combine into one total the values computed pursuant to § 1124.60 for all handlers who filed the reports prescribed by § 1124.30 for the month and who made the payments pursuant to § 1124.71 for the preceding month;

(b) Add the aggregate of all minus location adjustments computed pursuant to § 1124.75;

(c) Add an amount equal to not less than one-half of the unobligated balance in the produce-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1124.60(f); and

(e) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "uniform price" for milk received from producers.

§ 1124.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 14th day after the end of each month the uniform price for such month.

Payments for Milk

§ 1124.70 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund," into which shall be deposited all payments made by handlers pursuant to §§ 1124.71 and 1124.76 and out of which shall be made all payments to handlers pursuant to § 1124.72. However, the market administrator shall offset the payment due to a handler from such fund against payments due from such handler.

§ 1124.71 Payments to the producer-settlement fund.

(a) On or before the 16th day after the end of the month during which the skim milk and butterfat were received each handler shall pay to the market administrator the amount, if any, by which the total amount specified in paragraph (a)(1) of this section exceeds the total amount specified in paragraph (a)(2) of this section:

(1) The sum of:

(i) The total value of milk of the handler for such month as determined pursuant to § 1124.60; and

(ii) For a cooperative association handler, the amount due from other handlers pursuant to § 1124.73(d) but without adjustment for butterfat;

(2) The sum of:

(i) The value of milk received by such handler from producers at the applicable uniform price pursuant to § 1124.73(a)(2) but without adjustments for butterfat;

(ii) The amount to be paid to cooperative associations pursuant to § 1124.73(d) but without adjustment for butterfat; and

(iii) The value at the uniform price for all skim milk and butterfat applicable at the location of the plant(s) from which received (not to be less than the value at the Class III price) with respect to other source milk for which a value is computed pursuant to § 1124.60(f); and

(b) On or before the 25th day after the end of the month, each handler operating a plant specified in § 1124.7(d) (2) and (3), if such plant is subject to the classification and pricing provisions of another order which provides for individual handler pooling, shall pay to the market administrator for the producer-settlement fund an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk disposed of as route disposition in the marketing area which was allocated to Class I at such other order plant. If reconstituted skim milk in filled milk is disposed of from such plant as route disposition in the marketing areas regulated by two or more market pool orders, the reconstituted skim milk assigned to Class I shall be prorated

according to such disposition in each area.

(2) Compute the value of the quantity assigned in paragraph (b)(1) of this section to Class I disposition in this area, at the Class I price under this part applicable at the location of the other order plant (but not to be less than the Class III price) and subtract its value at the Class III price.

§ 1124.72 Payments from the producer-settlement fund.

On or before the 18th day after the end of the month during which the skim milk and butterfat were received, the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1124.71(a)(2) exceeds the amount computed pursuant to § 1124.71(a)(1), and less any unpaid obligations of such handler to the market administrator pursuant to §§ 1124.71(a), 1124.77, 1124.85, and 1124.86. However, if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available.

§ 1124.73 Payments to producers and to cooperative associations.

(a) Each handler shall make payments to each producer for milk received from such producer during the month:

(1) On or before the last day of the month to each producer who had not discontinued shipping milk to such handler before the 18th day of the month, at not less than the Class III price for the preceding month per hundredweight of milk received during the first 15 days of the month, less proper deductions authorized in writing by such producer; and

(2) On or before the 19th day after the end of each month for milk received from such producers during such month:

(i) At not less than the uniform price for the quantity of milk received, adjusted by the butterfat differential pursuant to § 1124.74 and by any location adjustments applicable under § 1124.75;

(ii) Minus payments made pursuant to paragraph (a)(1) of this section. However, if by such date such handler has not received full payment for such month pursuant to § 1124.72, the handler shall not be deemed to be in violation of this paragraph if the handler reduced uniformly for all producers the payments per hundredweight pursuant to this paragraph by a total amount not in excess of the reduction in payment from the Market Administrator; however, the handler shall make such balance of payment uniformly to those producers to whom it is due on or before the date for making payments pursuant to this paragraph next following that on which such balance of payments is received from the market administrator.

(b) The payments required in paragraph (a) of this section shall be made, upon request, to a cooperative association qualified under § 1124.18, or its duly authorized agent, with respect to milk received from each producer who has given such association authorization by contract or by other written instrument to collect the proceeds from the sale of the producer's milk, and any payment made pursuant to this paragraph shall be made on or before 2 days prior to the dates specified in paragraph (a) of this section.

(c) Each handler shall pay to each cooperative association or its duly authorized agent which operates a pool plant for skim milk and butterfat received from such plant:

(1) On or before the 2nd day prior to the date specified in paragraph (a)(1) of this section for skim milk and butterfat received during the first 15 days of that month at not less than the Class III price for the preceding month; and

(2) On or before the 15th day after the end of such month, an amount of money computed by multiplying the total pounds of such skim milk and butterfat in each class pursuant to § 1124.42(a) by the class price adjusted by the butterfat differential and taking into account any location adjustments as provided by § 1124.52 applicable at the pool plant of the cooperative association or its agent, minus payment made pursuant to paragraph (c)(1) of this section.

(d) Each handler who received milk for which a cooperative association is the handler pursuant to § 1124.9(c) shall pay such cooperative association for such milk received:

(1) On or before the 2nd day prior to the date specified in paragraph (a)(1) of this section for such milk received during the first 15 days of that month at not less than the Class III price for the preceding month; and

(2) On or before the 17th day after the end of each month, for the milk received at not less than the uniform price for all milk adjusted pursuant to §§ 1124.74 and 1124.75(b), minus payments made pursuant to paragraph (d)(1) of this section.

(e) None of the provisions of this section shall be construed to restrict any cooperative association qualified under section 8c(5)(F) of the Act from making payment for milk to its producers in accordance with such provision of the Act.

(f) In making payments to producers pursuant to this section, each handler, on or before the 19th days of each month shall furnish each producer with a supporting statement in such form that it may be retained by the producer, which shall show for the preceding month:

(1) The identity of the handler and the producer;

(2) The total pounds of milk delivered by the producer and the average butterfat test thereof and the pounds per shipment if such information is not furnished to the producer each day of delivery;

(3) The minimum rate at which payment to the producer is required under the provisions of this section;

(4) The rate per hundredweight and amount of any premiums or payments above the minimum price provided by the order;

(5) The amount or rate per hundredweight of each deduction claimed by the handler, together with a description of the respective deductions; and

(6) The net amount of payment to the producer.

(g) In making payments to a cooperative association in aggregate pursuant to this section, each handler upon request shall furnish to the cooperative association, with respect to each producer for whom such payment is made, any or all of the above information specified in paragraph (f) of this section.

§ 1124.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago as reported by the Department for the month. § 1124.75 Plant location adjustments for producers and on nonpool milk.

(a) In making payment to producers pursuant to § 1124.73(a) subject to the application of § 1124.13(c)(5) appropriate adjustments shall be made per hundredweight of milk received from producers at respective plant locations at the same rate as specified for Class I milk set forth in § 1124.52.

(b) In making payments to a cooperative association pursuant to § 1124.73(d) appropriate adjustments shall be made at the rates specified for Class I milk in § 1124.52 for the location

of the plant at which the milk was received from the cooperative association.

(c) For purposes of computations pursuant to §§ 1124.71(a) and 1124.72 the uniform price for all milk shall be adjusted at the rates set forth in § 1124.52 for Class I milk applicable at the location of the nonpool plant from which the milk or filled milk was received, except that the adjusted uniform price shall not be less than the Class III price.

§ 1124.76 Payments by a handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay to the market administrator for the producer-settlement fund on or before the 25th day after the end of the month either of the amounts (at the handler's election) calculated pursuant to paragraph (a) or (b) of this section. If the handler fails to report pursuant to §§ 1124.30(d) and 1124.31(b) the information necessary to compute the amount specified in paragraph (a) of this section, the handler shall pay the amount computed pursuant to paragraph (b) of this section:

(a) An amount computed as follows:

(1)(i) The obligation that would have been computed pursuant to § 1124.60 at such plant shall be determined as though such plant were a pool plant. For purposes of such computation, receipts at such nonpool plant from a pool plant or an other order plant shall be assigned to the utilization at which classified at the pool plant or other order plant and transfers from such nonpool plant to a pool plant or an other order plant shall be classified as Class II or Class III milk if allocated to such class at the pool plant or other order plant and be valued at the uniform price of the respective order if so allocated to Class I milk, except that reconstituted skim milk in filled milk shall be valued at the Class III price. No obligation shall apply to Class I milk transferred to a pool plant or an other order plant if such Class I utilization is assigned to receipts at the partially regulated distributing plant from pool plants and other order plants at which an equivalent amount of milk was classified and priced as Class I milk. There shall be included in the obligation so computed a charge in the amount specified in § 1124.60(f) and a credit in the amount specified in § 124.71(a)(2)(iii) with respect to receipts from an unregulated supply plant, except that the credit for receipts of reconstituted skim milk in filled milk shall be at the Class III price, unless an obligation with respect to such plant is computed as specified in paragraph (a)(1)(ii) of this section; and

(ii) If the operator of the partially regulated distributing plant so requests, and provides with reports filed pursuant to §§ 1124.30(d) and 1124.31(b) similar reports with respect to the operations of any other nonpool plant which serves as a supply plant for such partially regulated distributing plant by shipments to such plant during the month equivalent to the requirements of § 1124.7(b), with agreement of the operator of such plant that the market administrator may examine the books and records of such plant for purposes of verification of such reports, there will be added the amount of the obligation computed at such nonpool supply plant in the same manner and subject to the same conditions as for the partially regulated distributing plant.

(2) From this obligation there will be deducted the sum of:

(i) The gross payments made by such handler for Grade A milk received during the month from dairy farmers at such plant adjusted to a 3.5 percent butterfat basis by the butterfat differential pursuant to § 1124.74, and like payments made by the operator of a supply plant(s) included in the computations pursuant to paragraph (a)(1) of this section; and

(ii) Any payments to the producer-settlement fund of an other order under which such plant is also a partially regulated distributing plant.

(b) An amount computed as follows:

(1) Determine the respective amounts of skim milk and butterfat disposed of as route disposition of Class I milk within the maketing area;

(2) Deduct the respective amount of skim milk and butterfat received at the plant:

(i) As Class I milk from pool plants and other order plants, except that deducted under a similar provision of another order issued pursuant to the Act; and

(ii) From a nonpool plant that is not an other order plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such nonpool plant by handlers fully regulated under this or any other order issued pursuant to the Act is classified and priced as Class I milk and is not used as an offset on any payment obligation under this or any other order;

(3) Deduct the quantity of reconstituted skim milk in fluid milk products disposed of as route disposition in the marketing area;

(4) From the value of such milk at the Class I price applicable at the location of the nonpool plant, subtract its value at the uniform price applicable at such location (not to be less than the Class III price), and add for the quantity of reconstituted skim milk specified in paragraph (b)(3) of this section its value computed at the Class I price applicable at the location of the nonpool plant (but not to be less than the Class III price) less the value of such skim milk at the Class III price.

§ 1124.77 Adjustment of accounts.

Whenever verification by the market administrator of reports or payments of any handler discloses errors resulting in money due:

(a) The market administrator from such handler;

(b) Such handler from the market administrator; or

(c) Any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which such error occurred following the 5th day after such notice.

§ 1124.78 Charges on Overdue Accounts.

(a) Any unpaid obligation of a handler pursuant to §§ 1124.71, 1124.76, 1124.77, 1124.85 or § 1124.86 shall be increased 1 percent beginning on the first day after the due date, and on each date of subsequent months following the day on which such type of obligation is normally due, subject to the following conditions:
